Trains 1 and 2 run daily. Train 3 runs Mondays, Wednesdays and Fridays. Train 4 runs Tuesdays, Thursdays and Saturdays.

Passenger trains make close connections Mound House with express trains of V. & R. R., which connect at Reno with east west-bound trains of Central Pacific Rai

—o—

STAGE CONNECTIONS.

At Hawthorne, with U. S. Stage Company, daily coaches for Aurora, 26 miles: Bodie, 35 miles, and for Lundy and Bridgeport.

At Luning, 125 miles from Mound House with Gilmer, Salisbury & Co's tri-weekly stages, leaving Tuesday's Thursdays and Saturdays, at 8.00 a. m., for Downeyville, Grantsville, etc.

At Candelaria, with U. S. Stage Company's stages from Columbus, Silver Peak, Montezuma, Alida Valley, Gold Mountain, etc.

At Keeler, with stages from Cerro Gordo, 6 miles, Darwin, 22 miles, and Panamint.

This road has a first class equipment, is opening up new and most promising mining districts, farming and grazing valleys. West of Owens River Valley the Sierra Nevadas rise rapidly to an imposing height and are easy of access. A trip to Mt. Whitney, the "Nose" of the Sierras, and to the cataracts and great canyons of the south fork of Kings river, offers to the tourist a new and unsurpassed region—one soon to become famous

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

Observer.

*Record beginning March 6th 1898.

Methodist Church.

Services for Sunday, April 23rd, Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m. The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

FRIDAY, Apr. 14, 1899.

William Richey vs. James Pruett et al—Trial of case set for May 16, 1899.

TUESDAY, April 18, 1899.

Estate of John A. Hannah, deceased—Petition granted for partial distribution of estate.

The locust trees are in full bloom.

J. G. Dodge is up from Lone Pine today.

Arthur Sutherland came in from Ballarat last Monday.

Mrs. S. E. Vermilyea and her little daughter are at Bishop.

J. C. Crocker of Big Pine was in town a couple of days this week.

Sanger & Danielson are shipping thirty tons of lead ore to Selby's.

Assessor Yandell got back last Tuesday from a trip to Ballarat.

P. H. Mack Esq., returned from a trip to Sacramento last Wednesday.

A few bands of sheep have come up over the desert, but not many are expected.

Miss Travers came down from Round Valley last Monday and is visiting with friends at Camp Independence.

Robert O'Neal Esq. and Archie Fitzgerald came down from Bishop Wednesday, returning yesterday morning.

S. W. Austin returned home from Los Angeles last Tuesday. Mrs. Austin will remain some time for medical treatment.

P. J. Feely, a commercial traveler well known in this section, met with a bad accident in a stage wreck up north last week.

Hunter & Spear are packing about twenty tons of high grade ore to the arastras in Hunters Canyon and will start up next week.

Regular meeting of Inyo Lodge No. 221, F. & A. M. to-morrow evening. A full attendance of members is earnestly requested.

It is reported that Gibson is meeting with heavy losses in moving out his cattle. He left twenty head between Olancha and Little Lake.

E. Robinson is building a very expensive and durable stone ditch about half a mile in length to carry water to his ranch across the sand wash south of town.

Joe Rogers accidentally poisoned himself with ammonia at Darwin last Monday. He was brought to Keeler and Dr. Woodin telegraphed for. The doctor says he is out of danger.

John Baxter sent a four-horse load of supplies to Coso on Tuesday. He is part owner of what promises to be a valuable mine there. The vein is small, but it assays over $2,000 a ton in gold.

Dave Holland and his partners have a fine prospect at Beveridge. They have out and ready for milling several tons of ore will yield over $200 a ton, and the vein is improving as work progresses.

A Favored Country.

L. Case, T. J. Richards and H. H. Howell came down from Bishop yesterday and made final proof on their homesteads to-day. Mr. Case called upon us this morning and in the course of conversation emphasized what we have so often stated: that the people of this section, taken as a whole, are better situated than those of any other part of California. Poverty and distress is entirely unknown. What few indigents we have are old people unable to work, and these are very well cared for. We have beyond all question the best watered valley on the Coast. Mr. Case states that there is far more water at Bishop than can be used. There is an absolute certainty of crops every year. A crop failure never has and never will be known in this valley. There are very few mortgages on farm property, and all our farmers are in good condition financially. It only needs a trip through other parts of the State to understand and appreciate how well we are situated.

Unbounded Wealth

The mining excitement in this vicinity continues unabated. Julius Schroeder brought down some average samples of ore from the Barnes & Anderson mine and from a piece of white quartz weighing one and one-half ounces, which showed no free gold, he horned out 40 cents worth of gold. There is much of the rock which carries masses of free gold. The owners have a good trail to the mine, and twelve tons of ore are broken and sorted and ready for shipment. A great deal of it will carry $10,000 a ton gold. There is a shaft down about eight feet, the ledge is three feet wide, and the ore is apparently richer in the bottom. It is no doubt the richest strike made in California for many years. The croppings have been sampled for 600 feet, and it all prospects as well as the croppings at the point where the shaft is sunk. It seems incredible that such values should exist but it is true. The owners are not excited, though they have practically unlimited wealth in sight. Johnson & McGinnis have their trail about completed. They have been putting all their time in on it, and consequently no further work has been done at the mine. All agree that this is as good a prospect as the Barnes and Anderson. They have a shaft down ten feet and the ledge has been crosscut for twelve feet and it samples $38 per ton. A large amount of $100 ore can be sorted for shipment. The ledge crops for several hundred feet on the surface and the pay seems evenly distributed. The vein lies in a contact with the true granite backbone of the Inyo Range and gneissoid granite, capped with lime. The owners will commence shipping ore at once and will push the work of development. It is understood reat neither property is for sale. And indeed they should not be, as the lucky owners have enough ore in sight to make them independent and they can ship ore enough to make the properties develop themselves. These wonderful strikes have started many other people prospecting, and new strikes may be reported at any time. Dave Holland and his partners have a three-foot ledge of $200 ore in the Gualupe mine at Beveridge and have a force of five men at work taking out and sacking ore. There never was a time when the prospects of this section looked as good as at present. This is not nearly all. Within a few months two wealthy companies will have large plants operating on other mines near here of which nothing can be published at the present time. This is no dream—not a bit of it. The fact is that these strikes are so immensely rich that we do not half appreciate them.

Panamint Pointers

The Harrison and Godmark 10 stamp mill is now running in Pleasant Canyon. The company will soon put up a general merchandise store and expect to have a post office at old Pleasant City.

The Montgomery Bros. have sold the World Beater. A Bryan mill is going up at the foot of the dump which will crush a ton of ore an hour. There are 16,000 tons of ore blocked out.

There are about thirty men at work in the neighborhood of the stone corral and wood camp. Harrison & Godmark have 1,000 cords of wood cut and 1,000 more contracted for.

Anvil Springs, seventeen miles south of Ballarat, is a chlorider's camp, and twenty-five men are at work there. Two cash sales have been made there recently. The purchasers were Los Angeles people and the amounts paid were $2,500 to Al Lambert and $1,500 to Joe Tate.

T. H. Henebry expects to sell the Gem mine at Jail canyon.

The sale of the Oh Be Joyful mine at Tuber Canon is about completed. The buyers are Colorado capitalists, and they intend to put up a 10-stamp mill at once

Ballarat is having a building boom.

John King takes buggy rides now-a-days.

Weaver & Porter Bros. have put up a new residence. Mrs. Calloway has built an addition to her hotel. J. S. Stotler is putting up an adobe saloon. Hon. Judge Decker is laying the foundation for a new office. Chas. Cook is putting up an adobe building and feed corral.

The old man from Tuber has had his hands full attending the sick.

Billy Beauchamp is the fair haired boy now.

L. D. Porter has recovered from an attack of typhoid and has gone to Delano, his former home.

What will poor Pet do now?

L. H. Estep is dividing his time between his copper mines at Darwin and at Snow's Canyon.

Al Williams has tapped the ore chute on the Birdie claim at Tuber canyon and has twelve feet of ore that pays $12 a ton.

What is ths matter with Clair's not going up to the wood camp?

John Quinn, who has the cyanide plant at Montgomery's old camp, has worked successfully about 1,000 tons of tailings and has 1,500 tons yet to work.

Sam Conelly was found dead at the custom mill last Thursday morning.

Phil Ginser will have a run of 15 tons of ore from Mineral Hill which he expects will average $40.

J. Pruett and family from Mountain Spring have taken up their residence at Ballarat.

L. A. Smalley and wife started for Los Angeles last Friday. Mr. Smalley is convalescing from a spell of pneumonia.

Col. Woodward, Superintendent of the Johannesburg rail road, accompanied by Messrs. Stagg, Mead and Stebbins arrived at Ballarat last week, with a view to extending the railroad if the mining outlook will warrant it. They were favorably impressed with the mining prospects of the vicinity. JIM.

R. S. Miner Esq., arrived from Bridgeport last Friday evening and in company with A. F. Mairs started for Los Angeles last Monday. We are informed that the object of Mr. Miner's visit is to argue the case of Baxter vs. Gilbert in the Supreme Court.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending Mar. 31st, 1899

Respectfully submitted,
W. T. BUNNEY, County Treasurer.

Ordinance No. 67.

Providing for the Appointment of a County Stock Inspector defining his duties and powers and fixing his compensation.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows:

SECTION 1. The Board of Supervisors shall appoint a competent Veterinary Surgeon to act as Inspector of Live Stock for said County, to be known as County Stock Inspector, and to hold said office during the pleasure of said Board.

SECTION 2. It shall be the duty of such County Stock Inspector, upon the written request of any member of said Board of Supervisors, to examine any live stock in said county suspected of being affected with any contagious or infectious disease, and if he shall find such live stock, or any portion of it, to be affected with any contagious or infectious disease he shall at once notify the owner or the person in charge of such diseased livestock and the State Veterinarian of the State of California of such fact and while awaiting the action or instructions of the said State Veterinarian, he may, and he is hereby empowered, to take such steps as he shall deem necessary to prevent the spread of such contagious or infectious disease.

SECTION 3. The said County Stock Inspector shall be allowed and paid for his services as such Stock Inspector the sum of five dollars for each day actually and necessarily engaged in the discharge of his duties, and fifteen cents a mile actually traveled, in going only, when required, as hereinbefore specified, to go ten miles or more from his place of residence.

SECTION 4. This ordinance shall take effect and be in force fifteen days from and after its passage and shall be published with the names of the member of the Board of Supervisors voting for and against the same, in the Inyo Independent a newspaper published in the said County of Inyo, at least one week. Said publication to be made for said time and before the expiration of said fifteen days.

A. C. FREEMAN,
Chairman of the Board of Supervisors of the County of Inyo State of California.

{SEAL}

Attest: D. J. HESSION,
Clerk of said Board of Supervisors.

The above and foregoing ordinance No. 67 was duly passed, enacted and ordained by the Board of Supervisors of the County of Inyo, State of California, at a regular meeting of said Board, on the 6th day of April, 1899.

Ayes: N. J. Cooley, Jas. Jones, J. J. Stewart.

Noes: A. C. Freeman

A. C. FREEMAN,
Chairman of the Board of Supervisors of the County of Inyo, State of California.

{SEAL}

Attest: D. J. HESSION,
Clerk of said Board of Supervisors.

(Endorsed:)

ORDINANCE No. 67.

Filed Apr. 6, 1899.

D. J. HESSION,
Clerk.

Entered in Ordinance Book "B" at page — et seq.

ANNUAL MEETING.

The Regular Annual Meeting of the Stockholders of the Lone Pine Canal Company will be held at the office of the Company at Lone Pine on the last Saturday in April, April 29th, 1899, for the purpose of electing a Board of Directors to serve for the ensuing year, and the transaction of such other business as may come before the Meeting.

P. H. MACK, Secretary.

OUR NAVAL STATION AT SAN JUAN.

The new United States naval station to be located at San Juan, Porto Rico, will be of the utmost importance to this country as the key to the situation when the Nicaragua canal is constructed. The key to good health is Hostetter's Stomach Bitters. It guards the digestive organs from attacks of indigestion, biliousness and constipation, just the same as the new naval station at San Juan will ward off attacks upon this country by foreign foes.

The Kentucky colonol pressed the bottle eagerly to his mouth. It was empty and there was but the ghost of a smile on his lips.

TRY ALLEN'S FOOT-EASE,

A powder to be shaken into the shoes. At this season your feet feel swollen, nervous and uncomfortable. If you have smarting feet or tight shoes, try Allen's Foot-Ease. It rests and comforts; makes walking easy. Cures swollen and sweating feet, blisters and calous spots. Relieves corns and bunions of all pain and is a certain cure for Chilblains, Sweating, damp or frosted feet. We have over thirty thousand testimonials. Try it *to-day*. Sold by all druggists and shoe stores for 25c. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

"That reminds me," said the Uncommercial Traveler, "that dead men tell no tales, probably because of the similiarity of their point of view."

To Cure a Cold in One Day.

Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure, 25c.

A small town is called a hamlet, and maybe that is why when the Prince of Denmark was called Hamlet it made him melancholy.

They Work While You Sleep.

While your mind and body rest, Cascarets Candy Cathartic repair your digestion, your liver, your bowels, put them in perfect order. All druggists, 10c, 25c, 50c.

Probably the most marked feature in a newspaper office is the new contributor's copy.

FOR MEN ONLY.

DR. FOOTE & STAFF

161 ADAMS ST., CHICAGO.

Men requiring unsurpassed treatment should consult personally or by letter **"Free"** with the pioneer and only exclusive mens' specialists in United States. **Diseases of men** made the study of a lifetime. Unfortunates everywhere should immediately communicate with Dr. Foote of Chicago. Everything confidential. Remedies sent everywhere in sealed packages and letters in plain envelopes. Correspondence solicited. Latest **Surgical, Medical and Electrical** methods adopted. Deluging the stomach with drugs abandoned. Avoid drugs recommended by the un-authorized and self-styled specialists in Western towns; few genuine specialists locate out side of New York or Chicago. In these cities your private affairs are safe. Unequaled treatment for all diseases and weaknesses of the Genito-Urinary, Sexual, Reproductive and Nervous Systems. Impediments to marriage removed. **"Syphalin"** positively purifies the blood, cures syphilis and removes all white ulcers in the throat or mouth, copper colored spots on body and eruptions on skin, also catarrh and rheumatism. **"Vigoralin,"** the only permanent restorer and invigorator, gives vigor to vital organs and nerves, prevents and cures grip. $1 per bottle, 6 for $5. Trial bottles, either remedy, half price.

One of the oldest types of the new woman is the Ainu woman in Japan who tattoos her face to give her the appearance of men with whiskers.

No household is complete without a bottle of the famous Jesse Moore Whiskey. It is a pure and wholesome stimulant recommended by all physicians. Don't neglect this necessity.

The man who is master of himself has a servent that he can always depend upon.

When coming to San Francisco go to Brooklyn Hotel, 208-212 Bush street. American or European plan. Room and board $1.00 to $1.50 per day; rooms 50 cents to $1.00 per day; single meals 25 cents. Free coach. Chas. Montgomery.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Two bottles of Piso's Cure for Consumption cured me of a bad lung trouble.—Mrs. J. Nichols, Princeton, Ind., Mar. 26, 1895.

Difference Between Them.

"After all," said the bachelor, "the difference between love and dyspepsia is purely relative. It is a matter of time only. One is future and the other past."

"How do you mean?" asked the bewildered maid.

"The lover doesn't want to eat, and the dyspeptic wishes he hadn't," answered the bachelor, thereby thinking he had scored one on the sex that was continually disturbing his peace of mind.—Chicago Post.

"Only the First Step is Difficult."

The first step in Spring should be to cleanse Nature's house from Winter's accumulations. Hood's Sarsaparilla does this work easily. It is America's Greatest Spring Medicine. It purifies the blood, as millons of people say.

It makes the weak strong, as nervous men and women gladly testify. It cures all blood diseases, as thousands of cured voluntarily write. It is just the medicine for you, as you will gladly say after you have given it a fair trial.

Bad Blood—"Although past 70 years of age I am thoroughly well. It was three bottles of Hood's Sarsaparilla that made me so after spending over $60 in medical attendance. My trouble was a raw sore on my ankle." MRS. LOUISA MASON, Court Street, Lowell, Mass.

Running Sores—"After worrying four months I gave my children Hood's Sarsaparilla and it cured them of running sores. Hood's Pills cured me of dyspepsia and constipation." MRS. KATE E. THOMAS, 31 Governor Street, Annapolis, Md.

Consumptive Cough—"Five years ago I had a consumptive cough which reduced me to a skeleton. Was advised to take Hood' Sarsaparilla, which I did, and recovered normal health. I have been well ever since." MATILDA BRIDGEWATER, Cor. Pearl and Chestnut Sts., Jeffersonville, Ind.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills, the non-irritating and only cathartic to take with Hood's Sarsaparilla.

PISO'S CURE FOR CONSUMPTION. CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. 25 CTS.

MUSIC IN PORTO RICO.

The National Instrument, the Guira, Is Simple but Ingenious.

Like all other Spanish-speaking peoples, the Porto Ricans are fond of music. Every cafe has its orchestra, for a cafe could hardly do business without one. Every main street during the latter part of the day has its little itinerant band of guitar and violin players, and the warm nights are made pleasant to the strollers along the streets by the sound of stringed instruments which floats from behind the latticed, vine-clad screen of private residences.

Nearly all of the airs are pitched in a minor key, which, even when intended to be joyous, contains a plaint to the Angle-Saxon fond of Sousa's robust music. To one who has traveled in Spanish lands the music of Porto Rico at first seems very familiar, but the ear is not long in discovering something novel in the accompaniment to the melody.

It sounds at first like the rhythmical shuffle of feet upon sanded floor, and one might suppose some expert clog dancer was nimbly stepping to the music made by the violins and guitars. The motion is almost too quick, too complicated, for this, however, and it is the deftness of fingers, and not feet, which produces it.

It comes from the only musical instrument native to the West Indies, the "guira," which word is pronounced "huir-r-a," with a soft roll and twist to the tongue only possible to the native. The "guira" is a gourd varying in size in different instruments. On the inverse curve of the gourd are cut slits like those in the top of a violin. On the other side of the gourd opposite the holes is a series of deep scratches. The player balances the gourd in his left hand, holding it lightly that none of the resonance may be lost.

With the right hand he rapidly rubs this roughened side of the gourd with a two-tined steel fork. In the hands of a novice this produces nothing but a harsh, disagreeable noise. In the hands of a native "guira" player a wonderful rhythmic sound comes from this dried vegetable shell—a sound which, in its place in the orchestra, becomes music, and most certainly gives splendid time and considerable volume to the performance.

The player's hand moves with lightning rapidity. The steel fork at times makes long sweeps the whole length of the gourd, and then again vibrates with incredible swiftness over but an inch or two of its surface. There seems to be a perfect method in its playing, though no musical record is before the player, and it seems to be a matter purely of his fancy and his ear as to how his part shall harmonize with the melody of the stringed instruments.

The guira is found in all the West Indies, but seems especially popular in Porto Rico. The players generally make their own instruments, and apparently become attached to them, for as poor as these strolling players are they will hardly part with their guiras, even when offered ten times their real value. They are distinctly a Porto Rican curio, and, strange as it may seem, Porto Rico is probably more destitute of tourists' "loot" than any foreign country known to the traveling American. The tourist who can secure a guira may congratulate himself, for it will be hard to get, and is the very thing which can be carried away from the island as a souvenir which is distinctly native and peculiar.—Kansas City Star.

BATHS NOT HER SPECIALTY.

Hospital Patient Had Not Had One in Six Months.

This actually occurred in one of the hospitals in the city where a number of patients from the lower walks of life are brought for free treatment. One night the police ambulance brought a young woman who was suffering from a severe case of rheumatism. The first part of the treatment accorded patients is a thorough bath before they are placed between the clean sheets, and the unpleasant task of administering the scrub is a part of the duty of the probationers, as the nurses are called during the first six months of their training. The one who attempted the work in this case found a hopeless job on her hands, and after much vain labor she went to one of the older nurses for advice. It being a case of rheumatism, they disliked to risk putting her in a tub, but there seemed to be no help for it, so they soused her into the hot water and used soap, soda, alcohol and everything else the place afforded, and they rubbed, scrubbed and scoured with but little success. At last the elder nurse exclaimed: "I don't believe you ever had a bath before, did you?"

"Yes, I did," answered the patient in tones of indignation.

"When was it?"

"Just before I was married."

"How long ago was that?"

"A little over six months."—Chicago Chronicle.

Deductive Philosophy.

"I am quite certain that Edith intends to marry Tom."

"But they are not engaged, are they?"

"Not that I know of, but they go everywhere together. He never goes with another girl, and she never accepts attentions from another man."

"That is good as far as it goes, but is it enough to make one certain that she intends to marry him? Has she told you so?"

"Oh, no; she has not said a word about it to me, nor to anyone else so far as I know."

"Then what makes you so sure?"

"I have watched them a great deal, and I am convinced that Edith is taking a long look ahead, for whenever Tom tries to spend any money on her she always dissuades him."

Not of Equal Size.

Students of architecture have often wondered by two towers of Notre Dame are not of equal size, though they appear so to the casual observer. The explanation is rather a curious one. It appears that, when the cathedral was built, the cathedral of a suffragan bishop was not entitled to two towers of equal size, and for centuries the Bishop of Paris was suffragan to the Bishop of Sens.

A Risk to Run.

"I never give Henry neckties for presents."

"Why not?"

"If he doesn't like them he makes me wear them."

Brutalities at Sea.

In The Pall Mall Magazine W. Clark Russell quotes the instructions given by the Earl of Lindsay in 1635 to his captains:

"The keynote is struck with the devotional spirit of the age. The chief in command is to take care that all the officers and companies of the ships worship God twice a day. Swearing, drunkenness, robbery, sleeping on watch and the like were to be punished according to the order and custom of the sea. Punishments were brutally severe in those times. They marooned—that is, they set a man ashore alone on a desolate coast or island and left him to starve, to be destroyed by savages or wild beasts.

"They keel hauled—that is, they dragged a man naked by yard arm whips under the bottom of a ship, and drew him up raw and bloody with the harsh wounding of barnacles and spike-like adherences, only to be submerged afresh ere the unhappy miscreant could fetch a full breath. They nailed a man to the mainmast by driving a knife through his hand. For murder (that was often manslaughter) they tied the living to the dead, back to back, and threw them overboard."

A Man of Resource.

A big, uncouth looking stranger, with shoulders like a Hercules, walked into a department store late one afternoon, and, after gazing about a minute, stepped up to a salesman and made known his wish to buy a shirt. A couple of samples were shown him, and he informed the salesman that either one would do.

It was an article that sold for $1.50, and in making payment the stranger pulled from his hip pocket a huge roll of bills. He apparently skimmed them over in search of a small bill, but he could not find one of less denomination than $500. One of these was handed the surprised salesman, but he arose to the occasion and sent it away with the cashboy. When the change came, it was nearly all in small bills. The stranger interrupted the salesman in his work of counting the bills by reaching for the pile and wadding it into his hip pocket.

"Oh, I guess it's all right, and you give that shirt to a porter if you can find one big enough to wear it. All I wanted was the change. You see, it was after banking hours, and I am a man of resources. Good day."—Philadelphia Record.

Some naturalists are of the opinion that the whale was once a land animal, and that it was forced to take to water as a means of protection.

CATARRH CANNOT BE CURED

With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials, free.

Some Fifteens.

In The Courant of March 16, 1784, we printed the following queer story, which our readers will pardon us for repeating. Some of them may have forgotten it:

HEBRON, Feb. 15, 1784.—This day departed this life Mrs. Lydia Peters, the wife of Colonel John Peters and second daughter of Joseph Phelps, Esq. She was married at the age of 15 and lived wth her consort three times 15 years and had 15 living children, 13 now alive and the youngest 15 years old. She hath had three times 15 grandchildren. She was sick 15 months and died on the 15th day of the month, aged four times 15 years.

—Hartford Courant.

MRS. LUCY GOODWIN

Suffered four years with female troubles. She now writes to Mrs. Pinkham of her complete recovery. Read her letter:

DEAR MRS. PINKHAM:—I wish you to publish what Lydia E. Pinkham's Vegetable Compound, Sanative Wash and Liver Pills have done for me.

I suffered for four years with womb trouble. My doctor said I had falling of the womb. I also suffered with nervous prostration, faint, all-gone feelings, palpitation of the heart, bearing-down sensation and painful menstruation. I could not stand but a few minutes at a time.

When I commenced taking your medicine I could not sit up half a day, but before I had used half a bottle I was up and helped about my work.

I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and used one package of Sanative Wash, and am cured of all my troubles. I feel like a new woman. I can do all kinds of housework and feel stronger than I ever did in my life. I now weigh 131½ pounds. Before using your medicine I weighed only 108 pounds.

Surely it is the grandest medicine for weak woman that ever was, and my advice to all who are suffering from any female trouble is to try it at once and be well. Your medicine has proven a blessing to me, and I cannot praise it enough.—Mrs. LUCY GOODWIN, Holly, W. Va.

The Bridge of Lions.

The largest bridge in existence is not, as one would imagine, the work of some famous English or French engineer. This bridge, comparatively little known, was constructed long ago, in China, in the reign of the Emperor Keing Long.

It is situated near to Sangang and the Yellow sea, and measures not less than eight miles and a half.

The Bridge of Lions, as it is called, is supported by 300 immense arches and its foundation is 21 meters under water. On each pile of this wonderful bridge is a marble statue of a lion, three times larger than life size. The coup d'œil of these 300 enormous lions, each one supporting an arch, is stupendous in its magnificance.

He Told the Lawyer.

Lawyer S. is well known for his uncomely habits. He cuts his hair about four times a year and the rest of the time looks decidedly ragged about the ears. He was making a witness describe a barn which figured in his last case.

"How long had the barn been built?"

"Oh, I don't know. About a year mebby. About nine months p'r'aps."

"But just how long? Tell the jury how long it had been built."

"Well, I don't know exactly. Quite a while."

"Now, Mr. B., you pass for an intelligent farmer, and yet you can't tell me how old this barn is, and you have lived on the next farm for ten years. Can you tell me how old your own barn is? Come now, tell us how old your own house is, if you think you know."

Quick as lightning the old farmer replied:

"You want to know how old my house is, do ye? Well, it's just about as old as you be and needs the roof seeing to about as bad."

In the roar that followed the witness stepped down, and Lawyer S. didn't call him back.—London Globe.

"'Ark, the 'Erald Angels Sing."

Two turns brought me from the crowded highway along which cab and omnibus were speeding toward London's center of attraction to the quiet street in which fire and food awaited me. As I made the second turn I saw, through the murk of a mid-December evening, three figures pressed close against the area railings—surely my own area railings. And through the murk came in a treble bawl the sound of "Peace on earth, good 'ill ter men."

The area door opened with a clatter.

"Now, then, be off with yer! I'd smack yer 'eds if I could get near yer. Makin that noise! Now, then!"

"Garn! Want yer airy window broke?" said the biggest of the trio, pulling himself up by the railings and resting his chin between the spikes.

As I entered at the gate they scurried away in fear and trembling, and cook, distracted, slammed the area door. A minute later a want of discord came down the street:

"'Ark, the 'erald angels sing."

—Academy.

A New Commodity.

"John has 5 oranges, James gave him 11, and he gives Peter 7; how many has he left?"

Before this problem the class recoiled.

"Please, sir," said a young lad, "we always does our sums in apples."—London Tit-Bits.

A Woman's Answer.

She (confidingly)—I feel like a perfect wreck.

Her Dearest Friend (sympathizingly)—You look it.—New York Sun.

Spain has greater mineral resources than any other country in Europe, including iron, copper, zinc, silver, antimony, quicksilver, lead and gypsum.

People Who Live Long.

Among the many curious things noted by the actuaries the following are a few of the most interesting. Women have a much better prospect of long life than men, and the chances of married people are distinctly higher than those of bachelors and old maids.

From the data provided by the records of various churches it has been deduced that the peaceful Quakers have most frequently received the blessings of long life promised in the fifth commandment, while the death rate is remarkably high among Methodist clergymen. Annuitants as a class live from three to five years longer than other people, and this is not due to human perversity, as some humorists have suggested. It is undoubtedly due to the lack of worry regarding the changes of fortune when a regular income is a certainty.

Although no statistics have been collected on the death rate in the civil service, where the yearly income almost partakes of the character of an annuity, it would perhaps be found that there is some scientific basis for President Grant's cynical observation regarding this class, "Few die and none resign."—Ainslee's Magazine.

Waiting to Take Hold.

You know the misery of Sciatica is awful. Well, if you love misery better than cure, let it go on, but St. Jacobs Oil is waiting to take hold, subdue the pain, and set you all right.

The Poor and the Poor.

A very little familiarity with the poor districts of any city is sufficient to show how primitive and frontierlike are the neighborly relations, says Jane Addams in The Atlantic. The fact that the economic condition of all alike is on a most precarious level makes the ready outflow of sympathy and material assistance the most natural thing in the world. There are numberless instances of heroic self sacrifice quite unknown in the circles where greater economic advantages make that kind of intimate knowledge of one's neighbors impossible.

An Irish family, in which the man has lost his place and the woman is struggling to eke out the scanty savings by day work, will take in a widow and her five children who have been turned into the street without a moment's reflection upon the physical discomforts involved. The most maligned landlady is usually ready to lend a scuttleful of coal to a suffering tenant or to share her supper.

A woman for whom the writer had long tried in vain to find work failed to appear at the appointed time when a job turned up at last. Upon investigation it transpired that a neighbor further down the street was taken ill; that the children ran for the family friend, who went, of course, saying simply, when reasons for her nonappearance were demanded, "It broke me heart to leave the place, but what could I do?"

A View of Edmunds.

George F. Edmunds had a high reputation in the country as an able lawyer and a faithful and independent senator. He had unquestionably rendered great public service in the senate. If elected, I believe he would have administered the presidency on the principles which a large majority of the people of Massachussets held. He was an excellent debater. He was very fond of criticising and objecting to what was proposed by other men. He seemed never so happy as when in opposition to the majority of his associates. But he possessed what persons of that temper commonly lack—great capacity for constructive statesmanship. Any measure of which he was the author would be likely to accomplish its purpose and to stand fire.

David Davis, who was president pro tempore of the senate, used to say he could always compel Edmunds to vote in the negative on a question by putting the question in the old New England fashion. "Contrary minded will say no," for Edmunds was always contrary minded. I once told him, borrowing a saying of an Englishman, that if George Edmunds were the only man in the world George would quarrel with Edmunds.—Senator George F. Hoar, in Scribner's.

A Painter of Children.

A writer in The Century tells how the noted French artist, M. Boutet de Monvel, became a painter of children's portraits:

De Monvel's illustrations are full of atmosphere and an exquisite feeling for the out of door world. The fine effects of light and shade, the tone and composition of these pictures place them far beyond any others of their class, and proclaim them the work of a consummate artist. Boutet de Monvel spoke to the children of France as they had never been spoken to before. Bending over the bewitching pictures they exclaimed, "Ah, he understands!" And the fathers and mothers, looking from the little ones who read and enjoyed to the pages over which they bent, saw at once that here was a painter with a new and rare faculty for comprehending childhood. They sought Boutet de Monvel to paint their sons and daughters, till he became, one might say, "painter in ordinary" to the children.

Where Coleridge Was Wanting.

Coleridge has a lamentable want of voluntary power. If he is excited by a remark in company he will pour forth in an evening, without apparent effort, what would furnish matter for a hundred essays. But the moment that he is to write not from present impulse but from preordained deliberation his powers fail him, and I believe that there are times when he could not pen the commonest notes. He is one of those minds who, except in inspired moods, can do nothing, and his inspirations are all oral and not scriptural. And when he is inspired he surpasses, in my opinion, all that could be thought or imagined of a human being.—"Charles Lamb and the Lloyds," by E. V. Lucas.

For La Grippe Use "5 Drops"

FOR 30 DAYS YOU CAN TRY IT FOR 25 CENTS.

5 DROPS [TRADE MARK.]

Rheumatism, Sciatica and Catarrh

CURED BY

"5 DROPS" Three Years Ago.

DOCTORS PRONOUNCED HIM INCURABLE.

He is Still Well and Writes, on Oct. 10, 1898: "I Feel it a Duty That I Owe to God and Suffering Humanity to Announce to You and all the World What "5 Drops" has done for Me."

SIBERIA, PERRY CO., IND., JAN. 29, 1896,

SWANSON RHEUMATIC CURE COMPANY:—I would like to thank you for your great remedy, "5 DROPS," and tell you what it has done for me. I had Rheumatism in every joint and in the heart, and I had Catarrh of the Head for 30 years. I was so poorly that I lost the use of my legs and arms, and could not move without pain. I was so crippled that I had done but little work for seven long years, and our family physician, a good doctor, told me that my Rheumatism and Catarrh were incurable, and I believed him. But now, **after using "5 Drops" only two months,** I can truly say **I have not felt so well for seven years.** This medicine does more than is claimed for it. At this time my Catarrh is much better and I have scarcely any Rheumatism at all, and the heart weakness and pain are gone. My hearing is now good and my eyesight is much better. I have gained more than 10 pounds of flesh and can do a full day's work. It is the best medicine I ever saw to give a mother who has a young child, for it has the same effect on the child as on the mother. It wards off Croup and cures the Hives of the child and causes sweet and refreshing sleep to both young and old.

WM. M. KELLEMS.

SIX TESTIFY TO ITS TRUTH.

In a letter of Oct. 10, 1898, from Mr. Kellems, he says: "I feel it a duty that I owe to God and suffering humanity to announce to you and all the world that I am yet in the ring with untold thousands of others, to testify to the great merits of your valuable remedy called "5 DROPS." I believe I was the first sufferer in this part of the earth to learn of the existence of "5 DROPS," some three years ago. I was then badly afflicted with Rheumatism, Catarrh, etc., which my letter of Jan. 29, 1896, fully speaks of. All I can say is "5 DROPS" cured me. To make a long story short, "5 DROPS" needs no recommendation in this part of the country, as everybody knows the "5 DROPS remedies around here. **It has cured** more cases of Rheumatism, Sciatica, Neuralgia and many other pains than any other medicine that has ever been sold or heard of. For the last three years I have noticed the effect "5 DROPS" has on the sick, through my own observations as well as my brother, who is a practicing physician and **uses the "5 Drops" in his practice.** All ye that wish for further information, write and you are sure to get a reply without any delay. I will (as I have done in this letter) cheerfully recommend it to anyone that I may come in contact with. I myself can never forget what this remedy has done for me and many others.

Yours very truly, WM. M. KELLEMS, Siberia, Ind.

Witnesses to the above: Jas. Brady, J. R. Cox, E. R. Huff, S. Taylor, Dr. S. W. Kellems, Jno. Hays, all of Siberia, Ind.

The wonderful success that has attended the introduction of "5 DROPS" is unprecedented in the history of the world. Think of it! It has CURED more than **ONE MILLION AND A QUARTER** sufferers within the last three years. This must appeal to you. One million and a quarter people cannot all be mistaken. If suffering we trust you may have sufficient confidence to send for three large bottles of "5 DROPS" for $2.50, which will surely cure you. If not, then send for a $1.00 bottle, which contains enough medicine to more than prove its wonderful curative properties. Prepaid by mail or express. This wonderful curative gives almost instant relief and is a PERMANENT CURE for **Rheumatism, Sciatica, Neuralgia, Dyspepsia, Backache, Asthma, Hay Fever, Catarrh, Sleeplessness, Nervousness, Nervous and Neuralgic Headaches, Heart Weakness, Toothache, Earache, Croup, La Grippe, Malaria, Creeping Numbness, Bronchitis, and kindred diseases.**

"5 DROPS" is the name and dose. LARGE BOTTLE (360 doses), $1.00, prepaid by mail or express; THREE BOTTLES, $2.50. Sold only by us and our agents. **Agents Appointed in New Territory.** Write today.

Make Sure.

There have been years of misery suffered from a little nerve because St. Jacobs Oil was not used to cure Neuralgia, which affected it. Make sure and don't wait.

Rat Prognosticators.

The old superstition, which has grown into an adage, that rats desert a ship which is no longer seaworthy, is still an article of faith with the fresh water sailors of the great lakes. Sundry well authenticated instances seem to justify this belief. Here is one. The Vernon was a three master which did a tramp business. Built in Buffalo in 1850, she was for many years regarded as one of the best craft on the lakes.

Late in the fall, about 15 years ago, she unloaded a cargo of grain in Buffalo, and reloaded with package freight for Chicago. She was about to sail one rough November night. Just before the lines were let off one of the seamen saw a rat run over the hawsers to the wharf. In a moment another was seen. The seamen called others of the crew to see the unusual sight. Between 50 and 75 rats poured out of the ship and took refuge along the wharf. The crew refused to sail, but the captain was obstinate, shipped a fresh crew and sailed forthwith. The ship was lost with all hands.—Household Words.

SYRUP OF FIGS

NEVER IMITATED IN QUALITY.

THE EXCELLENCE OF SYRUP OF FIGS is due not only to the originality and simplicity of the combination, but also to the care and skill with which it is manufactured by scientific processes known to the CALIFORNIA FIG SYRUP CO. only, and we wish to impress upon all the importance of purchasing the true and original remedy. As the genuine Syrup of Figs is manufactured by the CALIFORNIA FIG SYRUP CO. only, a knowledge of that fact will assist one in avoiding the worthless imitations manufactured by other parties. The high standing of the CALIFORNIA FIG SYRUP CO. with the medical profession, and the satisfaction which the genuine Syrup of Figs has given to millions of families, makes the name of the Company a guaranty of the excellence of its remedy. It is far in advance of all other laxatives, as it acts on the kidneys, liver and bowels without irritating or weakening them, and it does not gripe nor nauseate. In order to get its beneficial effects, please remember the name of the Company—

ALABASTINE

Alabastine, the only durable wall coating, takes the place of scaling kalsomines, wall paper and paint for walls. It can be used on plaster, brick, wood or canvas.

Alabastine can be used over paint or paper; paint or paper can be used over Alabastine. Buy only in five pound packages, properly labeled; take no substitute.

Every church and schoolhouse should be coated only with Alabastine. Hundreds of tons used yearly for this work. Genuine Alabastine does not rub and scale off.

Alabastine packages have full directions. Anyone can brush it on. Ask paint dealer for tint card. "Alabastine Era" free. Alabastine Co., Grand Rapids, Mich.

FOR THEE.

The sun, with its glories outspread,
Is gilding the land and the sea,
And I fancy its smiles are all shed
For thee, little sweetheart, for thee!

The birds, with their songs of delight,
Are waking the morning with glee,
And they're singing—I fancy I'm right—
For thee, little sweetheart, for thee!

The roses that grow at thy door,
The daisies that bloom on the lea,
Their sweetness I fancy outpour
For thee, little sweetheart, for thee!

The love that endures in my breast,
The worship my feelings decree,
I know are most truly possess'd
For thee, little sweetheart, for thee!
—London Sun.

IN SPITE OF HIMSELF.

THERE was an air of suppressed excitement among the members of the C. E. Club which culminated in an open demonstration as the reading of the constitution was demanded. The President rapped loudly for order.

"It has been requested that the constitution be read," she said, in a clear, high soprano.

"This organization shall be called 'The Chaney Elopement Club.' Absolute secrecy as to time and particulars of elopement shall be maintained even between members. Membership shall be limited to seven, and shall cease the moment a wedding ring is placed on a true sister's finger. The older the man inveigled into eloping, the more credit shall be given the departing sister. Boys under 18 are not to be considered responsible. Long wedding trips are also barred. The penalty for being a member longer than two years is expulsion. Each departing member shall suggest a sister to take her place."

"You have heard the reading of the constitution," said the President, rising from her chair. "Now, what action is to be taken?"

"Madam President"—a tall girl arose with a malicious sparkle in her black eyes—"the reading of the constitution was demanded for the purpose of calling attention to the clause which reads that the penalty for being a member for over two years is expulsion. We have one such member. I think it time that action was taken."

The members gasped as the audacious speaker took her seat, and listened breathlessly for the President's answer. That official raised her head defiantly, and said haughtily:

"I presume that you mean me, Miss Andrews? I believe that I alone remain of the original seven."

"I do; and I move that the Vice President take the chair while we consider the case."

"One moment, please," the President turned to the Secretary. "Will you kindly look up the time of my membership?"

Amid dead silence the Secretary reported: "There are two months remaining, Madam President."

"I thought so." The President turned to the club, ignoring her of the black eyes. "You see," she said, "that it is impossible for the club to take any such step as the member moved, for the present. I will say, however, that such action will never become necessary in my case," and a resolute look came into the blue eyes.

"O, Gracie!" broke from the girls in admiration, for it was an open secret that the fair President had been engaged for some two years to a dignified professor of science, a man some twenty years her senior.

Grace walked away. "The hateful thing!" she exclaimed, the tears filling her eyes in spite of herself; "I'll show her! He does love me! He does! He will do anything I wish; only he does not approve of eloping. Oh, I wish that he did! But I'll manage somehow, and he just must do it, whether he approves or not."

A month passed, and still no opportunity presented itself for putting into practice any one of her numerous plans. Grace was almost in despair. Sadie Andrews openly laughed her to scorn as the time passed and Gracie was still Grace Dawn. Many of the girls looked dubious, and smiled faintly when Sadie would triumphantly ejaculate: "I told you so," in their presence. Grace preserved a calm bearing outwardly, but inwardly raged at her helplessness.

One day a merry party of excursionists boarded a boat, and went for an outing thirty miles down the river. Among them were Grace and Professor Harper. The C. E. Club was out in full force, and a mighty resolve formed itself in the maiden's mind that this should be the eventful occasion.

A cave in the vicinity visited and lunch partaken of, the party broke up into groups of twos or threes and scattered over the hills into the woods, the Captain of the vessel cautioning them against straying too far away, as the boat would put out promptly at 5 o'clock. As was natural, Grace and the professor sauntered off together.

"Now where shall we go?" inquired the professor. "Have you any special place you would like to go?"

"I thought," said the artful miss, "that perhaps we might find some specimens of the adiantum pedatum."

"True, my dear. Let me see what the time is. We don't want to go so far that we will not be able to get back to the boat in time."

He drew out his watch, but before he could glance at it Grace had snatched it from him.

"Now, guess, Herbert," she cried, merrily, putting her hands behind her. "Guess the time."

Professor Harper smiled indulgently. "It must be 2 o'clock or after," he said.

"Oh, you bad guesser!" said Gracie, laughingly, handed back the watch. "It is only half past 1."

"Why, so it is!" exclaimed the professor, amazed. "I was almost positive that it was after 2, but that will give us time for a long tramp."

So on they went farther and farther into the woods, until at last, with arms filled with fine specimens of maidenhair, they sat down on a mossy stone to analyze them. Suddenly the professor seemed to realize that the time was flying and whipped out his watch.

"Bless my soul!" he cried. "We will barely have time to get to the boat. It is 4 o'clock now. We must hurry, Grace."

They had not gone far before the deep whistle sounded on their ears.

"Why! We can never reach that boat in time in the world! We must run for it, Grace."

But, despite their efforts, when they reached the shore the boat was hidden from view by a bend in the river.

"This is a predicament!" and Professor Harper mopped his brow. "The worst of it is that they will think we did it on purpose!" and he frowned in annoyance. "I cannot think how my watch came to be so far behind time. Do you suppose you could have inadvertently turned the hands, Grace, when you took it from me?"

Grace hung her head, but made no reply.

"Grace!" he exclaimed, "I believe that you did it, and on purpose. Did you?"

Grace nodded.

"But why, child? Why should you want to be left out here in the woods?"

"I'm going to run off with you, Herbert; so that you might as well make up your mind to it."

"Why! What does the girl mean?" gasped the professor, in amazement.

"Just what I say. If you will agree to marry me right away I know a man that lives about a mile from here who will drive us to Chaney. If you don't promise I will not tell you where he lives, and you will just have to stay here all night."

Professor Harper stared at her for a moment in astonishment; and then, as her meaning burst upon him, gave vent to a roar of laughter. Grace's lips quivered.

"Oh, I surrender! I surrender!" cried the professor, hastily. "I will do anything you ask, my dear. But what a desperate character you are."

Shamefaced, but determined, Grace led the chuckling professor to the house of a farmer with whom arrangements were soon concluded to drive them to Chaney.

"You don't really mind, do you, Herbert?" whispered Grace, as they reached the house of the minister.

"Mind? No. I wish we had done it long ago," whispered back the professor, smiling boyishly. "I haven't been on such a lark for years."

The C. E. Club held a private jollification when it was known that Professor Harper and Grace Dawn had eloped, and the villagers wondered at the depravity of a man of his age.

"All the same, my dear," said the professor to his wife, "I hope that you won't always use such desperate methods to obtain your own way."—Ex.

How the Sermon was Spoiled.

Rev. Simon J. McPherson preached on "Hell" in a Presbyterian church in New York recently. He pictured in burning words the terrors awaiting the unrepentant wicked in the next world. His sermon made a deep impression on the congregation. The organist had not known the subject of the sermon when he selected the response, and thought no more about it.

The organist began to play the air planissimo, and a broad grin spread over every face. Dr. McPherson looked appealingly upward to the organist, and then turned over the leaves of the hymn-book with desperate eagerness. The organist left his pipes, and hurried down to the pastor.

"We must change that response," whispered the pastor.

"Why?" asked the organist innocently.

"I have been preaching on 'Hell,'" said the Doctor, "and the response you have chosen is 'What Must It Be to Be There?'"

The organist grinned as he climbed to the organ and started up "Art Thou Weary?"

The Spider's Appetite.

The spider has a tremendous appetite and his gormandizing defies all human competition. A scientist who carefully noted a spider's consumption of food in twenty-four hours concluded that if the spider were built proportionately to the human scale he would eat at daybreak (approximately) a small alligator; by 7 a. m., a lamb; by 9 a. m., a young camelopard; by 1 o'clock, a sheep; and would finish up with a lark pie in which there were 120 birds. Yet, in spite of his enormous appetite, a spider has wonderful power of refraining from food, and one has been known to live for ten months when absolutely deprived of food. A beetle lived in a similar state of unrefreshment for three years!—St. Louis Globe-Democrat.

Whirligigs for Bike Girls.

The latest fad for the bicycle girl is the "whirligig." It will be a pretty sight to see all the girls of a bicycle club making the first run of the season with "whirligigs" fastened on the front of the bike. The whirligig is made in the club colors, and is on the order of a pinwheel, and the faster the girl rides the more rapidly the whirligigs go round.

Rusting Irons.

To prevent irons from rusting, wrap them in brown paper and put them away in a dry place. If they have already become rusty they may be brightened again by rubbing them over a smooth board sprinkled with white sand.

The century plant is a case of age before beauty.

THE LATE PRESIDENT FAURE'S HUMBLE BEGINNING.

IMITATION OCEAN TRIP.

The Paris Exposition Will Have a Bogus Steamer Voyage.

Because of the great novelty of the proposition, the projectors of the "Mareorama" have been assigned by the directors of the Paris exposition to a most prominent site, in the very shadow of the Eiffel tower, as a location for the proposed amusement feature. The word "Mareorama" is a new one, which has been coined for this special occasion. It means a panorama of the sea. But as it is designed it will be none of the old-time panoramas, where one takes a position on an elevated platform and views a stretch of canvas with a somewhat realistic foreground which encircles him. On the contrary, a sensation, new and novel in every particular, will be revealed to the visitor. Nothing more or less than a perfect illusion of an ocean trip is what is in store for him. Not a trip of a few minutes, but a voyage, a cruise as serious and as attractive as if he were really on the deck of a bona fide steamer going at full speed.

Entering the doorway he finds himself on the gangplank leading up to the deck of what is apparently a full-fledged ocean steamer, apparently tied up at the wharf. The reproduction is accurate in every detail. The smoking funnels, lifeboats, ropes and pulleys, ventilators, port holes, masts and spars and the uniformed crew, with the members working under the direction of the captain on the bridge all serve to increase the illusion.

Great confusion prevails just before the announced departure of the boat. Deck stewards and cabin stewards are busy looking after the comfort of the guests, spectators or passengers, whichever they happen to be in this instance. These petty officials are rushing around looking after baggage, getting chairs and doing a dozen other like errands. After a while the gangplanks are withdrawn and stowed away, whistle signals are blown and gongs sounded and the boat pulls out, leaving the city of Marseilles, which is the starting point, disappearing in the distance. The scenery of the vicinity is accurately reproduced and finally the boat reaches the high seas. Things have been all rosy up to this time, but now the sun's light is noticed to be gradually diminishing and a spot darker than the rest of the horizon appears. A storm is approaching. The roar grows louder and louder until it breaks in all its genuine fury. The waves dash over the deck and lightning plays through the rigging. The sailors run wildly back and forth and into the rigging, where sails are furled and others are at the same time engaged in making fast the more exposed pieces of deck furniture. All this time the deck of the sham boat is plunging up and down and rolling and tossing in exactly the same manner as a boat on the seas. A ray of light is now seen and soon the atmosphere has cleared again and all is rosy once more. The boat rocks to and fro now with pleasant undulations.

MAREORAMA MECHANISM.

The itinerary of the trip includes stops at Algiers, Naples, Venice and Constantinople. At each landing there will be attractions for the amusement of the patrons of the Mareorama, and these features will be characteristic of the places stopped at and the landings at each place will be marked with some lively scenes as above described. The maneuvers of dropping the anchor, putting out a gang plank and in some instances the launching of a boat will be gone through with great accuracy and faithfulness of detail, as well as other episodic spectacles by numerous actors. When Naples is reached myriads of small boats appear, containing natives, who offer for sale fruit and trinkets and at the command of the officer some of them will execute the famous tarentella. Further on Arabs and Almees will entertain the voyagers. The incidents en route will be varied and interesting, including a meeting with a naval squadron, a sunrise at sea, ship on fire and rescue of the crew and other effects. The mechanical portion will also be interesting. The ship will be in a tank, which is floating within another tank, and the rocking motion will be given from the outside by means of pistons. The pivots on which the deck works are arranged in a circle and are controlled by means of levers from the bridge. This machinery will make the boat roll and pitch exactly as if it were in the trough of the sea. The illusion created by these movements, combined with the brilliant light effects and the moving panorama on either side, will be enhanced by the breeze fraught with salt water which will sweep the decks. The ceiling of the panorama will be arched, to appear to the eye just as the sky does. Upon this ceiling the sun will rise and set, the moon and the stars will appear and even the clouds and lightning are to be reproduced in the storm scene, which will represent every feature of a furious tempest at sea, minus only the danger. Passengers who cannot stand the movements on deck can go below into a cabin at the center of the boat, where the motion is but slightly felt, and can see the panorama through the portholes on either side.

ON THE DECK OF THE MAREORAMA.

The sea breeze will be furnished by huge ventilators, and the air passing first through a layer of varech or seaweed will be impregnated with the fragrance of the ocean winds.

The World's Tunnels.

If all the tunnels of the world were placed end to end, they would reach a distance of 514 miles. They number about 1,142.

The little good poetry in the world has resulted in a flood of doggeral that creates the suspicion that every man and woman on earth believes that he or she is a genius.

Political clubs are sometimes trumps.

INFLUENZA.

Nature and Symptoms of the Grip and Its Treatment.

Influenza, or the grip, is an acute infectious fever which usually occurs in widespread epidemics. It travels, as cholera formerly did, in waves over the world, running generally from the east to the west. It attacks a very large proportion of the population, especially at the beginning of an epidemic; then in recurrent years it seizes upon those who have previously escaped, and the epidemic does not finally die out until nearly every one has suffered its miseries.

Medical writers usually distinguish three forms of influenza, according as the nervous, the digestive, or the catarrhal symptoms predominate; but all constitute one and the same disease, and one form may easily pass into another in the course of the same attack.

In a typical case influenza begins suddenly with a general ill feeling, headache, pains in the muscles and in the back, loss of appetite, and a sense of extreme weakness. There may be a hard chill, or a succession of slight chills, or a general chilly sensation, and soon a high fever declares itself.

The eyes are often congested and sensitive to light, the nose runs, there is pain at the root of the nose and over the eyes, and all the symptoms of a severe cold in the head are experienced. The tongue is heavily coated, swallowing is difficult or painful, and the voice is hoarse or whispering. Often there is more or less jaundice. The pulse is very rapid and weak, especially when the patient stands.

A peculiar symptom in influenza, one that often serves to distinguish it sharply from an ordinary cold, is a marked depression of spirits; the patient is plunged in despair, and no amount of argument or raillery has any effect on his misery. In some severe cases of the so-called nervous form of the disease this melancholy is so extreme as to lead to attempts at suicide.

In the gastric form of influenza we find a loathing for food, nausea and vomiting, and severe bowel troubles. In the respiratory forms, bronchitis and especially pneumonia are frequent and dangerous complications.

In the treatment of grip we must first remember that we are dealing with no ordinary cold, but with a severe disease calling for as much care as scarlet fever or pneumonia. The patient must not only stay in the house but in bed. All cases of grip, whether mild or severe, need a physician's oversight.—Youth's Companion.

Founded on Tobacco.

Since so many of the wise have declared it less injurious to smoke a pipe than a cigar or the insidious cigarette, pipes are growing in popularity. There is a club about to form in Philadelphia which will permit its members to smoke pipes only. Every week a meeting will be held, and new brands of tobacco will be discussed, and the merits of this or that mixture will be considered. Those who have taken the matter in hand declare that in less than a year the clubroom will be fitted up with pipes from every quarter of the globe, and the rooms will not only be a cozy comfort, but will be of great historical value. Several of the proposed members have collections of pipes in their possession at present which will form the nucleus of the new club's collection. The person who at the end of the first month submits the most readable and valuable essay on pipe-smoking and tobacco will be chosen president. This competition will be open to all.

A Moving Staircase.

They have an improvement on our elevator in Paris. It is a moving staircase. You put your hand on a rail, and find yourself going up, up, without the least unpleasant feeling. On the contrary, the motion is said to be exhilarating, and, compared to the effect produced by the moving stairway, the elevator is crude indeed. Now a London store has begun the construction of one which has a carrying capacity of three thousand persons. Are we to be left in the rear in this fashion?

Solomon was so busy prescribing advice that he probably hadn't time to take much of it.

AMERICA IN HISTORY.

Things the English Schoolboy Learns About the Revolution.

The American school history has been the main bar to friendliness with England, by reason of its comments on the wars of our independence and of 1812. I was very curious when I first visited England in 1889 to see how the revolutionary war was treated in English school histories, but the only history I found, in a little village school that I visited, dismissed the matter with a mere statement that in a certain year we separated from the mother country and set up a republican form of government. The geographies paid scarcely more attention to our country, and I came away with the impression so many Americans have, that the English schoolboy is taught far less about our country than its importance should warrant. Within a month I have come across a "School History of England" for boys of what we would call high school age, and have been more than astonished at the manner in which the writer, Cunningham Geikie, treats the subjects which have so long remained open sores with us, largely, because we have supposed that the English were either willfully ignorant of the wrongs we suffered at their hands or at least were unrepentant. I found that this history, one of a well-known series of school books, condemns the policies of England's governments, at the times of our ruptures with them, more severely and in harsher language than I remember ever to have seen in an American school book. After enumerating the burdens, just and unjust, which Grenville forced upon us, the historian goes on to declare the insanity of the king and the illness of Pitt at a later date (1766). He says that the members of the government were ill fitted to take Pitt's place, and one especially, Charles Townshend, chancellor of the exchequer, "wanting in prudence and self-restraint, was destined to be the evil genius of England at this crisis."—From "Anglo-Saxon Affinities," by Julian Ralph, in Harper's Magazine.

WILL LEAD THE LIBERALS.

The Party of Gladstone Has a New and Very Mediocre Head.

Sir Henry Campbell-Bannerman, the new leader of the Liberals in the British House of Commons, is a very ordinary individual so far as talent and political ability are concerned. He has been thirty years in Parliament, has served as Secretary of War, Secretary of the Navy and Secretary of Ireland, to use American terms, and yet has never made the slightest impression as an executive, as a statute writer or as an orator. His father was a rich Scotch merchant, who sat for the universities of Glasgow and Aberdeen, but had never entered either. The son, with a Cambridge degree, became a pet of Mr. Gladstone, who held the father in strong friendship; and one of the Bannermans of Manchester, an uncle on the mother's side, bequeathed the nephew a fortune and a name. He had everything in his favor—education, leisure, freedom from cark and care, ambition even, connection with the Ashburnhams, marriage into the family of Gen. Bruce, inherited opinions long detached from need of defense, and Gladstone for a patron, yet all that even the precincts of Westminster know of the announced leader-elect of the minority in the House of Commons is that he has held various offices, and that he is "safe."

SIR HENRY CAMPBELL-BANNERMAN.

Effect of an "H."

A cockney whose name was Ogton, which he, following the usage of his class, pronounced Hogtown, settled at the beginning of the present century in the city of New York, where he did business as a trader. His prefixing of the "h" was the occasion of a post-office story, which Dunlap, the author of the "History of the Arts of Design," tells.

Before the clerks of the postoffice knew Ogton, he called day after day to inquire if there were "any letters for John Hogtown."

"None, sir," was the invariable answer.

"Very strange!" said he, feeling uneasy about the goods he had ordered from England, and the bills of exchange he had remitted.

One day after the usual question, "Any letters for John Hogtown?" his eye, following the clerk, noticed that he was looking among the letters beginning with H.

"'Ollo!" cried he, "what are you looking there for? I said John Hogtown."

"I know it, sir, and I am looking for John Hogtown; and there's nothing for you."

"Nay, nay!" shouted John; "don't look among the haitches, look among the hoes." And among the O's were found a pile of letters addressed to John Ogton, which had been accumulating for many a week.

Always provide for the worst—the best is able to provide for itself.

SHEAR NONSENSE

Mrs. Brown (indignantly)—"Is it true that he said I was 'fair, fat and forty?'" Mrs. Jones—"I'm not sure that he said 'fair.'"—Puck.

She—"Mr. Daubster, the artist, told me I was pretty as a picture." He—"I hope he didn't mean one of his own pictures."—Cincinnati Enquirer.

Housekeeper—If I give you a meal will you cut our grass? Weary Walker—Lady, I'll cut it dead; I'll scorn ter notice it.—Philadelphia Record.

"This new play, 'Cyrano de Bergerac,' seems to be a sporting production." "Why?" "It has won by a nose."—Philadelphia North American.

Cuba, 2176 A. D.: Mrs. Santiago Jones—But is his family such a very old one? Mrs. Guantanamo Smith—Oh, yes, indeed. They came over with Sampson in 1898.—Life.

Madame Theosophia—Tell me, have you never seen a vision? Never welcomed some strange spirit from the unseen world? Mrs. Sinclair—Never. But then I entertain so little.—Punch.

The Lady—You here, again? The Tramp—Yes, kind lady. "Well, I won't help you again. I don't believe you've done a thing all winter!" "Indeed I have, mum; I just done thirty days."

"What's she going to wear, and where is it, and who's making the frocks?" "Oh, she's going to appear in a divorce suit at the law courts, and her husband's making it."—Cleveland Plain Dealer.

Willie—I once knew a girl who nearly died from ice cream poisoning. Nellie—The very idea! I would never have dreamed of such a thing happening to a girl of your acquaintance.—Indianapolis Journal.

Engrossing Clerk (Ohio Legislature)—Here is this bill proposing to restrict marriage to persons of sound bodies and sane minds; how shall I entitle it? Married Solon—An act prohibiting matrimony.—Life.

Professor—Too bad! One of my pupils, to whom I have given two courses of instruction in the cultivation of the memory, has forgotten to pay me, and the worst of it is I can't remember his name.—Fliegende Blatter.

Jeweler (excusing a heavy charge)—That watch was in an awful condition. Why, sir, two hands have been constantly on it ever since you left it. Customer (dryly)—That's apparent on the face of it.—Jeweler's Weekly.

"Annexation?" answered Mr. Slowman; "why, that is grabbing anything in reach and holding on to it." "I don't care," said Miss Huggerton, as she pushed the hassock away; "I am in favor of it, if pa is not."—Life.

Young Man (dining at his club)—'Don't you think, James, that these lonely dinners at the club drive a number of men to matrimony?' Waiter—"Maybe, sir; but not so many as matrimony drives to the club!"—Punch.

Smith—"Great time we had at the club last night, eh?" Jones—"You bet! Did you get home all right?" "No; I was arrested before I got there, and spent the night in a station-house." "Lucky dog! I reached home."—Life.

The woman who had just moved in—"The first thing we want to do is to tear down these old curtains those people have left." Her Husband—"It seems you have no reverence for the shades of the departed."—Cincinnati Enquirer.

"Might I ask who lives here?" asked a polite gentleman of a stranger he met in front of a handsome mansion. "Certainly, sir," just as politely responded the other. "Who is it, sir?" "I'm sure I don't know," replied the stranger.—Tid-Bits.

Old Gentleman (dictating an indignant letter)—"Sir: My stenographer, being a lady, cannot take down what I think of you; I, being a gentleman, cannot think it; but you, being neither, can easily guess my thoughts."—The Independent.

Biker (blocked by load of hay)—Hay, there! pull out and let me by. Farmer—Oh, I dunno ez I'm in enny hurry! Biker (angrily)—You seemed in a hurry to let that other fellow's carriage get past. Farmer—That's 'cause his horse wuz eatin' my hay. Thar ain't no danger o' yew eatin' it.—Judge.

Mr. Green—"Now, I'm going to tell you something, Ethel. Do you know that last night, at your party, your sister promised to marry me? I hope you'll forgive me for taking her away?" Little Ethel—"Forgive you, Mr. Green! Of course I will. Why, that's what the party was for!"—Punch.

"I never was glad of the im-im-pediment in my speech but once," said the man from Dearborn who was in to see the big parade. "When was that?" "Fe-fe-fel-low asked me h-h-how much I would take for a-a horse, and while I-I-I was t-trying to tell him s-s-sixty d-dollars he offered me a hundred."—Detroit Free Press.

"Young man," said Farmer Corntossel, "I must say you've done a heap o' talkin' about yer family tree. Anybody would think you owned a whole lumber yard. Come out into the lane a minute." The youth with golf clothes accompanied him. Pausing by a weeping-willow, the farmer said: "I want you to take partic'lar notice of this." "What for?" "That's our family tree. That's what has heightened our ideals and stimmylated our energies. That has furnished switches fur four or five generations of Corntossels."—Washington Star.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, APRIL 28 1899

At a meeting of the State Board of Trade held in San Francisco last week the question of pump irrigation was discussed. General Chipman, president of the Board, said in part: "Adversity is not without its compensations. The last year has taught us that we must prepare for irrigation. Fortunately the means are at hand. The large outlay attending the various gravity enterprises and, what is still more important, the difficulty of obtaining water at any cost by gravity in some places, stimulated by necessity, has developed a new and cheap method of irrigation all over the State. Under nearly all of the orchard lands of the State are inexhaustible water tables from 50 to 100 feet below the surface. These strata of water have been found ample to supply all needed surface irrigation. For small plants of say three to ten horse power, gasoline engines have been found satisfactory, and are in successful operation with as high as 100 horse-power. A gravity supply of water can be passed over a surface only where the decline is constant. There are no lands sufficiently level to make more than 60 per cent of their surfaces subject to irrigation from any point of elevation in their vicinity. There are seasons in which the excess of precipitation makes drainage a problem difficult of solution. In such seasons the old costly plan of canals with lateral ditches is uneconomic as well as well as useless. It is stated on seemingly reliable authority that there are not far from 2,000 irrigation pumps in operation in Santa Clara county alone. In Capay valley, with irrigating machinery, pumping from Cache creek has been practiced and highly satisfactory results obtained. A 6-inch pump using a 15-horse power gasoline engine is capable of delivering 42,000 gallons an hour at the end of an altitude of 30 feet above the surface of the water. Ten hours' pumping allowing 250 gallons to each tree, would give a daily efficiency supplying 1680 trees, or fully sixteen acres. Excluding the labor of handling the pipes, usually performed by the owner of the orchard, the cost is $5 per day.

The campaign on the island of Luzon has closed for the winter, or rainy season, and our soldiers will simply do garrison duty. All the ports of the island, however, are to be blockaded to keep the Filipinos from getting arms and ammunition. And so the time will be whiled away until about October. In the meantime the army is to be recruited and more troops sent over. The cost is going on and the burden on the "white man's shoulders is being piled mountains high. And in the end, what. We have promised the Filipinos not to tax them except for the direct benefit of themselves, so we can brlag no rich tribute to fill the public treasury. Then what? We will control some of the trade of the islands but as we have promised the "open door" policy we cannot expect more than our share and as we have no ships to speak of that share cannot be very large. The whole exports and imports have never exceeded $30,000,000 a year. If we had all that, and the whole of it was profit it would not pay the pensions that will be paid on account of the war! Certainly will not pay the interest on the debt that will be created! Certainly will not pay the expense of keeping a garrison in every little hamlet, as General Lawton says we must keep, to the extent of 100,000 men. These cannot be kept there short of half-a-billion a year. If they can then the stealings out of the half billion appropriated by the last Congress on account of the war must have been inconceivable. All this to get our share of the trade of $30,000,000 a year which could not, under the most favorable conditions to be made to exceed over one-half. This trade it is true may be doubled in the course of time—that is by the time we have expended eight or ten billions of money.

But the burdens will fall on the necessities of the people and the profit be made by the great syndicates! There is the secret of the whole business. It is however, entirely consistent with the "protection" theory of the Republican party. No difference what burdens a measure may impose on the common people so the trusts make big money. If the trusts make big money they can hire more men. But all the while the percentage of those who must hire out becomes greater day by day and the great bone and sinew of the country is being squelched out.—*Colusa Sun.*

Another horrible thing has happened in the South. A negro buried an axe in the brain of a white farmer, and outraged the wife on the floor in the husband's blood. Two thousand whites lashed the negro to a tree, cut off his ears, fingers and other members, poured coal oil over him and burned him to death. They then cut his heart, liver and body to pieces and distributed them for relics.

A planter named Mangum has about six hundred monkeys at work on his plantation in Missippi picking cotton. He says the monks pick cotton faster, cleaner and at about one-third the expense that negroes do, and has sent to Africa for one thousand more of them. Pretty soon there will be war between the monks and mokes and the devil to pay in Dixie.

Emma Nevada, the American singer, was hissed and insulted in a Seville theater recently, by the "elite" of the city, because she is an American. Next day she went out to a bull fight and enjoyed themselves.

The Streets of New York.

It was lunchtime and the "frankfurter and roll" men of Frankfort street were doing their best to appease the appetites of the 200 or 300 newsboys who throng Park row. One of the dealers in giving change to a buyer accidentally dropped a dime, and before he had time to pick it up his brother dealer quickly stooped down and grabbed it. Then ensued an argument in a way which only "frankfurter men" can argue, each claiming that he had dropped the dime. It is very likely they would be arguing yet had not a young fellow of the Bowery type who had chanced to witness the trouble interfered. Walking up to the one who had really dropped the money he said:

"Dat's yer dime dat bloke has, ain't it?"

"Yes."

"Well, say, how much will yer gimme if I gets it back fer yer?"

"A nickel," was the answer.

Then addressing the other contestant the Bowery boy said:

"Say, yer got dat feller's dime, 'cause I saw yer take it. But, say, if I don't take it away from yer how much wil yer gimme?"

"Six cents," was the quick reply.

"All right; hand over." The bargain was concluded just as a policeman came rushing up and grabbed the one who had dropped the dime and took him to the station house for disorderly conduct —New York Commercial Advertiser.

A Punctual Man.

A certain Mr. Scott of Exeter whose business required him to travel constantly was one of the most famous characters for punctuality in the kingdom. By his methodical habits, combined with unwearied industry, he accumulated a large fortune. For a great many years the landlord of every inn in Cornwall or Devon that he visited knew the exact day and hour he would arrive. A short time before he died, at the advanced age of 80, a gentleman who was making a journey through Cornwall put up at a small inn at Port Isaac for his dinner. He looked over the bill of fare and found nothing to his liking. He had, however, seen a fine duck roasting on the fire. "I'll have that," said he.

"You cannot, sir," replied the landlord. "It is for Mr. Scott of Exeter."

"I know Mr. Scott very well," replied the traveler. "He is not in your house."

"Very sorry," said the landlord, "but six months ago, when he was last here, he ordered the duck to be ready for him this day exactly at 2 o'clock."

And to the amazement of the traveler, who chanced to look from the window, the old gentleman was at the moment entering the inn yard about five minutes before the appointed time. —Harper's Round Table.

An Acceptable Clock.

A well known professor sometime became so much interested in his lecture that when the noon bell rang he kept the class five or ten minutes over the hour. Certain restless spirits among the students thought they would give him a gentle hint, so they bought an alarm clock, set it to go off precisely at noon and placed it on the professor's desk when they came in to the next lecture. They knew that he was a little absent minded and expected that he would not notice it.

As the noon hour struck the alarm went off with a crash, and those of the class not in the secret started and took in the joke at once. There was a roum of applause. The professor waited until the alarm and the applause were over, and then said: "Young gentlemen, I thank you for this little gift. I had forgotten it was my birthday. An alarm clock is something my wife has needed for our servant for some time. It is a very kind remembrance on your part." The professor then went on to finish a demonstration interrupted by the alarm.—London Tit-Bits.

A Bad Dream.

It is not likely that any English speaking people understand so keen and punctilious a devotion to the niceties of language as that which characterizes the French grammarians. We may help ourselves to understand it perhaps by reading a story told of M. Lamany.

One night lately he awoke and sprang out of bed with a wild cry. His wife came running. He was in alarm and despair.

"Why, what is the matter?" she gasped.

"I dreamed," said the professor. "Oh, I had a horrible, a heartrending dream."

"What was it?"

"I dreamed I was talking, and I distinctly heard myself utter a sentence which had a grammatical error in it." —Youth's Companion.

Two Lockouts.

Editor's Wife (from second story window)—You don't get in this house at any such hour of the morning as this.

Editor (appealingly)—But, my dear, I was unavoidably detained at the office. You see, we had late news of a tremendous big lockout, and—

Wife—All right; you've got news of another new (slamming down the window).—London Answers.

The English of 1453.

The English population consisted of churchmen, nobles and craftsmen, as well as common people. It was a novel and significant division. Traders and manufacturers took their places somewhat noisily beside their fellow politicians of older standing, filling the whole land till it seems for a moment as if nothing counted any more in English life save its middle class—a busy, hard, prosperous, pugnacious middle class, slowly emerging from its early obscurity. In this century it had arrived at power definitely, ostentatiously, carrying a proud look and a high stomach, intent on its own affairs, heedless of the court, regardless of ministers save when it had to bribe them, irreverent to the noble, the "proud penniless with his painted sleeve," tolerant of ecclesiastics only so long as they could be kept rigidly within their allotted religious functions. — Denton's "England in the Fifteenth Century."

His Last Question.

The counsel for the opposition had been bullying the witness for an hour or more, when he finally asked:

"Is it true that there are traces of insanity in your family?"

"It would be folly to deny it," replied the witness. "My great-grandfather, who was studying for the ministry, gave it up to become a lawyer."—

PECAN CULTURE.

Some of the Latest Developments In Growing This Nut.

The first essential to having a good pecan grove is constant and thorough cultivation. Those people who tell you that all you have to do is to put a nut in the ground and that it will come up and grow and make a tree without any care are greatly mistaken. You had better not plant a grove unless you will cultivate it and take care of it.

Cotton is by far the best crop to plant a pecan grove in, as cotton is always given good cultivation, and the pecans get the benefit of it. I have planted my grove in cotton for 14 years, and have raised a moderate crop there this year. The trees are now so large that I fear I will have to stop planting cotton among them. My rows are 60 feet apart (the pecan rows, not the cotton rows). And I would strongly advise all parties wishing to plant pecan groves to be sure to put the rows far apart, even though the trees be close together in the rows, for then the trees will get the sunshine and air from at least two sides (and they will not do well unless they do), and, being thick in the row, all undesirable trees can be cut out. On rich land I would plant the rows 60 feet apart and the trees 30 feet apart in the row. On land of moderate fertility the distance may be modified, but be sure to give the rows sufficient distance.

As to budded or seedling trees, let me say once for all that where a person is rich enough to buy budded trees (and none but the rich can afford to buy them in any quantity) it is best to get them, provided you know something of the prolificness of the variety you are buying. But do not imagine for one moment that you cannot get a fine pecan grove by planting the seed. I know you can, for I have it here myself. While the seed do not reproduce themselves with exactness, still, where the best seed are planted, you get a very large proportion of trees that bear nuts much finer than those found in commerce. A few will come inferior. These I either bud and change into fine ones or cut them out where the stand is too thick.

And right here I wish to draw the reader's attention to a point of much importance. The first time a pecan tree bears the nuts are not nearly at their best. The tree seems too weak to develop them entirely. It is only after several years that they reach their full perfection. So do not be discouraged if the first year the nuts are a little defective. They will greatly improve in a few years. There is another point that I discovered by accident, and it is this—where a tree bears a defective or badly filled out nut it can be made to bear a fine, good nut by cutting out a portion of the top and throwing all the sap into the remaining limbs.

If you plant seed, be sure not only that they have extra size, but, of far more importance, get them from trees that bear heavily every year. There are such trees. Flavor is another point that is greatly neglected by parties who plant pecan groves.

The foregoing practical points by a pecan grower were lately given in the Southern Cultivator and are reproduced as bearing upon a subject in which an increasing interest seems to be felt.

Expert Swimmers.

The Siamese spend three-fourths of their existence in the water. Their first act on awakening is to bathe. They bathe at 11 o'clock, again at 3 and again at sunset. There is scarcely an hour in the day when bathers may not be seen in all the creeks, even the shallowest and muddiest. Boys go to play in the river just as our children go to play in the street. A traveler tells of a Siamese woman sitting on the lowest step of a landing place, while, by a girdle, she held in the water her infant for a few months. Were not the Siamese expert swimmers many lives would be lost, for the tide flows so swiftly that it requires the greatest skill and care to prevent boats from running foul of one another.

A story is told of an English boat running down a small native canoe containing a woman and two children. In an instant they all disappeared. The Englishmen were on the point of jumping to their rescue when they bobbed up, and the woman, upon recovering her breath, poured forth a volley of abuse. Having thus relieved her mind, she righted her canoe, ladled out some of the water and bundled in the children who had been composedly swimming around her, regarding with mingled fear and curiosity the barbarians who had caused the mishap.

He Knew Chester.

Mr. Gladstone had a nice taste in hot mutton pies. One of the Wesleyan journals recalls a conversation which R. W. Perks had with Mr. Gladstone at a public dinner in London, when the ex-premier asked all sorts of questions on matters pertaining to Methodism. A man who happened to sit exactly opposite, wishing to divert the conversation into another channel, asked, "Do you know Chester, Mr. Gladstone?"

"Yes, a little," was the answer, an ominous smile playing about the mouth. "Do you know Chester, Mr. ——?"

"Not very well," said the unwary questioner.

"Well, if you go to the city of Chester you will find a confectioner's shop in such a street," giving the number. "Go into that shop, and you can buy a hot mutton pie, deliciously hot," and here Mr. Gladstone screwed up his eyes, and his face beamed with delight as he recalled the taste and smell of those savory pies, "and all for threepence." Then, turning to Mr. Perks, in deep, earnest tones he said, "Let us resume where we left off."

There was no further interruption from the opposite side of the table.—

Moral Effect.

Mrs. Greene—Do you always give your little boy castor oil for a cold?

Mrs. Gray—Yes, I give it for its moral effect exclusively.

Mrs. Greene—For its moral effect?

Mrs. Gray—Yes, it will have an influence upon him not to catch another cold.—Boston Transcript.

Profit From a Whale.

The profit from a single whale that is captured is very large. One about 50 feet long weighs 140,000 pounds and will give 60,000 pounds of blubber, from which 48,000 pounds of train oil can be made and 3,000 pounds of whalebone.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending Mar. 9

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

SHERIFF SALE.

BY VIRTUE OF AN EXECUTION, ISSUED out of the Justice's Court of Fifth Township, County of Inyo, State of California, and to me directed and delivered, for a judgment rendered and entered in said Court, on the 9th day of August, 1897, in favor of J. B. Dover and against L. B. Harrison, I have levied on the following property, to wit: An undivided one-half interest in that certain water right known as the "Kingsford and Harrison" water claim, commencing at a monument of stone on the north side line of Jim Cooper's mill site location and running along said line east forty rods thence north 20 rods, thence west 40 rods, thence south 20 rods to place of beginning. Is at Stone Corral in South Park Mining District, Inyo County, State of California. Also,

An undivided one half interest in that certain mine or mining claim known as the "Myrtle Lee." This claim is located about three miles southeast of South Park Spring, in the Panamint range of mountains, on the west side of said range, in South Park Mining District, Inyo County, California.

NOTICE IS HEREBY GIVEN that on the 4th day of February, 1899, at one o'clock p. m. of that day, in front of the Justice's office, in the town of Ballarat, County of Inyo, I will sell all the right title and interest of said L. B. Harrison in and to the above described property, at PUBLIC AUCTION, for cash, gold coin in hand to the highest and best bidder, to satisfy said execution and all costs.

A. M. GIVEN, Sheriff.

Dated the 13th day of January, 1899

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfuly notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $4.00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

JOHN J. MCLEAN,
Observer.

*Record beginning March 6th 1898.

Methodist Church.

Services for Sunday, April 30th, Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m. The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

Two inches of snow fell at Bishop Wednesday morning.

Fred Burckhardt was up from Lone Pine on Wednesday.

T. C. Boland and J. A. McKenzie were in town early in the week.

Arthur Smith came in from the Minnietta last week and spent several days in town.

S. H. Spratt and Allie McDonald of Big Pine spent a couple of days in town this week.

Deputy Sheriff J. Harry Cole arrived from Ballarat on yesterday morning's train. He returns to-day.

W. M. Rickey left for Long Valley on Wednesday with his family. They will remain for the summer.

A pecial meeting of the F. & A. M. Lodge, No. 221, will be held at their lodge room to-morrow afternoon.

Mrs. Otto Belau left for San Francisco yesterday morning. Her health was greatly improved by her stay here.

Sheriff Given arrived home last Saturday. Mrs. Given remained at Stockton for a short visit with friends there.

Bert Rhine is fitting up a room in Rhine's store for a postoffice and will take charge of the local office and move it in a few days.

Charley Anthony came in from Darwin yesterday, returning to-day. He expects to have a cyanide plant in operation soon at Pleasant Canyon.

The weather has been quite cold for the past week. It has been storming constantly in the mountains and considerable new snow has fallen.

Just as we go to press another very rich strike of gold ore is reported to have been made by J. C. Roeper and Arthur Robinsen about a mile south of the Johnson.

A fine lot of placer gold has been brought in from Mazourka during the week. Paul Honard has strack a pay streak which promises to pan out well.

It is reported that W. R. Johnson has sold a mine in the Slate Range for $12,000 and got the money. We are glad of it. Bill is entitled to a streak of good luck.

About half a dozen bards of sheep have come up from the south, and this is about all that will come in this year. The forest patrolmen are watching them closely, and none are allowed even in the foothills.

The Silver Peak mines are advertised at public sale by United States Marshall to satisfy the mortgage interest of John I. Blair, amounting to over $600,000. The sale will take place about the end of next month. Expert miners claim there is enough ore in sight to keep a fifty-stamp mill running fifty years, and expert lawyers claim there are enough lawsuits pending over the title to keep a dozen lawyers busy a hundred years. As old Frank Reinhardt used to sing, "It will all be the same one hundred years hence."

Last Sunday evening, Tommy, the youngest son of Mr. and Mrs. J. W. Lacey, had his leg broken below the knee. In company with his brother he was riding in a cart drawn by a little burro. The animal became frightened, ran through the sagebrush and overturned the cart, the little fellow's leg getting caught in the wheel, resulting in breaking the large bone. Dr. Woodin was called as soon as possible, and he reports his patient doing nicely. The accident occurred near the family residence at Georges Creek.

At the end of last week Dr. Doyle was telegraphed for from Bishop to attend Jesus Coronado. Some time ago the old man was bitten by some venemous insect on the left hand, and blood poison set in. The disease kept spreading until the entire left arm is in a fearful condition, and it was hoped to prevent the further spread to the body by amputation; but when Dr. Doyle arrived it was too late. The doctor opened the pus sacs, inserted drains, and the old man is very much improved. He was brought to the Hospital on Wednesday by John Clarke.

Big Pine News.

BIG PINE, April 26, 1899.

ED. INDEPENDENT:

The "finds" of the prospectors of Independence have given quite an impetus to mountain climbing on the part of our people. Some quite flattering prospects have already been located. The Blake brothers have located and are developing a lead claim east of the old Montezuma, which carries 70 per cent lead and 60 oz. of silver per ton. Mr. Otter, late of Colton, has a very flattering prospect about three miles east of the Montezuma, which he thinks will pay in lead. The Lead canyon district is forging to the front. Quite a number of Big Piners are working there, and shipments of ore are going out to test the paying qualities of the claims. More earnest prospecting is going on from the hamlet than for many years.

The good ones of the camp will celebrate the feast of nations at Educational hall on the 5th of May, 1899. Just what the rites and ceremonies are to be, your philosopher can't state at the present writing, but one feature has been announced in "barn-door type", towit: standard and noted dishes of the eat of all nations. All the nations of earth will be represented by booths punctuated by the national colors of each. The opportunity of a life time will be offered the Christian palate to sample the viands of the universe from the patriotic pumpkin pie of the Plymouth Rock brood to the mysterious meat pie of the Celestial empire. Skilled caterers have been employed for months in studying the construction of the foreign dietary scale, and no doubt many fearful and wonderfully made "eats" will be flavored with the sight of national flags and costumes. In addition to the above, an entertainment musical and literary will be given in which the various nations of earth will be illustrated.

The preparations for the celebration of Memorial Day at the hamlet are progressing nicely, and it is expected that one of the largest concourses of people will be in attendance ever brought together in Inyo on a similar occasion. Doc Graham, Junior Vice Commander of Gen. John A. Logan Post, G. A. R., is displaying rare executive ability in the preparations for the occasion.

A little waif floated ashore from the pond of oblivion against the south-west corner of the hamlet one day last week, which should immortalize one of our most enterprising and worthy citizens, namely, Dad Schowalter.

A delegation from Inyo composed of desert freighters were congregated at the Mojave depot loading for home. King Bellows, monarch of the goat industry of the desert, was being grilled by a loquacious tourist of the Boston brand, full to the necktie with yankee inquisitiveness. Among other conundrums propounded to Bellows by the four-eyed tourist was the pointed inquiry about the mysterious and miraculous quality of the waters of Mono and Owens lakes, made with the avowed desire of testing the veracity of Mark Twain. "Is it a fact, Mr. Bellows that the water of Owens lake contains in solution divers and sundry constituents so held that when coming in contact with solid substances—" Here the goat man fortunately espied the sawmill man of the hamlet, Mr. S. H. Spratt, waiting his turn to load his schooner. "Samuel was called up" and introduced to the globe trotter, and the question was submitted to him. He replied that Mark Twain was all the same as the late lamented George Washington in the matter of the Mono lake fluid, as far as *his* limited investigation of it qualified him to state, and that he regretted exceedingly that he didn't have time to enter into the ramifications of the subject. But he must load at once for his return to Inyo as he was in haste to get back to Owens lake as soon as possible; for when he passed the lake on the way down he had stopped to load his team on the margin of the wonderful lake, and when he started he pulled out half a carload of borax which had crystallized on the shadow of his outfit. Quite naturally, he was anxious to make a shipment and take out a patent on the method.

Yours Respectfully,
E. SPENCER

New Stage Line.

W. K. Miller has received a contract to carry the mail from Darwin to Ballarat, three trips a week. He will increase the Ballarat and Johannesburg service to three trips a week and will make close connections from Keeler through. He is now at work fitting up the line, and will run a first class passenger service from Darwin to Johannesburg, connecting at Darwin with Anthony's stage from Keeler. Mr. Miller is a thorough stage man, and will make a determined bid for the southern passenger traffic. He will arrange that the fare to Los Angeles will be the same as at present charged, and the distance to be staged will be less. Just as soon as the date of opening is determined upon, full particulars will be published.

Ballarat Briefs.

Mrs. Dewey is very ill with pneumonia.

J. S. Stotler has returned from a visit to San Francisco.

The Godmark & Harrison ten-stamp mill is now running full twenty-four hours. The tramway, which at first caused considerable trouble, is now working well.

Monty, Clare and Doc have organized a winchester brigade and are engaged in dog hunting. Ha mon has taken to the brush.

George Montgomery broke his left arm last week in coming down Panamint canyon after dark. The wagon axle broke, and he was thrown out. Dr. McDonald set the broken arm, and he is doing very well.

Charley Shepherd has gone to Independence to have some deeds recorded.

Tim Henebry says he will live in town from this on.

Legal Holiday.

EXECUTIVE DEPARTMENT,
State of California.
SACRAMENTO, April 19, 1899.

On May first, A. D. 1898, Admiral Dewey, commanding the American Fleet, entered the Bay of Manila, Philippine Islands, and in a conflict to be famed in naval history, completely destroyed the hostile Spanith Fleet, thereby manifesting the prowess of America upon the seas.

The first day of May, A. D. 1899, will be the first anniversary of this celebrated naval engagement, and it appearing to the Executive that said day should be set apart for appropriate and patriotic public expressions by our people:

Now, Therefore, I, Henry T. Gage, Governor of the State of California, by virtue of the authority vested in me by the Constitution and laws of said State, do hereby proclaim Monday, the first day of May, A. D. 1899, a holiday.

In Witness Whereof, I have hereunto set my hand and caused the Great Seal of this State to be hereunto affixed, this 19th day of April, A. D. 1899

HENRY T. GAGE,
Governor of the State of California.

Attest:
C. F. CURRY, Secretary of State.

The Tax Rates.

The following is the rate of taxation on each one hundred dollars of valuation of this county from 1866 to the present date.

1866, $1.25	1883, $3 25
1867, 2 66	1884, 3 25
1868, 2.98	1885, 3.25
1869, 3 00	1886, 3.00
1870, 2 58½	1887, 3.00
1871, 3.00	1888, 2.50
1872, 2.50	1889, 2 50
1873, 3 00	1890, 2.50
1874, 3 00	1891, 2.30
1875, 3 00	1892, 2 00
1876, 3.00	1893, 1 80
1877, 3 00	1894, 2.00
1878, 3.00	1895, 5.50
1879, 3 00	1896, 2.15
1880, 3 50	1897, 2.50
1881, 3.50	1898, 2.25
1882, 2 25	

OFFICIAL.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Edouard Chenot, deceased.

It appearing to this Court, by the petition this day presented and filed by J. E. Shepherd and W. I. Hunter the Executors of the Last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said decedent, to pay the debts of decedent and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said Superior Court on MONDAY, the 29th day of May, A. D. 1899, at 10 o'clock a. m. of said day, at the court room of said Court, at the Court-house, in the town of Independence, in the county of Inyo, State of California, to show cause why an order should not be granted to the said Executors to sell so much of the real estate as shall be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated April 24th, 1899.
P. W. FORBES, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant.

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 20th day of April, A. D. 1898. D. J. HESSION,
(SEAL) Clerk.
By C. N. ROSE, Deputy Clerk.

NOTICE OF ASSESSMENT.

NEW STEVENS DITCH COMPANY.

Location of principal place of business, Independence, Inyo county, California. Location of works, Inyo county, California

Notice is hereby give that at a meeting of the Board of Directors, held on the 28th day of January, 1899, an assessment, No. 7, of 10 cents per share, was levied upon the Capital Stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at his office, in the Masonic Building, in the town of Independence, County of Inyo, State of California.

Any stock upon which this assessment shall remain unpaid on the 28th day of March, 1899, will be delinquent, and advertised for sale at public auction and unless payment is made before, will be sold on Wednesday, the 25th day of April, 1899 to pay the delinquent assessment, together with costs of advertising and expenses of sale.

Independence, Cal., January 28th, 1899.
P. W. FORBES, Secretary
Office in the Masonic Building, in Independence, California.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

ANNUAL MEETING.

The Regular Annual Meeting of the Stockholders of the Lone Pine Canal Company will be held at the office of the Company at Lone Pine on the last Saturday in April, April 29th, 1899, for the purpose of electing a Board of Directors to serve for the ensuing year, and the transaction of such other business as may come before the Meeting.

Dear Father (wrote the student)—Please send some money for a new book.

The new book had no leaves and was easy to carry in an inside pocket.—Boston Courier.

When coming to San Francisco go to Brooklyn Hotel, 208-212 Bush street. American or European plan. Room and board $1.00 to $1.50 per day; rooms 50 cents to $1.00 per day; single meals 25 cents. Free coach. Chas. Montgomery.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd., 930 Arch St., Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Piso's Cure for Consumption has been a God-send to me.—Wm. B. McClellan, Chester, Florida, Sept. 17, 1895.

CATARRH CANNOT BE CURED

With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials, free.

Sold by Druggists, price 75c.
Hall's Family Pills are the best.

A Reminder.

Perhaps one of the most unique ideas for causing an umbrella that has been exchanged by mistake to be returned to its owner is that of a Bangor gentleman who has painted in bold, white letters on the inside of his earthly parachute the following reminder, "Stolen from John ——, —— Ohio st., Bangor, Me."—Exchange.

"Out of Sight Out of Mind."

In other months we forget the harsh winds of Spring. But they have their use, as some say, to blow out the bad air accumulated after Winter storms and Spring thaws. There is far more important accumulation of badness in the veins and arteries of humanity, which needs Hood's Sarsaparilla.

This great Spring Medicine clarifies the blood as nothing else can. It cures scrofula, kidney disease, liver troubles, rheumatism and kindred ailments. Thus it gives perfect health, strength and appetite for months to come.

Kidneys—"My kidneys troubled me, and on advice took Hood's Sarsaparilla, which gave prompt relief, better appetite. My sleep is refreshing. It cured my wife also." MICHAEL BOYLE, 373 Denny Street, Pittsburg, Pa.

Dyspepsia—"Complicated with liver and kidney trouble, I suffered for years with dyspepsia, with severe pains. Hood's Sarsaparilla made me strong and hearty." J. B. EMERTON, Main Street, Auburn, Me.

Hip Disease—"Five running sores on my hip caused me to use crutches. Was confined to bed every winter. Hood's Sarsaparilla saved my life, as it cured me perfectly. Am strong and well." ANNIE ROBERT, 49 Fourth Street, Fall River, Mass.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills, the non-irritating and only cathartic to take with Hood's Sarsaparilla

Religion.—Religion is a matter between yourself and God.—Rev. G. W. Stone, Unitarian, Kansas City, Mo.

Rational Beliefs.—The two rational beliefs are Calvinism and Universalism.—Rev. I. P. Goddington, Universalist, Rochester, New York.

Knows God.—He who knows Jesus Christ knows God, and he only does.—Rev. Dr. Behrends, Congregationalist, Brooklyn, New York.

A Strong City.—God with man makes him a strong city; man without God is a ruined city.—Rev. W. H. Carward, Methodist, Chicago, Ill.

The Mind.—The mind has no conception of what it is to be tired or impaired, but it knows when its instrument is.—T. B. Wilson, Theosophist, Kansas City, Mo.

Church of Christ.—Pure hearts and clean hands upbuild the cause and Church of Christ.—Dr. Alfred Farlow, Christian Scientist, Kansas City, Mo.

Immortal Man.—If man be not immortal, then God has planted falsehood in the very center of our being.—Rev. J. F. Carson, Presbyterian, Brooklyn, N. Y.

Necessary Agency.—Every agency whether civic, religious or educational doing the work of Christianity, is necessary.—Rev. Reuben Thomas, Congregationalist, Boston, Mass.

The Supreme Interpreter.—The church will hold Christ as the supreme interpreter. In him is the interpretation of nature, of man, of God.—Dr. G. H. Combs, Kansas City, Mo.

National Idea.—The American national idea is personal liberty; the liberty of the individual man, because he is man.—Dr. Conaty, Roman Catholic, Catholic University, Washington, D. C.

Capital Punishment.—Our capital punishment is a social crime, inherited from the dead, and is a confession of the weakness and pusillanimity of society.—Rev. B. Fay Mills, Evangelist, Boston, Mass.

Human Glories.—How fleeting human glories are and how short is the duration of earthly happiness. The true happiness is founded on Christ in devotion to his religion.—Cardinal Gibbons, Roman Catholic, Baltimore, Md.

To Be Truly Great.—A man to be truly great and to have all his noblest powers aroused needs to feel that thrill and throb of the long yesterdays and the quivering pulsations of the great to-morrows.—Rev. Geo. B. Vosburg, Baptist, Denver, Colo.

Theosophists.—Theosophists are as much fatalists as are Mohammedans. There is an iron law of remorseless necessity, of unchanging and unchangeable force. There is no possibility of setting fate aside; the only thing you can do is to submit.—Dr. Dille, Methodist, Oakland, Cal.

A Character.—Three things will build up a character, the refusing to do wrong, the acceptance of the Divine Providence and the practicing his will. These will make a character conforming to the will of God, and such conformance is heaven, and abideth forever.—Rev. Wayland Hoyt, Baptist, Minneapolis, Minn.

Detraction.—Some sins may be peculiar to certain professions, to certain times, to certain places. Detraction presents itself to all professions, in all ages and in all places. It is evil in itself and in its motives. Envy, jealousy, hatred, pure malice; these are the motives of detraction.—Father Dubolse, Roman Catholic, San Francisco, California.

The Power of the Church.—There is in the church a power which tells men what to believe in a very dogmatic way. This power is infallible, being the voice of the Holy Ghost. Freedom of conscience is a gigantic error; God has a right to regulate what men should think, and man is amenable in his thought only to God.—Rev. Dr. Breen, Roman Catholic, Rochester, New York.

A MOST POPULAR GARMENT.

The New Features of This Year's Shirt Waist.

The ever-comfortable shirt-waist has such a hold on the feminine heart that it promises to be worn the coming season almost to the exclusion of everything else. Our illustration combines charmingly all the new features that distinguish this year's waists from

THE NEW SHIRTWAIST.

those of last season, namely round-cornered collars, huge pearl buttons to fasten and lengthwise tucks. The vogue of the lengthwise tucks has probably been brought about from the desire for change, for certainly crosswise effects have been run into the ground. Another craze for white waists is assured for next summer, with all-over Swiss shirt-waists for a novelty. The shape of the new waists differs very little from those of last year, except in the matter of smaller sleeves.

Worthy of Note.

Turin held an international exhibition last summer which will remain noteworthy through the receipts having exceeded all expenditures by $120,000. No sooner was the result known than the Italian Government sent in a tax bill, demanding 10 per cent. of the profits.

Every starving doctor cordially hates the doctor who is making a success of his profession.

An appetite for pie, and a stomach that will not stand pie, always go together.

OPEN LETTERS FROM

Jennie E. Green and Mrs. Harry Hardy.

JENNIE E GREEN, Denmark, Iowa, writes to Mrs. Pinkham:

"I had been sick at my monthly periods for seven years, and tried almost everything I ever heard of, but without any benefit. Was troubled with backache, headache, pains in the shoulders and dizziness. Through my mother I was induced to try Lydia E. Pinkham's Vegetable Compound, and it has done me so much good. I am now sound and well."

MRS. HARRY HARDY, Riverside, Iowa, writes to Mrs. Pinkham the story of her struggle with serious ovarian trouble, and the benefit she received from the use of Lydia E. Pinkham's Vegetable Compound. This is her letter:

"How thankful I am that I took your medicine. I was troubled for two years with inflammation of the womb and ovaries, womb was also very low. I was in constant misery. I had heart trouble, was short of breath and could not walk five blocks to save my life. Suffered very much with my back, had headache all the time, was nervous, menstruations were irregular and painful, had a bad discharge and was troubled with bloating. I was a perfect wreck. Had doctored and taken local treatments, but still was no better. I was advised by one of my neighbors to write to you. I have now finished the second bottle of Mrs. Pinkham's Vegetable Compound, and am better in every way. I am able to do all my own work and can walk nearly a mile without fatigue; something I had not been able to do for over two years. Your medicine has done me more good than all the doctors."

Secret of the Telephone Discovery.

Professor Alexander Graham Bell is reported to have explained in a lecture how he came to invent the telephone as follows:

"My father invented a symbol by which deaf mutes could converse, and finally I invented an apparatus by which the vibrations of speech could be seen, and it turned out to be a telephone. It occurred to me to make a machine that would enable one to hear vibrations. I went to an aurist, and he advised me to take the human ear as my model. He supplied me with a dead man's ear, and with this ear I experimented, and upon applying the apparatus I found that the dead man's ear wrote down the vibrations.

"I arrived at the conclusion that if I could make iron vibrate on a dead man's ear I could make an instrument more delicate which would cause those vibrations to be heard and understood. I thought if I placed a delicate piece of steel over an electric magnet I could get a vibration, and thus the telephone was completed.

"The telephone arose from my attempts to teach the deaf to speak. It arose from my knowledge, not of electricity, but as a teacher of the deaf. Had I been an electrician I would not have attempted it."—Electrical World.

Vitality of Snails.

The snail is blessed with great powers of vitality. A case is recorded of an Egyptian desert snail which came to life upon being immersed in warm water after having passed four years glued to a card in the English museum. Some species, in the collection of a certain naturalist, revived after they had apparently been dead for 15 years; and snails, having been frozen for weeks in solid blocks of ice, have recovered upon being thawed out. The eggs are as hard to destroy as the snail itself. They seem perfectly indifferent to freezing and have been known to prove productive after having been shriveled up in an oven to the semblance of grains of sand.

No household is complete without a bottle of the famous Jesse Moore Whiskey. It is a pure and wholesome stimulant recommended by all physicians. Don't neglect this necessity.

The Obvious.

In the meanwhile there had come among them another the purpose of whose thought it was to eliminate the esoteric from the obvious.

"In hard times," mused this person, "the people talk of nothing but the money question!"

"Well, it is then they have no money to speak of!" retorted the unconscious imbecile, thus revealing his identity.—Detroit Journal.

Guilty Conscience.

Miss Peerseeker—Oh, baron, I would so much like to hear you tell again about how King Ludwig presented you with a decoration when you were a mere little shaver, and—

The Baron Barberossa—A leedle shaver! I did not shave any one ven I was leedle. I did not learn my trade until—(recollecting himself)—dot is—I did not learn a trade at all.—Harlem Life.

TAPE WORMS

"A tape worm eighteen feet long at least came on the scene after my taking two CASCARETS. This I am sure has caused my bad health for the past three years. I am still taking Cascarets, the only cathartic worthy of notice by sensible people."
GEO. W. BOWLES, Baird, Miss.

JIMMIE · AND · JANE.

THOSE were their names—Jimmy and Jane. Everybody in the village knew them; they had many friends; yet all agreed with wonderful unanimity that they were two of the strangest individuals ever seen.

Jimmy—his full name was James Bradford—was a bachelor of about 50 years, reputed to have a stocking full of gold and silver coins, which he kept in his feather bed. He was a noted hater of women and seldom spoke to one.

Jane—or more properly Miss Jane Green—was called an old maid, lived in a tiny house by herself, and had a holy horror of the biped man. Her age was "uncertain," but her 40th birthday was of the past.

Jimmy took life easily, but was opposed to ostentation and the modern acceptance of the term "luxury."

He dressed without regard to fashion, but within the bounds of respectability. He even rode out in his own carriage, but it was by no means a modern vehicle; it had done service, he would proudly tell you, since his grandfather's days, quite a century ago.

He cared little for books; society he abominated, because it was spoiled by admitting women, and of the few diversions that went to make up the sum of his life's pleasures, fishing held the place of prominence.

Even in the pursuit of this gratification Jimmy was not free from harassment, for he was obliged to pass by the door of a cottage occupied by a woman in order to reach the river. The woman was no other than Jane.

One bright afternoon in September Jimmy was lounging along the river bank when the splash of oars in midstream fell upon his ears. He looked in the direction of the sounds, and then a scowl wrinkled his forehead.

"Humph!" he muttered, "that old maid Jane Green is trying to row over to Ned Brown's. She'd better be home drinking tea. Most likely she'll manage to get drowned. What a fuss she makes, splashin' an' flappin' about."

He pulled up his line with an angry jerk, put a fresh worm on the hook and then cast out the line again, with an outlay of strength quite unnecessary, unless to give vent to his indignation.

The "splashin' an' flappin' about," instead of dying away in the distance as the boat reached the other side of the river, grew louder and more disturbing, and, half in wonder, half anger, Jimmy looked around again.

"Drat the luck!" he cried. "If she ain't gone and rowed right smack inter that eddy—the only one within two miles at that. If that ain't jest like a fool woman I'd like to know what 'tis like."

Just then his attention was attracted to his line, and Jane's peril was for a moment forgotten.

A forcible reminder came in the form of a loud, piercing scream, followed by a frightened appeal for help.

"There, jest as might ha' been expected! The first bite I've had for an hour, and that miserable woman had to let out a scream an' scare the fish away."

"Help! Help! I shall drown!" screamed the woman.

There was no question about it, Miss Jane was in great peril. Her boat, an old leaky shell—was twirling about, the rapid, rotary motion causing at frequent intervals foamy waves to splash over its sides, and it bade fair to sink in short order.

"Let her drown!" growled the woman hater, savagely. "There'll be one less woman—gosh! she will go down as sure as fate. Bein' a sort of human critter, I s'pose I'll hev' to pull her out, er the neighbors 'll lynch me."

His own boat happened to be near at hand, and a few rapid strokes brought him as near the eddy as safety permitted.

"Here!" he cried, grumbling, as he threw out a rope, "ketch hold of that, if you don't want to drown."

Miss Jane had been so occupied with her fears and struggles that up to this

THE SPLASH OF OARS FELL UPON HIS EARS.

moment she was unaware that assistance had arrived. At the sound of his voice she turned quickly.

"Merciful heavens! Jimmy Bradford, of all men! lemme drown!"

"Don't be a tarnation fool, Jane Green! Ketch hold of that rope an' I'll pull you out."

"Never!" cried Jane, spurting out a stream of water from her mouth, and paddling desperately with both hands to keep afloat.

"Then I'll pull ye out, anyhow!" ejaculated Jimmy. "I never knew any livin' woman had such grit. You're too plucky for fish bait, an' I'll save ye, whether or no."

Despite Jane's gurgled protests, he hurriedly hauled in the rope, formed a slipnoose at one end, and hurled it over the half-drowned woman's shoulders. Then he exerted his strength in a vigorous pull, which Jane resisted with all her waning powers, and succeeded in lifting her into the boat.

"Oh, dear!" she gasped. "And to think that I should owe my life to Jimmy Bradford," and then, too much exhausted to bear up any longer, she closed her eyes and fainted away.

"Wuss and wuss!" cried Jimmy. "Did ever a man hev such luck? What in the world am I goin' to do with a faintin' half-drowned woman, I'd like to know? I've half a mind to leave her here in the boat an' start for home."

He drew the boat up on the sloping shore and after carrying Miss Jane to a sheltered spot beneath a widespreading willow tree, proceeded to restore her to consciousness. When she opened her eyes the first thing that met her gaze was Jimmy's face.

"Oh, my soul!" she gasped, feebly. "Am I in the power of the Evil One?"

"Draw it a little mild, Jane Green. I ain't the Evil One, nor no kin to him,

"AN' SET THE HULL TOWN TO TALKIN'," SAID JANE.

as I knows on. An' you're showin' mighty little appreciation for havin' your life saved, I can tell ye."

"Wall, said Jane, after a moment's thought, "perhaps I was a little too harsh. I s'pose there are wuss bein's on the face of this airth than you be. I reckon you'd set all the tongues o' scandal waggin' against me."

"You're too plucky a woman to feed fishes on, an' too good-looking, too."

Jane's pale face changed in a moment to a deep carnation hue, and her tone might have indicated either real or pretended reproach as she replied:

"Same on ye, Jimmie Bradford, to make fun of a misfortunate an' defenseless woman. I'll go home this minute."

She arose, trembling and weak, and attempted to walk away, but staggered and was obliged to grasp a branch of a tree for support.

"You're too weak to go home now, Jane," said Jimmy, approaching. "You'd better stop a while longer."

"So you could make more fun of me, I s'pose," said she tartly. "No, thank you, Mr. Bradford."

"I didn't say more'n I meant, Jane Green, nor more'n I'd say another time. I never knew before that women had so much gumption. But if you're bound to go, I'll give you a boost, for you couldn't get there alone. Here, take my arm."

"An' set the hull town to talkin'," cried Jane.

"Talin't best that they talk," retorted Jimmy. "The first one that says a word ag'inst you will feel that," exhibiting a hard and formidable fist.

After considerable persuasion, Jane was at last induced to take his arm, and off they walked, a most singular looking couple.

"Now be careful an' see that you don't take cold after yer duckin'," said Jimmy, as they reached the woman's home. "You'd better make you some hot ginger tea at once. An' if you'll agree to it I'll drop in to-morrow an' see how you are."

Jane agreed to it coyly, and Jimmy turned away, with new and strange feelings lingering in his breast.

"Blest if she ain't a plucky one," he said to himself. "I never seen a woman before that had any sense. She'd make a good wife for a feller that liked women folks."

But a month later found her the wife of a man who did not like women folks, and that contented individual was no other than Jimmy Bradford.

Why the Trick Failed.

A conjurer was exhibiting in Nashville, and prepared in the usual way for the well-known trick of passing a marked coin into the center of an uncut orange.

He found an intelligent urchin, and promised to pass him into the show provided he agreed to come on the stage at a given signal. Of course the urchin assented. The boy was provided with a marked dollar, and when the curtain rose he was in the front row.

The professor proceeded to borrow a dollar in the audience, marked it similarly to the one in the urchin's pocket, and, after some flourishes, passed it into the orange, from which he extracted it.

"Now," he said, "I'm going to ask some member of the audience to step on the stage, and then I'll pass the dollar into his pocket without going near him."

The youngster stepped up; the conjurer made the usual flourishes. "Now, my boy," he said, "put your hand in your right-hand trousers pocket and give me the dollar."

The boy looked sheepish, but he dived his fist down. Then, to the horror of Hertz, he produced a handful of silver and said: "I've only got ninety cents of it left, sir."—Saturday Evening Post.

A Wonderful Shooting.

Sergeant Matthews, of the Civil Service Volunteer Rifles, has made a world's record of 105, all bull's eyes, shooting from the knee, under the Queen's first stage conditions of seven shots each at 200, 500 and 600 yards, in a recent regimental competition.

THE BEST SPRING TONIC.

As winter passes away it leaves many people feeling weak, depressed and easily tired. This means that the blood needs attention and sensible people always take a tonic at this time of year. Purgatives are not the right medicine — they weaken instead of strengthening.

Dr. Williams' Pink Pills for Pale People are the best tonic medicine in the world and do not act on the bowels. They stimulate the appetite, enrich the blood, strengthen the nerves and make people feel bright, active and strong.

No one is better able to speak of this fact than Miss Hazel Snider, a charming young woman of Arlington, Ind. To-day she has rosy cheeks, sparkling eyes and a plump form, which prove that she is in good health. A year ago Miss Snider was very thin, her cheeks pale, eyes sunken and dull. She was troubled with nervousness and general debility. She says:

"After several months treatment from the family physician we saw he could do no good. I was discouraged and did not know what to do. One day I read an item in a paper of the wonderful curative qualities of Dr. Williams' Pink Pills for Pale People. I tried the medicine, and when nearly through with the second box noticed a change for the better. After I had taken eight boxes I was cured, and have had no occasion to take any kind of medicine since. I owe much to Dr. Williams' Pink Pills for Pale People, probably my life, and I advise any one suffering with troubles similar to mine, to take these pills."
Miss HAZEL SNIDER.

Sold by all druggists or sent post paid by the Dr. Williams' Medicine Co., Schenectady, N.Y., on receipt of price, 50¢ per box; six boxes, $2.50.

DENS OF HORROR.

The Prisons of Morocco Are Hotbeds of Deadly Disease.

The prison system and treatment of prisoners are worse in Morocco than in any other country in the world.

Men are arrested—often merely to spite some one whom they have been so unfortunate as to offend and who possesses some power—and flung into prison, where they would be left to starve did not their relatives or friends bring them food, for no arrangements whatever are made by the authorities for the feeding of prisoners. All that is provided is a prison, generally crowded with prisoners dying in the most loathsome and infectious diseases, dark and unventilated, and custodians who are quite as brutal and savage as the prison system itself.

Prisoners are cast into these hotbeds of disease, generally without the most farcical pretense of a trial, to die and rot if their crimes are light or their enemies impotent. Otherwise they are probably tortured in some way or another. Starving merely is too good for them in the opinion of the authorities.

Not long ago a merchant who had dared to claim payment for goods supplied to a friend of one of the court officials was cast into prison without trial, and after suffering torments in the midst of a mass of diseased humanity for months was taken out, shoved into a barrel fitted with long spikes and rolled down a high steep hill. The barrel eventually plunged into the sea with its torn and mangled cargo. Imprisonment, torture and death for daring to present his bill!—Cincinnati Enquirer.

Naval Heroes In the Abbey.

The well known saying, "Westminster abbey or glorious victory," attributed to Nelson when he boarded the San Josef at the battle of Cape Vincent, seems to point to the hero's own wishes as to an abbey grave. But for some unknown reason, when the end came at the famous battle at Trafalgar (1805), Nelson was buried at St. Paul's, and the abbey authorities, finding crowds going there to gaze on his last resting place, had an effigy made of him and set it up near Kempenfelt's monument, in order to attract people back to Westminster, with the desired result.

The figure now stands in the Islip Chantry chapel with the other funeral effigies, and is a very lifelike and good representation of the great man. It is said to have been copied from a smaller figure for which Nelson sat, in all the clothes except the coat he actually wore. Maclise, who borrowed the hat for his picture of the "Death of Nelson," found the marks of the eye patch on the inner lining and the stamp of the period in the crown.—Pall Mall Magazine.

Consistent to the Last.

"If I was to commit suicide at sea," said Weary Walker as he shifted the hay band on his left foot, "I'd jump from th' bow of th' boat."

"An why not from th' stern?" queried Limpy Lannigan.

"If I jumped from th' stern," said Weary, "I couldn't avoid th' wash!"—Cleveland Plain Dealer.

An Improved Brooder.

The Orange Judd Farmer gives comprehensive illustrations of an improved brooder.

Fig. 1 shows the brooder complete with cover raised. The hover is shown within the top. The upper dotted line shows the position of the matched board floor and the lower dotted line shows the position of the sheet iron beneath which the lamp stove is placed.

Fig. 2 shows the drum of sheet iron, or galvanized iron, which is attached to the edge of a circular opening in the floor, as shown in Fig. 3. This cut shows the floor, the sheet iron and the two inch space between them with the lamp underneath the sheet iron. The

FIG. 1. BROODER COMPLETE.

air above the sheet iron is warmer and rises through the drum, escaping through the small openings under the top, out into the brooder. A cloth curtain is hung around the edge of the broad top of the drum, forming a hover, into which the chicks go for warmth. This curtain is "slashed" up every few inches. Openings in the sides of the brooder admit air to the lamp to the space between the sheet iron and the floor above, and also ventilate the brooder chamber. These openings from the brooder chamber can be controlled by corks in very cold weather.

The brooder can be made any size up

FIG. 2. FIG. 3.
SHEET IRON DRUM. LAMP, FLOOR AND DRUM.

to 3x4 feet, which is large enough for seventy-five chicks. It can be heated with an incubator lamp or any good lamp with No. 2 burner and large oil chamber.

Currants for Profit.

There is no kind of small fruit that is so sure a crop if kept from the worm as the currant. It also generally sells at a good price, with the advantage to the grower that the currants will remain on the bushes two or three weeks, not only without injury, but each day growing better after they are colored. This may not altogether prevent a glut in the market, but it at least gives the currant grower more time in which to market his fruit. The only drawback to currant growing is the currant worm, but this is so easily killed by timely applications of hellebore powder that it is really an advantage to the grower who uses it in time, as it destroys the currants of so many others who would otherwise be his competitors. There is nothing usually to be made in what everybody can produce very easily.—American Cultivator.

Stretching Barbed Wire.

Barbed wire is uncomfortable stuff at the best. One of the easiest ways, perhaps, to handle it when placing it upon posts is with the device shown in the accompanying illustration, which is from the American Agriculturist.

BARBED WIRE DEVICE.

This frame can be quickly made and from it the wire can be unreeled as rapidly as a man can walk, pulling the framework after him. When his companion is ready to staple the wire to a stake, the pin is put through the side of the frame, locking the reel, when the wire can be pulled up as taut as desired.

Trees by the Roadside.

Many farmers when setting out trees by the roadside make the mistake of planting only one variety, which happens to be the one that they particularly admire. But variety of scenery adds much to its attractiveness, and a row of trees of different kinds shows in the varying foliage far more beauty than a single variety could do. Besides, where there is a long row of trees, some will be on low and wet soil, and others on that which is high and dry. Besides, each kind of tree should have the particular soil that it is best adapted to. An exception to this rule of interspersing varieties is found where rows of sugar maples are planted along roadsides, to be tapped for sap when old enough. It is then economy to have the trees in unbroken rows, so that the sap may be gathered more easily. A row or grove of maples near the house will usually be tapped every spring, while the more distant sugar bush may be neglected, when the woods are full of deep snow and it is hard work to get into them.

How to Secure Large Potatoes.

It will pay to thin potatoes to one stalk in a place and so give all the strength and moisture of the land to those that remain. It might be well to cut all eyes of the potatoes when planted, except such as are desired to grow, and so save the trouble of thinning out the field to some extent. There is no profit in growing a large crop of potatoes unless they are of merchantable size. The largest potatoes are always found where the largest and strongest stalks grow, and the small ones where they are small and weak. It is a mistake to plant small seed, or to cut the large ones to one or two eyes to save seed and to reduce the number of plants, as the common practice is. It is much better to plant whole potatoes of good size, or, if large, to cut them at most only in halves. Of course, it will cost more to seed a field, but with good seed properly planned, much better results can be obtained.

If one desires to raise the largest quantity possible from a few seed, great results can be obtained by taking off the shoots and transplanting, but the potatoes will not grow large. It may not be known to some people that each eye in a potato is capable of producing a large number of shoots; as fast as taken off others will grow. Usually not more than two or three to each eye will start when planted, but that number is far too many to be left to grow.—Orange Judd Farmer.

Corn.

But for the great corn crop made in the South last season the price would be mountain high, and the cotton States would be badly stranded. The escape from the peril incident to being caught between the rocks of 4½ cent cotton and $1 corn, should afford a warning never to be forgotten.

It is among the probabilities of the near future that the Gulf States will be called upon to reverse the old order of things and ship to the West, for the unfertilized lands of that section are not responding with their old-time harvest of that cereal.

For the next few years, and perhaps always, there will be a splendid market for corn and hay in Cuba and Porto Rico, that we ought to capture and control; and when the work begins on the Nicaragua Canal the Gulf States should supply the corn and forage consumed in course of construction, as well as the cattle, mules and lumber; and later on we should make enormous shipments of these products through the great canal.—Aberdeen Ex.

Preparation for Clover.

Usually there is not much difficulty in securing a stand of clover, but owing to a diversity of soils there are occasionally small areas upon which the young clover plants fail to grow. To guard against this failure haul manure direct from the horse stable and scatter it thinly over those places. Straw should be used liberally for bedding, and during the winter enough manure will be made to cover several acres. The soluble parts of the manure are washed into the surface soil, where they are easily available for the young clover plant. The straw serves as a mulch, affording considerable protection should an early drouth follow. Clover haulm can be used the same way, thereby getting the benefit of any seed remaining in it. Whatever the method employed, we cannot be too thorough in the preparation for the clover crop.—Orange Judd Farmer.

Variation of Cultivated Plants.

Most of the forest trees have very little variation from their original stock when grown from seed. With trees that have been long in cultivation, the variation is so much greater that the only way to secure the identical variety desired is by budding and grafting. It is probable that cultivation and better care given to trees and plants has much to do with making new and better varieties. It is after seasons that are unusually favorable to fruit of all kinds that the best varieties have been originated. It is always worth while to plant the seed of extra choice fruit and see what variety will come from it.—Exchange.

Home-Made Cheese for Farmers.

A great deal of the complaint of overproduction of dairy products would be obviated if more farmers made a practice each year of using enough milk for cheese to have a supply always on the family table. There is no better, cheaper or more healthful nutrition than can be found in cheese. It contains all the strength-giving nutrition for which meat is often eaten, and even when bought at retail, the cheese gives this much more cheaply than meat could do. Almost everybody likes cheese, and if more farmers made and used it, they would avoid the necessity of eating an excess of meat, as many now do, in hot weather.

Feeding Cotton-Seed Meal.

Cotton-seed meal is extremely difficult of digestion, and should never be given to young animals or those which from advanced age have a weak digestion. The hull which is shown by dark spots in the meal is almost entirely indigestible. Calves and pigs have been killed by eating small amounts of dark cotton-seed meal. Ruminant animals can digest it better, but it is so concentrated a food that it ought always to be fed with some bulky but less nutritious ration. A small amount of cotton-seed meal in a pailful of bran mash can be eaten safely by a cow.

That man who can afford to make enemies is certainly rich in expedients.

SHORE OF NEWFOUNDLAND.

Territory a Bone of Contention Between England and France.

Newfoundland has recently filled a very prominent position in the English and French press. In the Parisian journals it has occupied the largest space, second only to the Dreyfus case. The question at issue between the two countries is an important one, and its importance arises from the fact so clearly stated by the French rear admiral, Reveillere: "Our presence," as he says, "on the French shore is a perpetual menace of a dispute which has only been avoided by the display of extreme good will on the part of the two governments concerned." There has been keen friction, however, between French naval officers and the English colonists,

FRENCH SHORE VIEW OF HUMBER RIVER.

and disregard of the sovereign rights of England, so plainly defined in the treaty of Utrecht. But Rear Admiral Reveillere declared, evidently under governmental inspiration, that the French shore of Newfoundland had no kind of value for the French navy. This cuts the ground from all the arguments of the colonial party. The expenditure on Newfoundland, amounting to 1,000 francs for every French fisherman in the colony, serves no national purpose whatever; it is pure waste of French public money. The same amount would give the country annually over 5,000 excellent young naval recruits. For the first time the French government has dared to let the overtaxed millions know that for public purposes during the last fifty years 300,000,000 francs have been utterly thrown away in Newfoundland. But this is not all, or the only reason why the French government would welcome a settlement. Last year the French cod fishery in Newfoundland was a great failure on the northeast coast. Where there had been over a dozen establishments in 1893 there were only two, at St. Julien and Rouge. At the former fifty men caught seven quintals of cod per man, actual value less than £4, Rouge, about £8.

All the bounties France can give will not make such a business as this succeed, viz., a return of £489 to pay the expense of a large ship, food and pay for six months. Well, these amateurs refuse to go again to the northeast coast unless the government will give them a special subsidy over and above the bounty equal to the actual value of the cod and a special bonus of 50 francs per head. Hitherto on the west coast the fishery has been rather better, especially the lobsters. These crustaceans have gone up to an extraordinary price. Prices are now quoted at $9.50 to $10 per case, and the French pack, which in 1898 was worth $70,000—double the value of all the cod fishery—has kept the business alive; but the lobster fishery is contrary to the treaty. It is admitted by the French themselves, and

FRENCH FISHING HUTS.

is only permitted under a special modus vivendi made in 1890, and now the English government emphatically refuses to renew it. The Newfoundlanders have all along protested against it—hence Admiral Reveillere's manifesto. What does M. Lockroy, minister of marine, say to this Newfoundland expenditure? The real interest of France in Newfoundland lies in the bank fishery and the shipowners of Granville, St. Malo, etc., tell the ministry that a secure supply of bait from Newfoundland is worth twenty French shores. They know this could be arranged and that at present the whole success of their business is at the mercy of the colonists. Hence the stir about Newfoundland in France. Well-informed authorities believe that the French shore question can be readily settled.

Characteristics of Nations.

What are the distinguishing characteristics of the several nations of Europe? An Italian writer, Mr. Mantegazza, attempts in the current number of the Nuova Antologia to answer this question. It is a difficult question, he admits. The greatest difficulty arises from local prejudices, from which even the best men of each nation cannot quite free themselves. Our author points out all the evil things said by Germany of France after the Franco-German war, and adds that he was told by Virchow, who, if anyone, is calm and unprejudiced, that Italian science was greatly superior to German science—a judgment which Mantegazza himself thinks was as absurd as it was complimentary. Finally Mr. Mantegazza formulates the following definitions:

Italians—Aesthetic and erotic.

French—Impressionable, inconstant, erotic.

Germans—Ingenuous and enthusiastic.

English—Egotistic, religious, proud, hypocritical.

Spanish—Violent and proud.

Russians—Neurotic.

There is no nation, it will be seen, which is good except, apparently, Germany.

FRANCE'S NEW PRESIDENT.

He Is a Poor Man and Will Have to Practice Economy.

The new President of France is far more democratic and less inclined to ostentation than was his able but somewhat ridiculous predecessor. M. Faure courted the friendship and mimicked the ways of royalty and otherwise conducted himself as though ruling by divine right rather than by the will of the people. His chief pleasure was to kiss the hand of royalty, and he established a rule at the Elysee, the Paris residence of the President, that no one should presume to address the chief executive without being first spoken to by the latter.

M. Loubet is just the reverse of M. Faure in habit and inclination. He is a man of the people. Faure came up from the ranks, but his immense fortune and political power led him to forget his origin. Loubet is comparatively poor.

The Paris monarchical press cartoons Loubet as wearing felt slippers and tucking a corner of his napkin into his shirt collar. But instead of this rendering the new President ridiculous in the eyes of the masses, it only increases his popularity. The common people think no less of him because his aged mother still lives on a farm and wears peasant garb.

M. Loubet has no large private fortune and he will have to practice economy and conduct his office on a far different scale from that of his predecessors. France pays her President $125,000 a year in salary, and fully as much more in allowances of one kind or another, and yet this enormous income of a quarter of a million dollars has never been sufficient to meet the expenses of the French chief executive. Every one of the Presidents, from Thiers to Faure was immensely rich and all but one drew largely from his private fortune. President Faure is known to have spent in the neighborhood of a quarter of a million dollars over and above his official income in doing the honors to the Emperor and Empress of Russia on

M. LOUBET.

the occasion of their visit to Paris, while Marshal MacMahon found his salary and allowances so inadequate, especially during the exhibition of 1878, when he was called upon to welcome all sorts of foreign royalties to the French metropolis, that when he finally retired into private life he found that more than half of his large fortune had been spent at the Elysee. Mme. Carnot, who was a most careful manager, made no secret of the fact that her husband was obliged to dip heavily into his private income each year that he remained in office, and indeed the only President who managed to make both ends meet was the rich Grevy, who, like Loubet, was fond of wearing felt slippers, and who, more than once, was seen promenading in the gardens of the palace looking exceedingly comfortable, the aforesaid slippers being completed by a much worn jacket and a velvet smoking cap.

Shop-Worn Socks.

The National Advertiser tells a story of an old bachelor who bought a pair of socks and found attached to one of them a slip of paper with these words: "I am a young lady of 20 and would like to correspond with a bachelor, with a view to matrimony." Name and address were given. The bachelor wrote and in a few days got this letter: "Mamma was married twenty years ago. The merchant you bought those socks from evidently did not advertise or he would have sold them long ago. Mamma handed me your letter and said possibly I might suit you. I am 18 years old."

This Wisconsin's Electric Plant.

The battleship Wisconsin embodies all the electrical features that have been experimentally tried in the older vessels. Her electrical equipment consists of an incandescent lighting system, four large searchlights, apparatus for the operation of the two large turrets, electrical ammunition hoists and powerful electrically propelled fans for the elaborate ventilating system.

Bull Fighters on Bicycles.

Bull fights on bicycles are now a common sight in Madrid.

Age shows its approach in many ways on a woman. One is the appearance of a little shawl she begins to wear pinned tightly around her shoulders.

Young men cannot understand how it is possible to enjoy themselves without going out at night.

If a cat has nine lives we should accredit a kit-ten.

William M. Evarts was once going up in the elevator at the State Deprtment which was loaded with applicants for the minsterships and consulships. Turning to a friend who accompanied him, Mr. Evarts said: "This is the largest collection for foreign missions that I have seen taken up for some time."

Julia Ward Howe was once talking with a dilapidated bachelor, who retained little but his conceit. "It is time now," he said pompously, "for me to settle down as a married man, but I want so much. I want youth, health, wealth, of course, beauty, grace——" "Yes," said Mrs. Howe, sympathetically, "you poor man, you do want them all."

A poor Irish woman who had a son of whom she was very proud unintentionally paid him a very bad compliment. Speaking of the boy to the priest, she said: "There isn't in the barony, yer rivrence, a cleverer lad nor Tom. Look at thim" (pointing to two small chairs in the cabin); "he made thim out of his own head; and faith, he has enough wood left to make me a big arm chair."

During a discussion at a meeting of the Trinity College Historic Society, upon the slight consideration attached to life by uncivilized nations, a speaker mentioned the extraordinary circumstance that in China if a man were condemned to die he could easily hire another to die for him, "and," the debater went on, "I believe many poor fellows get their living by acting as substitutes in that way."

Rudyard Kipling, during his stay in Wiltshire one summer, met little Dorothy Drew, Gladstone's granddaughter, and took her in the grounds and told her stories. After a time, Mrs. Drew, fearing that Mr. Kipling must be tired of the child, called her, and said: "Now, Dorothy, I hope you have not been wearying Mr. Kipling?" "Oh, not a bit, mother," replied the small celebrity, "but he has been wearying me."

A party of visitors to the country were very much interested last summer by the remarks of some New York children, sent out by the fresh air fund for a week or two in the country. There were quite a number of them playing about a pretty farmhouse one day, when some passers by stopped and began to talk to them. "Did you ever see any chickens before?" asked one lady, as a flock of fowls came strutting down the lawn. "Oh, yes," said one of the eldest, wisely, with a knowing shake of his head; "we've always seen 'em—lots—only generally it was after they was peeled."

When Pope was first introduced to Lord Halifax, to read his "Iliad," the noble critic criticised this passage and that word at frequent intervals. The poet was stung with vexation, for the parts that most pleased him were the ones most criticised. As he returned home with Sir Samuel Garth, he revealed his displeasure. Oh," said Garth, "you are not acquainted with his lordship; he must criticise. At the next visit read him the same passages and tell him you have observed his criticisms." Pope made use of this stratagem. Lord Halifax was delighted, and exclaimed: "Pope, they are now inimitable!"

When the Lord Mayor of Dublin presented to Charles Stuart Parnell from the Irish people the Parnell tribute, out less than $185,000, his lordship naturally expected to make a speech. The Lord Mayor having been announced (says Barry O'Brien, in his biography of the Irish leader), bowed, and began: "Mr. Parnell——" "I believe," said Mr. Parnell, "you have got a check for me." The Lord Mayor, somewhat surprised at this interruption, said, "Yes," and was about to recommence his speech, when Parnell broke in: "Is it made payable to order and crossed?" The Lord Mayor again answered in the affirmative, and was resuming the discourse, when Parnell took the check, folded it neatly, and put it in his waistcoat pocket. This ended the interview.

Sarah Bernhardt, while in London last spring, dropped into a bookseller's shop one morning. "I sold her quite a pile of books," said the proprietor, "and she seemed pleased. As she was going out she took hold of my pencil and asked me something in French which I did not understand. Seeing that I failed to catch her meaning, she looked about on the counters, then, quick as a flash, she took up a volume of one of the very best sets of Scott, bound in tree calf, opened it at the very center, wrote something quickly, calmly tore out the leaf, handed it to me, smiled, and went out." The astonished bookseller looked at the leaf and discovered that Sarah had written a pass for two to her performance that evening! Magnificent, but it was not a cheap entertainment for the bookseller.

Thoroughly Welcome.

Theodore Hallam, a Kentucky attorney, is generally reputed to possess about the nimblest wit in that bluegrass commonwealth. A story of his repartee at the expense of the late "Deacon" Richard Smith, the widely known editor of the old Cincinnati Gazette, runs thus: Smith was chatting in the cafe of the St. Nicholas with a friend about political affairs. It so happened that just then the police superintendents of Covington, Ky., and Cincinnati were having a row over a fugitive, which ended in the charge that the Covington officials were affording "protection" to criminals. As Hallam entered the cafe "Deacon" Smith said:

"Hello, Theodore, I see by the papers that you're accused of harboring thieves over in your town."

"Yes, Mr. Smith," Hallam drawled, "come over."—Pittsburg Dispatch.

"MAIDS' MONEY."

A Quaint Way to Reward Humble Virtue Dating Away Back.

An interesting custom was observed recently at Guildford, on the occasion of the distribution of a municipal charity, familiarly known as the "Maid's Money." The event causes considerable interest by reason of the selected candidates having to decide who should receive the gift by casting lots. The gift was made in the seventeenth century, and it was stipulated that a sum of money should be invested in consols calculated to produce the sum of £12 12 shillings net for a maidservant who should have lived for two years or upward in one service in the old borough of Guildford, and who "should throw the highest number with two dice or cast lots with another maidservant." It is further explained that the unsuccessful maid is permitted to try three subsequent times for the gift, providing she remains an inhabitant of the town and does not marry. The testator stipulated that no maid who was a servant in a licensed inn or alehouse was to be selected as a candidate.

The proceedings took place in the Council chamber, when Mark Dowling, the oldest trustee, presided in the absence of David Williamson, J. P., the chairman, there being present a number of the old Guildfordians. This year no less than ten names were submitted to the trustees for selection. The successful two were Louisa Remnant, a servant in one employ for ten and a half years, and Sarah Ann Frogley, in the employ of Richard Sparkes for fifteen years. A cup and two dice were handed to them, and these they threw on the table. The young woman Frogley succeeded in scoring eight, while her rival secured five. The gift was thereupon handed to Miss Frogley.

BOY'S GIFT TO MRS. M'KINLEY.

How a Chicago Lad Gave the President's Wife a Rose.

One of the pleasantest incidents of President and Mrs. McKinley's recent trip to Omaha occurred during their brief stay in Chicago. The President and his wife were receiving callers at the house of a friend, and the sidewalk and entrance were well guarded to prevent the entrance of objectionable persons.

The usual crowd of small boys was on hand, and one of them, Herman Simon Strausser, held an American beauty rose in his hand. He did not join the other boys in their laughter and chatter. He closely watched the guards and the entrance, and when an opportunity presented itself he darted into the house and up to the President's side.

"I came to see you," he said, "and my name is Herman Simon Strausser, of No. 3920 Lake avenue."

"Is that rose for me?" queried the President.

Without making a reply Herman suddenly walked to Mrs. McKinley's side and held the rose up to her. She was so pleased with the gift that she gave the lad a photograph of herself, the President, and the White House.

Little Herman wiped the picture on his trousers leg to make it "more shiny" and unceremoniously ran out of the house and down the steps, and disappeared with his prize.—Chicago Inter Ocean.

Windmill 200 Years Old.

One of the eldest windmills of the marshes of Norfolk, England, where the marsh country is often very beautiful, is quaint. Its wooden tower still defies the strength of the winter winds which sweep across the lowlands from the sea, but two of its canvas frame sails are gone, an dthose that remain are fast falling into decay. For 200 years it has been one of the safeguards of the adjoining meadows.

Prize for a Picture.

Some time ago the Pope offered a prize of £400 for a well painted picture of the Holy Family. Consequently a large number of the Italian painters who exhibited at the exposition of sacred art at Turin chose this subject for their pictures, but none was judged to be good enough to deserve the prize. The Pope has therefore decided to reopen the competition and to make it international.

Light Effect.

Prof. Zickler recently found that a ray of ultra violet light transmitted as many as 200 meters (over 200 yards) will work a telegraph instrument at that distance. Rays of this kind have the property of causing an electric spark to pass between two highly charged conductors, which but for the light would not spark. This effect is made to work the telegraph instrument.

Boiler Explosion.

In an official French investigation of recent boiler explosions, 15 in number, not one of the boilers was found to have had tubes of iron or steel, the tubes being of brass in 14 cases and of copper in one. In eight of the boilers the tubes were more than four inches in diameter.

"My husband is plain-spoken; he calls a spade a spade." "So does mine; but I must decline to repeat what he calls the lawn-mower."—Chicago Record.

The only time a man remembers that he has any complexion at all, is when he selects a new tie.

GEOGRAPHICAL SONGS.

One Element in Popular Melodies Seems to Appeal to Public Taste.

The trend of the professional song writers just now is geographical, says the New York Sun. It is thought fitting, if not, indeed, indispensable, for a popular song to have a geographical background. "Louisiana Lou" has attained success on both sides of the Atlantic, and "The Little Alabama Coon" is not very far behind it in many of the qualities which contribute to a successful vogue. "Down in Old Tennessee" has had as much, or nearly as much, success in its way as "Bred in Old Kentucky," and "The Georgia Camp Meeting" has found admirers among many who have not had occasion to applaud a song of which the Cracker State was the theme since "Marching Through Georgia" first stirred the patriotic sensibilities of music-loving Americans. "Down in Sunny Virginia" has recently come into some celebrity, following, though a good distance off, the always popular "Maryland, My Maryland." Everyone has heard of "The Old Kentucky Home," of which the late Eugene Field once said that it was made up of five acres—and a mortgage.

Many of those who are familiar with the subjects of these songs incline, perhaps, to the belief that the Southern States furnish for them the most desirable theme, and that other States have been or may be neglected by the song writers. That is a mistake, for geographical divisions are of very little account to song writers when public applause is the object of their efforts. "In My Old New Hampshire Home" has recently attained some popularity, and a song having for its subject the Boston Back Bay, or the elms of New Haven, or the pier at Narragansett, cannot be far off. For a number of years a very popular song in the vaudeville houses has been "In Kansas," which is descriptive of the unusual size of fruits and flowers, the unusual abundance of cereal crops and the exalted standard of social life and citizenship in the Sunflower State. More recently some popularity has been attained by a waltz song, "Little Miss Ida from Idaho," and nearly every one has heard sung, whistled, played on hand organs or in phonographs "On the Banks of the Wabash" in Indiana.

Up to date the Empire State of New York has been a little behind some other States in respect to songs with geographical themes, but this deficiency may be accounted for, perhaps, on the ground that the superior importance of New York makes possible such minor divisions as would be thought unnecessary or indefensible elsewhere. There are two cities of the first class in New York, and each of them has in the popular estimate its own appropriate topical song. "My Best Girl's a New-Yorker" is sufficiently descriptive of what one city of the first class in the Empire State can do in the line of popular song making, and the other city of the first class has a lyric favorite, "Put Me Off at Buffalo." By the selection of a geographical subject of a song the author, or authoress (for many popular songs nowadays are written by women), is assured of the advantage of a clear understanding of the locale, so to speak, of the narrative. Moreover, there is a decided partiality for such songs, which dates back, perhaps, to the first popular acceptance of "Way Down Upon the Suwanee River." Since then the geographical titles have always been popular, but they were never before so popular as they have been recently. The number of such geographical songs further includes "Dat Gal from Baltimore," "Elsie from Chelsea," "On the Banks of the Ohio" and "In the Old Palmetto State." In the popular view of intelligent and appreciative song patrons "The Streets of Cairo" is not usually included among the geographical songs of the day. The particular street of Cairo referred to was in the Midway of the Chicago fair.

Talma and Napoleon.

Talma was standing at a corner, one of an immense crowd that thronged the streets of Paris to see Napoleon drive by in state.

"Do you see that little man there?" he said to a friend at his side, pointing as he spoke to the Emperor in his carriage.

"Yes," replied his companion. "What signifies that?"

"Well, answered Talma, "not so many years ago that same individual applied to me for a position in my company. He was ambitious to be an actor, and wished me to teach him the art of the stage. I discouraged him, as I could not see that he had any ability, and told him that there was no hope for any other than a genius in my profession.

"'Is there hope in any calling,' asked he, 'for the unfortunate plodder not blessed with ability?'"

"Well," said Talma's companion, "what of that?"

"Nothing," replied the actor—"nothing; only that unfortunate little man is now Emperor of France, and I—well, I am just plain Talma."

Horseless Carriages.

During the reign of Louis XV. of France a horseless carriage was invented by one Vancanson, run by a spring that was wound up like that in a watch. The Duke de Mortemart and M. de Lauzum rode in it round a court in Paris, but the Academy of Sciences decided that it could not be tolerated, and the thing was dropped.

Church Insurance.

The Methodist church in Canada is inaugurating a fire insurance business to take risks only on churches and parsonages. The profits will go to the fund for superannuated ministers.

Buried in Westminster.

In Westminster Abbey 1,176 persons have been buried.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, MAY 4 1899

Much of the uncertainty as to the proper method of procedure which appears to be experienced by many prospectors desiring to locate mining claims might be overcome and all essential requirements made plain, by providing a location blank, which in plain language, stripped of all unnecessary verbiage and confusing legal terms, sets forth every essential requirement of both Federal and local laws; and which having been properly filled out, posted and recorded, and the claim marked by stakes or monuments as required by law, shall constitute a perfectly valid and legal location, every requirement of the law having been observed. The Montana Society of Engineers has taken up this matter and advocates the adoption by the several counties of that State of a uniform blank of the character above referred to. It is really a matter for legislative enactment; but as the California Legislature recently adjourned and will not, in all probability, meet again for nearly two years, the subject should receive the attention of the California Miners' Association. The adoption of a suitable location blank by this organization would give it immediate standing, and such a blank would without doubt be adopted by mining districts throughout California. They should be printed upon substantial paper and sold at as low a price as possible, and no certificate of location should be accepted by the local or county recorders other than this official blank properly filled out, or which is not an exact copy of the original notice posted on the mining claim. If the blank is not properly filled out, another should be substituted in its stead by the recorder, whose duty it should be to see that this first step in the location of what may become valuable property be properly and legally taken—all this in the interest of the miner himself, and to obviate the possibility of vexatious and expensive litigation.

California is truly said to be a boss ridden State. There seems to be only one way of correcting this condition. We believe it lies in the direction of enforcing civil service rules. That strikes at the power of the bosses by taking away their patronage. Is it not about time California advanced as far at least in the direction of adoption of civil service, as as other States have found it advantageous to do? We are in fact behind them all. The power of bossism will will continue to grow until there is a change in the method of appointments and a fixed tenure by law controls subordinate positions. When the innovation comes we believe it will change radically and for the better, conditions in California politics which have been bad enough and which seem to get worse instead of better. It is a difficult matter to adjust but a vigorous effort in the proper direction will eventually bring about the desired result.

It is claimed that a Munich chemist named Linde has discovered by using liquid air as a new blasting agent—a substitute for giant power and other high explosives—and has experimented successfully with it. It is represented further that Linde's discovery is to be adopted in the new Simplon tunnel which is being bored through the Alps. That liquid air must possess a wonderful eruptive force is evident from the fact that such an enormous compression is required to liquefy it, and that in the process of liquefaction it reaches such an intense degree of cold. To be effective, however, as a blasting agent, it must suddenly restored to its normal condition.

John Lay, the man who made the torpedo which sunk the Albemarle and who helped Cushing fire it off, died in poverty the other day and may be buried in the potter's field. In any European country he would have had a pension and a rank in some department of the public service. The most the Government did for him was to buy his torpedos, but it would have done that for any inventor, and must be held accountable for complete neglect to reward Mr. Lay for his special public services.

It costs the Standard Oil company just 20 cents to place on the market a barrel of refined oil, which is two-fifths of a cent a gallon. This is the estimate made in a sworn statement by the Oil company and now on file at the office of the attorney-general of Ohio. Keeping in mind the price at which oil is sold it is not wonderful that immense fortunes are made by the men who own the stock. Would it be anarchy to legislate some of the profit out of this immense trust?

Massachusetts has come to the conclusion that the telephone business is a public service that ought to be regulated by the public and not by a monopoly, and a bill has been introduced into the Legislature giving the State Gas and Electric Commission the right to supervise it and fix prices. The consequence is the telephone company in Boston is crying out that the good old State is getting to be as wooly as Kansas.

Miss Viola Jeffries of Telegraph Hill, the author of the Tom Bozzle letter, is wasting her time in a cracker factory. Her gift of metaphor should have no difficulty in finding a market. "My heart beats for you," she wrote, "like a nanny-goat on a tin roof.

Admiral Kautz says that the young King of Samoa robes himself in a French admiral's cocked hat. His Samoan majesty might at least add a smile to his raiment.

HE FACED GREAT DANGER.

But, Not Knowing It, He Escaped Being Considered Brave.

"I noticed a couple of reminiscences as to my old branch of service," said an ex-naval official to the writer, "which reminded me of an incident in my own career. I was an assistant engineer on a cruiser bound from Norfolk to South American ports, and our ship was telling off 14 or 15 knots an hour one day, when a crank pin came out, and the next instant the crank was thrashing around in a most recklessly unsystematic fashion. Everybody in the engine room—and there were some men of considerable rank there just then, as it happened—made a dash for the deck. Meanwhile I quietly took four or five steps and shut off the steam. Of course the engines stopped, and then followed the delay caused by making the necessary repairs.

"It didn't occur to me that I had performed any act of an especial character until the chief engineer informed me that I was a confounded fool. 'Don't you know your place under such circumstances, sir?' he asked, and when I answered that I thought I had taken my proper position he continued: "No, sir; your duty was to make your way as soon as possible to the deck. With that piece of steel whirling and crashing about it was one chance in a thousand that a single soul would escape an instantaneous cooking, because if that thing had carried away the steam connections your life would have ended right then.'

"'Well, I took the chance,' I answered.

"'Yes, sir, you did, but you didn't know it, therefore it is not at all to your credit,' was the chief's answer, and it was so absolutely true that I couldn't for the life of me make any reply."—Detroit Free Press.

THE POWER OF WILL.

He Wanted to Live Four Days, and He Succeeded.

It would be vain to attempt to describe the sympathy for the poor and suffering which William Stokes could throw into his voice, says his biographer. One of the stories he used to tell is of peculiar interest, not only for its revelation of human kindness, but as a proof of the power of the will in prolonging life.

An old pensioner was a patient of Stokes in the Meath hospital. His life was despaired of, and, in fact, his death was hourly expected. One morning, having many patients to care for and believing that the pensioner was unconscious and past help, Dr. Stokes passed his bed without stopping. The patient was greatly distressed and cried out:

"Don't pass me by, docther; you must keep me alive for four days."

"We will keep you as long as we can, my poor fellow," answered Stokes, "but why for four days particularly?"

"Because," was the reply, "my pension will be due then, and I want the money for my wife and children. Don't give me anything to make me sleep, for if I sleep I shall die."

On the third day after this, to the amazement of Stokes and others, the patient was still breathing. On the morning of the fourth day he was alive and conscious, and on entering the ward Stokes saw him holding in his hand the certificate which required signature. As the doctor drew near the dying man gasped:

"Sign, sign!"

The doctor quickly complied, and the man sank back exhausted and within a few minutes crossed his hands over his breast and said, "The Lord have mercy on my soul," and quietly breathed his last.

Where He Repaired It.

When illicit distilling was common in the highlands, there was an old man who went about the country repairing whisky pots.

The gauger met him one day and, surmising that he had been doing repairs at no great distance, asked what he would take to inform him (the gauger) where he repaired the last whisky pot.

"Och," said the old man, "she'll shust tak' hauf a croon."

"Done!" retorted the gauger. "Here is your money, but be careful to tell me correctly."

"Och, she'll no' tell the gentleman a lee."

Getting the money, the old man quietly remarked:

"I shust mended the last whisky pot where the hole was."—London Spare Moments.

Ingenious.

"My wife is the most ingenious woman who ever lived," said Kipper.

"I believe you," returned Nipper politely.

"But you don't know why you believe me," intimated Kipper.

"To tell the truth, I don't," replied Nipper, looking bored.

"Well, I'll tell you. We've been married 12 years and lived in the same house all the time, and this morning she found a new place in which to hide my slippers."—London Standard.

Brief Mention.

The disease of cotton generally known as "cotton rust" are, according to Professor Anderson of South Carolina, not caused by a rust fungus, but are due to the cropping of the land year after year in cotton, and, as is well known, can often be remedied by adding kainit to the soil.

Spanish peanuts raised on a poor, sandy Alabama upland, which in the investigator's opinion would not have produced over 200 pounds of lint cotton per acre, worth from $10 to $12, gave profit at the rate of $18.34 per acre as forage for pigs. The expense of cultivating the peanuts was less than for a similar area of cotton and the soil was benefited by the manure and the peanut vines.

A Texas exchange says that whole trainloads of peas and beans come into that state every year from Kansas, Michigan, New York, California and other faraway states. Texas doesn't raise them, although it can. The wholesalers sell them to the local merchants, who sell them to the people at 50 times the cost of raising them.

A Southern Cultivator correspondent thinks it well to look to forest and stream for sources of income, as the demand for lumber, hard wood and staves is increasing and factories are coming south.

FARM AND GARDEN

GARDEN LETTUCE.

Confusion of Names—Two Varieties of Unusual Merit.

A most valuable and interesting feature of the second part of the tenth annual report of the Rhode Island station is a classification and description of the varieties of garden lettuce. Descriptive lists of the varieties of lettuce have already been published, but it is believed that there has been no recent classification based entirely on botanical characters. The kinds have been grouped as spring, summer and winter, and as cabbage, cutting and Cos lettuces, and then the names arranged in alphabetical order. But with this disposal any change in a name of variety is sure to lead to confusion. In this new classification the position of a kind of lettuce is approximately determined by certain botanical characters irrespective of the name. The descriptions of kinds which closely resemble each other are placed close together so that they can be readily compared and the minor differences

CALIFORNIA CREAM BUTTER LETTUCE.

noted. All of the descriptions have been prepared from carefully selected, well grown specimens. A major portion of the illustrations of lettuce heretofore have been quite as bad as the descriptions. The illustrations of the Rhode Island classification are mainly from photographs and therefore rich in detail and unquestionably accurate. Altogether, the plants from more than a thousand separate plantings of lettuce seed secured from leading seedsmen in the east, south, north and west, and also from Canada, England and France, have been available for the study of this species.

From the 69 varieties described and accompanied by 37 fine illustrations mention is here made of two attractive kinds:

California Cream Butter.—Leaves glossy green, blotched with red and shaded with red at least after light frosts, thick, elevations and depressions of the lamina, large and rounded, or those of the inner leaves pressed into folds, edges with conspicuous points on the sides and minute points where the veins terminate at the end. Plants large, 12 to 15 inches across, usually forming firm heads about four months after the seed is planted. A distinct variety, particularly good for private gardens. The leaves have a stronger flavor than those of the more delicate kinds, but to many tastes this is not objectionable—in fact, the leaves forming the heads are not usually excessively bitter. The vigorous constitution of the plants enables them to grow luxuriantly in soil that is not the best and in an atmosphere that is uncongenial. The form of the plant is like that of the white seeded Tennis Ball, and the two varieties appear to be nearly related, although they are very distinct.

Golden Queen.—Leaves short and broad, yellowish green, often shading to light yellow at the margins, edges smooth or with teeth only near the base, veins prominent, the lamina generally being depressed between them, at least when the plants are young. Base of midrib conspicuously shortened and thick, heads rounded, hard, weight four to eight ounces, texture crisp, free from excessive bitterness, base leaves few and small, seed white. A variety of unusual merit, either for field culture or forcing. The plants grow rapidly, and when well cared for they seldom fail to head. The heads average about the size or a little smaller than the white seeded Tennis Ball, and, like that variety, the plants go to seed rather quickly when grown in the open ground. The Golden Queen is recom-

GOLDEN QUEEN.

mended for growing under glass, because it is thought to be less subject to disease than the Boston Market, but it is doubtful if, on the whole, it is equal to that variety for forcing.

How Garden Vegetables Keep Best.

Nearly all our garden vegetables will keep best in the winter by being where the temperature is nearly down to the freezing point, remarks The American Cultivator, but cabbages, parsnips and onions keep well if frozen solid and put in a dark place or covered from the sunlight until the frost is out of them. They should not be handled while frozen. Turnips, also, are not injured by being frozen and must also be thawed out in the dark before handling, but it gives to them a sweeter taste and milder flavor, which is a recommendation to some tastes and by others may be thought a fault. We have taken turnips, cabbages and onions and thawed them out in cold water for immediate cooking and thought they were no worse for the freezing.

Russia, with her population of 129,000,000, has only 743 newspapers, but little more than half the number published in the state of Pennsylvania, which is 1,430. Of the 743 there are 589 printed in Russian, 69 in Polish, 44 in German, 9 in French, 5 in Armenian and 2 in Hebrew. No English newspaper appears in the list.

The earliest known mention of the pianoforte was in a playbill dated May 16, 1767. The principal attraction was given thus: "Miss Buckler will sing a song from 'Judith,' accompanied by a new instrument called pianoforte."

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending Mar 9

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, state of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under section One of an Act entitled "An Act relating to the working, rights of way easements and drainage of mines in the State of California," approved March 31, 1891.

FRANK HARRIS.

NOTICE TO CREDITORS.

Estate of Edouard Chenot, Deceased.

NOTICE IS HEREBY GIVEN by the undersigned, Executors of the last Will and Testament of

EDOUARD CHENOT.

deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice to the said Executors, at the residence of P. W. Forbes, in the town of Independence County of Inyo, State of California, the same being the place for the transaction of the business of the said estate in the County of Inyo State of California.

J. E. SHEPHERD and W. L. HUNTER, Executors of the estate of Edouard Chenot deceased.

Dated at Independence, Cal., November 30th 1898.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Luther Clarke deceased, to the Creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Ten Months after the first publication of this notice to the said administrator at his place of business on Edwards Street in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

J. C. IRWIN. Administrator of the estate of Luther Clarke, deceased.

LEGAL.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of Edouard Chenot, deceased.

It appearing to this Court, by the petition this day presented and filed by J. E. Shepherd and W. L. Hunter the Executors of the last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said decedent, to pay the debts of decedent and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said Superior Court on MONDAY, the 29th day of May, A. D. 1899, at 10 o'clock a. m. of said day, at the Court room of said Court, at the Court house, in the town of Independence, in the county of Inyo, State of California, to show cause why an order should not be granted to the said Executors to sell so much of the real estate as shall be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WATTS A. LAMAR, Judge of said Superior Court.

Dated April 4th, 1899.

P. W. FORBES, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE B. FITZGERALD, Plaintiff, vs. ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorneys for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 24th day of April, A. D. 1898

D. J. HESSION, Clerk.

(SEAL)

By C. N. ROSE, Deputy Clerk.

NOTICE OF ASSESSMENT.

NEW STEVENS DITCH COMPANY.

Location of principal place of business, Independence, Inyo county, California. Location of works, Inyo county, California

Notice is hereby given that at a meeting of the Board of Directors, held on the 28th day of January, 1899, an assessment, No. 7, of 10 cents per share, was levied upon the Capital stock of the Corporation, payable immediately in United States Gold Coin, to the Secretary, at his office, in the Masonic building, in the town of Independence, County of Inyo, State of California.

Any stock upon which this assessment shall remain unpaid on the 28th day of March, 1899, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Wednesday, the 24th day of April, 1899 to pay the delinquent assessment, together with costs of advertising and expenses of sale.

Independence, Cal., January 28th, 1899.

P. W. FORBES, Secretary

Office in the Masonic Building, in Independence, California.

SHERIFF SALE.

BY VIRTUE OF AN EXECUTION, ISSUED out of the Justice's Court of Fifth Township, County of Inyo, State of California, and to me directed and delivered, for a judgment rendered and entered in said Court, on the 9th day of August, 1897, in favor of J. B. Dover and against L. B. Harrison, I have levied on the following property, to wit: An undivided one-half interest in that certain water right known as the "Wingfield and Harrison" water claim, commencing at a monument of stone on the north side line of Jim Cooper's mill site location and running along said line east forty rods thence north 20 rods, thence west 40 rods, thence south 20 rods to place of beginning. Is at Stone Corral in South Park Mining District, Inyo County, State of California. Also,

An undivided one half interest in that certain mine or mining claim known as the "Myrtle Lee." This claim is located about three miles southeast of South Park Spring, in the Panamint range of mountains, on the west side of said range, in South Park Mining District, Inyo County, California.

NOTICE IS HEREBY GIVEN that on the 4th day of February, 1899, at one o'clock p. m. of that day, in front of the Justice's office, in the town of Ballarat, County of Inyo, I will sell all the right title and interest of said L. B. Harrison in and to the above described property, at PUBLIC AUCTION, for cash, gold coin in hand to the highest and best bidder, to satisfy said execution and all costs.

A. M. GIVEN, Sheriff.

Dated the 13th day of January, 1899

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,100 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

Dr. Doyle has gone to Bishop accompanied by Arthur Sutherland.

R. S. Miner, Esq., Arlie Mairs and Nap. Baker came up from Los Angeles on last Monday's stage.

There is some talk of the Reward mill soon resuming operations. Nothing is definitely known, however.

C. A. Walter is marketing some fine strawberries, and in accordance with his usual custom remembered this office with a sample lot.

Bert Rhine received his commission as postmaster last Monday and has taken charge of the local postoffice. It is located in Rhine's store.

E. R. Dodge Esq., a prominent Nevada attorney, spent several days at Independence this week looking up matters in relation to the Saline copper mines.

Barnes & Anderson are shipping fifteen ton of ore to Dayton to be worked as a test. If it comes half-way up to expectation they have a bonanza in sight.

Hon. T. B. Rickey arrived from Carson on Wednesday's train. He expects to remain about a week getting the cattle ready to drive to Long Valley for the summer.

In the output of minerals throughout California during the past year, Inyo is quoted as producing the greatest amount of soda ($154,000), lead ($21,170) and marble ($1200).

Hunter & Spear have sent to San Francisco for new tubes for the boiler at their Hunter canyon mill, and as soon as they can be put in place, they will start up their steam arastras on a run of ore.

Mr. and Mrs. M. C. Anton and Mrs. Fred Burckhardt were up from Lone Pine early in the week. Mrs. Anton's mother come out from the East a short time ago, and she has accompanied her back to Wisconsin.

The Independence school closed for the term last Friday. Mr. Janvier is conducting examinations this week for graduating diplomas. Jeanette Wood of Independence and Irene Reynolds of Georges Creek are taking them.

H. H. Spears came up from Bakersfield last Monday, accompanied by Rollin Laird and a couple of vaqueros. He has purchased the Conklin band of horses, something over a hundred head, and left here Wednesday with them for Bakersfield.

Mr. and Mrs. A. L. Conklin, Mrs. Louella Butler and N. E. Conklin arrived at Independence last Monday from Bakersfield. A. L. Conklin has purchased a wholesale butcher business at Bakersfield and is removing his effects there. Both brothers have closed out their large sheep interests.

On Wednesday a man named McMillan struck town and gave an interesting exhibit on the street of feats of strength. He tore three decks of cards in two; twisted a steel horseshoe in two; bent a bar of half-inch round iron in a spiral spiral spring, holding and end in his teeth; held a bar of inch and a quarter round iron about twenty feet long weighing ninety-five pounds in his mouth while ten men bent it; lifted a forty-five gallon barrel filled with water with one hand; and drove a sixty-penny nail through a two-inch plank with his hand. In fact gave a good show.

Real Estate Transfers.

The following deeds have been recorded since Jan. 1, 1899.

J W Robinson to W G Morton—Jan 3 1899 160 acres at Blackrock $5.

W G Morton to J W Robinson—Jan 3, 1899, 160 acres at Blackrock $5.

B H Yandell to E H Edwards—Jan 27, 1899 320 acres, 5 town lots at Lone Pine and mine at Cerro Gordo, property of Diaz estate $182.25.

N C Young to Katie J Boyd—Jan 3, 1699 80 acres at Bishop—.

H W Fletcher and Bernard Fletcher to A Mathews—Dec 31, 1898 160 acres near Bishop $250.

Louis Joseph to S H Spratt—Sept 29 1898 5 acres at Big Pine $204.

J E McConnell to Ella R Spratt—Dec 13, 1897 2 acres at Big Pine $53.

L W Barnaby to S H Spratt—Dec 13, 1897 160 acres at Big Pine known as Sawmill tract $1350.

A C Stock to Mary Bigelow—Jan 3 1899 160 acres south of Laws $1100.

J W Kelly and P Reddy to J G Kichline—Dec 20, 1898 San Jose mine Coso $500.

W F Matlack to Henry Fehrman—Jan 4, 1899 Blacksmith shop property, Independence $2475.

J S McQueen to Dell Ditch Co—Water rights in Dell ditch $3,000.

W Vaughn to D Vaughn—Jan 14, 1899 40 acres near Citrus $250.

A L Adams et al to W F Schuetheiss—Jan 9, 1899 Und. 2 9th interest in certain mining claims South Park district $5.

C F Wildasinn to Anna Parsons—Jan 21, 1899 lot in Clarke addition to town of Bishop $40.

Inyo Academic Association to Robert O'Neal—Oct 14, 1898 Lot 9 Block S Bishop.

Frank Kelsey to J F Ginser—Jan 9, 1899 Comet mine South Park district $5

S J Mcmurry to H H McMurry—Feb 17, 1895 40 acres near Big Pine $5,

Mark Watterson to W H Mitchell—Dec 3, 1898 Roadway $15.

Kate L Sneden and S G Sneden to John Black Jan 10, 1899 lot at Bishop $250

D R McLaren and James Shaw to J E Dunlap Jan 20, 1899 80 acres near Bishop $500.

Inyo Academic Association to Sarah E Drake—Lot 2 Block E Bishop $100.

Heirs of Margaret McNally to J McNally—Dec 19, 1898 160 acres near Laws $400.

J W Tracey to A Rossi—Jan 27, 1899 lot at Big Pine $500.

Frank Van Ness to A E Morton—Jan 26, 1899 right of way near Bishop $5.

W W Watterson to Joseph Shelly—Jan 22, 1899 Lot 2 Block F Bishop $10.

Thomas McKenzie to Thos Hughes—Jan 28, 1899 40 acres near Bishop $10

A C Finley to H E Finley—May 30, 1898 Und. ½ interest in Oso La Plata, Panaca and St Patrick mines Resting Spring District $500.

J W Holland to T Bolond—April 2, 1866 Last Chance mine Swansea District $5.

U S to P Reddy—patent to Independence mine Darwin.

R Diaz to E H Edwards—Jan 30, 1899 59.89 acres at Lone Pine $100.

Mrs M R Fairchilds to O P Templeton—Sept 9, 1898 Und. ¼ interest in Alta, Mountain Boy and Sadie mines Argus range $150.

J R Moffatt to Frank Lawrence—Feb 6, 1899 Lot 8 block 40 Independence $50.

T W S McLeod to Christina McLeod—Feb 7, 1899 200 acres near Bishop—.

J H Bulpitt to C A Partridge—Sept 7 1898, 79.82 acres near Bishop and water right in Gerkens ditch, $375.

Kate L Sneden and S G Sneden to C F Wildasinn, lot 80x204, Bishop, $400.

A Clark to Holiness Church—Jan 28, 1899, lot 50x100, Bishop, $10.

Olino Garcia to J D Snyder—Feb 7 1899 Und ½ int in Orochino mine, Coso, $300.

John A Durral to F B Parker—Feb 14, 1899, und 1-6th int same, $250.

F B Parker to J D Snyder—Feb 18 1899 und ½ int same, $300.

Hiram Hancock to W J Baldwin—Feb 15, 1899, und ½ int in Red Rover mine, Beveridge Dist., $100.

W F Lewis to J C Irwin—March 4 1899 und ½ int in Winner mine, Union Dist, $15. Same transferred to J J Gunn.

W N Cook to J J Granbury—Feb 14, 1899, und ½ int in Gen. Lee mine, South Park Dist, $25.

C H Powers to Laura E Powers—Mar. 1, 1894, 80 acres near Bishop.

C H Powers to J B Chamberlain—Mar 13, 1897, 80 acres near Bishop. Trust deed.

A Clark to Thos Hughes—Feb 15 1899, Right of way.

F C Kennedy to Chas. Anthony—Mar. 9, 1899, Virginia mine, Wild Rose, $500.

South Park Development Co to Chas. Austin—Jan 6, 1899. conflict of Little Till mine with Radcliffe mine, South Park Dist. $2.

L B Harrison to W W Godsmark—Mar 4, 1899, und ½ int in water rights at Pleasant Canyon, $50.

James Wingfield to W W Godsmark—Dec 22 1898, water rights in Pleasant Canyon, $200.

E. Robinson, Commissioner, to Mark Hand—Feb 8 1999, certain lands known as "The Island," $1852.

F P Meysan to Thos Dixon—March 29 1899, Tiptop mine, 7 miles west of Round Valley, $1.

A M Cohn to Geo Tuttle—Nov 9 1898, und 1-12th int in Florence mine, Coso Dist, $500.

Geo L Tuttle and wife to John R Taylor—Dec 13. 1898 same $10.

Luke Regan to R C Troeger—March 30, 1899 Morning Star mine Cerro Gordo Dist 1 —.

Ollie Dearborn and Lucas Mensas to A Diaz—May 3, 1899 Kesler mine Cerro Gordo Dist $5.

Chas Anthony to Henry Mettler—Dec 19, 1898, Bryan mine Coso Dist $250.

Argus Gold Mining Co. to Louis Tourniel—California mine $1.

Gustave Sanger to Joseph Danielson—April 13, 1899 Emma mine Lead Canyon $100.

Joseph Danielson to G Sanger—April 13, 1899 certain copper mines in Saline Valley $100.

Fire Alarm.

Last Friday night the town of Independence was startled by a cry of fire, and a very serious conflagration was averted only by the heroic and timely effort. B. H. Yandell was passing Rhine's store about 10 o'clock in the evening and saw smoke issuing from a grating in the front porch over the cellar. He at once gave the alarm and a crowd of men were soon on the scene. The cellar door was broken and the entire lower basement was found filled with flames and smoke. The place is used for storing kerosene and other oils, candles, hams and bacon, liquors and other highly inflammable material. Two lines of one-and-a-half-inch hose were secured and water was soon pouring into the flames. The smoke was stifling, but men were found who went into the furnace and stayed there, directing the stream to best advantage. The wooden boxes containing kerosene were many of them charred to cinders. The floor of the salesroom over the cellar was burned nearly through in many places. The flames found an outlet on the south side of the building, and the south wall is badly charred. A high north wind was blowing at the time, and it is a wonder that the building was saved. Had it not been for the good supply of water another fire like that of 1886 would inevitably resulted. The cellar was filled with merchandise, all of which is badly damaged both by fire and water. Mrs. Rhine estimates the loss at $2,000, covered by insurance. Steps should be taken at once to secure some kind of an organized method of fighting fire. The town has a splendid water works system and fire plugs should be placed at every corner, and a sufficient quantity of hose secured to make it available. What is the matter with calling a public meeting and doing something?

Good Prospects.

Phil Cartier is sinking a shaft on his new discovery at Mazourka. He is down about thirty feet and is running a crosscut. There is an immense mass of iron ochre and decomposed quartz which assays from $2.50 to $3.00 per ton gold. J. C. Irwin owns a half interest in the claim. John Kispert is sinking a shaft on the south extension and there ore prospects even better than where Cartier is at work. The ravines cutting through the hill in which the lead is situated were very rich in placer gold, and this lead to the discovery of the vein. The claim is about two miles from Citrus station on the C. & C.

The Delinquent List.

Tax Collector Given has completed the delinquent assessment roll for taxes of 1898. There is a total delinquency of $579 60 on the first installment and $682 37 on the second, making a grand total of $1270.97, which is less than three per cent of the total amount collected. There are 110 names on the delinquent roll, and of these at least thirty-five will yet pay before property is sold to the State, furtehr reducing the total amount due to about $700. Of the remaining seventy-five names about half should not have appeared on the roll, being for Indian lands, the owners of which are exempt from taxation and similar items.

A Promising New Apple.

One of the latest and most valuable successes of Luther Burbank of California is, as it seems to a writer in The

SEEDLING OF GRAVENSTEIN.

Rural New Yorker, an apple, a seedling of the Gravenstein, of which Mr. Burbank wrote as follows:

"By this mail I send you a medium to small sample of my new Gravenstein seedling, six weeks later than its parent, ripening exactly with Baldwin and Rhode Island Greening. The tree is a grand grower and as productive as an apple can possibly be. I think the quality, tenderness and texture remarkable."

Of the specimen in question, a half section of which is illustrated, The Rural says: The apple was slightly shriveled when it was received. The flesh is yellowish, exceedingly tender, spicy, rich, subacid. It has a flavor all its own, and we do not think, taking it all and all, that we have ever eaten an apple that more nearly approaches all that we need ever hope to get in an apple. In appearance and coloring we may say, in a word, that it resembles the Ben Davis.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

ANNUAL MEETING.

The Regular Annual Meeting of the Stockholders of the Lone Pine Canal Company will be held at the office of the Company at Lone Pine on the last Saturday in April, April 29th, 1899, for the purpose of electing a Board of Directors to serve for the ensuing year, and the transaction of such other business as may come before the Meeting.

RAILROAD ACROSS THE ENGLISH CHANNEL.

The English Parliament is considering the plan of connecting that country with France by railway. Engineers say a roadbed can be laid on the bottom of the English channel, and by mounting trestlework on wheels, so that it projects above the water, the railway can be operated. This seems beyond belief, but it is perhaps no more remarkable than some of the cures accomplished by Hostetter's Stomach Bitters in bad cases of dyspepsia, indigestion and constipation. This is an age of wonderful achievements.

An unusual thing has happened in Chicago, where a child five years old has been declared insane and sent to the asylum.

SHAKE INTO YOUR SHOES.

Allen,s Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Cousin George now has twenty-two vessels under his command and quite a few under the water near him.

To Cure a Cold in One Day.

Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure, 25c.

The Kaiser might not be willing to confess to as much relief as he feels over the final burial of Bismarck.

Good For Little Folks.

Don't torture the children with liquid and pill poisons! The only safe, agreeable laxative for little ones is Cascarets Candy Cathartic. All druggists, 10c, 25c, 50c.

When a man looks rocky at the breakfast table a stony stare from his wife does not improve matters.

When coming to San Francisco go to Brooklyn Hotel, 208-212 Bush street. American or European plan. Room and board $1.00 to $1.50 per day; rooms 50 cents to $1.00 per day; single meals 25 cents. Free coach. Chas. Montgomery.

It is generally the man with castles in the air who has no real estate.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd., 930 Arch St., Philadelphia, Pa.

I know that my life was saved by Piso's Cure for Consumption.—John A. Miller, Au Sable, Michigan, April 21, 1895.

Aguinaldo is a good deal like the month of March, something of a blowhard, you know.

FOR MEN ONLY.

DR. FOOTE & STAFF

161 ADAMS ST., CHICAGO.

Men requiring unsurpassed treatment should consult personally or by letter **"Free"** with the pioneer and only exclusive men's specialists in United States. **Diseases of men** made the study of a lifetime. Unfortunates everywhere should immediately communicate with Dr. Foote of Chicago. Everything confidential. Remedies sent everywhere in sealed packages and letters in plain envelopes. Correspondence solicited. Latest **Surgical, Medical and Electrical** methods adopted. Deluging the stomach with drugs abandoned. Avoid drugs recommended by the unauthorized and self-styled specialists in Western towns; few genuine specialists locate outside of New York or Chicago. In these cities your private affairs are safe. Unequaled treatment for all diseases and weaknesses of the Genito-Urinary, Sexual, Reproductive and Nervous Systems. Impediments to marriage removed. **"Syphalis"** positively purifies the blood, cure syphilis and removes all white ulcers in the throat or mouth, copper colored spots on body and eruptions on skin, also catarrh and rheumatism. **"Vigorala,"** the only permanent restorer and invigorator, gives vigor to vital organs and nerves, prevents and cures grip. $1 per bottle, 6 for $5. Trial bottles, either remedy, half price.

He Might Have Married.

Fitz-Greene Halleck never married, yet, as Mr. Howe reminds us in his "American Bookman," he could not have been without attractions, for a certain superior lady is reported to have declared:

"If I were on my way to church to be married, yes, even if I were walking up the aisle, and Halleck were to offer himself, I'd leave the man I had promised to marry and take him."

To this, perhaps, should be joined his epigram, written for a young lady who had asked for his autograph:

There wanted but this drop to fill
The witless poet's cup of fame.
Hurrah! There lives a lady still
Willing to take his name.

Diamonds may be black as well as white, and some are blue, red, yellow, green, pink and orange, but there is no violet diamond, although, in addition to amethysts, there are sapphires, rubies and garnets of that color.

"Evil Dispositions Are Early Shown."

Just so evil in the blood comes out in shape of scrofula, pimples, etc., in children and young people. Taken in time it can be eradicated by using Hood's Sarsaparilla. In older people, the aftermath of irregular living shows itself in bilious conditions, a heavy head, a foul mouth, a general bad feeling.

It is the blood, the impure blood, friends, which is the real cause. Purify that with Hood's Sarsaparilla and happiness will reign in your family.

Blood Poison—"I lived in a bed of fire for years, owing to blood poisoning, that followed small pox. It broke out all over my body, itching intensely. Tried doctors and hospitals in vain. I tried Hood's Sarsaparilla. It helped. I kept at it and was entirely cured. I could go on the housetops and shout about it." MRS. J. T. WILLIAMS, Carbondale, Pa.

Scrofula Sores—"My baby at two months had scrofula sores on cheek and arm. Local applications and physicians' medicine did little or no good. Hood's Sarsaparilla cured him permanently. He is now four, with smooth, fair skin." MRS. S. S. WROTEN, Farmington, Del.

Sore Eyes—"Humor in the blood made my daughter's eyes sore, so that we feared blindness, until Hood's Sarsaparilla made her entirely well." E. B. GIBSON, Henniker, N. H.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; non-irritating and only cathartic to take with Hood's Sarsaparilla.

Caught in a Storm.

"THERE are some advantages," said Ronald meditatively, "in being a cousin, after all."

He addressed Angelica, who sat opposite him. All about them was deep-blue serenity—on one hand stretching away to meet in a line with a fainter azure, on the other merging distantly into long shining masses of greenish brown rocks, with ragged cliffs towering above them. Angelica's hat was tilted a little forward and the breeze darted in among her curls, tossing them merrily about her face. She was a diminutive person in all respects save two, which two were particularly large, brilliant, languishing, and in every way dangerous.

"But on the whole, Angelica," added Ronald, deliberately, "I regret that I am in any way related to or connected with you."

"Ronald!" she exclaimed, "I really cannot allow you to be so flattering."

"A cousin is a nondescript, variable sort of being—at times an absolute stranger, at others a sort of second-hand brother—in that capacity extremely useful. Of course, that is something; but still——"

"I think it's a great deal; but I see you are the same as ever. You always were a greedy little boy," said Angelica.

"Thanks. You, on the other hand, were rather nicer as a little girl than you are now in some ways—oh! you could still be nice if you tried."

"If I tried? How funny! I shouldn't know—you see most people think——" she regarded her shoes inquiringly.

"I dare say; but I am not 'most people.' I stand alone."

"I thought you were sitting down," interrupted Angelica. (She certainly was provoking to-day.) And I wasn't aware that you were alone. But perhaps I don't count."

"My dear, that's the worst of it. You do count, and there's no one else in the world who does. I just worship you, Nan! Have I startled you?"

"Not at all," she answered, politely. "You see they all say that or something equivalent." She turned her head a little and dabbled in the water with her hand.

"Oh, yes, I know! Of course, I'm a presumptuous fool. All the same, I have thought lately"—he paused and then added: "Do you remember last week at Cowes?"

"Yes," said Angelica, radiantly. "On that afternoon—I don't mind telling you, Ronald—I very seriously considered falling in love with you. There is a yacht quite close to us," she added, quite hastily; "I considered, and after due deliberation, decided——"

"Well, Nan?"

"Not to fall in love with any one at all."

"You mean——"

"Ronald, if you don't row how can I steer? We don't want to be swamped. Love is so inconvenient."

"You're pulling the wrong rope. I confess I don't quite see how——"

"Well, it doesn't always go with other things."

"But is it not worth more than—other things?"

"Ronald," replied Angelica, somewhat irrelevantly, "have you any idea of the price of a Paris hat?"

"The left rope again. Ah, now we're safe! A Paris hat? I—well, I have heard that they're something ridiculous."

"They are — absolutely ridiculous. That fact alone," said Angelica, solemnly, "is enough to make any thought of love impossible and wicked."

"Except for any one with a heart, with a soul, composed in fact of anything but shallowness and vanity."

"My dear boy, if you go on," she said, encouragingly, "you will in time make the accomplished flatterer of the age."

"Don't jest with me, Nan. It's nothing to you, perhaps, but to me it's everything. I love you. If you knew what the word meant," he burst out vehemently, "you could not sit there coolly breaking my heart in your hands."

"Hush! Not so loud. Yes, I know I'm wicked (penitently). I oughtn't to be here with you at all, when I am going to marry some one else."

"You're going to—Nan, is this true?"

"Mr. Rathbone," said Angelica, drooping.

"Are you engaged to him?"

"He will ask me to-night."

"How do you know that?" curtly.

"Ronald, don't be so absurd! How do I know?"

This was convincing.

"Well, he is a consummate fool," said Ronald, savagely.

"Thanks," she murmured.

"And, moreover, he could not possibly love you——"

"Thanks—once more."

"Or any one else, except himself. But, of course, I see that he has advantages. Oh, don't trouble to explain what they are! I see them. How pleased every one will be, especially mamma! It will all be so delightful."

There was a silence. The sun had disappeared, and the blue sky had turned to gray.

"It's not so pleasant as it was, is it?" inquired Angelica, presently.

"No," shortly.

"I felt a drop. Are we far from home, Ronald?"

"Yes; about three miles."

"Oh, dear, are we? Why don't you turn quickly, then? Don't you see it's going to be wet?"

"I thought you were steering," rudely.

"You might help me," she said, plaintively, tugging at the rope.

He gave a swift stroke or two, and they swung round. There were angry masses of clouds drifting toward them over an uneasy, ruffled sea.

"Why don't you row faster? We shall never get home," she exclaimed, petulantly.

"The tide is strong and the wind is against us. I'm doing my best."

"Ronald, what was that? Oh, don't say it was lightning! I'm more afraid of it than anything in the world. Oh, listen!"

There was a subdued roar in the distance, now gathering ominously.

"Ronald, was that thunder?" said Angelica waveringly.

"There is generally thunder when it lightens," he answered, with bitter sarcasm.

"But we're out in an open boat, miles from home or shelter of any kind."

"I am aware of that."

She gave a pathetic little gulp and pressed her hands together.

"Oh-h! There's another flash! Ronald, I—I'm going to faint!"

"Faint? Nonsense!" he returned, roughly.

"Nonsense? What do you mean, Mr. Grant? I suppose I have a right to faint if I choose I—ah!"

Crash, rattle, rattle, bang! C-r-a-c-k!

"Put that over you," said Ronald, sternly, wrapping her in his mackintosh coat.

"But it doesn't rain, and that makes it m—much more dangerous, d—doesn't it, Ronald?"

"Much more," he answered, mercilessly.

"Oh, how can you be so heartless and cruel?" she moaned. "You don't care how much I suffer! Men are always like that——"

"And women never, of course," put in Ronald, with quiet irony.

"Oh, don't—don't be so hard! I know I'm a wicked girl, and this is to punish me!" A vivid gleam shot up the heavens, and something seemed to burst over their heads. "Oh, Ronald! (In a frenzy of terror) save me, save me! Oh, let us die together! I love you, oh, you know I do! Don't look at me so

SHE WAS PROVOKINGLY RADIANT.

coldly; forgive me, oh, forgive me, Ronald!" Angelica hid her face in the cushions and sobbed.

"I can better bear to die with you, dear, than to live without you," said Ronald, tenderly. There was a suspicious twitching about his mouth, but he mastered himself heroically, and it did not become a smile.

A silence followed. The thunder rolled and tumbled away to the west, and presently there was a gleam more brilliant than any before.

"What's that awful light?" moaned Angelica.

"Look, dear. It's the sun."

"The sun!" she started up in consternation. "It can't be, Ronald (indignantly). Do you mean to tell me the storm is over?"

"I think it's passed by. You seem annoyed. Aren't you glad we're out of danger?"

"Yes—yes, of course. Only I thought——" haughtily—perhaps now, Mr. Grant, you will take me home?"

"Yes, I'll take you home, Nan. They'll be surprised, won't they, at our news?"

"News? What—what do you mean?" gasped Angelica.

"I think you know." There was no mistake about this smile now.

"Ronald," she said pathetically, "now you're not going to be tiresome."

"Nan," he answered gravely, "I do hope not, but, of course, a lifetime is a severe test."

"You know it was only because I was frightened. It's a mean advantage—it's ungentlemanly"—her voice died away weakly.

Ronald provokingly—"Are you quite sure you didn't mean all you said?"

Angelica, tearfully—"It's absurd! Mamma will be so angry."—Chicago Herald.

Average Length of a Man's Stride.

Quetelet estimates the average length of a man's stride at 31½ inches, and the distance an average traveler can cover at this rate at 7,158 yards an hour, or 119 yards a minute. The number of strides would be 7,500 an hour, or 125 a minute. The length of the stride in the various European armies is as follows: In the German army it is 31½ inches, with a cadence of 112 steps per minute; in the Austrian army 29½ inches, with a cadence of from 115 to 130 per minute; in the Italian army 29½ inches, with a cadence of 120 per minute; in the French army 29½ inches, with a cadence of 115 per minute; in the British army 30 inches, with a cadence of 116 per minute.

Outwitted His Sharp-Tongued Wife.

An Englishman of Lymington had the misfortune to live in a continuous quarrel with his wife, who was a modern Xantippe, and threatened, in case she survived him, to dance over his grave. It was her lot to outlive him, but it was not so easy to carry out her threat. The husband had the precaution to make an injunction in his will requiring his body to be buried in the sea near his residence and without ceremony. The injunction was complied with.

To Prevent Sleep-Walking.

A device to prevent sleep-walking is to lay upon the floor beside the somnambulist a sheet of iron, zinc, or other metal, wide enough to insure that he will step upon it. When the sleep-walking fit comes upon him his foot touches the cold surface of the metal and he instinctively draws that leg into bed again. After two or three attempts the somnambulist gives it up and settles down in bed.

It takes a woman as long to select a seat at the theater as it does for the average man to pick out a new suit of clothes.

SINGULAR STATEMENT.

From Mrs. Rank to Mrs. Pinkham.

The following letter to Mrs. Pinkham from Mrs. M. RANK, No. 2,354 East Susquehanna Ave., Philadelphia, Pa., is a remarkable statement of relief from utter discouragement. She says:

"I never can find words with which to thank you for what Lydia E. Pinkham's Vegetable Compound has done for me.

"Some years ago I had womb trouble and doctored for a long time, not seeing any improvement. At times I would feel well enough, and other times was miserable. So it went on until last October, I felt something terrible creeping over me, I knew not what, but kept getting worse. I can hardly explain my feelings at that time. I was so depressed in spirits that I did not wish to live, although I had everything to live for. Had hysteria, was very nervous; could not sleep and was not safe to be left alone.

"Indeed, I thought I would lose my mind. No one knows what I endured.

"I continued this way until the last of February, when I saw in a paper a testimonial of a lady whose case was similar to mine, and who had been cured by Lydia E. Pinkham's Vegetable Compound. I determined to try it, and felt better after the first dose. I continued taking it, and to-day am a well woman, and can say from my heart, 'Thank God for such a medicine.'"

Mrs. Pinkham invites all suffering women to write to her at Lynn, Mass., for advice. All such letters are seen and answered by women only.

What's In a Name?

In an article on Indian names Mr. Frank Terry comments on the odd effect produced by giving rein to this fancy for distinguished appellations in the renaming of Indians. Often their native names are unpronounceable and the translations long and not in accordance with our ideas of what is pleasing. So, instead of simply turning Bear-Sits-Down or Mule-Kicks-Up or Jumping Rabbit into English, the Indian is renamed entirely, and is given the first famous name that comes to mind.

"William Penn, Fitz-Hugh Lee, David B. Hill and William Shakespeare," says Mr. Terry, "are policemen at the Shoshone agency, Wyoming. Only a short while ago it was reported that on an Indian reservation in New Mexico William Breckinridge arrested John G. Carlisle for being drunk and disorderly.

"It would no doubt surprise the reader of this should I say that I have seen George Washington, John Quincy Adams, Franklin Pierce, Rip Van Winkle, Allen G. Thurman and Hilary Herbert engaged together in a game of shinney. Yet this interesting spectacle I have gazed upon, and I have been the enforced witness to a severe spanking administered to James G. Blaine."—Youth's Companion.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

Blankets of Bark.

In Ecuador, one of the South American republics, the bark of a tree which grows on the slopes of the Andes is utilized for the making of blankets. The blanket is over six feet long and over five feet wide and is as soft and pliable as though it were made of flannel. It is about the thickness of a good flannel blanket and can be rolled up and put in a strap without hurting or injuring it.

This tree or bark blanket is merely a strip of bark cut from a section of the trunk of the blanket or demajagua tree. The Indians make a cutting around the trunk to get it, and they prepare it by soaking it in water until it is soft. It is then pounded so that the rough outside can be stripped off and the inside alone left. The inside is of fine fibers so joined together by nature that it makes a beautiful blanket, warm enough to be used as a cover and soft enough for a mattress.

He Attends to Business.

He attends to business who goes straight to work to cure Neuralgia by the use of St. Jacobs Oil, and saves time and money and gets out of misery quickly. He's all right.

The Largest Diamond In the World.

This is in possession of the king of Portugal. It has a weight of 1,680 karats 14 ounces and is as large as a hen's egg. It came from Brazil in the eighteenth century and was then valued at $1,000,000, whereas now it has a value of $2,000,000.

It Does Help.

It takes off a good deal of the suffering attending illness and adds greatly to the pleasure of existence for the doctor to tell you that yours was one of the worst cases he ever attended.—Boston Transcript.

PIMPLES

"My wife had pimples on her face, but she has been taking CASCARETS and they have all disappeared. I had been troubled with constipation for some time, but after taking the first Cascaret I have had no trouble with this ailment. We cannot speak too highly of Cascarets." FRED WAGEMAN, 5708 Germantown Ave., Philadelphia, Pa.

Origin of the Postal System.

The wonderful postal system, which has reached out until it includes every country on the face of the earth, had its beginning in the mind of an ingenious Frenchman.

In 1658, early in the reign of Louis XIV, M. de Velayer established a private penny post. Boxes were set up at the street corners for the reception of letters and offices were opened in various quarters of Paris. Collections were made once a day from the street boxes, followed many hours later by a single delivery, and thus the first postoffice in the world was established.

M. de Velayer was so greatly encouraged by the success of his enterprise that in order to develop it still further he printed certain forms of billets or notes which were intended to cover all the ordinary requirements of business in great towns. These forms contained blanks which were intended to be filled up by the pen with such special matter as might be necessary to complete the writer's object. The idea at once became popular, and the printed forms accompanied the expansion of the postal service throughout the larger cities of France, and it was many years before they fell into disuse.—Harper's Round Table.

An Original Oath of Allegiance.

In the old days when the Spanish province of Aragon was a proud and independent monarchy the people used when choosing their king the following singular form of election:

"We, the freeborn inhabitants of the ancient kingdom of Aragon, who are equal to you, Don Philip, and something more, elect you to be our king on condition that you preserve to us our rights and privileges. If in this you should fail, we own you for our king no longer."—Harper's Round Table.

After the Cooling Process.

Don't cool off too quickly after being in an overheated room. If you do, you will need St. Jacobs Oil to cure Lumbago, which sets in very often after the cooling process. It relaxes the stiffened muscles.

His Annoying Problem.

"I wonder," she said, knitting her brows in a perplexed way, "whether"—

And then she paused. It was her first experience in keeping house on an allowance, and naturally many problems presented themselves.

"I wonder," she repeated, "whether, when woman comes into her proper sphere and exercises her rightful influence, if she legislates the first of every month out of existence the bills will come in the second day or will be entirely abolished. I think the plan would be worth trying, anyway."—Chicago Post.

AN EXCELLENT COMBINATION.

Successful Enterprise Based on Merit—The Importance of Informing the Public of the Value of an Article Through the Leading Newspapers.

The few remedies which have attained to word-wide fame, as truly beneficial in effect and giving satisfaction to millions of people everywhere, are the products of the knowledge of the most eminent physicians, and presented in the form most acceptable to the human system by the skill of the world's great chemists; and one of the most successful examples is the Syrup of Figs manufactured by the California Fig Syrup Co. Unlike a host of imitations and cheap substitutes, Syrup of Figs is permanently beneficial in its effects, and therefore lives and promotes good health, while inferior preparations are being cast aside and forgotten. In olden times if a remedy gave temporary relief to individuals here and there it was thought good; but nowadays a laxative remedy must give satisfaction to all. If you have never used Syrup of Figs, give it a trial, and you will be pleased with it, and will recommend it to your friends or to any who suffer from constipation, or from over-feeding, or from colds, headaches, biliousnss, or other ills resulting from an inactive condition of the kidneys, liver and bowels.

In the process of manufatcturing the pleasant family laxative made by the California Fig Syrup Co., and named Syrup of Figs, figs are used as they are pleasant to the taste; but the medicinal properties of the remedy are obtained from an excellent combination of plants known to be medicinally laxative and to act most beneficially. As the true and original remedy, named Syrup of Figs, is manufactured by the California Fig Syrup Co. only, a knowledge of that fact will assist in avoiding the worthless imitations manufactured by other parties. The Company has selected for years past the leading publications of the United States through which to inform the public of the merits of its remedy, and among them this paper is included, as will be seen by reference to its advertising columns.

Gained Their Point.

In describing the bombardment of Morro Castle at Santiago during the Spanish-American war a war artist who was in Cuba tells how he and some newspaper men managed to attain a point of vantage near the Texas:

A few days previous a rival newspaper dispatch boat, the recipient of certain courtesies with which we had not been favored, had been carrying minor telegrams to the flagship from one point or another, and she was in the habit of sailing in among the fleet, with an air of importance and displaying the signal, "We have dispatches for the admiral."

This, of course, prevented the vessels of the fleet from making her come outside and enabled her to approach the flagship to deliver her communications. Before leaving Port Antonio we had taken in a large supply of fresh fruit, including bananas, so it occurred to one of our very alert and original newspaper men that we should hoist the signal, "We have bananas for the Texas on board."

This we acted upon, and our vessel was allowed to glide in without interference, until we reached the Texas. Once alongside, Captain Philip hailed us with delight, accepted our little gift and told us that a bombardment was very shortly to take place. We thought ourselves in great luck at receiving this news and made outside the lines, keeping as near to the squadron as we were permitted.

Gloves of chicken skin were in vogue in the early part of the seventeenth century. They were used at night to give the hand whiteness and delicacy.

FOR THIRTY DAYS MORE YOU CAN TRY IT FOR 25 CENTS.

5 DROPS (TRADE MARK.)

Cured of Rheumatism.

CANNOT FIND WORDS ENOUGH TO PRAISE YOUR WONDERFUL REMEDY "5 Drops."

Swanson Rheumatic Cure Co., Chicago, Gentlemen:—I thought that I would write you a statement and tell you how I have got along since I have used your "5 DROPS". I must say that I am entirely well once more, **thanks to your wonderful remedy.** It has accomplished more good from the sample bottle and the dollar bottle than the thirty dollars' worth of medicine I have used of other manufacturers. I tried all kinds of medicine I saw advertised for Rheumatism **but could not get any relief from the dreadful suffering till I got a sample bottle of your "5 DROPS,"** and after taking the same for a few days I began to have less of those severe pains racking through my body. After I got the sample bottle most used up I could begin to rest some every night, after I had used about half the dollar bottle then all my pains left me. **Oh! what a comfort it was!** when I could sleep again at night without any more suffering. I am so thankful to you and your "5 DROPS" that I cannot find words enough in praise of your wonderful remedy for the cure of Rheumatism, **and I can safely recommend it to all suffering humanity** and say that they cannot purchase any better medicine than "5 DROPS" for all their ills. Thanking you, gentlemen, for all your kindness, I remain, forever, your friend, R. M. LEE, Porterfield, Wis., Feb. 10, '98.

SUFERRED THE TORTURES OF THE DAMNED.

President Swanson Rheumatic Cure Co., Chicago. My Dear Sir:—After suffering the tortures of the damned for a long time from an attack of Rheumatism, I wish to say that your Rheumatic Cure "5 DROPS" **has cured me of all my troubles,** which were all caused by one complaint—Rheumatism. I had Heart Trouble, Piles, Bladder Trouble and Constipation. I would not take $500 and do without the remedies even if it only cured the Catarrh for me, which it has done. Therefore, I willingly take the agency for the sale of your medicines, **for they are a boon to mankind.** Gratefully yours, J. W. DENNIS, 120 Normal Av., Buffalo, N. Y., Feb. 8, 1898.

"5 DROPS" cures **Rheumatism, Sciatica, Neuralgia, Dyspepsia, Backache, Asthma, Hay Fever, Catarrh, Sleeplessness, Nervousness, Nervous and Neuralgic Headaches, Earache, Toothache, Heart Weakness, Croup, Swelling, La Grippe, Malaria, Creeping Numbness.**

FOR THIRTY DAYS LONGER to enable sufferers to give "5 DROPS" at least a trial, we will send a sample bottle, prepaid by mail, for 25 cents. A sample bottle will convince you. Also, large bottles, (500 doses) $1.00, 3 bottles for $2.50. Not sold by druggists, only by us and our agents. **Agents wanted in new territory. Write us to-day.**

SWANSON RHEUMATIC CURE Co., 167-169 Dearborn St., CHICAGO, ILL.

Still Smoking Twelve Years After.

The man had been absent from New York for a number of years. During his absence many changes had taken place. Some of his friends had moved away and some had died. Though he had taken the New York papers pretty regularly, he had not kept up with these friends of his as he should have done.

One evening he called upon a woman friend who was living at a hotel. Arrived at her rooms, he found her surrounded by a crowd of people, but he finally reached her and shook her by the hand.

"You are just the same," he said admiringly. "You haven't changed a particle," which was not at all true, for her hair had turned so white that she had the air of a marquise in some old picture. "And your husband, too," he went on, "he is just the same as ever. I saw him just now down in the lobby. He was smoking."

The woman looked a trifle startled for a moment, then recovered her composure with considerable effort.

"I am sorry to hear," she remarked gravely, "that my husband is still smoking. He has been dead for 12 years."—New York Sun.

Shooting Stars.

When a shooting star breaks into flame in our atmosphere, the residuum of the combustion remains in the air and can be found in what is known as atmospheric dust. The virgin snow of the polar regions was often seen to be spotted with traces of dust which contained particles of iron. Like particles are found on church towers and elsewhere. Among the minute bodies that dance in the sun's rays there are certainly particles of shooting stars.

The sands of the African deserts when examined by a microscope present traces of very small iron particles which seem to have been subjected to a high temperature, and the Challenger on its remarkable trip in the Atlantic found at times in its dragnet fragments of magnetic iron which we have every reason to believe fell from the sky. Sir William Thompson (Lord Kelvin) and Richter have even seen in the aerolites the disseminators of the germs of life throughout the universe.—Chautauquan.

The Strength of a Bear.

Few people know that a grizzly bear can give points to any other carnivorous animal in point of strength. A grizzly bear weighing just 400 pounds has been watched carrying a heifer two-thirds its own weight for two miles up the most steep and rugged mountain side, and this without pausing for one instant for rest.

The big white polar bear, though not really so dangerous a customer, is capable of performing the most extraordinary feats of strength. A polar bear has been seen to move with his paw a bowlder six men had with difficulty put in position to guard a cache of provisions.

Didn't Admire American Children.

An American lady in Berlin had occasion to talk to her hostess about American children. "I have read of them," said the German woman proudly. "I have of them in English read. I have two stories read that I might know. I do not wish to go to America. I have read 'Peck's Bad Boy' and 'Helen's Babies.' Ach! I stay by the German children so!"—New York World.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

A Soldier's Blanket.

This story, told of Sir Ralph Abercrombie, the victor of Aboukir, shows that even in death he did not forget consideration for others. After the battle at which he was mortally wounded he was carried on board a ship, and a soldier's blanket was placed under his head to ease it. He felt the relief and asked what it was.

"Only a soldier's blanket," was the reply.

"Whose blanket is it?"

"Only one of the men's."

"I wish to know the name of the man."

"It is Duncan Roy's, of the Forty-second, Sir Ralph."

"Then see," said the dying general, "that Duncan Roy gets his blanket this very night."

Without Knowing It.

While sitting in a draft without knowing it, we may become sore and stiff from cold. We feel soreness and stiffness all gone after using St. Jacobs Oil, hardly knowing when.

A man endowed with great perfection without good breeding is like one who has his pockets full of gold, but always wants change for his ordinary occasions. —Steele.

RICH
Government Lands.

A soil of very deep dark loam; will grow all kinds of vegetables, grain, hay—in great abundance. Climate splendid. Crop failures impossible. Adapted to the raising of cattle, sheep, hogs; dairy and poultry industries. In mining district, providing an excellent market for all products. Also rich cranberry lands. Magnificent chance if taken at once. Write for descriptive book giving full particulars. Address to day.

NOTED INDIAN SCOUT.

MAJ. DRANNAN, THE CAPTOR OF CAPTAIN JACK.

A Veteran Plainsman Who Has Been a Fighter and Hunter for Fifty Years—Some of the Exploits in Which He Figured.

One of the most famous Indian scouts and the last of the great hunters and trappers common in the Rocky mountains fifty years ago is Major William F. Drannan, who still sees service among the Nez Perces of Idaho. He carries a knife with which he has scalped thirty-five Indians, after having killed them in fair fight.

It was Major Drannan who captured Captain Jack, the chief of the Modocs, in 1873, and put an end to the Modoc war. The conflict between the United States troops and the Modoc Indians broke out during one of Major Drannan's periodical attempts to "settle down" and farm. Couriers dashed up to his ranch, their horses covered with foam, and brought the news that Captain Jack and his Modocs had gone on the war path.

The whole settlement was soon in a state of great excitement. The Indians killed all the defenseless ranchers they could and then fled to the lava beds of Idaho and intrenched themselves in a cave. Somebody had to ride to Jacksonville, a hundred miles away, to warn the town and bring re-enforcements to the regular troops. Nobody cared to undertake it. Major Drannan saddled Black Bess and started at sundown. All night long the sharp eyes of the scout and the sagacious nose of his pet mare picked out the trail as unerringly as a bloodhound. Before sunrise the Major rode into Jacksonville and told the sheriff to gather a strong posse, as Captain Jack was on the war path and murdering settlers by the score. General Wheaton, in command

MAJ. WILLIAM M. DRANNAN.

of the regular army forces stationed at Linkville, sent for Major Drannan and commissioned him to organize a scouting force. With this force he scouted a strip of country about forty miles long every day in front of where Captain Jack and his men were intrenched in the lava beds, because the officers feared an uprising of the Utes as well. Not an Indian showed his head. Their stronghold was nothing more than a big cave in the lava rock, but it was absolutely secure. There was only one place to get in, a narrow passage, but there were numerous rifle holes on the east and south sides.

General Wheaton determined one day on taking Captain Jack by storm and for three days the whole command, backed by howitzers, were turned loose on the Indians. The assault failed. General Wheaton lost sixty of his men, while the Indians did not appear to have been singed.

General Canby took command and tried to take Captain Jack by storm himself. He lost 100 men and failed.

A conference was arranged between General Canby, his chaplain, Colonel Thomas, two interpreters, and Captain Jack, all without arms. Before it was held Major Drannan went to Colonel Miller, Canby's aid, and said:

"Colonel, if the general ever goes to that council with Captain Jack he will never come out alive."

The Major repeated his warning again and again, but Captain Thomas said, "The Lord will protect us," and General Canby laughed at the idea of treachery.

The conference was held and General Canby, together with Colonel Thomas and George Meacham, interpreter, were traitorously shot down by the Indians.

Capture of Capt. Jack.

Major Drannan then had the cave surrounded by a double ring of guards, knowing very well that the supply of horse meat on which the Indians were living was about exhausted. Soon he found that Jack was sending the squaws and children away, to save food. Every Indian that attempted to escape was captured by Drannan and his men. They all said, "We heap hungry."

One night Drannan, scouting as usual, crossed the trail of three Indians. One track was quite large and long, a second smaller, and one quite small.

"Captain Jack, his squaw, and their little girl are running away," said Drannan to Black Bess. "They are starving, and they've started out to Clear creek to catch fish."

The Major had been in the saddle twenty-four hours, but he never hesitated. He took up the trail and followed it as rapidly as he could push ahead. Across miles and miles of gravel ridge there was nothing to go by except sometimes a bent twig or a pebble turned by the feet. Finally the Major looked down in the valley from the top of a high ridge, and caught sight of the three Indians. He tremblingly put his field glasses to his eyes, and, sure enough, it was Captain Jack, his squaw and little girl.

"Where are you going, Jack?" asked the Major, as he rode up to the big chief who had been causing all the trouble.

"Heap hungry," said Jack, dejectedly. "Guess go Clear creek catch fish."

A few hours later the old scout rode into camp with his three prisoners. The capture put an end to the Modoc war.

Drannan avenged the murder of the Davis family, which was a sensational horror of the plains thirty years ago. An inoffensive family of settlers was killed in cold blood by a party of Mexican greasers, who then made off with their cattle. The deed was laid to the Ute Indians.

"No," said Drannan, with his usual sagacity, "this is the work of greasers."

Lieutenant Jackson detailed him a squad of men and he started in pursuit. He traveled all day and about 9 o'clock at night Black Bess sniffed the air curiously.

"Here's their camp," said Drannan, triumphantly. Sure enough, by the light of the dying embers the little posse could discern the forms of the greasers. The cattle feeding near were those taken from Davis' ranch.

"We'll give you five minutes to get ready," said the Major to the Mexicans, who pleaded abjectly, as they were surrounded. At the end of five minutes they were lined up and shot.

Drannan started on his remarkable career from St. Louis with Kit Carson in 1847 and when 15 years old killed his first Indian or rather two of them. Major Drannan is to-day lithe and agile and stands 6 feet 2 inches in his stocking feet. He still eats bear meat and sleeps on an elk-skin bed.

BORN TO GRUMBLE.

Some People in Every Community Who Are Never Satisfied.

In every community there are chronic growlers, always finding fault with the existing condition of things, and no better satisfied with attempts that are made in the line of improvement.

A Western village had been sorely scourged by fire, its principal business portion having been burned twice. There was no fire department, the citizens apparently being of the opinion that it would be too expensive.

Among them was a man of the name of Grinders, who, while invariably grumbling at the lack of enterprise displayed by the business men of the place, opposed any and every attempt to organize a fire department. "We are taxed too heavily already," he said.

But after the second disastrous fire there was such a clamor for better protection in the future that the town trustees purchased a chemical engine, with hooks, ladders and the usual paraphernalia, provided a room, and a volunteer company was organized.

"It's a waste of money," said Grinders. 'It will be twenty years before there's another big fire. Mark my words. Lightning doesn't strike three times in the same place. You'll see."

Several years passed without any real occasion for the services of the new fire department. The company, it is true, turned out in response to several false alarms, and always made a creditable display when on parade, but Grinders was irreconcilable.

"Look at it!" he exclaimed. "Five hundred dollars thrown away—absolutely thrown away! I told you we shouldn't have any more fires, but you wouldn't listen to me."

One day, however, a fierce blaze broke out in one of the stores in the rebuilt business district. The fire company was promptly on hand, and by strenuous exertions put out the flames before much damage was done. The work of the "fire boys" was creditable in the highest degree, and it was the general opinion that they had saved the town from a third calamity.

"What do you think of our fire department now, Grinders?" asked one of the exultant merchants—the one, in fact, in whose store the fire had started.

"H'mph!" growled Grinders. "How much did you lose?"

"Only about thirty-five dollars," replied the merchant. "Mostly empty boxes. The boys put the fire out before it got into my goods."

"H'mph!" growled Grinders again. "Five hundred dollars to put out a thirty-five-dollar fire!"

And after that he grumbled worse than ever.—Youth's Companion.

The "Lady" Question in Germany.

Germany is having its "ladies" and "gentlemen" question. A controversy has arisen with regard to the style which should be adopted in addressing married women. There are, in the language of the fatherland, four names whereby that delightful class may be designated—gemahlin (consort), gattin (spouse), frau (lady), and weib (wife). To save the not infrequent disputes and heartburnings which arise from impertinence and ignorance in the use of any one of these terms, it is now proposed that one shall be officially allotted to each of the recognized gradations of the "scale social." In this manner, a general's wife shall be known as his "consort;" she of an official of the next lower grade shall be that happy person's "spouse;" the middle-class partner becomes her husband's "lady," and the workingman's helpmate is simply his "wife."—New Orleans Picayune.

Pruyn—Have you heard that horrible story about old Stiffe being buried alive? Dr. Bolus (hastily)—Buried alive? Impossible! Why, he was one of my patients.—Exchange.

Some men walk so lazy and worthless on the streets that you know they are on their way to a saloon.

SAVED HER FROM THE SUTTEE.

Hindoo Woman Now in America Escapes from a Horrible Death.

Mrs. Ramie Lalros, a woman between 50 and 55, arrived in Chicago recently from India, via Yokohama and San Francisco, with her husband. Mrs. Lalros' husband is a Eurasian from Lahore, and a Christian, but the woman is a stanch Hindoo who refuses to be converted, and has brought with her from her native Benares a copper statuette of the goddess Shiva, which she worships at leisure, while her husband may be attending services in the nearest Episcopal church. They tolerate each other and live happily together with their three beautiful daughters, two of whom are of their father's creed, while the third, the youngest, is a devout worshiper of Shiva and Ganeesha.

Mrs. Lalros has a history that is most interesting, for she was about to become a victim to the terrible suttee of her caste when rescued by the man who afterward became her husband. As is the custom in India, Ramee Khud, while still a toddling child, was affianced to the son of a friend and neighbor. At the age of 11, just on the eve of the children's marriage, the youth of 13 who was to be the bridegroom died, and, according to the irrevocable laws of her caste, she was doomed to be burned on his funeral pyre on the banks of the sacred river Jumna, over from the city of Benares. As Lalros had much to do with what followed, it is just as well he should tell the story:

"It was a little before the Sepoy mutiny of 1857, and I, the son of a European father, was guiding a detachment of the First Bengal cavalry through the jungles to Benares. While concealed in the bush waiting for sunrise we saw the dead youth carried down to the water's edge on a bamboo stretcher, and, judging from the sort of crowd that had assembled, we were about to witness a suttee. The body was covered over with a green silk robe—for he was a high-class Brahmin—and placed on a pile of resinous sandal-wood logs. Then the cloth was removed, the bier placed on the pyre,

SAVED FROM THE SUTTEE.

with the feet toward the Jumna, six logs were laid on the body, and all was ready for the widow.

"Led by a relative Ramee walked slowly down the bank to play her tragic part in the ceremony, covered with a flowing robe of white. A Brahmin priest stood at the head of the body—the scene is before me now as if it were but yesterday—and he directed the proceedings in the coolest manner possible. Taking the rod presented her by the Brahmin in her right hand Ramee walked three times round the bier and waved it over her head. The Brahmin next handed her a torch, which, though to all appearance not lighted, contained a spark of fire within. Very soon the waving of the torch caught a current and ignited. I could not see the girl's face all this time, but I could see that her form shook like an aspen leaf.

"The Brahmin now, amid profound silence, having ordered her to apply the torch, Ramee advanced toward the pile with tottering steps, and in a moment the pile was ablaze. Now came Ramee's time to sacrifice herself, to perish in the fierce flames that were already stretching out their tongues toward her flimsy robe.

"She hesitated, she trembled, and by command of the priest two men were about to throw her on the blazing pyre, when the officer commanding the detachment, a young man with a soft heart, ordered his men to charge. They obeyed the order with alacrity, and not a moment too soon, dispersing the suttee party, which fled to its boats, leaving Ramee fainting on the river banks. In taking this step the officer really disobeyed orders. Fortunately we found what we had come for. We saw the rebels were fortifying Benares. As for Ramee, the colonel's wife took her under her protection, and after the mutiny was suppressed she became my wife."

HERO AMONG HIS COMRADES

Is Tommy Watson, a Stowaway on the Texas at Santiago.

At the training station at Newport is a boy who is a naval apprentice in one of the lowest divisions and yet a veteran of the Spanish war. He is 14 year of age, and yet he was in the battle of Santiago. He heard Commodore Philip, of the Texas, when he said to his crew: "Don't cheer, boys; the poor devils are dying." The lad, while not on the department rolls, was a member of the Texas' crew at the time of the fight, and, in fact, all through the war.

The boy is Thomas Watson. He had a brother in the crew, and when the ship was about to sail to the front he smuggled him aboard. He was cared for in concealment for some days, until, stowaway-like, he made his appearance on deck when it was too late to set him ashore. Once at the front, he might as well be kept on the Texas as any other ship of the fighting line, so the officers accepted the situation.

The boy soon became proficient in such duties as his strength would permit his performing, and being a bright fellow, it was early seen that he would not prove a hindrance in case of action. In fact, there is evidence that he conducted himself in a praiseworthy manner. He admits that he was scared at times during the action. Upon the return of the ship for New York he was taken for enlistment in the navy in regular order, and had it been necessary the entire ship's company would have vouched for him. To-day he is probably far better fitted for filling a number in the ship crew than any other boy at the training station. He may be expected to secure rapid promotion from class to class.

STORIES OF THE SPANISH WAR

One rainy night in Cuba four rough riders had gathered under a tree for shelter. They had had nothing to eat all day and were sympathizing with one another over their ill-fortune. "It's tough luck," said one, "but we'll just have to grin and bear it. I am about starved all the same." A trooper from one of the Western companies happened to be passing the tree, and he heard the last remark. Going up to the speaker he slapped him on the back and, opening his blouse, pulled out some hardtacks. "Sorry yer in sich tough luck, pard," he said. "I ran in a streak of luck to-day and got ten hardtacks. Here, you take half of 'em." "Thanks, old man," was the grateful rejoinder. "I'll only take four. I guess that will do!" As the Westerner walked off the other rough rider turned around and gave each of his companions a hardtack. The next morning the Western man was surprised to receive a visit from Col. Roosevelt, and still more surprised when the colonel thanked him for the hardtack he had given him the night before.

-:—:-

Eight of the ten casualties upon the American ships in the battle of Santiago were ruptures of the ear drums. One of the cases was that of Lieut. Harrison of the Oregon, who stuck his head out of a turret just as a thirteen-inch rifle was fired, and had the full benefit of the noise of the explosion. The drums of both ears were lacerated, and for a time he was totally deaf. The gunners on the battleships are accustomed to plug their ears with cotton to protect them, but they were out for the usual weekly inspection on a peaceful Sabbath morning when Cervera's fleet appeared, and rushed to their guns without thinking of cotton or anything else.

-:—:-

Lieut. Frank P. Hayes of Troop L of the rough riders, which was commanded by the gallant Capt. Capron, is a resident of Oklahoma and enlisted at Fort Sill. He is of small physique, but is grit to the backbone, knows what to do in an emergency, and talks as he shot, to the point. In camp before Santiago, after every excuse for a meal, Hayes would get up murmuring "and —— Benjamin Franklin." At first nobody understood this curious "grace after meat," but at last an explanation was forthcoming. "You know, boys, Benjamin Franklin was the old duffer who used to say that you ought always to get up from a meal 'feeling as if you could eat a little more.' That's what we do."

-:—:-

The luck of war is a queer thing, says a member of the band of the Thirty-third Michigan. We used to talk about that in Cuba before the fighting began, figuring out what chance a man had to get killed. Well, there was another chap in the band; he played the trombone, and he used to laugh and say that the Spaniards couldn't spoil his business, anyway; they might shoot his legs off, or shoot his arms off, or shoot all through his body, so long as they didn't kill him; and when he came out of the war he'd be able to go on playing the trombone just the same. All he needed to do that was his mouth. Well, sir, when we got into the fighting a Mauser bullet came along and struck Mr. Trombone Player right in the mouth, and he'll never blow another note on a trombone as long as he lives.

-:—:-

A certain old colonel, who had served all through the civil war and who had lost one of his eyes at the battle of Gettysburg, was very indignant because he was put aside as physically incapacitated. Filled with wrath, he journeyed to Washington, and the President, after listening to his plea, said kindly: "But, my good Col. J——, you have only one eye." "Just so, sir," was the prompt rejoinder, "but can't you see the great advantage of my having only one eye? When I aim my gun I will not have to close the other." He fought at Santiago.

People Live on Putrid Fish.

The people who live in the Barotse country develop the muscles of their arms, chests and backs to an abnormal degree, but they seem to be able to use their strength for nothing but canoeing. The Barotse are great fishermen, using all manner of nets, traps and assegais for catching their fish. They, however, seem to prefer fish other than fresh. Sometimes they kipper their catch, and occasionally they are fit for food and untainted, but more often remind one of "Cape snock." But their great delight seems to be fish they find floating in the water, caught, killed and half eaten by a fish eagle. The fish have been killed probably three or four days, and are usually putrid when found. In this condition the Barotse eat them with evident satisfaction. The great number of lepers found on the river can probably be traced to this filthy practice.

An Unusual Case.

The late Senator Morrill once told a journalist that he had never asked a voter or legislator for his suffrage, and had never spent money to bring about his election.

Scarlet Flowers Are Hardy.

Scarlet flowers are said to stand drought better than any others.

ANECDOTE AND INCIDENT

Sir Henry Hawkins was once presiding over a long, tedious, and uninteresting trial, and was listening apparently with great attention to a very long-winded speech from a learned counsel. After a while he made a pencil memorandum, folded it, and sent it by the usher to the Q. C. in question, who, unfolding the paper, found these words: "Patience competition. Gold medal, Sir Henry Hawkins; honorable mention, Job."

A former Lord Mayor of London, Sir William Curtis, was extremely fond of the expressions, "This here" and "That there," a fact which prompted a wag to suggest this epitaph for him:

"Here lies William Curtis, our worthy Lord Mayor,
Who has left this here world and gone to that there."

The origin of the three "R's'ss is attributed to Sir William, who proposed them as one of the toasts at a banquet. Whereupon, another gentleman at the dinner proposed "the three C's—Curtis, King, and Constitution."

Sergeant Channell, who was in the habit of dropping his h's, and Sir Frederic Thesiger were once trying a case about a ship the Helen. Every time the former mentioned the vessel he called it the Ellen. Every time the other counsel mentioned her they her the Helen. At last the judge, with a quaint gravity, said: "Stop; what was the name of the ship? I have it on my notes the Ellen and the Hellen. Which is it?" And the bar grinned. "Oh, my lud," said Thesiger, in his blandest manner, "the ship was christened the Helen, but she lost her h in the chops of the Channell."

Dr. Pakenham-Walsh, who recently resigned the bishopric of Ossory, proposed to his wife in an unusual manner. He was at a dinner-party, and was seated beside the woman of his choice. In the course of the dinner he found that he had been helped to the "wishing-bone," and he pulled for the wish with his neighbor. The little V-shaped bone was broken, and the bishop, having secured the "wish," whispered to his fair companion, as he laid down his part of the bone: "Will you lay your bones with my bones?" She blushingly whispered an assent, and after dinner the engagement was announced.

An English traveler once had an amusing experience with the Roumanian custom-house, which had seized upon a very heavy book he was engaged in reviewing. After weighing it very carefully with a pair of scales, they demanded six francs duty. The traveler protested that this monstrous, particularly as the book was not even new. They replied that it did not matter whether it was new or not; the question was whether it was bound or not. "Then," said the traveler, "if it were not bound I should have to pay nothing?" "Yes," they replied, thinking this would finally settle the matter; "in that case it would have come in duty free." "All right," he said, as he proceeded to tear off the cover; "now I presume, you will allow it to pass?" And they had to do so, though they were very cross about it.

Bridget Rafferty had served the best years of her life as a cook, and now that she was "wearin' awa'" and an operation became necessary, she haughtily declined to go to a ward, but took one of the best rooms in the hospital. The operation was successful, but the patient was allowed very little food. During her convalescence she made frequent use of the electric bell at her bed. The nurse would fly to her, to be greeted with some trifling question or the remark: "I only wanted to know if you were there." As such frequent use of her bell suggested to the matron on that floor that the nurse was neglecting her patient, the nurse remonstrated, and received the following explanation: "Well, you see, miss, here I am paying thirty dollars a week, and I'm not seeing anything, I'm not hearing anything, and, miss, I'm not eating anything. So I just ring the bell to get my money's worth, and, anyways, I enjoy hearing it ring."

The late Harold Frederic, during his first visit to Berlin, after paying some formal diplomatic calls, in the evening dropped in at the Cafe Bauer in the unwonted glory of a frock-coat and a tall silk hat. This hat was carefully hung on a hat-stand, and Frederic sat down to read an English newspaper. Enter a lieutenant, booted, and spurred, and sworded, and epauletted. He brushed against the hat-stand, knocked Frederic's hat over into the sawdust, and swaggered to his seat without so much as looking around. In a towering passion, Frederic went to the lieutenant, stood over him, and pointed to the object on the floor. "Pick up that hat, sir!" he roared. The officers stared amazed, the waiters were paralyzed with terror at hearing one so much more than human so addressed by a civilian. "Pick up that hat," repeated Frederic in a tone more menacing than before. And the lieutenant did what he was told. He was as irresistibly dominated by the courage and force of the man as a schoolboy before his master.

Pussy in a Maze.

More uncomfortable even than "a cat in a strange garret" must be a cat in a "crystal maze"—a series of mirrors so arranged that, once in, it is hard to find one's way out. A strange cat strayed into the Maze at Jacksonville. Says the Times-Union:

Walking around between the mirrors, she saw her own reflection on all sides. She was not pleased. Her tail started to swell, and she rushed at the nearest cat, which advanced to meet her at the same rate of speed. With a shriek of defiance they met, and the ill-tempered feline fell back from a fearful bump against a mirror.

Up she jumped and looked around, only to see an array of abused cats staring at her. When she moved one hundred and twenty-five others moved also. With a mighty howl of disgust she turned and fled.

Groups of cats greeted her everywhere as she dashed into mirrors and tried to climb the slippery surface of the glass. In the course of a few minutes the animal ran through the exit of the crystal maze as if shot from a catapult. With two jumps she rushed to the street, and disappeared in one of the adjacent houses, a very badly "rattled" cat.

TORTURE IN RUSSIA.

Punishment Visited Upon the Man that Shot at Alexander II.

In April, 1866, Karakozoff shot at Alexander II. as he was coming out of the summer garden to take his carriage. The shot missed, and Karakozoff was arrested on the spot.

In 1866 I was in Siberia. One of our Siberian officers, who traveled from Russia to Irkutsk toward the end of that year, met at a post station two gendarmes. Our Irkutsk officer, finding the gendarmes at the tea table on a cold winter night, joined them and chatted with them while the horses were being changed. One of the two gendarmes knew Karakozoff.

"He was cunning, he was," he said. "When he was in the fortress we were ordered, two of us—we were relieved every two hours—not to let him sleep. So we kept him sitting on a small stool, and as soon as he began to slumber we shook him to keep him awake. * * * What will you? We were orderer to do so! * * * Well, see how cunning he was: he would sit with crossed legs, swinging one of his legs to make us believe that he was awake, and himself, in the meantime, would get a nap, continuing to swing his leg. But we soon made it out and told those who relieved us, so that he was shaken and waked up every few minutes, whether he swung his legs or not." "And how long did that last?" my friend asked. "Oh, many days—more than one week." * *

When Karakozoff was hanged one of my comrades from the corps of pages was present at the execution with his regiment of cuirassiers. "When he was taken out of the fortress," my comrade told me, "sitting on the high platform of the cart which was jolting on the rough glacis of the fortress, my first impression was that they were bringing out an india-rubber doll to be hanged; that Karakozoff was already dead. Imagine that the head, the hands, the whole body, were absolutely loose, as if there were no bones in that body, or that the bones had been all broken. It was a terrible thing to see and to think what it meant. However, when two soldiers took him down from the cart, I saw that he moved his legs and made strenuous endeavors to walk by himself, and to ascend the steps of the scaffold. So it was not a doll, nor could he have been in a swoon. All the officers were very much puzzled at the circumstance, and could not explain it." When, however, I suggested to my comrade that perhaps Karakozoff might have been tortured the color came into his face, and he replied, "So we all thought."—Prince Kropotkin, in the Atlantic.

Rogue Camel's Suicide.

A valuable camel, working in an oil mill in Africa, was beaten by its driver. Seeing that the camel had treasured up the injury and was only awaiting a favorable chance for revenge, the driver kept strict watch upon the animal. Time passed away; the camel, knowing that it was watched, was quiet and obedient, and the driver began to think that the beating was forgotten, when, one night, after several months had gone by, the man was sleeping on a raised platform in the mill, while, as is customary, the camel was stabled in a corner.

Happening to awake, the driver saw by the bright moonlight that, when all was quiet, the animal looked cautiously around, rose softly, and, stealing toward a spot where a bundle of clothes and a burnous thrown carelessly on the ground, resembled a sleeping figure, cast itself with violence upon them, rolling with all its weight, and tearing them most viciously with its teeth. Satisfied that its revenge was complete, the camel was returning to its corner when the driver sat up and spoke. At the sound of his voice, and realizing the mistake it had made, the animal was so mortified at the failure and discovery of its scheme that it dashed its head against the wall and died on the spot.—Gentleman's Magazine.

Cost of Burning a Heretic.

In the course of an article sketching the histories of some early English ecclesiastics, a writer in the Windsor Magazine (London) tells what it cost to burn a heretic. The items are taken from the municipal records of Canterbury, dated 1535, and are as follows:

For the expenses of bringing a heretic from London	14s 8d
For 1½ loads of wood to burn him	2s 0d
For gunpowder	1d
A stake and staple	8d

Electric Equipment for Gibraltar.

The port of Gibraltar is to have a complete electric equipment, both for government and private supply, and in keeping with the military ideas that are so prevalent there it has been decided to locate the power station in one of the best protected positions on the rock. This is what is known as the King's Bastion, cut out of solid rock and formerly used as an artillery barracks.

It may usually be said of a man in debt that he is generous to his wife.

TIBBS WAS ELECTED.

THE FLIGHT OF ORATORY THAT WON HIM A PAGESHIP.

Jimmie Was Not Bashful, and His Early Call on Senator Eldridge Gave That Gentleman an Inspiration In Words That Carried the Day.

Below is printed the noted speech of Senator Eldridge of Shelby in nominating Jimmie Tibbs, the Nashville newsboy, to be page of the senate. Senator Eldridge had made the newsboy's cause his own, though the little fellow came to him unknown, with no stronger supplicancy than the boy's frail yet energetic appearance. Senator Eldridge had notified the senate that the man who voted against Tibbs voted against the senator from Shelby, and the sweetness of revenge would come when the opposing voter wanted the senator's support on a local bill. The speech was as follows:

"Mr. Speaker, I nominate for page Jim Tibbs of Davidson county. There can be no ulterior motive ascribed to this nomination, no railroad passes, no champagne suppers, no political pulls. I come from the muddy Mississippi river and Mr. Tibbs from the misty mountain tops of middle Tennessee. Mr. Tibbs has seen ten summers, but many, many winters have shed their snow on his sunny head. His freckled, anxious face is standing there gazing at me now. He is looking up now, but for nearly all his life he has looked down as he has shined the big feet of small men.

"Mr. Speaker, Mr. Tibbs is not here as a supplicant for pity or sympathy. Mr. Tibbs is a man and the head of a family. Mr. Tibbs has met the dizzy, sinsick world and won out. He has not become as dizzy or as sick as you and I, and, therefore, I will not refer to the humble home of Mr. Tibbs or the old mother who, no doubt, is on her knees praying to Almighty God for Mr. Tibbs. I will not refer to the paralyzed brother who, like myself, knows that Mr. Tibbs cannot fail. But somehow I feel cold when I think of that snowstorm out yonder and how it must rattle the curtainless windows of Mr. Tibbs' residence. And, Mr. Speaker, I somehow do wish that the mother of Mr. Tibbs would kindly mention this great senate in that prayer, for, if she did, I believe it would suit its constituents better, and we would come nearer coming back next time.

"Mr. Tibbs, like myself, has been blown into this senate by the sublimity of luck. Destiny chooses her disciples with unerring aim, and those who oppose Mr. Tibbs are fighting God. I will tell you why I think this. I am stopping at the Tulane hotel, by the faith of the host thereof. My wife and baby are with me there. Yesterday morning I had been up very early discussing the question of a new constitution for myself and my state.

"At 6 in the morning Sarah was softly humming to the teething baby, rocking him back to rest, to sleep and to forgetfulness, which is the only rest. The old refrain rose and fell as the nodding of a flower:

"Jesus can make a dying bed
Feel soft as downy pillows are,
While on his breast I lean my head
And softly breathe my life out there.

"Knock! knock! 'Come in,' I angrily said, expecting a bellboy.

"Mr. Tibbs appeared. He came to the bed and said: 'Senator, I am named Tibbs, and I want to be page of the senate. I want you to make the rest of them vote for me, please sir.'

"'Mr. Tibbs,' I replied, 'does it not occur to you that you are crowding me somewhat? Don't you think for the kind of a day and the time of day that your visit is not the proper thing?'

"'Well, it is good daylight,' he said, 'and I have been up some time.'

"'Yes, sir, all men should be ready for business by this time,' was my rejoinder, 'but why do you come to me and how did you find me?'

"'I saw you in the Climax saloon yesterday, and Mr. Maddin, the barkeeper, said you were a senator,' came the unhesitating answer.

"I quickly glanced at my wife, the rocking had stopped, and the baby, hearing a strange voice, had ceased his complaint and was sitting up, looking like a jack rabbit in a bed of lilies, all eyes and ears.

"I said, 'Mr. Tibbs, I must ask you to excuse me, I will call on you later.'

"'Yes, sir, I will see you,' he replied, and went away.

"Sarah turned her head and said, 'Will, I am for Tibbs.'

"Mr. Speaker, I arose and raised the curtain of the window. The east seemed flecked with a swarm of golden bees; the sun, that had been away, was knocking at the front door of this planet. Sir, who can tell of the systems and cycles he had smiled upon, of his unspeakable glory and sublimity? The light of this sun will fade by and by. At one time it was born, at one time it must surely die, but, sir, the fire I had seen in the eyes of Jimmie Tibbs will not die. It is older than the sun. It has stood floods of storm and wrath that would quench that sun. One is of today, but the faith, the courage and the hope of Tibbs make us dream again of the immortality of the soul."

Tibbs was elected.—Nashville American.

Neglected Poe.

According to the English papers, Austin Dobson is accredited with the following lines, written in a copy of the works of Edgar Allan Poe:

I wonder when America will know
That much her greatest bard is Edgar Poe!
I say this reminiscent and defiant
Of Boker, Tabb and Longfellow and Bryant.

Evils in the journey of life are like the hills which alarm travelers upon their road. They both appear great at a distance, but when we approach them we find that they are far less insurmountable than we had conceived.—Colton.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, MAY 11 1899

A frequent source of error in the location of quartz mines is found in the inability of the prospector to distinguish between the true and apparent strike of a vein. Many veins have a winding course, swinging one way and then another, but most veins are practically straight for considerable distances. There is less likelihood of error in locating a vein which stands perpendicular or nearly so, for the topography of the ground does not affect it materially; but where veins have a low angle of dip in a rough country the locator finds his vein striking in a zigzag line across the ridges and gulches and he is often puzzled to know how to locate his claim so as to cover the lode. This difficulty may be solved by a correct understanding of the the meaning of strike and dip. The strike of a vein is its direction on a horizontal line, taken at right angles to its dip. When about to locate a mine the strike must be taken in a horizontal direction (on the level), and not down the slope of the hill. This is the true strike, so do not locate the claim with an elbow in the center, but straight—parallel with the real strike.

The success of the Roberts pumping plant demonstrates that there is no occasion for farmers residing along Kern river to suffer for want of water for irrigation when the river is low. For the past two years there has been insufficient water to irrigate the lands even most favorably situated and the result has proven disastrous to more than one small farmer. But Mr. Roberts had confidence that there was ample water under the ground for all practical purposes and the result of his venture has shown the correctness of his conclusion. Five wells, averaging about thirty feet in depth, are yielding four cubic feet of water per second—a stream of sufficient size to flood the whole farm as often as it shall be necessary. The experiment is an experiment no longer. Flowing under the earth's crust within a reasonable distance of Kern river is a vast body of water that requires small capital to place it on the surface of the ground. For Mr. Roberts and those who follow his example, dry years in future will have no terror.—*Californian.*

The organization of the Southwest Commercial Congress is the initial movement of what will become a powerful factor for the good of this southwestern region. The constitution adopted provides: "The purpose of this organization shall be to promote business and commercial interests of the territory represented by its membership by endeavoring to secure concert and unity of action throughout such territory for the purpose of advancing said interests."

The next article provides: "This congress shall be composed of representatives from the commercial organizations in the following territory: Arizona, New Mexico, Utah, Nevada and Southern California, which shall be deemed to include the counties of San Diego, Riverside, Orange, San Bernardino, Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Kern, Tulare, Kings, Fresno and Inyo."

Better than a new gold discovery is that of the wealth to be gained by California through the intelligent use of water for irrigation. Throughout the great interior valleys it has been found that abundance of water may be had by means of pumps and wells, the improvements in machinery making practicable what was formerly regarded as out of the question. It appears from a recent publication that W. A. Wallace irrigates his place near Goshen, Tulare County, by means of a 6-inch centrifugal pump, operated by a ten horse power engine, using distillate oil for fuel, which is cheaper than gasoline. The pump raises 800 to 900 gallons of water a minute, lifting the water twenty-two feet, from a well thirty feet deep. In ten hours water enough is pumped to cover twenty acres one inch deep. The cost of pumping is about $1 75 a day.

Senator Perkins and Governor Gage have locked horns. The former said the latter vetoed too many bills, and the latter gives the Republican legislature a hard dig when he thinks there was so much awfully bad legislation. The legislature, according to the Governor, would have looted the State treasury, and the people have him to thank for saving any vestige of their purses. Taking them all round, then, it can be proven by high Republican authority that there are no good Republicans. But still there are *some* very good Republicans. The party, however, must be held responsible for some very unjustifiable acts. There is no other way of running a republic than by turning out the party that does wrong, notwithstanding the fact that it has some very good members.—*Colusa Sun.*

If the story be true that the publication in Germany of Coghlan's song about the Kaiser has had the effect of inclining the people to favor the scheme of increasing the navy, then our German consuns have taken the joke altogether too seriously. It was intended the burden of the ditty should be a josh and not an increase of taxation.

The way American girls are getting to the top across the herring pond is gratifying. Lady Curzon of Kedleston, nee Leiter of Chicago, is vice reine of India, and now comes the news that the young Duchess of Marlborough, once Consulo Vanderbilt, is in a fair way to become the Lady Lieutenant of Ireland.

THE GAME OF QUOITS.

CAN BE PLAYED ANY PLACE AND IS SPLENDID EXERCISE.

It Is a Very Ancient English Pastime, and Its Beginnings Are Lost In the Mist of Ages—Fine Training For the Eye and Arm.

There are some games which have never had their boom, and quoits is one of them. Still, as nothing happens but the unexpected, it may be that the time is nearly ripe for quoits to be taken out of its undeserved obscurity, to be exalted to the status of a national game, to have weekly papers named after it and to have columns in the sporting press devoted to the doings of its champions. Stranger things have happened. Who, for instance, would have said when at the end of the sixties a few energetic sportsmen went wobbling about on bone shaking bicycles which it would have been far easier to push than to ride that at the end of the century considerably more than 100,000 bicycles would be manufactured annually in Great Britain alone and that a great part of the population would adopt this means of locomotion? One cannot imagine that quoits will ever attain such popularity as the bicycle, but the unprejudiced person can see no reason why it should not become as favorite a pastime as golf, which a very few years ago was almost unheard of south of the Tweed.

Quoits is a very fine game, especially in the winter time. It is splendid exercise and trains the eye and the hand to act together in a way that few other sports can do, for the very essence of it is accuracy of aim at a mark placed below the level of the hand. It has been objected that throwing quoits makes the player lopsided, but, after all, that is easily remedied, for there is nothing to prevent the player throwing the quoit with his left hand if he so pleases, and such a change would make a variation in the game and also afford an excellent method of handicapping the men of unequal skill. Quoits strengthens the arms and shoulders, but it is not a pastime which primarily demands strength.

A great advantage of the game is that it can be played in any small space and that the ground need not be particularly level. Any rough field or waste bit of ground is good enough for a quoits pitch, and no rolling or cutting is required to satisfy the demands of the most exigent. For cricket you need a carefully prepared wicket, for lawn tennis and croquet a piece of turf like a billiard table and for golf the best part of a country all to yourself, but for quoits you only need a few yards of rough ground, and you have as good a place for throwing as any one can possibly require.

People certainly might play quoits more than they do, but the taking up of a game is usually a matter of fancy, and perhaps two things stand in the way of quoits. First, there is an idea that it is a "rustic" sport and can only be played by the rough country lads, and, second, there is the legend that the game is derived from the classical discus throwing, a suspicion which it must be confessed is enough to throw a slur on any well regulated game.

No treatise on quoits can begin without the time honored pedigree of the quoit from the discus. Strutt, who lived at the end of the last century, of course dealt with it, and equally of course he dragged in the discus even if he did not invent the descent of quoits from the sports of ancient Greece. The thing, of course, is absurd. To make a discus, the artisan did not, in the words of the immortal Irishman, take a hole and put some iron around it. The discus was more like a flattened Dutch cheese and was a solid missile. Moreover, it was not held in the same manner as a quoit, but was bowled underhand, in which indeed it alone differs from putting the weight. That quoits is now played chiefly in the country is the fault of those who do not play it and bring it into fashion.

It is no doubt a very ancient English game, and its beginnings are lost in the mist of ages. Hakluyt mentions it in his book of "Voyages," so it was well known in Queen Elizabeth's time, when it probably was one of the favorite sports of Merrie England. In some parts of the country the rustics used to employ horseshoes for want of properly made quoits, and there are districts in which the quoit is called a "shoe" even to this day. This gives us the clew to the most probable origin of the sport and hints that the first game of quoits was started by throwing old horseshoes at the hob or mark, and from this gradually grew up the practice of having quoits specially made for throwing. So much for the discus legend. As for the word "quoit" itself, its etymology is more than doubtful, and it gives us no clew whatever to the origin of the game.

Shakespeare, who mentions everything except tobacco, of course has a reference to the sport, and as Hakluyt was a contemporary of his it may be held to show that the spacious times of Great Elizabeth were the palmy period of quoits. It is true that he does not speak of the sport in very reputable connection, for the only mention of it occurs in the scene in which Prince Henry, Falstaff, Poins and the rest were in the Bear's Head tavern, in Eastcheap. Falstaff, in giving a character sketch of the young prince, observes that he plays quoits well, but the contoxt very clearly shows that in Queen Elizabeth's time at any rate quoit playing was looked down upon as the idle man's recreation, much as skittles is with us. That fat Jack Falstaff, disreputable old fellow as he was, meant to imply no good of the prince by his reference to quoits is very evident. This is the only reference to quoits in Shakespeare, and it is a libel, though the sting is taken out of it by the fact that it is put into the mouth of Falstaff.—Physical Culture.

Malicious Interference.

"I'll get even with that printer," said the editor of the Plunkville Bugle, "if it takes me the rest of my life."

"What printer?" asked his friend.

"That tramp I took on while my wife was visiting her mother. I got a $10 write up out of old Hiker, who is laying his pipes for the senatorship, and I said that some day his little son would make as big a mark as his father, and that villain fixed it that the young 'un would be as big a mark, etc."—Indianapolis Journal.

FARM AND GARDEN

MEXICAN JUNE CORN.

Advantages From Its Wonderful Aerial Root System.

The Mexican June is an interesting variety of corn and The Rural New Yorker gives an instructive story about it, in which occur the following items, with illustration:

A second planting was made the last week in May. After the plants were well up all were destroyed but two.

Liberal dressings of nitrate of soda, sulphate of potash, wood ashes, bone four and horse manure were made from time to time. Our object was to find out how tall this corn could be forced to grow. During the season of 1897 the stalks grew to a height of 13 feet, and this in a rather poor soil under ordinary field culture. The nodes or leaves averaged seven inches apart, the old leaves averaged about four feet long and four inches wide. It will be seen that such plants would give an immense amount of folinge per acre. The following table will show approximately the rate of growth from week to week:

July 25	5 feet high.
Aug. 2	7 feet 5 inches.
Aug. 9	8 feet 8 inches.
Aug. 16	9 feet 11 inches.
Aug. 24	11 feet 8 inches.
Sept. 11	13 feet.

Our next measurement was not until Sept. 27, when the taller plant measured 14 feet, the other being nearly the

AERIAL STEMS AND ROOTS OF CORN.

same height. After this it made a growth of, perhaps, six inches when frost occurred. The tassels began to shed their pollen upon the silks of three sets, the uppermost of which was 10 feet above the soil. The lowest set was eight feet above the soil. There were nine whorls of aerial roots, eight of which are shown in the cut, the highest being four feet above the soil. The longest leaves were five feet in length and four inches in width.

We have raised this variety of corn for three seasons, and while all other kinds were more or less lodged by high winds not a plant of the Mexican June was broken or bent from a perpendicular position. This is readily accounted for by its wonderful root system and the elasticity and toughness of the stalks, which resemble so many bamboo fishing rods. Following are some notes with which some of our readers have favored us, which will show how the Mexican June corn conducted itself with them:

Charles Macon of Ingleside, N. C., writes under date of Sept. 22: "I have two rows of Mexican June corn. The stalks will average 16 feet in height—some of them 18 feet. They have fair sized ears that I think will mature—they are about half matured now."

Mr. Benjamin Buckman of Farmingdale, Ills., as early as Sept. 12 wrote: "The tallest stalks of the Mexican June corn have reached the height of 14 feet, and if we have two weeks of warm weather the ears now showing will produce seeds that will grow."

The lower whorls of aerial stems send out as many fibrous roots as does the main stem itself, and these unquestionably absorb nutriment from the soil. Hence it is fair to suppose that the Mexican June corn will thrive in poorer soils and during severer droughts than other varieties.

A Five Rowed Corn Marker.

"Nine times out of ten you will plant a hill of corn in a track made by the horses if marked with a two or four rowed marker, where if marked with a three or five rowed marker you will never plant in the horse track, and a five rowed marker will mark on rolling or uneven ground as well as level ground, if made like the inclosed plan," says an Ohio Farmer correspondent. The plan is

PLAN FOR CORN MARKER.

lettered thus: A, 2 by 4; B, 3½ feet long; C, ¾ rod hinge; D, 2 by 4; E, 1 by 4; F, 2 by 4.

"My marker marks five rows. The runners are 3½ feet long, made of 2 by 8 plank, with 2 by 4 crosspieces, notched in runners and spiked. The hinges are made by boring a hole through the 2 by 4 crosspieces and then putting a three-eighths rod through them. The tongue pieces can be put on to suit, for a sleigh or a wagon tongue. If the outside runners do not make a plain mark, I spike a block of wood on them for a weight. Farmers should make these things when they can get time, and not wait till spring work is rushing them."

A well known professor says that over a large area of central Russia the magnetic needle does not point north or south. It is in one part deflected to the west, and at another part to the east, and at one place it points due east and west.

The eggs of a bluebottle fly, if placed in the sun, will hatch in two or three hours.

About 1,500 tons of iron and brass wire are yearly manufactured in Britain into pins.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31st, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter e Mar 9

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

LEGAL.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Edouard Chenot, deceased.

It appearing to this Court, by the petition this day presented and filed by J. E. Shepherd and W. L. Hunter the Executors of the Last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said decedent, to pay the debts of decedent and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said Superior Court on MONDAY, the 29th day of May, A. D. 1899, at 10 o'clock a. m. of said day, at the court room of said Court, at the Court house, in the town of Independence, in the county of Inyo, State of California, to show cause why an order should not be granted to the said Executors to sell so much of the real estate as shall be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WALTER A. LAMAR, Judge of said Superior Court.

Dated April 24th, 1899.

P. W. FORBES, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff, vs. ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant.

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 20th day of April, A. D. 1898.

D. J. HESSION, Clerk.

[SEAL] By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 19th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR, Judge of said Superior Court.

SHERIFF SALE.

BY VIRTUE OF AN EXECUTION, ISSUED out of the Justice's Court of Fifth Township, County of Inyo, State of California, and to me directed and delivered, for a judgment rendered and entered in said Court, on the 9th day of August, 1897, in favor of J. B. Dover and against L. B. Harrison, I have levied on the following property, to wit: An undivided one-half interest in that certain water right known as the "Wingfield and Harrison" water claim, commencing at a monument of stone on the north side line of Jim Cooper's mill-site location and running along said line east forty rods thence north 20 rods, thence west 40 rods, thence south 20 rods to place of beginning. Is at Stone Corral in South Park Mining District, Inyo County, State of California. Also,

An undivided one-half interest in that certain mine or mining claim known as the "Myrtle Lee." This claim is located about three miles southeast of South Park spring, in the Panamint range of mountains on the west side of said range, in South Park Mining District, Inyo County, California.

NOTICE IS HEREBY GIVEN that on the 4th day of February, 1899, at one o'clock p. m. of that day, in front of the Justice's office, in the town of Ballarat, County of Inyo, I will sell all the right title and interest of said L. B. Harrison in and to the above described property, at PUBLIC AUCTION, for cash, gold coin in hand to the highest and best bidder, to satisfy said execution and all costs.

A. M. GIVEN, Sheriff.

Dated the 13th day of January, 1899

TO LAKE TAHOE

A TRIP OF RARE ITEREST.

Passengers on west-bound overland trains o Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:30 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leav promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the mo ning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spen examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

Methodist Church.

Services for Sunday, May 14th, 1899.

Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m.

The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

County Clerk Hession went to Bishop Wednesday.

N. E. Conklin has bought the Frazer band of sheep.

R. Hession of Big Pine spent several days in town this week.

Arlie Mairs has gone to Saline Valley on business connected with his copper mine there.

Remember Dunham & Cartland, the photographers, will remain in Independence only one week longer.

Mrs. Bertrand Rhine and her two little daughters will arrive home from San Francisco this evening.

Dunham & Cartland, the celebrated photographers are here and are doing a rushing business. They will remain in town one week longer.

Mrs. Rhine is selling out the stock of goods damaged by the late fire at greatly reduced prices. If you want a bargain go and look the stock over.

Miss Georgia Johnson has gone to Washington, D. C., as an attorney for Nevada Indian War claimants to collect claims allowed by the late Congress.

Harry Cook was down from Mazourka a few days this week. He says they have had a survey of their tunnel made and are now more hopeful of getting to bedrock.

Dave Willis found the tiniest rabbit and the biggest strawberry of the season on Wednesday. A photograph of the two was taken at the Court house and shows them to be almost of a size.

Mr. and Mrs. A. L. Conklin left for Bakersfield on Wednesday, where they will reside in the future The Conklin ranch at Blackrock has been leased to N. Peterson for a term of five years.

C. H. Jordan arrived at Independence on Wednesday from San Francisco. Mr. Jordan has a bond on the Green Eyed Monster mine and the Roeper mine about a mile north of Citrus Station on the C. & C., and we understand that he is about to begin some development work. They are both copper prospects carrying some gold and silver.

Decoration Day at Big Pine.

Memorial Day will be celebrated at Big Pine May 30th, 1899, under the auspices of Gen. John A. Logan Post, G. A. R., Department of California and Nevada. Assembly will sound at 10 o'clock a. m. sharp. Post, with all Confederate and Federal veterans, will form on Main Street near corner of Church under command of Commander Henry Shirley, Marshall of the day, Fred B. Stewart, in charge of column, headed by President of the Day Irv. H. Mulholland, Orator of the Day, P. W. Forbes, and Chaplain Wilcox. Sons and daughters, grandsons and granddaughters of Confederate and Federal Veterans, under command of Assistant Marshall John L. Collins, will form on corner of Church Street and fall in line next to G. A. R. Post, followed by schools citizens on foot and in carriages. The column will march with martial band to Big Pine Cemetery, where dedicatory services will be performed in honor of deceased soldiers and sailors by G. A. R. Post; after which column will countermarch to suburbs of Big Pine and break ranks for rations. The commissary department of the Ladies Aid Society will assist in furnishing rations to the multitude. Reception Committee, Comrade M. H. Bush, Mrs. George Hall, Mrs. May Schalten, E. Spencer.

At 2 o'clock p. m. the following program will be rendered at Educational Hall:

Introductory Remarks by President of the Day.....I. H. Mulholland
Music, Decoration Hymn.....Choir
Prayer.....Chaplain Wilcox
Recitation, Serving With the Tenth, Miss Tena Warner
Recitation, Yankee Consul General, Jessie Thomas
Reading, Poem.....Mrs. Marion Collins
Music.....Choir

1866 Memorial. 1899

TO DESCENDANTS OF CONFEDERATE AND UNION VETERANS:

Recognizing the fact that amity has been restored between the Confederate and the Federal Veterans of the late Civil War and believing that their descendents should perpetuate the same, all sons and daughters, grandsons and grand-daughters of Union and Confederate Veterans are cordially invited to assemble at Big Pine on the morning of May 30th 1899, at 10 o'clock to participate in the celebration of Memorial Day, and in decorating graves of Confederate and Federal soldiers and sailors buried at Big Pine.

By order of Committee.

W. H. UHLMEYER,
Son of Union Veteran.

DOUGLAS ROBINSON,
Son of Confederate Veteran.

A. E. JANVIER,
Teacher.

The people know a good thing when they see it, which accounts for Dunham & Cartland having such a rush of business. Their photographic work is up to date and equal to that done in San Francisco. Give them a call and take a look at their samples.

Calvert Meads, an insurance man, arrived at Independence last Monday, leaving yesterday morning. He came here for the purpose of adjusting the loss occasioned by the recent fire in Rhine's store. The amount of the damage is not made public.

Dunham & Cartland have all the latest novelties in photography. They make a specialty of carbon work and photo jewelry. Buttons, scarf pins, medallions and charms of every description.

Archie Farrington came down from Big Pine yesterday, returning to-day. Mr. Farrington is delivering a large quantity of wood at Alvord for the Railroad Company.

S. W. AUSTIN, Register.

NOTICE OF ANNUAL MEETING OF STOCKHOLDERS.

NEW STEVENS DITCH COMPANY.

Location of principal place of business, Independence, Inyo county, California. Location of works, Inyo county, California.

The Regular Annual Meeting of the above Company will be held at the office of P. W. Forbes in the town of Independence, County of Inyo, State of California, on Saturday the 27th day of May, 1899, for the election of a Board of Directors for the ensuing year. Every stockholder is expected to be present, in person or by proxy.

By order of the Board of Directors.
Dated May 12, 1899.

P. W. FORBES, Secretary.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st. 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner: your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

KIPLING'S GOOD LUCK.

The first story that Kipling writes after his illness will bring a fabulous price. It will be sought as eagerly by progressive publishers as Hostetter's Stomach Bitters is by all who suffer from stomach ills of any nature. No matter whe'her it be indigestion, constipation, biliousness or nervousness, the Bitters will cure it. It is an unequalled spring medicine.

The reported fertility of Cuba is just a bit disapointing. Up to date they seem to raise more trouble there than anything else.

SHAKE INTO YOUR SHOES.

Allen,s Foot-Ease, a powder for the feet. It cures painful, swoolen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

A Western enthusiast arises to proclaim: There is nothing small about Dewey but the babies that are named after him.

To Cure a Cold in One Day.

Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure. 25c.

In this changeable weather small is the wonder that the March hare is mad.

Health and Beauty.

No beauty with pimply skin, dull eyes, bad breath. Clean your system and keep it clean with fragrant Cascarets Candy Cathartic! All druggists, 10c, 25c, 50c.

The Daily News remarks that codfish balls are not barred in Chicago social circles during Lent.

When coming to San Francisco go to Brooklyn Hotel, 208-212 Bush street. American or European plan. Room and board $1.00 to $1.50 per day; rooms 50 cents to $1.00 per day; single meals 25 cents. Free coach. Chas. Montgomery.

We are now having a bit of Lapland weather, that is the chilly kind when winter lingers in the lap of Spring.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd., 931 Arch St., Philadelphia, Pa.

Piso's Cure for Consumption has saved me large doctor bills.—C. L. Baker, 4228 Regent Sq., Philadelphia, Pa., Dec. 8, 1895.

Even in a sealed can of army beef the worm will turn.

5 DROPS The Pleasantest, Most Powerful and Effective Never failing Remedy for **La Grippe, Catarrh, Rheumatism.**

TRADE MARK Will cure any ache or pain known to the human body. Send for a trial bottle, 25c. This offer lasts 30 days only. Large bottle (300 doses of 5 DROPS each) $1.00 or 3 for $2.50.

SWANSON RHEUMATIC CURE CO.
167 and 169 Dearborn St., Chicago.

Aguinaldo is a good deal like the month of March, something of a blowhard, you know.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

It is generally the man with castles in the air who has no real estate.

A Barnum Surprise.

A good story of the late George Augustus Sala and Barnum is told. It was on the occasion of the last visit of the famous showman to England, when a public dinner was tendered to Mr. Barnum. Mr. Sala presided. In the reception room, where all were waiting to welcome the guest of the evening, Mr Barnum came in, beaming, and, shaking hands with the chairman, said:

"This is indeed a surprise to me.'

"Did you hear that?" Mr. Sala whispered. "Why, he arranged for the dinner himself."

Afloat and Ashore.

Bill—How about that Sound steamer?

Jill—I guess she's all right. There's a rumor ashore that she's afloat.

Bill—That's good. I heard there was a rumor afloat that she was ashore.—Yonkers Statesman.

One direct result of the Suez canal has been the introduction into the Mediterranean of sharks which previously were unknown there.

"Spring Unlocks The Flowers

To Paint the Laughing Soil."

And not even Nature would allow the flowers to grow and blossom to perfection without good soil. Now Nature and people are much alike; the former must have sunshine, latter must have pure blood in order to have perfect health.

Hood's Sarsaparilla cures blood troubles of all sorts. It is to the human system what sunshine is to Nature—the destroyer of disease germs. *It never disappoints.*

Poor Blood—"The doctor said there were not seven drops of good blood in my body. Hood's Sarsaparilla built me up and made me strong and well." SUSIE E. BROWN, 16 Astor Hill, Linn, Mass.

Dyspepsia, etc.—"A complication of troubles, dyspepsia, chronic catarrh and inflammation of the stomach, rheumatism, etc., made me miserable. Had no appetite until I took Hood's Sarsaparilla, which acted like magic. I am thoroughly cured."—N. B. SEELEY, 1871 W. 4th Ave., Denver, Col.

Rheumatism—"My husband was obliged to give up work on account of rheumatism. No remedy helped until he used Hood's Sarsaparilla, which permanently cured him. It cured my daughter of catarrh. I give it to the children with good results." MRS. J. S. MCMATH, Stamford, Ct.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills, the non-irritating and only cathartic to take with Hood's Sarsaparilla.

APOTHECARY EVEN AT LAST.

Finds a Man Who Wants Medicine and Turns Him Into the Street.

A man who lives above One Hundredth street thought he had the grip and hastened to the nearest apothecary shop. It was late, and the druggist was routed from his bed by the night bell, which went off like an alarm clock. When he admitted the customer the druggist said:

"I suppose you want some stamps?"

The customer denied this, and said, with some vehemence, that he was in no condition to appreciate a joke. He was ill and he wanted a remedy.

"There's the city directory," said the druggist, pointing out a demoralized book.

"Thank you," replied the customer. "I thought it was a canal boat. Now will you be good enough to wait on me?"

"That's the telephone in the corner," and the druggist pointed out the lung tester and ear annihilator.

"And this is my prescription," said the customer, producing a bit of paper.

"Did the butcher send you?" asked the druggist, and before the customer could interfere he added, "'cause he sends women over here for change, and for everything he doesn't keep and that I never have. And that undertaker in this block—maybe he sent you? He went down town the other day, and as he had no one to leave in his place he stuck up a sign in his window: 'Call at the drug store.' Got a great laugh on me. People came in here all day and asked me when I went into partnership with the undertaker. I know the sign out there indicates that this is a drug store. I pay an apothecary's license. But to-morrow I will have that sign painted over, and the words 'Intelligence shop' painted on. Here's your prescription. Drug store two blocks above."

Bang went the door. One apothecary was even.—New York Sun.

The accounts of Salem witchcraft have so superseded all others in school histories and in the public mind that few realize that other commonwealths have erred in the same particular as Massachusetts. Yet 100 years after old Rebecca Nourse was hanged in Salem, Mass., a man was condemned by an Illinois court to be burned alive at the stake as a penalty for sorcery. Nor was his execution the only one that has taken place in Illinois for the same "crime."

The warant for the burning alive of the Illinois sorcerer, whose name was Manuel, was signed by John Todd, Lieutenant Governor of the Territory of Illinois, in the year 1779. Todd was of the famous Todd family of Kentucky, from which sprung the wife of Abraham Lincoln.

Manuel was a slave. He had cast an evil eye on a number of people, who were willing to swear that the influence of the glance was baleful in the extreme. The great court of the district of Kaskaskia was convened to try the negro for his life. The court speedily declared the guilt of the prisoner and condemned him to death at the stake, after which his ashes were to be scattered to the four winds of the prairie. There seems to be some conflict of authorities as to the manner of Manuel's execution. Some of them declare that the negro was shot by a mob while on his way to the burning; others agree that the sentence in all its horrors was carried to the cruel end. The preponderance of evidence is in favor of the latter account, and the Governor's warrant makes it certain that burning at the stake was the intent and the veritable record of the court. The law which Illinois people invoked in order to burn the slave Manuel for sorcery was the statute of Virginia, to which the Illinois Territory was then tributary.

It was twelve years after the burning of Manuel for sorcery when the next victim suffered. He, like Manuel, was a slave, and was called by his master's name, Moreau. This master he had killed by a "devilish incantation." The man was tried for witchcraft and sentenced to be hanged. The sentence was duly carried out. He was convicted by a legally constituted court. There was a white woman of English descent living on Silver Creek, Ill., who in the early part of the century or the very end of the last was charged with being a witch. She was repeatedly beaten, but her ultimate fate is uncertain. So much credence was placed in her power to work harm to those about her that her evil doings were made a matter of record and the record stands until this day.

The witch days do not seem so far removed when it is thought that recently one Peoria man solemnly predicted that another's death would take place on a certain day and the prophecy was as solemnly believed. There is on record in the coroner's office in Chicago a verdict rendered in 1892 by six citizens to the effect that "the deceased came to his death by having his breath sucked by the house cat."

"What do you think of your new neighbors?" asked the hostess of the "sweet" old lady who was calling. "You know that I never speak unkindly of any one. I have nothing to say of her; but I will say of her husband that I feel very, very sorry for him."

GERMAN MILITARY SERVICE.

A Curious Method by Which It May Be Avoided.

Anybody can emigrate from Germany before he is 17 years old without running the risk, in case he should return, of being forced to join the army, but he will be allowed to remain only nine months in Germany. If he stays longer he becomes again a German citizen and must do military service. If he leaves when he has been a little less than nine months in the country and stays away for two or three weeks he can return without running any danger and can stay another nine months. If he does this every nine months he can live as long as he likes in Germany.

As soon as a man is 17 years old he cannot leave Germany without serving in the army. He can, however, get permission to leave the country until he is 20 years old if somebody is willing to give bond that he will return and serve his term.

In case a man forfeits his bond he cannot return to his fatherland before he is 45 years old, as he would be promptly arrested and sentenced to serve a longer term than the original one. After a man is 45 years old he can go back to Germany without being punished and live there as long as he likes.

In case a deserter is caught in Germany before he is 45 years old he is sentenced to two or three years' imprisonment in a fortress and all his personal property is confiscated. — New York Herald.

Trained Show Dogs.

"Considering the investment, trained dogs are one of the most profitable attractions in the vaudeville line," said an old time showman, here with one of the current theatrical companies. "I suppose there are at least 12 or 15 troupes of them scattered over the country," he continued, "and the good ones easily average a couple of hundred a week and expenses. As there are no salaries to pay for the dogs and no hotel bills for anybody except the proprietor and one keeper the returns are rather handsome. Nowadays they have the business down to such a fine point that the sudden death of any of the animals can be readily remedied by telegraphing to New York, where several men make a specialty of keeping standard trick dogs in stock.

"A dog troupe usually consists of five performers, one of which is a star. The star probably costs $150 and the others about $50 apiece. Mongrels of no intrinsic worth are generally selected for training purposes, because they learn as quickly as the thoroughbreds and if anything happens to them the loss is so much lighter. There is a standard series of tricks which they are taught to do, so that one can easily replace another, and a little ingenuity on the part of the showman supplies the variety to the programme."—New Orleans Times-Democrat.

A Literary Note.

"Your majesty," said the prime minister, "this is the page who has been remiss in his duty."

"Aha!" exclaimed the king. "We'll have to bring him to book."

"Ho! Ho!" laughed the page. "A noble jest, I'll be bound."

Thereupon the king's heart softened, for he marveled that a man so young could make so old a joke.—Catholic Standard and Times.

Proof Positive.

His Honor—What's the charge, officer? Drunk?

Officer—No, sor—crazy.

His Honor—How do you know?

Officer—Well, sor, he is a proprietor of a daily paper, and I heard him tell a man that the paper probably had the smallest circulation in the city, and so—

His Honor—The padded cell—quick!—Harlem Life.

Legal Repartee.

"Gentlemen of the jury," said the pompous lawyer, assuming his most imposing mien, "I once sat upon the judge's bench in Iowa."

"Where was the judge?" quickly inquired the opposing attorney, and the pompous gentleman found the thread of his argument hopelessly entangled.—Detroit Free Press.

ALABASTINE

LABASTINE is the original and only durable wall coating, entirely different from all kalsomines. Ready for use in white or twelve beautiful tints by adding cold water.

ADIES naturally prefer ALABASTINE for walls and ceilings, because it is pure, clean, durable. Put up in dry powdered form in five-pound packages, with full directions.

LL kalsomines are cheap, temporary preparations made from whiting, chalks, clays, etc., and stuck on walls with decaying animal glue. ALABASTINE is not a kalsomine.

EWARE of the dealer who says he can sell you the "same thing" as ALABASTINE or "something just as good." He is either not posted or is trying to deceive you.

ND IN OFFERING something he has bought cheap and tries to sell on ALABASTINE'S demands, he may not realize the damage you will suffer by a kalsomine on your walls.

ENSIBLE dealers will not buy a lawsuit. Dealers risk one by selling and consumers by using infringement. Alabastine Co. own right to make wall coating to mix with cold water.

HE INTERIOR WALLS of every schoolhouse should be coated only with pure, durable ALABASTINE. It safeguards health. Hundreds of tons are used annually for this work.

N BUYING ALABASTINE, see that packages are properly labeled. Beware of large four-pound package light kalsomine offered to customers as a five-pound package.

UISANCE of wall paper is obviated by ALABASTINE. It can be used on plastered walls, wood ceilings, brick or canvas. A child can brush it on. It does not rub or scale off.

STABLISHED in favor. Shun all imitations. Ask paint dealer or druggist for tint card. Write for "Alabastine Era," free, to ALABASTINE CO., Grand Rapids, Michigan.

THE ILLS OF WOMEN

And How Mrs. Pinkham Helps Overcome Them.

Mrs. MARY BOLLINGER, 1101 Marianna St., Chicago, Ill., to Mrs. Pinkham:

"I have been troubled for the past two years with falling of the womb, leucorrhœa, pains over my body, sick headaches, backache, nervousness and weakness. I tried doctors and various remedies without relief. After taking two bottles of your Vegetable Compound, the relief I obtained was truly wonderful. I have now taken several more bottles of your famous medicine, and can say that I am entirely cured."

Mrs. HENRY DORR, No. 806 Findley St., Cincinnati, Ohio, to Mrs. Pinkham:

"For a long time I suffered with chronic inflammation of the womb, pain in abdomen and bearing-down feeling. Was very nervous at times, and so weak I was hardly able to do anything. Was subject to headaches, also troubled with leucorrhœa. After doctoring for many months with different physicians, and getting no relief, I had given up all hope of being well again when I read of the great good Lydia E. Pinkham's Vegetable Compound was doing. I decided immediately to give it a trial. The result was simply past belief. After taking four bottles of Vegetable Compound and using three packages of Sanative Wash I can say I feel like a new woman. I deem it my duty to announce the fact to my fellow sufferers that Lydia E. Pinkham's Vegetable remedies have entirely cured me of all my pains and suffering. I have her alone to thank for my recovery, for which I am grateful. May heaven bless her for the good work she is doing for our sex."

SHE SANG FOR DEATH.

The Pathos and Tragedy of Emma Abbott's Passing Away.

One night in the city of Denver, located at the foot and in plain view of the Rocky mountains, Emma Abbott was billed to appear in "Faust." In the same city a most attractive and beautiful 18-year-old girl, belonging to one of the wealthiest families, lay in the last stages of that fell enemy of the human race—consumption. Some weeks before the arrival of the company she said to those around her: "Oh, I hope the sun will shine and the weather will be warm and genial, so I can hear Miss Abbott sing once more. I think I could then pass away peacefully and without one single regret." But there came with the queen of the lyric stage a northern hurricane—with the very air charged with icicles, which penetrated the lungs. Some one told Miss Abbott of the grievous disappointment of the dying girl. She went to the opera house and never sang more sweetly, and as soon as it was over and the audience dismissed called her carriage and directed it to drive to the home of the young lady.

The scene which followed was worthy of the finest brush ever wielded by the grand old masters. There lay the dying earth angel, with pallid lips, hectic cheeks and lustrous eyes and the light of immortal beauty shining upon her face. Standing beside her, in one of her richest robes (the one she had worn that night), sparkling with pearls, rubies and diamonds, stood the almost divine mistress of earthly melody.

The first piece rendered was "The Old Folks at Home," and then followed "I Know My Redeemer Liveth." The finale of this weird scene was "Rock of Ages Cleft For Me, Let Me Hide Myself In Thee." And then Miss Abbott bent over the frail form and kissed her an eternal farewell. Soon after the spirit passed into the wild winds which rang through the wild mountains near by—set sail for that haven from which the first homeward bound bark is yet to be seen—the stainless soul wafted to the stainless heavens by the sweetest music ever heard on earth—into the melodies of paradise birds.

Miss Abbott returned to her room at the hotel and retired. Some time during the night she awoke with a pain in the left lung. It rapidly grew worse. A physician was summoned. Then another, and another, who applied every remedy they could command. All to no purpose. It was typhoid pneumonia in its worst form. The black camel was kneeling at her door. Angels of the heavenly choir had that night listened to her voice in the sickroom and sent for her to come home to them.

In three days that voice which had so often raised the souls of men and women to the noblest, the grandest heights in holy ecstasy, was forever stilled in death—gone forth into—the night.

So fades the summer cloud away,
So sinks the gale when storms are o'er,
So gently shuts the eye of day,
So dies the wave along the shore.

While You Sleep.

Do not have too much air blowing through your room at night, or Neuralgia may creep upon you while you sleep. But if it comes, use St. Jacobs Oil; it warms, soothes and cures.

An Eye to Business.

The doctor hurried in and called the druggist to one side.

"I've just been called to attend the Crœsus baby," he said, "and I've given a prescription that calls for nothing but paregoric. When they send it over here, you must tell them it will take at least an hour to put it up and the cost will be $3.50. That's the only way to make them think I'm any good, the medicine's any good and you're any good, and I want to keep their business."—Chicago Post.

BAD BREATH

"I have been using CASCARETS and as a mild and effective laxative they are simply wonderful. My daughter and I were bothered with sick stomach and our breath was very bad. After taking a few doses of Cascarets we have improved wonderfully. They are a great help in the family." WILHELMINA NAGEL, 1137 Rittenhouse St., Cincinnati, Ohio.

SERMONS OF THE WEEK

His Chosen.—It is God that raises up his chosen from the lowliest.—Rabbi E. G. Hirsch, Hebrew, Chicago, Ill.

God's Power.—You have God's power when God has all of you.—Rev. J. F. Carson, Presbyterian, Brooklyn, N. Y.

Belief.—Belief is the indispensable condition of performance in all directions.—Rev. S. R. Calthrop, Syracuse, New York.

Love and Force.—Only through the weal and woe of human existence do we prove God to be love.—Mrs. Gestefeld, Scientist, Chicago, Ill.

Christianity.—Christianity as a system of truth can have no effective existence without the personal Christ.—Rev. A. A. Rice, Universalist, Los Angeles, California.

Marriages.—Were marriages based more on real love and affection than on material advantages, there would be fewer divorces.—Rabbi M. S. Levi, Hebrew, San Francisco, Cal.

The Promise of My Father.—This is the consummation of revelation, yet no one in the world knows to the fullest extent what that revelation is.—Rev. F. J. Van Horn, Boston, Mass.

Good in All.—The Catholics are right for believing that Protestants criticise them. I believe that there is something good in all churches.—Rev. C. H. Eaton, Universalist, New York.

The Law of Proximity.—In our giving we should observe the law of proximity. The distress that is nearest to us is the distress that most imperiously claims us.—Rev. J. A. Milburn, Presbyterian, Indianapolis, Ind.

The Materialist.—The materialist studies man from the side of his physician organization, his relation to other living creatures, and the brief duration of his physical existence.—Rev. C. W. Wendte, Unitarian, Los Angeles, Cal.

Lent.—It is a mistake to assume for a moment that a man ought to be more religious in Lent than at other times. You cannot crowd the year's religion into the forty days of Lent.—Rev. W. A. Wasson, Episcopalian, Brooklyn, New York.

The Most of This Life.—We are to make the most of this life and do our best in it, not as though that were the end, incalculably good as it is, but chiefly because it all is to have its effect in a larger, higher sphere, in the life beyond.—Rev. B. F. Fritz, United Brethren, Columbus, Ohio.

No Greater Blessing.—I can conceive of no greater blessing—for there is none greater, none more helpful—than that derived from an implicit trust in the Lord God of hosts. As a nation we can trust him to lead us, having greatly blessed us in the past.—Rev. T. J. Danner, Episcopalian, Pittsburg, Pa.

The World's Want.—The world's want is men, and the only mission of the church is to inspire better living. It alone sets itself to the task of making moral manhood and womanhood. The aim is noble enough to command every man's sympathies, but the task is great. Rev. A. J. Wells, Unitarian, San Francisco, Cal.

Methodists.—If all Methodists would give to their church after the tithing system of the Mosaic law, or accordingly to their ability, there would be no need of a call for a twentieth century fund of $20,000,000, and there would also be a speedy re-enforcement of missionaries throughout the world.—Rev. Geo. H. Adams, Methodist, Brooklyn, New York.

God Called.—If God ever called a nation to take up arms he certainly called this nation a few months ago, when it championed the cause of the weak and down-trodden. We have the best government under heaven; a government good enough for any nation; a government it would be well to propagate in any legitimate manner.—Rev. J. W. Duffy, Methodist, Washington, D. C.

Sound Pictures.

To take a picture of your voice it is only necessary to tie a sheet of thin, strong paper over the flaring end of an old tin horn. Hold the horn with the sheet of paper upward. Take a little pinch of fine sand and place it in the center of the paper. Then hold the horn vertically above your face and sing a note into the lower end of the instrument. Do not blow, but sing the note.

Now lower the horn carefully and look at the sand. You will find that the vibrations of your voice have scattered the pinch of sand into a beautiful sound picture. Every note in the musical scale will produce a great variety of them.

Some of these pictures look like pansies, roses and other flowers, some like snakes, and others like flying birds; in fact, there is no limit to the variation. The pictures of the notes of musical instruments are made by holding the horn as near as possible to them.

Chinese Furniture Makers.

The total number of Chinese furniture makers in New South Wales—all working in factories of their own—was about 300. No Chinese workmen are employed in European factories.

Miss Nerves—Doctor, I'm in constant dread of getting into a trance or something, and being buried alive. Dr. Pylls—Nonsense! You take what I prescribe and drive such foolish notions out of your head. Such a thing as being buried alive never happens to my patients!—Bazar.

"I presume you carry a memento of some sort in that locket of yours?" "Precisely, it is a lock of my husband's hair." "But your husband is still alive?" "Yes, but his hair is all gone."—Tid-Bits.

"I am feeling better," said a man today who had been sick. "Every one tells me I look sick, and it makes me feel good to be vindicated."

"What made the audience hiss that vegetarian lecturer?" "He said he would deliver a meaty discourse."—Chicago Record.

A man can't hide things from other people, for fear he will forget where he put them.

Modern Science Recognizes RHEUMATISM as a Disease of the Blood

There is a popular idea that this disease is caused by exposure to cold, and that some localities are infected with it more than others. Such conditions frequently promote the development of the disease, but from the fact that this ailment runs in certain families, it is shown to be hereditary, and consequently a disease of the blood.

Among the oldest and best known residents of Bluffs, Ill., is Adam Vangundy. He has always been prominently identified with the interests of that place. He was the first President of the Board of Trustees, and for a long time has been a Justice of the Peace. He says: "I had been a sufferer of rheumatism for a number of years and the pain at times was very intense. I tried all the proprietary medicines I could think or hear of, but received no relief.

"I finally placed my case with several physicians and doctored with them for some time, but they failed to do me any good. Finally, with my hopes of relief nearly exhausted I read an article regarding Dr. Williams' Pink Pills for Pale People, which induced me to try them. I was anxious to get rid of the terrible disease and bought two boxes of the pills, I began using them about March, 1897. After I had taken two boxes I was completely cured, and the pain has never returned. I think it is the best medicine I have ever taken, and am willing at any time to testify to its good merits."—*Bluffs (Ill.) Times.*

Ancient Chains.

In an interesting article on the subject of chains an English writer points to the fact that notwithstanding the frequent mention of chain in the Bible the article is comparatively new. The same author says:

"Some authorities give the Britons credit for originating the cable chain because Julius Cæsar is recorded as having been unable to cut the cables of the Gaul's vessels, 'as they were made of iron.' This may have been a chain in the present acceptation of the term, but it is doubtful, because the first patent for chainmaking was obtained in England in 1634 by a blacksmith named Philip White. The patent was for 14 years, and in consideration of it White had to pay £5 in lawful money yearly 'at the Exchequer, Westminster, att the Feast of the Blessed Virgyn and Saint Michell the Archangell by even and equal process.'

"His patent is described as follows: 'A way for the wearing of shipps with iron chaynes by finding out the true heating (pre)pareing and tempering of Iyron for that (pur)pose and that he hath nowe attayned to the true vse of the said chaynes and that the same wilbe for the great saveing of cordage and safety of shippers and will redound to good of our Comon Wealth.'"

Gazelle Hunting.

Gazelles in Nubia are hunted by a powerful breed of hounds, in build somewhat heavier than a greyhound. In spite of being far swifter than the hound, the gazelle falls a victim from the nervous habit of constantly stopping to look back to see if it is pursued. It also expends its strength by taking great bounds in an almost vertical direction, thereby not only losing time, but exhausting itself, so that it is overtaken without difficulty.—Harper's Weekly.

Don't Mind the Weather.

There is one thing that does not mind the weather, and that is rheumatism; and one thing that does not mind rheumatism is St. Jacobs Oil, as it goes to work upon it and cures right off.

Torpedo Boats.

The average distance of discovery of a torpedo boat by the searchlight from a battleship has been calculated to be 781 yards and the greatest distance 2,000 yards. Thus, taking the distance at which the torpedo can be fired with effect at 500 yards it will be generally found that a torpedo boat will have to cross about 300 yards under fire from the ship she is attacking, and it will take the little craft about half a minute to do this.

Gallant.

"A man is as old as he feels," said the gentleman of the old school, "and a woman as old as she says she is."—Indianapolis Journal.

HENRY W. LAWTON, FIGHTING MACHINE.

AT the head of the 5,000 regulars in the Philippine Islands is a modern fighting machine. Its name is Lawton—Henry W. Lawton—and for nearly forty years it has worn the uniform of the United States army. It has risen from the ranks, this fighting machine, leaving behind it other machines as strong possibly, but less fortunate.

Henry W. Lawton was born in Ohio fifty-six years ago. He was a country boy and got only a common school education—not any too much of it. It is to be doubted if he would have learned a great deal if kept steadily at college until he attained his majority. Emphatically he is not a book man. Studying the printed page has been to him always a task and never a pleasure. Men are his books—men and happenings. His folk were plain farmer folk. From them he derived his length and size of bone. The tremendous muscles, the tireless endurance which have marked him in later life had the beginning of the development in the open air of the fields of his boyhood. It was said of him that it took him longer to learn anything and longer to forget it than any youth that ever tramped through the snow to a log school house. His memory, indeed, has been one of his strong points since he emerged from childhood. He remembers well—particularly enemies. A better hater was never born. It follows necessarily that he is true in friendship. He is, in fact, a man's man. Women who get to know him like him well enough, but not many of them get to know him. In the age of gray hair he is still a bachelor, and if he has ever had an affair of the heart it has been kept to himself.

Lawton entered the volunteer service of the United States in April, 1861, and was given the chevrons of a sergeant in company E of the Ninth Indiana Infantry. In August, 1861, he was made first lieutenant of the Thirtieth Indiana. In May, 1862, he was made a captain, was a lieutenant colonel in November, 1864, was breveted a colonel for gallant and meritorious services in March, 1865, and was mustered out of the service in November, 1865. He had had practically four years of the most tremendous war in the history of the nations. He had been a participant in a dozen pitched battles. He had led his men in charge and counter charge on the stricken fields of Virginia. He had stepped upon the dead upturned faces of his brothers. He had been soaked with blood to his knees.

On the 1st of July, 1866, he was gazetted a second lieutenant in the regular army, being assigned to the Forty-first Infantry. A year later he was made a first lieutenant. He was transferred to the cavalry arm in January, 1871, had advanced to a captaincy in March, 1879, was made a major in the inspector's general's department in September, 1888, and inspector general, with the rank of lieutenant colonel, in 1889. That is his rank in the regular army to-day, although he wears the epaulets of a major general of volunteers. He is slated for appointment to be a brigadier general under the reorganization act and when the two years for which the new soldiers will be enlisted have expired there will be enough retirements from the service to make his retention as a regular brigadier a certainty.

He has come upward step by step solely through personal courage and personal strength. He has held that it is the first duty of the soldier to fight, and to fight as soon as he gets the chance. He has been possessed by no particular refinements of the art of war. He has simply gone ahead and fought like a fiend when opportunity offered and left to others the task of explaining why and how such and such a victory was won or defeat suffered. He has devoted his life to the profession of arms and he understands it. He does not pretend to be an authority upon anything else. He is a one-idea man.

Personality of the Man.

In person he is a wonder. Standing 6 feet 3 inches high, as straight as a rule, with long arms, wide shoulders, deep chest and thin flanks, he weighed 195 pounds of bone and muscle when 25 years old and now weighs 210. His head is small and set on a massive neck. His hands and feet are large. He is as active as a cat and as tireless as a wolf. Under the sleeves of his blue fatigue jacket the muscles bulge like cables. His stomach goes like clockwork. He has not an unsound tooth. Headaches are not known to him, except from hearsay. He can travel for a week without food or sleep, then make a boa constrictor ashamed of itself and sleep for two days without turning over. He has never taken any care of himself. The soldier's rough and exposed life has been his since youth, but he is as sound as a nut today and able to tire out a dozen younger men. Apparently fatigue passes him by when it lays its heavy hand upon those apparently as strong. He is always alert and always looking for a chance to damage an opponent. One of his many Indian names is "Man-Who-Gets-Up-in-the-Night-to-Fight," and he has earned it by years of practically ceaseless toil. His forehead is high and somewhat narrow, his eyes a keen gray, his nose and cheek bones prominent, his chin square, his lips thin. He wears a drooping mustache. His hair is cut pompadour, stands up stiff and short like a reversed shoe shoe brush, and he is not pretty. This hair is now liberally sprinkled with gray, and the white amid the brown is about his only sign of age. Army surgeons who know him say that he may live to be 100 unless a bullet cuts short his strange and sanguinary career.

Henry W. Lawton was a gallant and serviceable officer of infantry during four years of the civil war, but his peculiar talents were properly environed only when he was transferred to the cavalry and stationed in the southwest. This was more than a quarter of a century ago, and for two decades he was remote from the large cities of the east. He found New Mexico and Arizona overrun and terrorized by hostile bands of Indians and he set himself, along with his comrades, to hold them down. They were held down. The work that the cavalrymen of the United States did in those years will never be appreciated until a circumstantial history is written and it is not probable that the history will ever be written. It was a life of foray, long rides, desperate battles in remote valleys, midnight surprises, combat with a foe that often was not seen, disheartening and fruitless chases, danger and frequent death. In fifteen years the officer saw every friend he had made when he went to the mountains taken from him by removal, age disease or the bullet. The entire personnel of the force changed more than once—the entire personnel—that is, except himself. He was always left, lonely, self-contained, earnest, indefatigable and silent, save when giving commands or cheering on his men in fight. His name became a household world in all of the tepees in that wild land. The Chiricahuas, the Mescaleros, the Jicarillas, Apaches, all had for him the mixture of hate and grudged admiration compelled by a dauntless foe. They found in him, after a little while, a man who was taking a trail that at its beginning was broad and plainly marked. Then followed the most remarkable pursuit in the history of Indian warfare. Day after day the ceaseless toil continued. The men speedily found themselves in a country where horses without claws were of worse than no account. Their officer dismounted them. "We will walk them down," he said grimly. The walk began. It was white pluck and endurance against Indian craftiness and endurance.

Hunting Geronimo.

Over rocks that blistered the hands when touched, in ravines so deep and dark that through the narrow rift far overhead the stars were visible at noontide, up the sides of huge hills down which trickled rivulets of dust, threading paths along precipices which frowned upon green valleys 5,000 feet below, drinking of cold, clear springs that gushed above the clouds, sometimes in the sun-baked desert, again clambering far beyond the timber line, Lawton and his followers struggled on. Frequently a wisp of blue smoke jutted from some inaccessible crag and a bullet sang its wicked way to its billet or spattered upon a russet rock. It is a country that God Almighty made in wrath and the imprint of his anger is on it all. Week succeeded week. Men dropped, fainting, in the giant hills and their comrades passed on. There was no time to stay. They were left to find their way back to the reservation as best they could. Indian and white were foemen worthy of each other's steel, and the issue of the contest was in doubt to the last day.

Finally, one night just as the sentries were set, there was a faint hail and an Indian stood before them. He was worn to the bone, but dauntless still. He said that his chief would talk to the white man, but would talk to him alone. His camp was some miles further on, but the messenger would guide Lawton to it if he cared to come. The noncoms endeavored to persuade the captain against the venture, but he smiled sourly at them and told the Indian that he

learned in every phase of their peculiar warfare, and in ten years they dreaded him as they have dreaded few white men since the winning of the West began. Lawton's method of handling them was singularly his own. When he struck a trail he kept to it with a dogged tenacity which knew no such thing as quit. Whether the pursuit was maintained for a day or a week, it was maintained with a steady, unrelenting earnestness that did more to strike terror into the hearts of the red men than would have been possible to all the rifles on earth. The man's philosophy was wholly expressed once in a chance remark to a newspaper acquaintance.

"If a man is hunting for you," he said, "get a gun and hunt him. Do it right away. It discourages anyone to be suddenly transferred from the position of hunter to hunted."

This rule has guided him. He insists upon being the aggressor. It is supposed that he would stand a charge all right, but hitherto he has always done the charging. He does not believe in waiting for the other side to act. This trait was signally demonstrated in his conduct of the right wing of the American army at El Caney. He had men that he thought could be depended on. At any rate he proposed to see what they could and would do. So he sent them at the blockhouses and breastworks hour after hour with a savage disregard of the chances of battle and the liability to death that is one of the marvels of that brief and glorious campaign. It was of Lawton's men and not of the rough riders that the Spanish infantryman said: "We do not understand you American soldiers. You tried to catch us with your hands."

It was Lawton's reputation for daring and tireless pertinacity that led to his becoming internationally famous. His characteristics were known, of course, to his superior officers as thoroughly as they were known to the Indians whom he had been fighting for a dozen years. For the tenth time the band of Chiricahua Apaches, headed by Chief Naches and directed by Geronimo, had jumped the San Carlos reservation, leaving behind them the usual trail of blood and ruin. Ranchmen were butchered on lonely ranges, children's brains were dashed out and the smoke of burning dwellings rose day and night to the brilliantly blue sky. General Miles, a trained soldier and an Indian fighter himself, was in command, and he selected Captain Lawton for the task that was set before them. He started with two troops of veterans, Caney, doing as much as any man could do to convince Toral that his cause was hopeless. In all of the fighting of that terrific day he was up to the firing line, saying little, but pacing slowly up and down, his gaunt figure a mark for every sharpshooter in the enemy's lines, the Mauser's flicking up the dust about him or pulsing in the air, giving to his men the constant example of how an American soldier should act when under fire. He was one of the three commissioners appointed by Gen. Shafter to arrange with Toral the terms of capitulation, and after the fall of Santiago policed the city in a very thorough manner until the establishment of a stable form of government was made possible. Lawton's idea of policing a place of the kind is very simple. "The regulations are so and so," he would say, "and you have your gun. If anybody violates the regulations, use the gun." It required just one day to quiet the city.

Again it was the Geronimo record—or rather the record of years in the west crowned by the Geronimo incident—which sent him to the Philippines to command the American forces in the field. The rainy season will have no effect on him, whatever the effect may be on those under him. He is as certain to go strong and fast, even if he goes to his death, as the sun is certain to rise and set. All climates and all seasons are alike to that iron frame, upon which war and peace and the rigors of the mountains and the sloth of the Potomac Valley and asceticism and dissipation have been effectless.

SNAKES AS DECORATIONS.

Samoan Maidens Wreath Themselves with Reptiles of Flaming Red.

For the most part the Pacific islands are destitute of snakes. That is absolutely the case in Hawaii. In New Zealand, equally free of these reptiles, the only knowledge which the Maoris had of snakes may be found in a legend of a monster called the aniwha, concerning which authorities differ as to whether it is the ancestral and dim recollection of a snake or of an alligator. All the eastern islands of Polynesia between these two outposts are snakeless. Westward from Hawaii, down among the Gilberts and the Marshalls and the Carolines, the square-bodied water snake begins to make its appearance in the lagoons and harbors. By the time the Philippines are reached the water snake becomes both common and deadly, and the jungles of those islands are abundantly supplied with snakes. From the Philippines as one follows down the chains of islands snakes are found both abundant and venomous. In the wild lands of the western Pacific the reptiles are frequently objects of worship, and in some legends are credited with the creation of the world.

Samoa seems to lie just on the boundary line of snakes in the Pacific. In the eastern islands of the archipelago no snakes are to be found; in Upolu a few are seen at rare intervals. In Savali, only a few miles to the westward, they are common and attain great size, in the case of some kinds at least. None of them is venomous, and the islanders neither fear them nor exhibit any of that repugnance to their presence which is commonly called instinctive.

This indifference to the reptiles is made most markedly manifest at the hamlet of Iva, on the northeast coast of Savali. Here are to be found small snakes of a most brilliant red color. They are so common that a basketful may be easily picked up in any banana patch. The dancing girls of this town are in the habit of employing these gaudy snakes for personal adornment in their dances. They tie them about their necks, their ankles, and their wrists, festoon them in their headdresses, and tuck a few extra ones in the belt in readiness to replace such as escape in the dance. At their best these sivas danced by the Samoans are either dull, or revolting shows of savagery. It can easily be imagined that they are made no more attractive when the taupou or village maid and her crew of attendant girls go careering about with an assortment of writhing red snakes. Still, the Samoans, who have no stock of snake prejudices, look upon this as one of the most successful and artistic dances in their islands.

Life of Big Guns.

The huge guns of modern navies can be fired only about seventy-five times, when they become worn out.

The all 'round proverb is a sort of circular saw.

A WOMAN'S POWER.

MAN rebels against the faintest hint of coercion. As soon as his chains begin to gall he frets and longs for freedom. The wife holds certain reins in her hands, and she may use her tongue as a curb; but the reins should be of flowers and the curb of loving kindness. She should make her husband feel that he is free to come and go as he pleases; that his house is not a jail, but a place where he is always sure of a hearty welcome, even when he has wandered from it for a time. She will not sulk if he leaves her sometimes in the evening, nor sit up for him like a reproachful ghost. She will learn the art of forgiving and forgetting (especially forgetting) petty faults and wrongs, and will remember always that to keep the love she has won is the most important thing for her happiness.—Woman's Home Companion.

Marriage a Serious Vocation.

"A woman who is blessed with good sense does not consider at the start that marriage is a role to be skillfully and successfully enacted, or a grand frolic of which she is to be the admired and indulged center, or a mere incident in a life crowded with other activities," writes Helen Watterson Moody in the Ladies' Home Journal. "She knows that marriage is a serious and steady vocation, and that the true wife is one who enters marriage not thinking how much she can get out of it, but how much she can put into it. It is this larger conception of marriage which makes women dwell by their own firesides in sweet content with what is commonly called the 'narrow limits of home,' knowing well that no true home is narrow since it must give cover to 'the whole primal mysteries of life—food, raiment and work to earn them withal; love and marriage, birth and death, right-doing and wrong-doing—all these commonplaces of humanity which are most divine because they are most commonplace.' The way to make home a wide place to dwell in is to bring a wide personality to dwell in it. Any home is just as wide as the maker, and can be no wider. When a woman understands this she is able to keep her head steady and her heart undisturbed over newspaper sketches about other women, in which each of them is made to do the most remarkable and unnecessary things."

The Care of the Hands.

The hands should be washed in warm water, not hot water, and, if possible, in soft water. After washing they should be dried very thoroughly in bran or oatmeal, and great care taken that the nails are most thoroughly dry; in the drying the cuticle can be pushed back sufficiently to show the half-moon at the base of the nail. Nail scissors, not used for any other purpose, should be used to cut off any hangnails; but it is better to use a file to keep the nails short, and for this purpose there should be three or four files of varying size. To give the luster desired there is a new kind of wash that makes the nails pink, not deep red, and also gives a gloss and finish. After this is put on the hands should be washed, but sufficient of the polish will remain.

After the hands are washed the second time to remove the polish the nails should be rubbed briskly, either with a piece of chamois, a nail polisher, or by rubbing them again with the palm of the hand. This last method is perhaps the best of all, for it polishes just enough without giving too exaggerated a finish in appearance.—Harper's Bazar.

Art of Washing Ribbons.

The girl who goes in heavily for light-colored neck ribbons finds herself in a perpetual state of poverty. But this is unnecessary if one but knows the art of washing ribbons. The finest of double-faced satin ribbons can be washed to look like new—only better, for they will have an added softness that is really enchanting. Fill the basin in the bathroom with tepid water, lay the ribbons on the marble edge, and go over it carefully with common kitchen soap, water and a stiff nailbrush. Under no circumstances must the silky stuff be wrung out or folded. After the rubbing rinse well by dipping into clear water, and then slap the ribbon on to the painted wall of the bathroom. When dry it will fall off of its own accord. Ribbons of the daintiest hues can be cleaned perfectly this way, and the heavier and nicer the ribbon the better the result.

Texts for the Young Wife.

There are scores of texts upon which the young wife will do well to heed exhortation—keeping herself beautiful and young and her household cheerful, orderly and exquisitely clean; studying deeply the right selection of human foods; adapting herself to her relations-in-law; liberally tolerating, if not subscribing to, her husband's politics and religion; bravely defending him against the adverse criticism of others, and never, never censuring his weaknesses to relations or friends.—Woman's Home Companion.

Advice About the Eyes.

A clever woman who knows what she is talking about has this to say on the subject of eyes: Never rub your eyes, nor allow your children to do so from their infancy. Veils are bad for the sight, especially those spotted or covered with a pattern. So eschew veils when you can, or wear the softest, clearest net when obliged to do so. Never read in bed or when lying on the sofa. Sit with your back to the light when engaged in reading or working. Pale blues or greens are the most restful wall papers for the eyes, whereas red is exceedingly fatiguing. Do not read, write or work longer than two hours together without resting your eyes and closing them fully five minutes. Be most careful to live in a dry house on dry soil. Attend to the digestion, for did not Milton declare his blindness to proceed from the effects of dyspepsia? If the eyes be weak, bathe them in a basin of soft water, to which a pinch of table salt and a dessertspoonful of brandy have been added.

Nature's Sweet Restorer.

Do we lose time when we sleep? Or is it not the wiser economy to take as much as we need? Here is expert testimony on the subject: In reply to the question, "Is it wise for a man to deny himself and get along with a few hours' sleep a day, to do more work?" Tesla, the great electrician, is said to have replied: "That is a great mistake, I am convinced. A man has just so many hours to be awake, and the fewer of these he uses up each day the more days they will last, that is, the longer he will live. I believe that a man might live 200 years if he would sleep most of the time. That is why negroes often live to advanced old age, because they sleep so much. It is said that Gladstone slept seventeen hours every day; that is why his faculties remained unimpaired in spite of his great age. The proper way to economize life is to sleep every moment that it is not necessary or desirable that you should be awake."

For Pimples on the Face.

Bathe face in a lotion composed of weak solution of borax and warm water at night. Use very warm water on the face, then dry and rub into the pores an ointment made of flower of sulphur and lard. A good face wash to prevent wrinkles is 200 grains of rose water, 50 grains of almond cream, 5 grains of sulphate of alum. Dissolve and bottle for use. A very simple remedy to whiten and soften the hands is made of two teaspoonfuls of lemon juice, one of glycerine, one of colorless almond oil and a few drops of the triple extract of violets. To prevent hair from falling out, saturate the scalp twice a week with one ounce of borax, one-half ounce of gum camphor, one quart rain water. Boil all together and bottle.

The Model Hostess.

Even though a guest or maid inadvertently breaks a bit of china which can never be replaced, the hostess must smile on as though the loss of the entire set would but emphasize the pleasure of the evening. Though in her heart she may be very dubious about certain important details of her dinner or dance she does not show her anxiety. A flurried hostess or nervous host, whose countenances but badly conceal the worry they feel, can do more toward making guests uncomfortable than if the soup were served stone cold and the salad dressing were ruined by a too bountiful quantity of vinegar. An imperturbable calm and ready tact are the two important factors in the making of a model hostess.

Notes of Interest.

Try lemon juice to remove stains on the nails. It must be well rinsed off afterward, and the fingers carefully dried.

Oranges eaten before breakfast have a wonderfully beautifying effect on the complexion and can do no harm if eaten in moderation.

Sweet almond oil alone agrees excellently with some skins. Try it for a day or two. Nearly every skin requires different treatment, and the only plan is to experiment.

Fruit stains are often difficult to remove, especially when much fruit has to be picked by hand. Oxalic acid diluted will be found most useful, and should be used as soon as the stains appear.

To make the neatest possible darn of a rent in a black woolen garment, use the finest, softest darning cotton—the stocking kind. It is much more satisfactory than silk in that it merges itself into the fuzzy fiber of the goods and has no tell-tale gleam.

Nothing is better for swallow complexions than bathing in elder flower water. At night this should be allowed to dry on the skin. In the morning wash the face in the usual way, bathe with the elder flower lotion for a few minutes, wipe with a soft towel, and finish off with a soft clean chamois leather.

New corsets are shorter and not nearly so stiff as in the past. Steel springs are no longer used, the "body" being furnished by some equally strong but more flexible filling. When it can be afforded, it is always wise for a woman to find out some one good corset that actually fits her, and wear that especial make as long as she can buy it.

Now that sleeves are worn so very short gloves must necessarily be a good deal longer, and it would seem that they have been brought out in many new colors, and for the time suedes are having the preference in light grays, pinks, whites and yellows, while even blue and green to match the dresses are not considered preposterous.

WIDOW OF STEPHEN A. DOUGLAS

Death of the Woman Who Was the "Little Giant's" Wife.

Mrs. Robert Williams, formerly the wife of Stephen A. Douglas, the "Little Giant" of the Democratic party, and Lincoln's opponent in the Presidential campaign of 1860, died in Washington a short time ago. Some years after Douglas' death she married former Adjutant General Robert Williams. As the wife of Senator Douglas she was famous in fashionable and political circles for her beauty and her wit. When the "Little Giant" made his famous campaign his wife accompanied him, and by her tact and keen intuition made herself a strong factor in his chances of success. It was said that during the exciting times before and during the civil war Mrs. Douglas never made an enemy, although placed in many a trying situation.

Mrs. Williams was the daughter of J. M. Cutts, Comptroller of the Treasury in the '50s. She was a girl of wonderful personal charm. Tall, slender, and willowy, with a head and face of almost pure Greek type, there was a rare gentleness in the gaze of her beautiful brown eyes, in her unfailing courtesy, that made her a popular idol. Senator Douglas was a widower when he married the beautiful Adele Cutts, with whom he fell desperately in love at first sight at a reception at the White House.

After Senator Douglas' death, his widow, who was an ardent Roman Catholic, retired from society, and for some time resided the greater part of her time, after the French custom, in a convent. It was whispered that the beautiful young widow was to become a nun, the Pope having, it was said,

MRS. STEPHEN A. DOUGLAS.

granted a special dispensation permitting her to be received as a member of the Order of the Sacred Heart. After several years' retirement, however, Mrs. Douglas once more appeared in the social world, and her happy marriage to Gen. Williams occurred soon after.

THE EMPEROR'S MUSTACHE.

It Has Been as Good as a Gold Mine to the Royal Barber.

A German paper has lately got itself into a deal of trouble by discussing the Emperor's mustacahe and the barber who has made a fortune out it. The imperial barber is Herr Haby. About three years ago Adjutant von Hulien, companion from youth of the Kaiser, appeared before his majesty with his mustache turned up in the fan-shaped style which has now become so familiar from recent photographs of the German Emperor. His majesty was very much struck at the appearance of the adjutant.

"Who did it?" he asked.

"Haby, your majesty," came the reply.

"Send him to me," said the Kaiser, and from that day Haby became the king of barbers, and the imperial face assumed an entirely new aspect.

Haby to-day, although an uncrowned king, has many decorations. The latest is the Cross of Jerusalem, given to him upon the Kaiser's birthday. Haby accompanied the Kaiser upon his Palestine journey, and has accompanied the Emperor on all his journeys for several years. His other decorations include the Knight's Cross of the Hessian Philip Order, the Russian Stanislaus Order, a Bavarian silver medal of merit and a Turkish medjidie of the fourth class.

Haby has grown rich out of his job. His public establishment is crowded daily with the men of Berlin who are imitating the Kaiser's style of beard and he sells at fancy prices the water with which he claims to have made the Imperial mustache what it is. The Kaiser has his mustache dressed every day and, sometimes, several times in a day.

Too Few Marriages.

"I am afraid that our young women are altogether too stylish and expect too much. They want a house and lot and the house furnished before they will consent to marry. Their parents did not have all these things. I have been told that some of the young men and young women in this parish have been keeping company for from six to ten years. That is altogether too long. I hope the young men will take more courage on this question of marriage, and I also hope that the young people will not try to be too well off before making up their minds to get married."—Baltimore Sun.

London's Healthy Summers.

London is much healthier in summer than in winter. In the third week of January 2,021 deaths were notified, while in the third week of June the number was only 1,193.

The apple of a man's eye is too often but the fruit of egotism.

INYO INDEPENDENT.

FRT. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, MAY 19 1899

From the papers read by Prof. Rice and the remarks of C. E. Tripler on liquid air at the last meeting of the Junior Members of the American Society of Mechanical Engineers, it is very evident that there is little foundation in experiment or theory for the marvelous economy in power and production claimed for liquid air. The old, inexorable law that nature cannot be cheated still holds good. The gross energy expended primarily is the extreme limit that can be realized in any transformation of mechanical power, and to secure 100 per cent it is necessary to eliminate all losses from friction, condensation, etc. The active exploitation of air-power devices of late, coming at a time of feverish speculation, is indicative of a purpose to work the public. The average man knows as little of the science of pneumatics as of electricity. In the earlier development of the electrical industries the belief was common that electricity, like the hand of Midas, had the magical power of turning into gold everything it touched. The lesson that electrical enterprises are amenable to the same laws of economics as there of every other sort had to be learned. Many came out of electrical ventures sadder but wiser men. Unscrupulous men took advantage of the public's ignorant confidence in the mysterious force. This was not so long ago, either, but people forget quickly, and the time is ripe for the repetition of history by the exploitation of air power, though not on so large a scale. Croker and Leiter have opened the ball. Tripler's conversion of air into liquid, the astonishing things he has done with the stuff, and the still more astonishing things he has promised to do—marvels that rival Jules Verne and the Arabian Nights—have brought the public to a state of open-mouthed wonderment. The sympathy between the mouth and the pocket has probably not escaped the notice of astute promoters of air-power enterprises.—*Engineer.*

The Army Beef Court of Inquiry has reported. Its findings are of interest only in that they confirm the general opinion that the investigation would amount to little. In substance the court finds that the canned roast beef was bad and unfit for food, but that it was not "embalmed"; that several officers "failed to perform their full measure of duty" but that the "interests of the service will be best subserved if further proceedings be not taken."

Now, let the incompetents, the expert meddlers, the blunderers, who, at the head of army departmental affairs, have done more to thin the ranks of the American army than Spanish and Filipino bullets, lift up their voices in peans of praise and thanksgiving. It is their hour to rejoice. To condemn the brave men who fought for the eternal glory of the old flag to subsist on rank and putrid flesh that would produce nausea in even a respectable and decent vulture is not a crime; it is merely an indiscretion. The thousands of brave men slain by army beef are not to be avenged. "For the interests of the service" further proceedings should not be taken. In the light of the findings of the court, what was the use of it all? That the beef was unfit for food and that it caused much of the sickness and death of American soldiers in Cuba and Porto Rico was established long ago. That some one was responsible for this there is no doubt. In failing to fix that responsibility the Court of Inquiry has failed to perform its whole duty. The mild censure of Commissary-General Egan for purchasing in too heavy quantities an untried ration and of General Miles and Colonel Moss for not sooner reporting that the ration was bad does not satisfy. The evident intention to hush and smother the affair can only result in injury to the administration.

To a man up a tree it may look as though much of the news from Manila is doctored for the American market. If the official dispatches and the reports of correspondents were to be fully believed, the Filipinos must have been "utterly defeated," "disheartened" and "demoralized" a dozen times. But a day or two after such a report comes along they turn up in some fresh locality, bent on more fighting. Seemingly, the news from Manila is rather one-sided, so far as giving actual facts are concerned. One reason for this may be that the correspondents are all in the American camps.

The Act repealing all local mining laws passed at the last session of the California Legislature took effect immediately upon its passage, and those who have located claims since the passage of that act in conformity with the old Act of '97, which was repealed, should take steps to relocate under the Federal statutes, it appearing that some litigation has already resulted from the change. It is a well-known axiom that ignorance of the law is not an excuse, and those who have proceeded under the old law not knowing of the passage of the new would have a poor case in the event of litigation.

It is the opinion of Senator Depew of the New York Central railroad, the Republican party will have a plank in its next national platform denunciatory of trusts. Probably, but with such men as Depew, Quay, Hanna and Platt in control of the Republican machinery, such molasses will not catch any voters unless the voters want to be caught. The successful fight against the trusts will have to be made under captains who get their commissions from the people and not from the corporations.

FARM AND GARDEN

ASPARAGUS CULTURE.

Said to Be Well Pleasing to Everybody Concerned Therein.

Asparagus seems to find favor among those who cultivate it largely, on account of its strong market value. An Illinois correspondent of the Ohio Farmer says every thrifty market gardener will find one of his best investments in an acre or more of it. Some reasons for this are: "There is no easier vegetable to grow, and beds, when once established, if properly tended, yield more and pay better each season. As a long distance shipping vegetable it ranks among the very best. The plain truth is this—it makes money for the grower, yields a profit for the middleman, and, most of all, pleases the consumer." This grower's methods are as follows:

Variety and Size to Plant.—We regard the Columbian Mammoth White as the most satisfactory variety in cultivation. Not only are the stalks of the

HOW TO SET THE PLANTS.

largest size, but they are produced abundantly and very early. They are nearly clear white in early growth and remain so in favorable weather until three or four inches high. This sort commands an extra price, not only on a fancy market, but from canners, who find that when put up under a special brand it sells so readily at a higher price as to warrant them in paying the grower an extra price for growing it. We prefer to use only well grown 2-year-old stock.

Soil.—The soil on which asparagus plants are transplanted must be made very rich. From 100 to 200 loads of rich stable manure to the acre—well plowed in—makes a good start for a good crop. Select a good sandy loam sloping to the south, if possible. The ground should be plowed as deep as possible and furrowed off from 4 to 5 feet apart. Ground thus fitted enables the roots to take hold at once, which is of great importance, as the more strength and size gained on the roots each year places you that much ahead and enables you to secure a good profit from your bed the second season after planting.

How to Plant.—We usually set the plants in early spring, as soon as the ground can be worked, 18 inches apart in the rows which have previously been prepared, with the rows four feet apart. It will require 8,000 plants to properly plant an acre. As illustrated in this column, there is a "right way" and a "wrong way" to plant. It requires a little more time to set the roots in proper shape, but it pays. The roots should be spread apart, not bunched. The crown should be covered with four inches of earth. By shallow planting crops come earlier than if planted deeper. After planting has been done the ground should be properly leveled and good cultivation given throughout the season. The bed should be well cleaned every autumn and salted at the rate of one barrel of salt per acre, as this stimulates the roots and retards the weeds. A good dressing of manure should also be given every fall. A well planted and tended field in full bearing should present the general appearance given in the second cut.

Bleaching.—The young shoots can be bleached and made extremely tender by covering with straw or leaves, and I would suggest that planters give this mode of bleaching at least a trial, as it is a worthy method.

How to Cut.—Use a sharp knife and cut even with ground. Late cutting is not advised, as the roots will become exhausted if the shoots are not allowed to develop. Remember the leaves are the lungs of the plant.

Bunching.—The sprouts should be of good size when cut. Arrange in bunches eight inches across butt end. After they

ASPARAGUS IN THE FIELD.

have been neatly cut and tied place the butts of the branches in trays of water one inch deep, taking care to keep the tops dry. This prepares them for their journey to market, and they arrive in nice condition when they are handled in this way.

Packing.—Use a light, new, clean case that will hold about two dozen bunches. Stencil your name on each case, for if your asparagus pleases the purchaser your stock will always be in great demand and command a higher price than that which is poorly grown or badly packed.

Lime and Plant Diseases.

The effect of lime in different forms has been tested at the Rhode Island station, with not entirely conclusive results, on various diseases of plants, including cranberry and sweet potato diseases and a root disease of alfalfa. Slacked lime was found to be effective in reducing soil rot of sweet potatoes and quicklime in checking or preventing the root disease of alfalfa.

Practical experience has taught the growers of early potatoes to have the greater part of the nitrogen in their potato fertilizers in the form of nitrate of soda, depending upon its quick action to hasten the development of the crop.

A Useless Wish.

"Oh," sighed the poetic lady, "had I the wings of a bird!"

"Don't!" protested her husband. "Don't wish for the wings of a bird. If you had them, some other woman would probably be wearing them on her hat before the season is over."—Wash.

Persons who don't know enough to come in out of the wet are not likely to be the salt of the earth for any length of time.—Detroit Journal.

A SONG.

Ah, what is better than this, my dear,
What is better than this?
The thought of a night which has lost its way
Between to-morrow and yesterday;
The full of the tide and the gray of the sea,
And a gull that circleth endlessly;
The breath from a wind which bloweth well;
A sail that taketh new ports to tell;
If aught is better than this, my dear,
I find it not here, I find it not here.
—Blanche Trask in "The Land of Sunshine."

JUST A CURTAIN FIRE.

It Was In a Girls' Boarding School and Did Complicated Damage.

A fire in a skyscraper may be thrilling, but for dramatic episodes and unexpected complications a fire in a girls' boarding school surpasses it. The boarding school fire is usually what is known among insurance men as a curtain fire, but a curtain fire in a girls' school is more exciting and causes more casualties than an ordinary blaze anywhere else.

One evening last week two girls, who occupy a microscopic hall bedroom in a swell up town school, took the globes off the gas fixtures for hair curling purposes and left them off, because it was easier to do that than to put them on again. Then the girls raised the window a trifle in order to cool the room and dutifully sat down to write home letters. The inevitable happened, and when girl number one poised her pen in the air and glanced around the room in search of inspiration she saw the curtains in a blaze. She screamed. Girl number two looked around and echoed the scream. Then, with promptitude and discretion, both girls fainted. The screams had attracted the attention of the other girls, who rushed to the scene and then did various and sundry stunts, according to their several dispositions. One fainted, several wept, a few ran out of the house, and the rest shouted for the one man on the premises.

When he arrived, things looked rather hopeless. Curtains and woodwork were blazing finely. The floor was littered with prostrate forms, and when three girls have fainted on the floor of a hall bedroom there isn't much space in the room for promenading. The man picked his way across the prostrate forms and ordered all the girls who were not in a dead faint to leave the room, but they didn't go until he lost his temper and spoke with a force which isn't common in boarding school circles. Then they fled; but, unluckily, there was an enemy in the rear. A vigorous and practical woman from Texas had been inspired to go after some water. Returning in mad haste with a large pitcherful of water borne triumphantly aloft, she collided with the retreating forces at the door. The pitcher struck the leader of the retreat squarely in the face and knocked out two of her front teeth, whereupon the injured girl made the fainting trio a quartet and the water carrier dropped her pitcher and went into violent hysterics.

Hysteria, as boarding school teachers know to their sorrow, is contagious, and the one case touched off the crowd. By the time teachers arrived upon the scene the fire was out, but the survivors were in a bad way. It was necessary to put nine-tenths of the school to bed and order whole-sale doses of bromide. Even now the girls insist that they haven't recovered from the shock sufficiently to do hard studying, and the victims of the water pitcher are both under the care of trained nurses. As for the man, he gave up his place the next day and confided to the cook that he was going to look for a job in a lunatic asylum, where his boarding school experience would be of value to him.—New York Sun.

SUGAR CANE.

How to Plant, Cultivate, Grow, Fancy Kinds, Etc.

Sugar cane may be planted in the fall just before time for early freezes, which would kill its "eyes," or it may be put in piles and covered with earth and its leaves till about the middle of January. In fact, it may be planted any time after maturity in the fall up to the time of beginning growth in the spring, just so it is not subjected to freezing weather. If planted in the spring, cover about as deep as corn; if in the fall, cover as deeply as possible and drag off in the late winter, when danger from freezing in the ground is past.

In planting at any time care should be used to have the ground in condition to suit other growing crops, and the cane should be planted about four inches below the level surface of the ground to insure deep roots. The rows are to be about four feet apart or a little more. Always cultivate shallow and keep comparatively level at first. As the cane begins to joint above the ground begin to hoe the ground up to it. It soon gets top heavy, and if not well supported with earth into which each joint covered sends out roots to aid in its support, it will easily blow down. It is usually laid by in July or August, when its leaves shade the ground. A good practice is to follow the last plowing with hoes and drag the earth up well about the roots, making a high, rounded top hill.

Never plant whole canes unless they are less than two feet in length. Cut them in two if they are longer than that, because if the canes are left whole the entire length of the cane will go into a small number of the "eyes," and a too thin stand is the result. Fifteen feet of cane of any sort, not injured by rust or otherwise, should plant ten feet of rows.

If one wishes to grow fancy sugar cane, let him always select the best stalks for planting and then take only one planting out of each cane, selecting that piece from the longest joints, but do not get closer the root than about two feet, and reject the top of the stalk.

A Texas planter whose advice, originally given in The Farm and Ranch, is here presented, concludes as follows: I am growing sugar cane here for chewing only, and have grown it more extensively in Florida. One stalk weighed six pounds. I have five varieties—red cane, white cane, red ribbon cane, green ribbon cane and green cane. Teach people to call sugar cane sugar cane, sorghum sorghum and millet millet.

A Remarkable Vase.

On the roof of a brewery at Maidstone, Kent, is to be seen one of the most remarkable vases in England. It represents an old brown jug and glass. The jug, which is made of copper, stands 3 feet 6 inches in height and is 3 feet in diameter and capable of holding 108 gallons.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31st, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending March 31st, 1899.

Respectfully submitted,
W. T. BUNNEY, County Treasurer.

Notice of Forfeiture

STATE OF CALIFORNIA } ss
COUNTY OF INYO }

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended one Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining district, County of Inyo, State of California, commonly known and recorded in the mining records of said County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31, 1898, and if within thirty days after the publication of this notice you fail or refuse to contribute your proportion of such expenditure, to wit, the sum of thirty-three dollars and thirty-three cents each, your interest in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under section 0 of an act entitled "An act relating to the working rights of owners of mines and drainage of mines in the State of California," approved March ... 98.

FRANK HARRIS.

NOTICE TO CREDITORS.

Estate of Eduard Chenot, deceased.

NOTICE IS HEREBY GIVEN by the undersigned, Executors of the last Will and Testament of

EDOUARD CHENOT

deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within four months after the first publication of this notice to the said executors at the residence of P. W. Forbes, in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the County of Inyo, State of California.

J. E. SHEPHERD and
W. L. HUNTER,
Executors of the estate of Eduard Chenot deceased.

Dated at Independence, Cal., November 28th 1898.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

Notice is hereby given by the undersigned, administrator of the estate of Luther Clarke deceased, to the Creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Ten Months after the first publication of this notice to the said administrator at his place of business on Edwards Street in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

LEGAL.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not Be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Edouard Chenot, deceased.

It appearing to this Court, by the petition this day presented and filed by J. E. Shepherd and W. L. Hunter, the executors of the last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said decedent, to pay the debts of decedent and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said Superior Court, on MONDAY, the 29th day of May, A. D. 1899, at 10 o'clock a. m. of said day, at the court room of said Court, at the Court House, in the town of Independence, in the county of Inyo, State of California, to show cause why an order should not be granted to the said Executors to sell so much of the real estate as shall be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated April 24th, 1899.

P. W. FORBES, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 5th day of April, A. D. 1899.

D. J. HESSION,
(SEAL) Clerk.
By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to the Court, by the petition presented and filed by J. C. Irwin, Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the entire real property, and interest of said deceased, that it is necessary to sell the whole or some portion of the real estate of said deceased, for the payment of debts, expenses and charges of administration.

It is therefore ordered by the Court that all persons interested appear before the Court at the Court House, in the town of Independence, County of Inyo, State of California, at the Court House, in the town of Independence, County of Inyo, State of California, on the 29th day of May, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the court room of said Court, at the Court House, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property, or such part thereof as may be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SHERIFF SALE.

BY VIRTUE OF AN EXECUTION, ISSUED out of the Justice's Court of Fifth Township, County of Inyo, State of California, and to me directed and delivered, for a judgment rendered and entered in said Court, on the 8th day of August, 1897, in favor of J. B. Dover and against L. B. Harrison, I have levied on the following property, to wit: An undivided one-half interest in that certain water right known as the "Vingfield and Harrison" water claim, commencing at a monument of stone on the north side of Jim Cooper's hill side location and running along said line 80 rods thence north 20 rods, thence west 4 rods, thence south 20 rods to place of beginning. Is at Soda Corral in South Park Mining District, Inyo County, State of California. Also,

An undivided one-half interest in that certain mine or mining claim known as the "Myrtle Lee." This claim is located about three miles southeast of South Park Spring, in the Panamint range of mountains, on the west side said range in South Park Mining District, Inyo County, California.

NOTICE IS HEREBY GIVEN that on the 4th day of February, 1899, at one o'clock p. m. of that day, in front of the Justice's office, in the town of Ballarat, County of Inyo, I will sell all the right title and interest of said L. B. Harrison in and to the above described property, at PUBLIC AUCTION, for cash, gold coin in hand to the highest and best bidder, to satisfy said execution and all costs.

A. M. GIVEN, Sheriff.

Dated the 13th day of January, 1899

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

WEDNESDAY, May 17, 1899

William Richey vs. James Pruett—Action for foreclosure of mortgage. Decree granted and William Dehy appointed commissioner to sell encumbered property.

A. A. Neil was a visitor in town yesterday.

W. T. Bunney, County Treasurer, was at Bishop this week.

A shortage of 70,000 head is reported in the Texas cattle supply this year.

Webb & Whitmore have taken their cattle to Long Valley for the summer.

Charley Summers came down from Bishop last Monday, returning next day.

C. B. Rawson and Thos. Williams were in town at the end of last week.

A narrow vein of high grade gold bearing quartz has been developed at Belleville.

Archie Farrington came down from Big Pine Wednesday returning yesterday.

I. Tucker came up from Darwin yesterday on business in the local Land Office.

Dr. G. P. Doyle has removed to Bishop where he expects to remain permanently.

R. Decker came up from Ballarat on Tuesday as a witness in the case of Ritchie vs. Pruett.

Ernest Laird arrived from Bakersfield last Saturday. He came to report the trial of Richie vs. Pruett.

Big Pine is sparing no effort to make the approaching Decoration Day a memorable event in the history of the county.

S. E. Vermilyea came down from Bishop on Wednesday on business in Wednesday on business in the Superior Court.

Charley Anthony spent several days in town this week. He was thrown from a wagon at Pleasant Canyon recently, and badly bruised about the shoulders.

The first drive of the Rickey cattle started for Long Valley last Sunday in charge of Billy Rickey. Jim Moffett will start to-morrow with the second and last drive.

Mr. and Mrs. George Montgomery arrived here yesterday from Ballarat. Mr. Montgomery will return next week while Mrs. Montgomery will remain here visiting with friends.

T. B. Scovil was admitted to the County Hospital Tuesday evening suffering from a severe attack of sciatica. He was discharged Wednesday morning completely cured.

Dave Johnson came in from his mine Wednesday and sent a pack train out yesterday. He has six tons of good ore sacked and plenty more ready for sacking. Charley Robinson will do the packing.

Superintendent Troeger of the Lane mine arrived from Los Angeles on Wednesday's train. The mine has been closed down since the 28th of last month and some new developments are expected now that Mr. Troeger has returned.

The thirty forest reservations of the United States embrace an area of 40,000,000 acres in thirteen States and Territories. Seven are in California, the largest of which—the Sierra forest reserve—includes 4,000,000 acres. Within the past 35 years it is estimated that 11,000,000,000 feet of lumber on public land have been destroyed by forest fires.

Some miscreant broke into the harness room of Mairs' livery stable last night and with a sharp knife cut a nearly new saddle belonging to Paul Mairs into ribbons. It is surprising that any human being should be so lost to reason as to wantonly destroy property in this way. It was evidently done out of illwill, and it is a contemptible and cowardly outrage. The scrub, or someone of the same ilk, stole a bundle of blankets from John Ramsey and a pair of silver-mounted spurs from Frank McGann. The matter will not rest here. Somebody will get hurt at this kind of business.

MARCH OF PROGRESS.

On taking a trip northward through the Valley one cannot help but be struck by the improvement that is being made in that section. Beginning at Fish Springs the change first becomes noticeable. Within the past three years the section lying between Big Pine and Fish Springs, an area six miles long by four miles wide, has all been put under fence and is rapidly being brought under cultivation. Good, comfortable farm houses dot a landscape, which, but a short time ago was a barren sagebrush waste. Forest trees and orchards have been planted and it is almost inconceivable what rapid growth they are attaining. Large fields of alfalfa stretch away, and during the present season at least five thousand tons of alfalfa will be cut and stacked in this vicinity. The town of Big Pine is building up, rapidly A new school building, church and store, besides about twenty new dwellings, have been erected within a short time. Between Big Pine and Bishop, sixteen miles, the country is all being brought under cultivation. Nearly all of the immigration of the past few years has settled in this region. They are all people in moderate circumstances but they are workers, and it is astonishing to see what has already been accomplished. When we first visited this section fifteen years ago there were but three ranches between the Big Pine settlement and Bishop; now there are sixty square miles under fence and a goodly proportion of this being cultivated. The great object lesson of all this is *irrigation*. From Lincoln to Fish Springs, twenty-six miles long by six miles wide, the country is under a complete irrigation system of ditches from Owens River. There are nine large canals taken from the river besides several small ditches. The soil is unsurpassed for fertility and only required water to make a veritable Eden. It costs a little to irrigate, but a crop failure is almost an unknown occurrance. This fact more than offsets the trouble of irrigating. Between Fish Springs and the Alabama range lie 120 square miles of just as good land as any above Fish Springs. It only requires water to ensure the rapid settling up of this vicinity. And until water is obtained we cannot look for much improvement. It took many years of patient labor to construct the Owens River and Big Pine Canals. But they were completed, and the northern country now shows the effect of it. The same intelligent and untiring effort will make just as fruitful a country of the region south of there.

Evidently An Error.

E. M. Dineen of the P. D. Q. Cyanide works at Ballarat is in town. He reports that they will get through at Montgomery's in about ten days and will make a good thing of it. They will then remove to the Reward mine and will locate about ten miles east of Independence where they have secured 10,000 tons and will put up a fifty ton plant. They have also 2,000 tons in the Beveridge district some sixteen miles from the Reward which they have bought outright and which are very good but somewhat difficult to work. There is no wagon road to this latter but everything must be packed in by animals over a mountain trail.—*Randsburg Miner*

Superintendent Hoskins of the Reward mine knows nothing of any arrangement with the above people to work the Reward tailings and thinks it is a mistake. It is a fact, however, that they have bought the tailings at Beveridge.

Farm Buildings Burned.

Last Sunday afternoon the farmhouse and outbuildings at the Mairs ranch were totally destroyed by fire. J. S. Gorman was passing the place about two o'clock in the afternoon and saw that the haystack near the house was on fire. He gave the alarm, but as a high wind was blowing at the time nothing could be done. The farm machinery stored in the barn was saved but nothing else. M. Barragan had eight complete aparejo outfits destroyed, loss about $250. Paul Mairs had two mules in the barn which he was breaking. One was burned to death and the other is so badly burned that it may die. A little calf was burned. The dwelling was a substantial frame building which cost $1,500. There was a fine stone cellar and milkhouse and a number of other buildings. All were totally destroyed. The loss will amount to about $2,500 with no insurance. No one knows how the fire originated as there was no one about the place at the time. Mr. Gorman says it caught in the field near the haystack and the wind carried it to the hay and from there to the house.

F. C. Sherrer arrived at Independence Wednesday evening from San Jose and expects to remain here for about three weeks. Frank is an Inyo boy whom we feel proud to claim. He studied hard in the public school here and on graduating went to San Jose, where he took up the study of shorthand and became an expert stenographer. He studied law and about a year ago was admitted to practice in the Supreme Court. He has a good practice at San Jose.

C. H. Jordan has put a force of men to work on the Copper Queen mine near Citrus. He has the property bonded from J. C. Roeper and will sink fifty feet, and if the showing justifies it, will then work further. His stepson, J. Cook, arrived here last Tuesday and will have charge of the work. Mr. Cook is a competent assayer and metallurgist.

Chas. S. Newhall, Superintendent of the Sierra Forest Reserve, arrived at Independence Monday evening, leaving on the train next morning. The gentleman's time for observing conditions here was extremely limited. He can report that he has been here, however.

The sale of 300,000 pounds of wool to to Boston purchasers was made in Winnemucca last week. The price paid was ten cents per pound.

1866 Memorial. 1899

TO DESCENDANTS OF CONFEDERATE AND UNION VETERANS:

Recognizing the fact that amity has been restored between the Confederate and the Federal Veterans of the late Civil War and believing that their descendents should perpetuate the same, all sons and daughters, grandsons and grand-daughters of Union and Confederate Veterans are cordially invited to assemble at Big Pine on the morning of May 30th 1899, at 10 o'clock to participate in the celebration of Memorial Day, and in decorating graves of Confederate and Federal soldiers and sailors buried at Big Pine.

By order of Committee.
W. H. UHLMEYER,
Son of Union Veteran.
DOUGLAS ROBINSON,
Son of Confederate Veteran.

Real Estate Transfers.

The following deeds have been recorded since May 11, 1899.

T. C. Harness and Mamie Clark to Fred H. Bulpitt—Feb. 28, 1899, one lot in town of Bishop, $100.

Fred Rambaud to Petous Rambaud—May 10 1899, one acre at Big Pine, $50.-

William L. Coats to S. J. Newlon—May 13, 1899, 160 acres on Bishop Creek, $500.

Mrs. L. D. Roughney to A. K. Eugley—Sept 24, 1898, Lot 9 block 4, Big Pine $150.

Alex McDonald to O. L. Griffith—May 13 1899, und. ½ interest in Isabella mine Argus Dist.

Lester Laird came in from Minnietta yesterday. He has been a little under the weather and came in to recuperate. He says J. J. Gunn has seven men employed and has about sixty tons of ore ready for shipment. He says that never in the history of the mine did it look so well as at the present time.

Miss June Skinner arrived home last Monday from San Francisco where she has been attending the Hopkins Art School. She will spend the summer vacation with her relatives here.

LEGAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the county of Inyo, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this Fourth day of May, A. D. 1899.

D. J. HESSION,
[SEAL] Clerk.
P. H. Mack, Independence Cal. Attorney for plaintiff.

NOTICE FOR PUBLICATION.

U. S. LAND OFFICE, Independence, Cal., May 8, 1899.

Notice is hereby given that the following-named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before Register and Receiver at Independence, Cal., on June 17, 1899, viz.: James Edward Rose for the S. E. ¼ of S. E. ¼ Sec. 26. E ½ of N. E. ¼ and N. W. ¼ of N. E. ¼ Sec. 35, Tp. 10 S., R. 34 E., M. D. M.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz.: Marshall H. Naylor, Alexander D. Gilbert Charles N. Rose and George H. Rose all of Independence, Cal.

S. W. AUSTIN, Register.

HOMESTEAD, FINAL PROOF.

"Gossamer iron," the wonderful product of the Swansea iron mills, is so thin that it takes 4,800 sheets, piled one on the other, to make an inch in thickness.

I shall recommend Piso's Cure for Consumption far and wide.—Mrs. Mulligan, Plumstead, Kent, England, Nov. 8, 1895.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Merit Wins.

The invention of Alabastine marked a new era in wall coatings, and from the standpoint of the building owner was a most important discovery. It has practically driven all kalsomines from the market, and from a small beginning has branched out into every country of the civilized world. The name "kalsomine" has become so offensive to property owners that manufacturers of cheap kalsomine preparations are now calling them by some other name, and attempting to sell on the Alabastine Company's reputation.

Through extensive advertising and personal use, the merits of Alabastine are so thoroughly known that the people insist on getting these goods and will take no chance of spoiling their walls for a possible saving of at the most but a few cents. Thus it is again demonstrated that merit wins and that manufacturers of first-class articles will be supported by the people.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Sold by Druggists, 75c.
Hall's Family Pills are the best.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE LTD., 930 Arch St., Philadelphia, Pa.

"Did I understand you, Mr. Kawbash, to say that I was a sponge?" "Not exactly, Tanx; you know a sponge will take water—I don't believe you ever did."

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

Animals That Know Roads.

The Welsh mountain sheep have obtained legal recognition of their ability to distinguish boundaries and their own roads through their pastures. One flock of sheep fought a trespassing flock and the court decided that the sheep were worth a half crown more than others because they knew their roads and boundaries.

There Is No Telling.

Be sure not to let rheumatism stay in the system longer than you can get a bottle of St. Jacobs Oil to cure it. There is no telling what part it may strike or how much misery it may give.

Sausage Links.

"Yes," said the yellow dog, "I believe after death we enter into another sphere of action. I think I'll be a golf player."

"How do you figure that out?" queried the black and tan.

"Oh, I'll be in the links."—Philadelphia North American.

"Better Be Wise Than Rich."

Wise people are also rich when they know a perfect remedy for all annoying diseases of the blood, kidneys, liver and bowels. It is Hood's Sarsaparilla, which is perfect in its action. It so regulates the entire system as to bring vigorous health. It never disappoints.

Coitre—"For 42 years I had goitre, or swellings on my neck, which was discouraging and troublesome. Rheumatism also annoyed me. Hood's Sarsaparilla cured me completely and the swelling has entirely disappeared. A lady in Michigan saw my previous testimonial and used Hood's and was entirely cured of the same trouble. She thanked me for recommending it." MRS. ANNA SUTHERLAND, 406 Lovel Street, Kalamazoo, Mich.

Poor Health—"Had poor health for years, pains in shoulders, back and hips, with constant headache, nervousness and no appetite. Used Hood's Sarsaparilla, gained strength and can work hard all day; eat heartily and sleep well. I took it because it helped my husband." MRS. ELIZABETH J. GIFFELS, Moose Lake, Minn.

Makes Weak Strong—"I would give $5 a bottle for Hood's Sarsaparilla if I could not get it for less. It is the best spring medicine. It makes the weak strong." ALBERT A. JAGNOW, Douglastown, N. Y.

Bad Blood.—"When 65, a cancerous eruption appeared under my eye. Hood's Sarsaparilla purified my blood and the eruption disappeared." JOHN M. KERR, 3519 Wood St., Chicago, Ill.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; non-irritating and only cathartic to take with Hood's Sarsaparilla.

SURPRISE PARTY FOR PETER.

Belligerent Cat's Assault on Bull Terrier Causes a Decided Commotion.

Peter is a brindled cat of uncertain age, but a most warlike front. He affects the boxes and barrels of a South Side grocery with intent to descend upon the roofs of visiting dogs and do them hurt. Being of large porportions and unimpeachable courage, Peter had things all his own way for a long time. He would prowl about and lie in wait for the invaders. Then he would crouch on some elevated spot, silent and vengeful. Then at the right time he would launch himself on the back of his victim. Thereupon would arise much clamor, noise, spitting, scratching, yowling and the scraping of eager feet as the dog hastened to the other side of the causeway and marveled concerning what hit him.

One day a business man of the district entered the store, being possessed of a bull terrier of hard muscle and eagerness for trouble, who travels under the alias of "Jack." The said Jack was unaware of the existence of Peter and Peter of that of Jack prior to this meeting. Peter will remember. He has certain unexpected and urgent reasons for doing so. Jack is the same care-free terrier of old.

Jack trailed his master into the store and immediately commenced a voyage of discovery. He succeeded, for he discovered Peter. That wise feline had espied Jack even before he entered and had taken position for the fray. As Jack wandered sniffingly about he passed directly under the place where his enemy was reared aloft. Peter grinned with joy, hoisted himself gingerly up and then with horrid yowl descended upon Jack with a wild crash. Jack was surprised. He felt something lifting pieces out of his back, all the time making remarks like the steam coil in his master's parlor. He tried to turn about and look at the thing and was smitten in the jaw. Thereupon he lay down. Not figuratively was this submission, but physically. Jack was calm and had fought before, so he lay down and rolled over his unknown assailant. Then having broken the hold he sprang up with marvelous agility to investigate.

It was Peter's time to be surprised. He had battled all kinds of dogs and never been rubbed in the sawdust before. None had rolled him from his hold and he wist not what to do. But Jack informed him, for he spoke in angry tones and bore down on the dazed feline. Peter spit once and then sailed away with speed, Jack camping on his trail with eager bark. Once, twice around the store they raced. Then Peter vaulted upon the meat market counter as Jack was about to lay hold upon him. Not a moment stopped or stayed Jack, but eagerly he also vaulted on the counter.

The master's hand reached forth and grasped Jack's collar as Peter sprang into the swinging scale. Jack was two inches away, but it was enough. Peter took additional flight and when last seen was on the summit of a pile of goods some twenty feet from the floor. He declined all invitations to descend until hours after Jack had gone home.

COMMON FALLACIES

Regarding the Actual Length of a Day.

Nine persons out of ten, if asked how long it takes the earth to turn once on its axis, would answer 24 hours, and to the question, "How many times does it turn on its axis in the course of the year?" the answer would be 365¼ times. Both answers are wrong.

It requires but 23 hours and 56 minutes for the earth to make one complete turn, and it makes 366¼ turns during the year. The error springs from a wrong idea of what is meant by a day.

The day is not, as is commonly supposed, the time required by the earth to make one turn on its axis, but the interval between two successive passages of the sun across the meridian; that is to say, the time which elapses after the sun is seen exactly south, in its diurnal course through the heavens, before it is again seen in that position.

Now, in consequence of the earth's revolution in its orbit, or path around the sun, the sun has the appearance of moving very slowly in the heavens in a direction from east to west. At noon to-morrow the sun will be a short distance to the east of the point in the heavens at which it is seen at noon today, so that when the earth has made one complete turn it will still have to turn four minutes longer before the sun can again be seen exactly south.

Oldest Form of Animal Life.

The Tuatara lizard of New Zealand is said to be one of the most ancient forms of animal life now existing. It originally possesed four eyes, but now has to be contented with but two. It lays eggs and these take no less than thirteen months to hatch out, the embryos passing the winter in a state of hibernation.

These remarkable animals are found only in one or two places in the colony and they are rapidly becoming scarce, as collectors from every part of the world are continually on their track. They are about eighteen inches in length and, like many of the lizards, are said to have the characteristic of being able to replace portions of their limbs, etc., which have been destroyed. One owned by Carl Hanser of Awanui had the misfortune to lose an eye some time ago and now a complete new eye, as perfect as the undamaged one, has grown in the place of that lost.—San Francisco Examiner.

The Meanest Man on Record.

A mean man on the South Side agreed early in the week to meet a girl at luncheon down town last Saturday, and after luncheon they were going to the matinee. The girl kept her part of the contract. She dressed in a new silk waist and a violet bonnet, and was in the lunch room as the clock struck 1. After she had waited about five minutes there came a note from the mean man. It said:

"The inclosed cards will show you why I can't keep my engagement."

The "inclosed cards" announced that he had been married to a chum of hers that morning.—Chicago Inter Ocean.

Big Police Force in New York.

It takes a police force of 7,461 men to protect the interests of New York's population against crimes and disorder.

Lots of writers who pursue a literary career are unable to catch up with it.

AN OPERATION AVOIDED.

Mrs. Rosa Gaum Writes to Mrs. Pinkham About it. She Says:

DEAR MRS. PINKHAM:—I take pleasure in writing you a few lines to inform you of the good your Vegetable Compound has done me. I cannot thank you enough for what your medicine has done for me; it has, indeed, helped me wonderfully. For years I was troubled with an ovarian tumor, each year growing worse, until at last I was compelled to consult with a physician. He said nothing could be done for me but to go under an operation

In speaking with a friend of mine about it, she recommended Lydia E. Pinkham's Vegetable Compound, saying she knew it would cure me. I then sent for your medicine, and after taking three bottles of it, the tumor disappeared. Oh! you do not know how much good your medicine has done me. I shall recommend it to all suffering women.—Mrs. ROSA GAUM, 720 Wall St., Los Angeles, Cal.

The great and unvarying success of Lydia E. Pinkham's Vegetable Compound in relieving every derangement of the female organs, demonstrates it to be the modern safeguard of woman's happiness and bodily strength. More than a million women have been benefited by it.

Every woman who needs advice about her health is invited to write to Mrs. Pinkham at Lynn, Mass.

Accounted For the Pit.

Hon. George R. Peck so keenly appreciates a good joke that he tells the following on himself:

"When, after a foreign trip, I was being welcomed by some of my friends in Topeka, I wore a suit of clothes made by a London tailor that was uncomfortably tight in places. I expressed my surprise that a loose fit in London should prove a tight fit in Topeka, whereupon an Irishman of the party exclaimed:

"'Mr. Peck, don't forget you're a bigger man in Topayka than you were in London.'"—Chicago Journal.

FOR MEN ONLY.
DR. FOOTE & STAFF
161 ADAMS ST., CHICAGO.

Men requiring unsurpassed treatment should consult personally or by letter **"Free"** with the pioneer and only exclusively men's specialists in United States. **Diseases of men** made the study of a lifetime. Unfortunates everywhere should immediately communicate with Dr. Foote of Chicago. Everything confidential. Remedies sent everywhere in sealed packages and letters in plain envelopes. Correspondence solicited. Latest **Surgical, Medical and Electrical** methods adopted. Deluging the stomach with drugs abandoned. Avoid drugs recommended by the unauthorized and self-styled specialists in Western towns; few genuine specialists locate out side of New York or Chicago. In these cities your private affairs are safe. Unequaled treatment for all diseases and weaknesses of the Genito-Urinary, Sexual, Reproductive and Nervous Systems. Impediments to marriage removed. **"Syphala"** positively purifies the blood, cures syphilis and removes all white ulcers in the throat or mouth, copper colored spots on body and eruptions on skin, also catarrh and rheumatism. **"Vigorala,"** the only permanent restorer and invigorator, gives vigor to vital organs and nerves, prevents and cures grip. $1 per bottle, 6 for $5. Trial bottles, either remedy, half price.

Her Opinion In Full.

The car turned sharply around a curve and the tall man who was holding on to a strap somewhat loosely was suddenly thrown from his upright position with a force that landed him in the lap of a dignified dowager sitting near him, while his high silk hat flew from his head and rolled down the aisle of the car.

"Sir," she said as he rose to his feet again with profuse apologies, "I am compelled to say that in my judgment you were lacking in that complete grasp of the strap which was essential to the highest efficiency in maintaining an upright attitude when turning a curve."

That was all. But it crushed him.—Chicago Tribune.

Stands By In Need.

Every living thing has pains and aches sometimes, and the aches and pains of humankind have a friend in St. Jacobs Oil, which stands by in need to cure and restore.

Untimely Nap.

"What time did the hotel catch fire?"

"Midnight."

"Everybody get out safely?"

"All except the night watchman. We couldn't wake him up in time."—Boston Traveler.

The Danger of It.

The man with too many irons in the fire is sure to take one by the hot end.—Dallas News.

INSOMNIA

"I have been using CASCARETS for Insomnia, with which I have been afflicted for over twenty years, and I can say that Cascarets have given me more relief than any other remedy I have ever tried. I shall certainly recommend them to my friends as being all they are represented." THOS. GILLARD, Elgin, Ill.

A CHEAP COTTAGE.

An Economical and Carefully Planned Dwelling.

A great many people delay building because they do not know what may be done through economical planning. By this is meant the economical and careful planning in the arrangement of the floor plans. Compact floor plans save labor, and in this section of the world compactness and convenience is a serious desideratum. The design shown

A CHEAP COTTAGE.

herewith is for a low-priced cottage. The plan is worthy of consideration, and the exterior is picturesque and attractive. It is a good solution of the question of a four-room house for a small amount of money. The man who builds a cheap cottage generally wants convenience of arrangement and accessibility as much as he who builds more pretentiously. In order to have these, something must be sacrificed, generally something in the size and quality of the materials used in the construction. Comfort and convenience should be the first important consideration.

Of course different people possess different ideas in regard to the planning of a dwelling, and what might seem an ideal arrangement to one person would appear to be very inconvenient to another. Inexperienced persons usually expect too much, and cannot understand why a few feet added here and there in the dimensions of a room should make much difference in the cost of the structure. Yet it is the actual area of ground covered by the building upon which the cost is estimated.

This house is to be built on a brick or stone foundation, the outside walls sheathed and papered under the weatherboarding, and the inside walls and ceilings lathed and plastered three coats. The rooms are so grouped around one chimney that the living

room, kitchen and one bedroom may be heated. An open fireplace in the living room would be an attractive feature, and might be added at a slight additional cost. The construction of the house is good. The exterior walls are finished with half-inch siding and the gables and roof shingled. The dimensions of the house outside are thirty-one feet wide, and twenty-eight feet deep, not including the projection of the bay in front, and the height of the story is nine feet in the clear. No cellar is provided as shown, but if desired one could be built under a part or whole of the house for slight additional expense. A house could be built after this design, of reasonably good materials for from $450 to $500.—E. A. Payne.

AUTOMATIC BASS VIOL.

This Instrument Needs No Genius to Perform on It.

This musical instrument does not need genius, talent or even education to draw a voice from its depths. All the genius is inside and all the person who plays it has to do is to wind it up and set it going. It is one of the inventions of Bruce Miller, the musical inventor, who has made a whole orchestra of automatic musical instruments. The instruments are connected by tubing with a keyboard which the leader plays to set the violins, 'cellos, flutes, trombones, oboes and other instruments going. It is a question whether a violin played by machine can ever give forth such soul-stirring, heart-breaking, hair-raising and otherwise pleasing sounds as an empty violin played by an ordinary man.

AUTOMATIC BASS VIOL.

Names in the Postal Guide.

The following names of postoffices appear in the United States postal guide: Mud, Twin Sisters, Texas; Mule, Oregon; Sodom, New Mexico; Yellow-jacket, Idaho; Loyalsock, Option, Pennsylvania; Wax, Iowa; Pebble, Sawdust, Florida; Seven Guns, Quality, Kentucky; Virtue, Tennessee; Wit, North Carolina; Zero, Mississippi; Love, Colorado; Oats, South Carolina; Pluck, Virginia; Pure Air, Rockycomfort, Peculiar, Lick-Skillet, Missouri; Sassafras, Maryland; Pious, Ohio; Rolling Stone, Minnesota; Peppertown, Indiana.

A Philippine Animal.

At the National Zoological gardens in Washington has just been received a tarsier from the Philippines. The tarsier may best be described as having a face like an owl, and a body, limbs, and tail like those of a monkey. His sitting height is about that of the squirrel. As his enormous optics would lead one to suppose, he cuts capers in the night and sleeps in the daytime, concealed usually in abandoned clearings, where new growth has sprung up to a height of twenty feet or more.

It's foolish to attempt the cultivation of friendship by giving your friends an occasional dig.

Twenty Lashes For Six Hairs.

A singular theft was tried by Mr. Beale, first class magistrate. Superstitious Burmans pull out the hairs of an elephant's tail for talismans, making rings out of them and other charms. One Nge Tun Lin went into an elephant's shed at Ahlone and pulled six hairs out of a bull elephant's tail, secreting them in his umbrella. The mahout challenged him, and he promptly shook the hairs out of the umbrella. They fell on some straw, were picked up and put forward in evidence of theft. The man was convicted and sentenced to receive 20 lashes.—Times of Burmah.

Mutual Dislike.

Brahms and Tschaikowsky, the famous musicians, met but twice. On the last occasion Brahms was sufficiently interested in Tschaikowsky's "Fifth Symphony" to travel expressly to Hamburg in order to make its acquaintance. After the performance the distinguished composers dined together, and the conscientious Brahms frankly admitted that he did not like the work at all; whereupon the usually meek Russian plucked up sufficient courage to inform his host that the dislike of each other's music was mutual. They parted on excellent terms nevertheless.

Tender Flesh.

The more tender the flesh, the blacker the bruise. The sooner you use St. Jacobs Oil, the quicker will be the cure of any bruise, and any bruise will disappear promptly under the treatment of the great remedy.

The Business of a Theater.

A prosperous theater in the city of New York may in a favorable season do a business of more than $250,000 and keep in employment 150 persons. There are 37 theaters, including the variety houses, in active operation in the boroughs of Manhattan and the Bronx, while the borough of Brooklyn adds a score or more. Everything which affects business in general affects the theater immediately.

A man will reduce his expenditures for tickets to places of amusement long before he thinks of cutting down his supply of cigars, for the cigar belongs to that class of luxuries which subtly become necessaries, while the theater habit, as any observant manager will tell you, requires constant cultivation. The management of a theater is therefore an occupation requiring business sagacity in a greater degree than it calls for artistic taste.—W. J. Henderson in Scribner's.

Wanted Warmth.

"I think it would be well," said the decorator, "to have your dining room bordered by a frieze."

"No, no," remonstrated the man who had only recently struck it. "I want that room, above all others, to have a warm, cozy appearance."—Philadelphia North American.

FOR 30 DAYS YOU CAN TRY IT FOR 25 CENTS.

RHEUMATISM 42 YEARS!

CURED BY **5 DROPS** [TRADE MARK.]

SPENT HUNDREDS OF DOLLARS TRYING TO GET WELL, BUT ALL IN VAIN, USED "5 DROPS" FOR TWO MONTHS AND IS NOW COMPLETELY CURED.

THOUSANDS OF GRATEFUL LETTERS RECEIVED OF WHICH THE FOLLOWING ARE SAMPLES:

Grinnell, Iowa, Nov. 17, 1897.

To the SWANSON RHEUMATIC CURE CO., Chicago, Ill.: GENTLEMEN: I will state that I had the Rheumatism over 42 years. Spent over $600.00 in trying to get well, but all in vain, until my brother-in-law gave me one bottle of "5 DROPS" on trial last June. I used it for two months, and I am now a well man. I certainly believe it is all you claim for it, and fully worth the money to anyone. I hope the public will benefit by my statement of my own case, and anyone wishing to write me will receive an answer.

N. WITTAMOTH.

CRUTCHES DESTROYED AFTER ONE BOTTLE.

Regent, Ill., Nov. 12, 1897.

SWANSON RHEUMATIC CURE CO., 167 Dearborn St., Chicago, Ill.: SIRS: My wife has been suffering two years with Rheumatism. She could not get about at all. She has used about one bottle of "5 DROPS," and can now go about without crutches. I never have found anything that did her so much good, and I hope to be able to continue the treatment until she is entirely well.

JAMES WILLIAMS.

As a positive cure for **Rheumatism, Sciatica, Neuralgia, Dyspepsia, Backache, Asthma, Hay Fever, Catarrh, Sleeplessness, Nervousness, Nervous and Neuralgic Headaches, Heart Weakness, Toothache, Earache, Croup, Swelling, La Grippe, Malaria, Creeping Numbness, etc., etc., "FIVE DROPS"** has never been equalled.

"5 DROPS" taken but once a day is a dose of this great remedy and to enable all sufferers to make a trial of its wonderful curative properties, we will send out during the next thirty days, 100,000 sample bottles, 25c each, prepaid by mail. Even a sample bottle will convince you of its merit. Best and cheapest medicine on earth. Large bottles (300 doses) $1.00, for thirty days 3 bottles for $2.50. Not sold by druggists, only by us and our agents. **Agents wanted in new territory. Write us to-day.**

SWANSON RHEUMATIC CURE CO., 167-169 Dearborn St., CHICAGO, ILL.

Insure your Crop now

It's easy and cheap and sensible, in fact you can't afford *not* to. One of our pumping plants don't cost very much—but will pump oceans of water.

Hercules Gas Engine Works
305 MARKET ST. San Francisco, Cal

SURE CURE FOR PILES

ITCHING Piles produce moisture and cause itching. This form, as well as Blind, Bleeding or Protruding Piles is cured by **Dr. Bosanko's Pile Remedy**. Stops itching and bleeding. Absorbs tumors. At a Jar at druggists or sent by mail. Treatise free. Write me about your case. DR. BOSANKO, Philada., Pa.

PATENTS The National Inventors' Association. (INCORPORATED.)

We do a general **PATENT BUSINESS**. We secure, introduce and sell patents. Our registered attorney can get you patents direct from the government without delay. Agents wanted in every town to sell patented articles. Further information furnished on request. ROOM 618 CHAMBER OF COMMERCE BUILDING, PORTLAND, OREGON.

LADIES KEEP ME Relief at Last. Ask druggists for Dr. Martel's French Female Pills in metal box with French Flag on top in blue, White and Red. Insist on having the genuine. "Relief for Women" mailed FREE in plain sealed letter with testimonials and particulars. FRENCH DRUG CO., 381 & 383 Pearl St., New York.

CURE YOURSELF! Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles, $2.75. Circular sent on request. BIG G CURES in 1 to 5 days. Guaranteed not to stricture. Prevents contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A.

Health Is Yours.

You don't need to suffer from pains in the back—have sleepless nights—or continue to have that tired feeling. Use the remedy that has been proven helpful—use

MOORE'S REVEALED REMEDY

$1 per bottle at your druggist's.

DR. GUNN'S IMPROVED LIVER PILLS

ONE FOR A DOSE. Cure Sick Headache and Dyspepsia, Remove Pimples and Purify the Blood, Aid Digestion and Prevent Biliousness. Do not Gripe or Sicken. To convince you, we will mail sample free, or full box for 25c. DR. BOSANKO CO., Philada., Penna. Sold by Druggists.

AN EXCELLENT COMBINATION

THE pleasant method and beneficial effects of the well-known remedy, SYRUP OF FIGS, manufactured by the California Fig Syrup Company, illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative,

CLEANSING THE SYSTEM EFFECTUALLY, DISPELLING COLDS AND HEADACHES, PREVENTING FEVERS, OVERCOMING HABITUAL CONSTIPATION PERMANENTLY.

Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, gently yet promptly, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but

THE MEDICINAL QUALITIES ARE OBTAINED FROM SENNA AND OTHER AROMATIC PLANTS,

by a method known to the California Fig Syrup Company only. In order to get its beneficial effects, and to avoid imitations, please remember the full name of the Company printed on the front of every package.

Consumers of the choicest products of modern commerce purchase at about the same price that others pay for cheap and worthless imitations. To come into universal demand and to be everywhere considered the best of its class, an article must be capable of satisfying the wants and tastes of the best informed purchasers. The California Fig Syrup Company having met with the highest success in the manufacture and sale of its excellent liquid laxative remedy, SYRUP OF FIGS, it has become important to all to have a knowledge of the Company and its product. The California Fig Syrup Company was organized more than fifteen years ago, for the special purpose of manufacturing and selling a laxative remedy which would be more pleasant to the taste and more beneficial in effect than any other known. The great value of the remedy, as a medicinal agent and of the Company's efforts, is attested by the sale of millions of bottles annually, and by the high approval of most eminent physicians. As the true and genuine remedy named SYRUP OF FIGS is manufactured by the California Fig Syrup Company only, the knowledge of that fact will assist in avoiding the worthless imitations manufactured by other parties.

ROSES.

I'm taking roses home with me to-night;
Red roses costing half my weekly pay;
They'll give my wife perhaps an hour's delight
And then she'll cast them carelessly away.

What fools we mortals be! Long years ago
I plucked, with careless hand, wild roses red
And tossed them to a maid I used to know.
To-day I found some rose leaves, faded, dead,

Hid in a little corner where my wife
Keeps sundry treasures stored; a note or two;
A young man's photo; not, I trust, like life;
A toy; a trinket, and a baby's shoe.

I'm fifty now, and counted somewhat gruff;
My figure's portly and my hair is gray.
Bah! One would think that I was old enough
To scorn the mad joy of a by-gone day.

And yet I felt unreasoning delight
To find those withered rose leaves lying there;
And—well, I'm taking roses home to-night;
And all the time I wonder, "Will she care?"

—Life.

THE DAFFODILS.

He had just moved into his new lodgings and had endeavored to make the bare, cheerless rooms a little more home-like, but, though the photographs were scattered about, his piperack nailed over the mantel shelf, surmounted by a neat and effective border of unpaid bills, sundry writs, and County Court notices, he was yet unsatisfied with the general effect.

Of course, there was a vast difference between the luxurious quarters in Murray Hill which he had just vacated and these small, stifling rooms, with their cheap horsehair furniture, but he was somewhat of a philosopher, and his motto was to go with the tide.

This time, however, the current had been too strong, and he found himself at last stranded with a beggarly allowance of a thousand a year, the last remnant of the handsome fortune that had once been his.

The fault was entirely his own. He frankly admitted it, though most men would have laid the blame on the woman who was the primary cause of it all; but he did not condemn her.

He also had been to blame. She was poor, and he made love to her under false colors—had led her to believe he was a poor government clerk at a salary of $700 a year. His object at first had been purely of his own amusement, but she was not the kind of woman fitted to be a man's plaything, and the game had ended in deadly earnest.

Therefore, it was with some trepidation that he had written confessing that which he had concealed from her, and asking her to marry him. He was scarcely prepared, however, for the curt reply that came: "I am going away to-day. Good-by."

Mechanically he opened the drawer of the writing table by which he stood. It was full of papers and little womanly trifles, evidently the property of the former occupant of the room. Unconsciously he commenced to read the paper in his hand—the writing was blurred and irregular, as though written by some one in ill-health:

"Why do I think of you to-day? It seems as though you must be near, or is it because it is springtime, and my room is full of yellow daffodils? I am writing a letter to you, one that you will never receive—for all I know you may be dead or—even married. It does not seem so long since we met, though I know it is years ago. I wonder if you would be glad to know that to-day I am thinking of you—that out of the desolate gray comes a vague, sweet dream that brings you near to me. To-morrow it will be winter again—winter in my heart—and I shall tear up this letter; but to-day the dreariness has faded. There is no touch of scorn to freeze my heart, no kisses cold as death to chill my lips—no silence that aches round me with its worldless pain. * * * I hear the whisper of spring that breathes of hope, I feel the touch of clinging hands—your hair against my cheek—whom I might not know were I to meet you now—do you doubt my love, that you let me go out of your life without a word or a sign that you cared——"

Here the writing terminated abruptly. The reader stood as in a dream, staring straight before him into the dingy street. Her handwriting! It was as though a ghost had risen to confront him.

A knock at the door aroused him from his stupor, and the landlady bustled in with the tea tray; her quick eyes caught sight of the open drawer. "Good laws, I meant to clear that out, sir!" she exclaimed, "but the poor young lady being taken away so sudden like clean drove it out of my head."

"Is—is she dead?" he faltered. A deadly fear had taken possession of him, his face paled to an ashen hue.

"Lor', no, leastways not yet," said the good woman, cheerfully. "I went to see her last week at the 'orspital, but the doctors don't give any hope of her gettin' better."

As she spoke she swept the contents of the drawer into her apron, and he winced at the sight—to him it seemed like desceration, and his hand closed convulsively on the letter he held.

"Which hospital was she taken to?" he asked, steadying his voice with an effort.

"The one just round in the square, sir," answered the woman. Then, in hurried apology: "You'll be wantin' your tea, sir; you look tired."

As the door closed on her portly form he dropped his head in his hands. "Good God!" he groaned, "a whole week has passed; she may be dead!"

It was visiting day at the hospital, the ward was bright with spring flowers, and brighter faces lit up by that pathetic, wistful expectancy characteristic of the sick. There was an eager hum of voices, too, hushed occasionally by an admonishing word from the nurse in charge. In the same ward, railed off by a curtained screen from the other patients, a girl lay asleep. No visitor ever came for her save the doctor, and sometimes this woman where she had once lodged, but the nurse, in kindly sympathy, had placed a bowl of fresh daffodils where her tired eyes could see them on awakening. The doctor gave no hope of the patient's recovery, and so, with womanly pity, she tried to make the girl's last days as happy as possible. Before the afternoon was half over a gentleman called and asked to see No. 20. "She is not expected to live," said the nurse, studying the white, anxious face before her. "Are you a friend? She has no relatives, I think."

"Yes—a friend. That is, I knew her years ago," he said hesitatingly. "Perhaps you had better break it to her first; it might startle her."

As the nurse went back the girl opened her great brown eyes; her ears caught the sound of merry laughter, and her gaze wandered to the daffodils; a longing look crept into her eyes. "Who brought me the flowers, nurse?" she asked in a kind of breathless wonder, and a sudden idea took possession of the nurse. "A gentleman, a friend who knew you years ago," she replied. A deep flush dyed the girl's white cheeks. "Is he here?" she said eagerly, and the white, wasted hands opened and closed convulsively.

"Yes, and if you'll promise not to excite yourself, you shall see him for a few minutes," said the nurse, soothingly, and forthwith ushered in the visitor.

With a stifled cry he fell on his knees by the bed. "Damaris!" he said, and the girl touched his rough curls. "You have come back," she whispered with half incredulous joy; the nurse dropped the curtain and left them together.

"I knew you had come when I saw the daffodols," she went on with a tremor of eagerness. "Don't you remember how we met in the time of daffodils, and how happy we were?"

He took the little trembling hands and kissed them passionately. "You didn't receive my letter that I wrote six years ago asking you to marry me and telling how I had deceived you," he said.

"Did you deceive me? It doesn't matter," she smiled; "nothing matters now you have come back to me."

He kissed the small white face. "You will get better, Damaris," he pleaded, "for my sake, sweetheart, though God knows I don't deserve it."

She took his face in her two hands. "How could I die and leave you all alone?" she asked, pathetically.

Thus after many years they took up the severed thread of their lives, and love, "who will not be denied," smoothed out the tangle and wove in its stead his golden mesh.—Buffalo News.

QUEER STORIES

Caviare is the product of sturgeon ova.

Hawks fly at the rate of 150 miles an hour.

A fiber of silk a mile long weighs twelve grains.

The oldest tree in the British Isles is the Bradbourne yew, in Kent, three thousand years old.

The two little islands of Zanzibar and Pemba furnish four-fifths of the cloves consumed by the world.

Platinum has been drawn into smooth wire so fine that it could not be distinguished by the naked eye, even when stretched across a piece of white cardboard.

Date vinegar has been made by the Arabs for ages. It has recently been put on the English market, and many people say it is far superior to any other vinegar.

The most peculiar custom of the Australian aborigines is the mutilation of teeth. The boy who wants to be thought a man will often break out one of his front teeth.

A Viennese meteorologist has proved by experiments that rainbows are conditioned by the size of the raindrops, and that, while we ordinarily see only two rainbows side by side, there are as many as twenty.

African travelers tell us the white rhinoceros frequently dies from eating poisonous plants, which are never eaten by the black one, probably because the fine scent of the latter tells him they are dangerous.

Dr. H. L. Hastings declares that women go with their necks bare, and men keep them swathed and bandaged, and ten women have sweet voices to one man. A man's voice should be as pure as a woman's. Why is it not? He is choked and shaved.

Magnetic Brick.

From time to time experts have noticed certain unexplainable peculiarities in magnetic instruments in various buildings. It is now declared, as the result of experiments and investigations, that the vagaries are due to the presence of magnetism in bricks. They are made of earthy matter containing a greater or less proportion of magnetite or magnetic iron ore.

On the Back.

It is getting to be the fashion to address and stamp envelopes on the back. With the direction written across the folds, the letter cannot be opened by an unauthorized person without the fact being noted.

CHILDREN'S COLUMN.

A DEPARTMENT FOR LITTLE BOYS AND GIRLS.

Something that Will Interest the Juvenile Members of Every Household—Quaint Actions and Bright Sayings of Many Cute and Cunning Children.

It was the uneasy time of day. It was likewise the time when the hands of the clock went around altogether too fast to suit Janet.

"You seem to love to say it's my bedtime," she said, looking crossly at the big clock. "I wish I could sit up once in a while and see what a good time the grown folks have after we have gone to bed."

"We" meant Janet and her dolls.

"You can sit up to-night if you wish, just as long as you like," said Janet's mother.

"Truly?" asked Janet.

"Truly," said her mother.

"Oh, thank you, mamma. Won't we have a good time, though?"

Then she went to tell the dolls.

"Dear ones," she said when she had collected them together, "I know and I long have known just how you feel about going to bed so early. So to-night you shall sit up just as long as you like, and we will see for ourselves just what good times the grown-up people have."

Then they all went downstairs to the library, where the family were. It was very quiet there, Janet thought. The older children were studying their lessons for the next day, grouped around the long table in the middle of the room, and her father and mother were reading.

"Do tell me a long story, please, mamma," said Janet, bringing her little chair up beside her mother's; but her mother shook her head.

"It would disturb the children studying," she said.

"Can I have an opera with my dolls?"

"No, dear."

"Isn't there anything to amuse me?" and there were tears in Janet's voice.

"No, little daughter, this is the quiet hour for the grown people and you will have to keep still."

So Janet sat down and looked soberly at the fire.

By and by her head rested against her mother's knee.

"I don't think grown folks—" she began, and that was all, until her father was carrying her upstairs—"have a very good time at all," she murmured sleepily.

Since then she goes to bed cheerfully.

"For it's really better for all of us, my dears," she told the dolls.—Youth's Companion.

Pearl's Nuisance.

A boy is a terrible nuisance,
He bothers from morning till night,
He teases and plays jokes upon you,
And laughs when he gives you a fright.

Why, to-day, when I sat just as quiet
With my beautiful, new picture book,
My cousin slyed close up behind me
And when I turned round, for a look,
What do you suppose he had hold of,
And dangled right over my head?
Oh! a great ugly spider! My gracious!
I screamed, and my heart sank like lead.
'Twas only a Japanese spider;
But my! such a horrid, big thing!
And it looked 'most alive as it dangled
Around at the end of the string.
Then he laughed, when he saw how it scared me,
But I managed to grab his short hair
And I pulled it until he begged loudly,
And declared his head was "snatched bare!"
He said, "cross his heart," he would never
Scare me like that any more;
But he couldn't quite make me believe it,
'Cause he's said just that same thing before.
I let him off easy, he begged so,
Though I know that, most likely, he'll find
Some new way to tease me to-morrow,
But I'll just pretend I don't mind;
For that makes him feel worse about it,
Than if I should scold him, or cry,
For boys like to know that they bother,
Though I never could understand why.

Why can't they be kind of quiet,
And act more as girls always do?
I think they'd be lots and lots nicer,
And worth twice as much, so! Don't you?
—Ohio Farmer.

Children in Holland.

Wandering through the crooked streets of the little fishing village of Schereningen, from which the famous Dutch watering place takes its name, I heard many shouts of laughter issuing from a garden inclosed by high walls. The gate was open, and I peeped in. My curiosity was rewarded by one of the sweetest sights I have ever witnessed. About twenty little Dutch maids and lads, their ages varying from three to six years, were enjoying a game of ordinary American tag, while a little attendant of about twelve years stood by, busily knitting while she watched them. A bell sounded; they all fell in line behind the little knitter and walked demurely, two by two, in a serpentine line around the garden and disappeared in a long hall, at the door of which each child took off its little wooden shoes and held them in one hand behind its back, says a writer in the Washington Star.

In the meantime the principal came out and invited me, by signs, to enter. In the hall I noticed the little sabots laid orderly side by side. There were three halls in the kindergarten; in each were fifty children, between the ages of three and six years—the girls in gowns to their ankles, held out in balloon fashion with haircloth petticoats, little white shawls pinned over the shoulders and caps covering their straight yellow locks.

At this free kindergarten the children of the fisher folk, many of them fatherless, derive all care and attention. They are taught by the same methods used in Germany. All seemed bright and happy. In one room they were singing quaint little nursery rhymes about boats, so one little fellow made me understand by walking across the floor, rolling like a sailor, and then going through the motions of rowing a boat and pulling in nets. He with great glee made me understand that he would be a fisherman when he was "so big," stretching up his arms, and smoking an imaginary pipe. This amused the children so much and made them shout and laugh so loud that the teacher was obliged to send them to their seats and end our fun.

How She Arrived at It.

A little girl, who had just entered school, jubilantly announced to her father that she had beaten all the girls above her in the arithmetic class and gone to the top.

"That was clever of you," said he, encouragingly. "How was it?"

"Well, you see, the teacher asked the girl at the head how much was 8 and 5, and she didn't know, and said 12, and the next girl said 9, and the next one said 11, and the next one said 14. Such silly answers! Then the teacher asked me, and I said 13, and she told me to go to the top. 'Course it was 13."

"That was nice," said the father. "I didn't think you could add so well. How did you know it was 13?"

"Why, I guessed it. Nobody said 13."

A DANGEROUS COAST.

New Beacon Now Being Placed in the "Atlantic's Graveyard."

"The Graveyard of the Atlantic" is what seafaring men term that part of the ocean which lies off Cape Hatteras. Since America was discovered, this long, low piece of North Carolina, projecting far out to sea, has been more dreaded than any other cape in the Western Hemisphere. The bottom of the ocean there is strewn with the wrecks of vessels, and the great loss of life which has occurred there in marine disasters has well earned the place its title. A powerful light gives some warning to the mariner by night, but by day the dangerous shoals, about which storms rage sometimes for weeks together, are only revealed by a line of foam-capped breakers.

To prevent, if possible, further shipwrecks in the daytime, the Government has constructed a beacon, the only one of its kind in the world, which it is believed will do much in warning away ships and their crews.

It is what is termed a "day beacon," and is built on solid steel rods, forming a skeleton structure, which will stand about forty feet above the water at low tide. The skeleton holds a huge cage of iron, which it is believed can be seen through glasses at a distance of fully ten miles.

The question of fastening the structure securely in the treacherous sands at this point has been a great engineering problem. Four steel disks will be sunk to a point fourteen feet below the bottom, and filled with concrete. They are of such a size that engineers believe they will form a huge anchor, preventing the skeleton from being thrown over by the great force of the waves at this point.

The framework alone weighs thirty tons, and was towed to Cape Hatteras resting on pontoons filled with air, which are forty feet long and seven feet in diameter. If the beacon is successful, others are to be placed at different points on the coast.

RECENT INVENTIONS.

A New Yorker has patented a neat-looking gear case, consisting of a rubber tube, split on its inner face and stretched over the chain and sprocket wheel, with spreaders to open the tube as it runs around the wheels, allowing it to close over the chain as it passes from one sprocket to the other.

An improved valve for bicycle tires is formed of a tube extending into the tire on one side and having cone-shaped shoulders at either end, with a stem in the tube having a head at each end to engage the cones, the outer head being opened by the insertion of the pump, while the inner head opens automatically under pressure of the air.

A new voting machine has a set of levers for each office, operating numbered disks to register the vote, with a locking mechanism which fastens the set as soon as one lever is used, repeating the operation for each set of candidates. The levers are unlocked by the next voter stepping on the booth platform.

In a new bicycle propelling mechanism the crank shaft carries a toothed wheel meshing in a second wheel mounted on a shaft close to the crank shaft, the power being applied to the face of the rear wheel by means of a friction wheel carried by the rear shaft.

Drawbridge openings can be automatically closed by a new safety gate, formed of a pivoted bar set on a post at one side of the bridge and operated by a system of levers to close across the opening when the draw opens and open again as the draw closes.

Death Rather than Dismemberment

There is a belief among the South Sea islanders that no man can enter paradise who has lost a limb, and for this reason a man will often die rather than submit to amputation.

FARM AND GARDEN

Device for Smoking Meat.

Recent illustrated articles in the Ohio Farmer on this subject, says a correspondent of that journal, generally provide for locating the fire directly under the meat in the smoke house. The accompanying sketch illustrates a far better method, as the smoke is cooled before reaching the meat. The illustration explains itself. All that is required is a few joints of stove pipe and an elbow, a barrel with a loose cover into which the pipe is fitted and connected with the smokehouse as shown. A few inches of ashes in the bottom of the barrel, hollowed out to receive the fire, and the outfit is complete. It is almost impossible to smoke meat with the fire directly under it without heating it more or less, and these partial cookings and

SMOKING MEAT.

sweatings impart an unsavory taste. Another advantage of this method is that all danger of fire is avoided.

Saving Brush for Kindling.

In pruning orchards the branches cut out are often piled in heaps, and when dried are burned, often injuring the trees in their vicinity. There is a much better way than this. Apple, pear or peach wood makes when dried a very hot fire, and should be saved for the stove when the branches are too large to cut readily. Even the twigs have their value. They make the very best of kindlings when dried, and if they are somewhat crooked they are all the better, because they will not pack closely together as the straight sticks are pretty sure to do. An old story is told of a farmer who once boasted among his companions what a good, patient wife he had. She never complained of anything he did. One of them suggested that the next time he drew up wood for the house he should make a load of the crookedest sticks he could find. He did so, and as he drew up the load to the house his wife came out smiling to meet him. "Mary, how do you like this load of wood?" was the inquiry, while the farmer's companions stood by expecting a storm of abuse. Instead, the reply was given in the sweetest tones, "Oh, John, that is capital wood. We always used it at home when I was a girl, and mother used to say that the crooked pieces made the hottest fire because they fitted so nicely around the kettles."—American Cultivator.

Feed Trough for Hogs.

The trough shown in the illustration I have found quite convenient. The board between the uprights b can be removed when the trough is to be cleaned. Placed in an opening in the fence as in the cut, the slops can be

FEED TROUGH FOR HOGS.

poured in from the outside. If used in the open lot the middle board keeps the hogs out of the trough.—A. O. Harvey, in Orange Judd Farmer.

Weak-Growing Apple Trees.

There is a great difference in varieties of apple trees as to their habit of growth, and judgment is needed in portioning out the manure to be used on each. The strong-growing varieties like Northern Spy will need very little stable manure until they begin to fall from old age. But there are other kinds of slow and feeble growth that even while young can bear some stimulation with stable manure, especially if it is composted, and its deficiencies of potash and phosphate are supplied. Coarse manure ought never to be applied to apple trees at any age. It is the fermentation of manure in the soil that is the prolific cause of the fungus growths that injure foliage and fruit more than the manure can help the tree. The only fertilizers that can be always used with safety are the minerals potash and phosphate.

Black Knot in Plum Trees.

Before warm weather all the plum trees should be looked over, and any that show marks of black warts that indicate black knot should be removed with a sharp knife and the wound washed with carbolic acid solution or some other antiseptic. In fact, it is a good plan to spray plum trees with a carbolic acid solution, made one part of carbolic acid to 2,000 parts of water. This will remain on the spores, which are dormant during the winter until they burst their bounds and begin to spread the disease over the tree. The solution named is much stronger than can be applied after the foliage is in its tender growth.

Teaching Calves to Drink.

Nature teaches the calf to turn its mouth upward to get its food. The unwillingness of the calf to put its head down into a pail is the result of instinct. Some have thought to offset this instinct by never allowing the calf to suck its dam even once. But we think this injures the calf. It needs stimulation when first born, and should be allowed to get it in the way most natural to it. In sucking the teat the milk comes slowly, and a good deal of saliva is mixed with it. But after once sucking its dam the calf should be taught to drink out of a pail, and to put its head down when eating. It will need to be pretty hungry to do this readily, and the finger should be used, placing it first in the calf's mouth, and then putting the finger into the milk. So soon as the calf gets fairly to drinking, the finger should be withdrawn.—Exchange.

Severe Root Pruning Favored.

Although the horticulturist of the Georgia experiment station declines to make any positive statement concerning the advisability of severe root pruning when planting young trees, he says that he is fairly satisfied that peach trees from which the roots have been largely cut off will live and flourish in Georgia even in stiff clay and under adverse weather conditions. The same statement may also be made of apple and cherry trees. In some experiments made the last two years he found that the root pruned trees made fewer, deeper, larger and more robust roots. These roots penetrated 17½ inches, against 9½ inches for the roots of unpruned trees.

Have a Tool House.

A special house for tools would save much that goes for repairs every year. Many tools and implements are exposed by farmers because they have no storage room for them. A tool house should be in a convenient location, and it matters not if the interior is cold or warm, provided that it is perfectly dry. A tool house, in addition to preserving implements, will enable the farmer to have a place for everything, with everything in its place.

Black Rot in Grapes.

The black rot of the grape was the subject of experiments conducted last year in France. A solution of Bordeaux mixture containing not less than 2 per cent. of copper sulphate was found to give the best results. The first application should be made when the shoots are quite short. The efficiency of the subsequent sprayings depends upon the time of their application. For ordinary black rot four or five sprayings will be sufficient.

Posts from Rough Sticks.

Good-looking fence posts about the farm buildings and along highways go a long way toward giving a thrifty, progressive appearance to a place. Where one's fence posts are rough and knotty and too small, perhaps, to square out properly, the plan shown in the cut may be used to advantage. The part of the post to be above ground is squared a little on each side as shown and then covered with inch boards. A cap is then put on to keep water out and a very handsome post is the result.—American Agriculturist.

Brood Hens.

If broody hens are properly treated nine out of ten will begin to lay again within two weeks after being removed from the nest. But if they are half drowned, starved a week, or bruised and abused, it is more than likely they will get even with their owners by declining to lay a single egg until they have fully recovered from their ill treatment and acquired their customary tranquillity.

Profits in Agriculture.

The facts derived from impartial investigation show that farming conducted on right basis pays probably a larger per cent. of profit than most other lines. It is at least profitable. And is there not a point worth noting that the farmers that use best methods and get results seldom complain of results in relation to the sale of their product?—Minneapolis Journal.

A Good Dairy Ration.

Two pounds each of cornmeal, cottonseed meal and gluten meal, ten pounds corn ensilage and as much timothy hay as they want is recommended by the Maine station as a satisfactory ration for milch cows, to be fed twice a day. Many farmers would doubtless prefer to substitute bran for cottonseed meal.

Early Flowers.

Early flower plants may be started in the house window, in small starch boxes or flower pots. Use rich earth, sifted, and do not keep it wet, but slightly moist. The boxes or pots should be placed in the sunlight during the day and kept in a warm room at night.

Grafting Wax.

A good grafting wax is made of four pounds rosin, one pound of tallow and one pound of beeswax. Melt all together over a slow fire, and when melted pour into a vessel of cold water and pull as with shoemakers' wax. When wanted for use soften with warm water.

A POPULAR PRINCESS.

Kaiulani, of Hawaii, Who Recently Died at Honolulu.

Princess Victoria Kaiulani, who died recently at Honolulu, was at one time heir apparent to the Hawaiian throne and was a great favorite in the sunny islands of the Pacific. She was the daughter of A. S. Cleghorn, a man of British stock, who had long been a resident of Hawaii and who held important public positions under the

PRINCESS KAIULANI.

monarchy. The princess' mother was the Princess Miriam Likelike, sister of the late King Kalakaua, and of the deposed Queen Liliuokalani, and through her she was descended from the Kamehamehas, the founder of which dynasty united the islands under one government.

The princess was born on October 16 1875. After the death of her mother, in 1887, the princess went to England, where her education was perfected.

On March 9, 1891, she was proclaimed heir apparent to the throne by Queen Liliuokalani, the fact being officially communicated to the United States Government and acknowledged. In March, 1893, she came to the United States to protest against the Harrison treaty of annexation. She declared that she had never taken, nor desired to take, any part in politics, but felt that it was her duty, in view of her position, to uphold the nationality of the Hawaiian people.

"I do not care for myself," she said, "but suppose this wrong is consummated, and I return to Hawaii, and my people come around me and say 'Kaiulani, you were there; you might have saved us and you did not.' How can I answer them?"

The princess then issued a pathetic and eloquent protest to the American people.

She afterward returned to England, but came here again in October, 1897, on her way to Waikiki, a beautiful suburb of Honolulu, where her father had built a magnificent home for her. She had then dropped her title, calling herself Miss Victoria Cleghorn.

The princess was a typical Hawaiian beauty, tall and finely proportioned. She was an excellent athlete and an accomplished musician.

GREAT JOURNALIST GONE

Death of Joseph Medill Removed an Able Writer and Good Citizen.

The recent death of Joseph Medill, of the Chicago Tribune, removed one of the veteran and leading journalists of the country and one of the most highly regarded of the citizens of the Western metropolis.

Mr. Medill was born in New Brunswick, Canada, in 1823, but early removed to this country with his parents, and they settled in Stark County, Ohio. His first independent venture in journalism was in Coshocton, in 1849, when he established a Free Soil paper. Later he founded a paper at Cleveland, and two years afterward he was one of the organizers of the Republican party. In 1853 he connected himself with the Chicago Tribune and practically he had been the Tribune ever since. In 1855 he became part owner

JOSEPH MEDILL.

of the paper, and in 1874 secured a controlling interest.

Mr. Medill was a member of the Illinois Constitutional Convention in 1870 and the following year was elected Mayor of Chicago. He also served as civil service commissioner, the only national office he ever filled. He was an aggressive and able writer.

A joker offered to bet half a sovereign with a gentleman that he would ask sixteen persons one and the same question, to which he would receive the same answer. The bet was accepted, and the joker asked each one of the sixteen the question: "Did you hear that Smith was bankrupt?" And "Which Smith?" was the stereotyped reply.

The less artificial women are, the less men laugh at them.

When a woman washes her head, all the neighbors know it.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, MAY 26 1899

Czar Reed after a visit to the White House is reported to have said, "The Almighty may know what the financial policy of the Administration is, but McKinley does not." The fact seems to be that the only well-defined policy the Administration has is to avoid any policy anywhere on any subject, except perhaps to get all the money possible out of the people into the hands of a corrupt ring. The Cuban army is waiting for a policy, but the only thing that can be gotten out of the Administration is "lay down your arms and we will do the rest." The Repuplican press is rattled over the situation. Sometimes we see frantic appeals to stand by the policy of our noble President, and then again arguments showing that the very acme of statesmanship is to have no policy, but to let the actions of to day be controlled by the events of yesterday—in other words, drift. When the war closed with Spain the Filipinos were our friends and were ready to talk about the future, but all they got from this country was, "lay down your arms and leave the rest to us." They did not do this and we went to killing them. Again when they asked for an armistice and wanted to talk "policy" we we once more said "give up your arms." It is seldom that the most tyrannical conquerors of old refused to talk terms to an enemy. They generally had a policy of some sort but our Administration has absolutely none. We must have big operations in Cuba, in Porto Rico and in the Philippines so the rings and syndicates may make money!

We went to war to free Cuba, declaring to the world that the men in arms on that island were a band of noble patriots who were worthy of freedom. Now we have possession of the land and we do not hear of the "patriots" any more. They are simply a band of outlaws with whom it is beneath our dignity to treat. If we once declared a policy we might be in some respect bound by it, and that might interfere with getting money out of the poor people of the United States for the benefit of the contractors. If we had a system of levying taxes on wealth and if the handful of men, who, under the ruinous systems that have obtained since the Civil war, have gathered nearly all of the wealth of the land into their hands, had to pay their share of all this expense, there would be a policy in a hurry! And a whole lot of infernal nonsense would stop.

The Cubans are getting excited over the fact that the United States is issuing ammunition to American soldiers. It has been understood that Cuba was to be free and independent and we were simply going to help them along a little, but now we demand that they lay down their arms and we send supplies of ammunition to our troops there. Do we blame them for being a little suspicious of such disinterested friendship? We have no policy to offer them—cannot tell them when we are going to leave them to govern themselves. They must lay down their arms without presuming to ask any questions. We cannot tell what is to become of all the mortgages on fine plantations until our syndicates have bought them up and foreclosed them. Then the army will have to protect those transactions and the poor people of the United States will have to foot all the bills! But they like it!—*Colusa Sun.*

Huge trusts continue to absorb many industrial organizations, and since the first of the year the movement has developed into a craze similar to that which overspread Great Britain ten yeaas ago. The aggregate of capitalized stock in the recent combines now runs into the thousands of millions, and naturally, eastern bankers and brokers grow apprehensive of so much sail and so little anchor, and are beginning to decline that class of security as collateral. The present activity is a repetition of former history in this regard. Former history shows that that species of speculation ends in a collapse. It is brobable that the ultimate result of the present tendency to form trusts in all lines of industrial manufacture or production will result in disastrous reaction.

The raise in the price of copper and zinc has done much to attract capital into channels of mining. Men who heretofore looked upon mining as a speculative business, too risky for investment, are learning that the great success of the largest mining enterprises is due to careful, close business management—as careful and as conservative as that which characterizes successful business enterprises in this country. A thorough investigation of the possibilities of mining, with due regard for its uncertainties, will soon convince most men that legitimate mining is as much a safe business as other enterprises and not a lottery at all.

The Oklahama tornado that split a cord of wood, cleared a ten-acre tract of stumps, blew the mosquitoes into Arkansas and tossed a cow with the hide torn off on the hooks of a butcher shop ready for the knife, had some features of utility that must be recognized.

If some one could have brought about the amicable relations betwen the Governor of North Carolina and the Governor of South Carolina, between Captain Coghlan, U. S. N., and the Goi-Emperor of Germany, the scene would have been worth painting.

And now one of the powerful political organs of Austria declares that America is no good. Judging from the way that Uncle Sam has been acting lately, it would be a wise policy for Austria to mind her own business.

A TRAPPED BURGLAR

THE NICELY PREPARED BAIT WAS EAGERLY TAKEN.

It Cost the Ingenious Man Who Devised the Scheme $400 or $500, and It Cost the Burglar Four Years' Time.

"Of course," said the retired burglar, "a man in my business is always on the lookout for traps and most of 'em he can circumvent without much trouble. But men go to a lot of trouble and expense to lay traps, and sometimes they get up something that is new and effective. I suppose that any man going into a dwelling house would be sure to look over the bureaus and dressing tables in the sleeping rooms. It was this well known professional habit no doubt that had suggested the idea of a trap I came across once, which a man had had built with a view to catching anybody that might stand in front of the bureau in his room.

"I imagine that this man must have been visited before and been very much irritated by it, because he never could have gone to all the trouble and expense he did just for mere protection—there was clearly some feeling in it. It was a handsome room, promising looking from its richness, and when I turned my light on the bureau, where I went, naturally enough, to begin, I was not disappointed. There was a glitter of glass and silver in the bullseye, and as I swept the light along it struck a pocketbook that didn't glitter much, but that looked fat and comfortable, and a watch that did shine, and, take it altogether, it made me think that here was the home of a man that didn't have to work nights to make both ends meet. And so I set my lamp down on one end of the bureau—it made me laugh, actually, to think that there was so much good stuff there that I had to shove something one side to make room for it—and put my bag down on a chair that was there and began cleaning the things out.

"I'd just put the silver hairbrushes in the bag and had turned around to the bureau again to pick up the pocketbook and the watch when I heard, or it seemed as though I felt, a little click, and just the faintest touch of a jarring or yielding under my feet, and the next instant, a long time before I could jump or do anything whatever, a piece of the floor under my feet about three feet square dropped out from under me, and down I went.

"But I didn't give up, by a long shot. I was an ablebodied man, and my hands were free—my lamp being then on the corner of the bureau and my bag on the chair—and I wasn't going to give it up yet, if I was going down a trap. The trapdoor was hung on hinges on the side farthest from the bureau, and I laughed to myself as I put up my hands and thought how easy it was to grab on to the edge of the solid floor running along just in front of the bureau and haul myself up. Truly it seemed like a waste of money, all the expense this man had been to to put in the trap without guarding against the chance of escape from it by just this means, and I already imagined myself climbing out as I threw up my hands, which I did before I'd dropped much more'n half of my length below the level of the floor, gripping that firm edge very tightly. I was going to make sure of that.

"And I got it all right, but in about a millionth part of a second I became conscious of the fact that it wasn't stopping me at all; I was carrying it down with me. It was the front edge of another trap cut in the floor under the bureau, hinged at the back and held up in place by a spring just strong enough to keep it in position. I held on as hard as I could, but if I had had iron fingers and steel muscles I couldn't have held on after the trap had swung down straight. I went down like a ton of lead, and the next minute I found myself sliding through a smooth board tunnel not much bigger'n enough to let me slide comfortably, and the next minute I'd been shot into a box or room about seven feet square through another trap in the top of it that closed flush after I came through.

"Now, there was a situation for you. Me in a square box of hard pine, apparently in the cellar of the house, no opening in it anywhere and my bag with all my tools in it up there on the chair by the bureau and me down there with nothing, not a blessed thing, to work with. But while there's life there's hope, and I never should have thought of such a thing as giving up if I could have had a chance. But I didn't. I hadn't been in the box two minutes before there was a slide pushed back up near the top on one side, and a man looked in. It was the boss of the shanty. And in five minutes the police were there, and then I found they had a door in this box big enough to get a man out of.

"I have seen other traps as elaborate, but none more costly. He had to cut his carpet, to begin with, around the traps in this room. Of course that didn't cost anything much, but it spoiled his carpet, and then the cost of the traps and the time contrivance, whatever it was, that was attached to the main trap that let me stand on it for a minute or two before it dropped, and then the shoot and the box and the whole business couldn't have cost a cent less than $400 or $500. It cost me four years' time."—New York Sun.

English Penny Novels.

Penny novelettes differ from one another in externals rather than in internals. The get up of the better sort is neat and attractive. The type is clear, and the covers might even be called "artistic" in the catholic sense of the term. The inferior kinds are indifferently printed "on gray paper with blunt type," and there are many degrees of excellence between the two extremes. All except one have illustrations ranging from the rudest of woodcuts to the smudgiest of "process" plates. Of course the artist selects the most sensational incidents for his pencil to adorn. The stabbing of the heroine's father by the villain disguised as the hero, the kidnaping of the heroine by Black Tom and his gang of gypsies at the instigation of her jealous rival, the horsewhipping of the villain by the hero in "faultless" evening dress—these and their like naturally present themselves as thoroughly suitable and congenial subjects.—Blackwood's Magazine.

SEEPAGE IRRIGATION.

A System of Impounding and Evenly Distributing Water.

Concerning seepage irrigation, which is practiced to some extent in the arid fields of the west, where water is scarce and valuable, and surface conditions are favorable, Joel Shomaker says in The Orange Judd Farmer: It not only catches and retains the surplus rainfall by evenly distributing on the subsurface strata, to feed the roots of growing crops through capillary action, but serves as a drainage for excessive water when a drain pipe is placed at the lowest point and left open. The ditches may remain permanently when once perfected, and, if the farmer is able financially, he can readily convert the seepage plot into a complete subirrigation system by putting in tiling or filling the ditches with stones, logs, brush or straw, coarse enough to allow the water to cut percolating channels.

A seepage system consists of trenches dug round and across a given tract, at proper distances to allow the water full distributory force. On some land, containing deep vegetable mold, water will seep 1,000 feet from a permanent canal, reservoir or other large body and furnish sufficient moisture for maturing crops, while in other less porous soils the under surface percolation will not exceed 100 feet. The trenches are therefore dug in conformity to the nature of the top soil and depth of subsoil. I have seen main ditches three feet in depth and similar width surrounding five acre tracts, with two laterals of similar dimensions across the center, and again have noticed orchards and vineyards with seepage ditches every 200 feet.

The water is turned into the trenches at the highest point by means of a head gate made of separate boards two to six inches wide. These are inserted in slots made by nailing cleats on either side and are put in as the water from the outside fills up the trenches. When trenches are full, all the gate is up and water shut off from supply canal. The water thus impounded percolates through the soil on a level with the bottom of the trenches or on top the hardpan, or substrata, and forms a perfect reservoir from ditch to ditch, seldom coming to the surface except by showing spots of moisture in some of the lowest places.

New Forage Plants.

These new forage plants (Japanese millets), like the Hungarian, are greedy feeders, and for the best results demand a quick and available fertilizer. The seed should not be sown before June nor later than the middle of July, the quantity being at the rate of from two to three pecks per acre. The millets, when used for hay, should be cut soon after the heads are formed and before the seed has set, otherwise the stem becomes fibrous or woody, says Professor F. William Rane, in describing experiments with forage crops at the New Hampshire station (bulletin 57).

JAPANESE MILLET, CRUS GALLI.

The table shows comparative yields and measurements of seven varieties:

	Measurement. (Feet.)	Average weight per acre.
Panicum miliaceum	4½ to 5	10 tons, 1,054 lb.
Panicum italicum	5	7 tons, 530 lbs.
Panicum crus galli	5 to 6	16 tons, 912 lb.
Golden Wonder	4 to 4½	8 tons, 1,908 lb.
New Siberian	4	5 tons, 406 lb.
Japanese (Breck)	4 to 4½	10 tons, 1,208 lb.
Japanese (Henderson)	4½ to 5	13 tons, 1,104 lb.

The Golden Wonder, besides being cured for hay, is used as a soiling crop.

New Siberian is an exceptionally early variety and could be planted much later than the others.

Crus galli grows more stalwart and erect as well as taller than the others and has been the heaviest yielder each year. Professor Rane believes these new Japanese millets to be a valuable acquisition on account of the brief period necessary to their growth and the fact that they can, to some extent, take the place of either hay or corn in seasons when the latter are failures.

Cotton Growing.

At the recent National Farmers' congress at Fort Worth Hon. E. S. Peters, president of the Texas Cotton Growers' association, said among other things: In the production of cotton to obtain the best results the land must be broken up in the fall and winter so as to get the winter rains and frosts. Chopping cotton and getting it to stand is the most expensive part in the cultivation of a crop. The cost of the cultivation of cotton varies according to the character of the land. In the rich alluvial bottom, where there is rank vegetation, it costs more to cultivate this land than it does upland. The cost of production has been estimated all the way from 3 to 10 cents per pound. There are conditions where the person owns his place, is satisfied with the bare necessities of life and compels his wife and children to work in the field, for which they receive no pay and are deprived of all home comforts and raised up in ignorance by not being able to attend school. Cotton raised under these conditions possibly might be produced for less than 5 cents per pound. Now, one word to the farmers. Plant everything that you need to eat and drink, and raise everything at home, buy nothing on credit, and do not under any circumstances plant more cotton than you can gather yourself without the aid of your wife and children.

In Russia when coffins are covered with cloth the color of the covering is to a certain extent distinctive, pink being used when the deceased is a child or a young person, crimson for women and brown for widows, but black is in no case employed.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter Mar

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

Notice of Forfeiture

STATE OF CALIFORNIA } ss
COUNTY OF INYO }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said county as the Black Kirk mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interest in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under section One of an Act entitled "An Act relating to the working rights of way, easements and drainage of mines in the State of California, approved March 1st 1897."

FRANK HARRIS.

NOTICE IS HEREBY GIVEN by the undersigned, Executors of the last Will and Testament of

EDOUARD CHENOT

deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within Ten Months after the first publication of this notice to the said Executors, at the residence of P. W. Forbes, in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of the said estate in the County of Inyo, State of California.

J. E. SHEPHERD and
W. L. HUNTER,
Executors of the estate of Edouard Chenot deceased.

Dated at Independence, Cal., November 23th 1898.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Luther Clarke deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Ten Months after the first publication of this notice to the said administrator at his place of business on Edwards Street in the town of Bishop, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

J. C. IRWIN,
Administrator of the estate of Luther Clarke, deceased.

LEGAL.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of Edward Chenot, deceased.

Happening to this court, by the petition this day presented and filed by J. E. Shepherd and W. L. Hunter, the Executors of the Last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said deceased, to pay the debts of said deceased and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said Superior Court on MONDAY, the 5th day of June, A. D. 1899, at 10 o'clock a. m. of said day, at the court room of said Court, at the Court house, in the town of Independence, in the county of Inyo, state of California, to show cause why an order should not be granted to the said Executors to sell so much of the real estate as should be necessary and that a copy of this order be published in Bear Creek Week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated April 24th, 1899.
P. W. Forbes, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and F. W. Smith, Attorneys for Plaintiff.

The People of the State of California send Greeting to Rose Fitzgerald, Defendant

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 24th day of April, A. D. 1899.

D. J. HESSION,
Clerk.
[SEAL]
By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition duly presented and filed by J. C. Irwin, one administrators of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interest of said estate, that it is the interest of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested in the estate appear before this Court on the 12th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court room of said Court, at the Court house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four weeks successively in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo, P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this Fourth day of May, A. D. 1899.

D. J. HESSION,
Clerk.
[SEAL]
P. H. Mack, Independence Cal. Attorney for plaintiff.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening, where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6.00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time Table above Round Trip Tickets for sale at Ticket Office Reno.

Way vs. Way—Decree of divorce granted plaintiff, Mary Way.

Estate of James Daley deceased—Decree of final discharge.

WEDNESDAY, May 23, 1899.

Estate of William Berger, deceased—Filed final account of administrator and petition for final cischarge. Hearing set for June 5, 1899.

Measles are reported to be epidemic at Soda Springs.

A. W. D. Carroll was a visitor from Lone Pine to-day.

Albert Lewis left to-day for a visit to Mountain Springs.

P. W. Forbes Esq., spent several days in Bishop this week.

Hon. T. B. Rickey will leave for Carson to-morrow morning.

Thos. Williams was down from Round Valley early in the week.

Lester Laird and Marshall Naylor are prospecting in Kearsarge district.

We are indepted to Mrs. J. R. Moffett for the first new potatoes of the season.

Don't forget Memorial Day is next Tuesday, and there will be a grand celebration at Big Pine.

George Montgomery returns to Ballarat on to-day's train. He expects to return here in about two weeks.

The young folks will give a social dance at Mairs' Hall to-morrow evening. Everybody invited and a good time assured.

The cattle belonging to the Van Dyke estate have been sold to T. B. Rickey, delivery being made at the Black Rock ranch to-day.

A young man named Archie Strong, a graduate of Stanford University, arrived at Independence last Monday, and is the guest of Irving Woodin.

The weather is still cold, windy and disagreeable. The "oldest inhabitant" fails to remember any season when Winter lingered so long in the lap of next year.

Pat Clinton has about two carloads of silver-lead ore ready for shipment at Cerro Gordo. It will be forwarded to Selby just as soon as transportation can be arranged for.

The old Ward four-stamp mill has been sold to a man named Cooper, who has a rich mine at Ballarat. It has been taken down and will be hauled to Pleasant Canyon by Jack Davis.

R. C. Spear was in from Beveridge a couple of days this week. He says they have six tons of high grade ore at the arastra and a considerable quantity out and ready for sacking. They will start up as soon as the new tubes for the boiler arrive.

Charley Houle recently made a trip to the top of Kearsarge mountain. He says there is three times the amount of snow high up in the mountains that there was last year. The unusual cold this spring has kept the snow from melting, but with the advent of warm weather he thinks there will be a great deal of water. The lakes are still frozen over.

A few weeks ago a young man named Stewart, representing Salt Lake people, spent several days looking over copper prospects in this vicinity. As the result of his observations one of his principals, C. H. Scheu, arrived from Salt Lake last week and has bonded the principal claims in Saline Valley. Mr. Scheu has gone to New York and expects to return here in about a month.

Fred Crocker and Ed Rose made a trip to Monache recently for the purpose of looking over the country with a view to taking their cattle there for the summer. Fred says the country has all dried out and that there is scarcely any feed. He says there is scarcely any water in the south fork of Kern river, and in consequence of there being no oveaflow, the meadows are barren. He will take his cattle to Deep Spring valley for the summer while Rose will probably go to Long Valley.

A Complete Success.

George Willis made a trip to Ballarat during the week on business connected with the Sheriff's office. He says the Harrison & Godsmark people have a fine proposition in the Radcliffe mine. They have a ten stamp mill in operation which is a model. The ore is supplied by means of a tramway 4,000 long, and three miners break enough ore to keep the mill running. There is a shaft down 250 feet, and a cross-cut in the bottom shows the ore body to be 200 feet wide. It yields twelve dollars per ton on the plates and the tailings assay from twelve to fourteen dollars per ton, and these can be worked by the cyanide process up to 90 per cent. Concentrators will soon be in place, and it is then expected that the ore will work up to 70 per cent in the mill. Mr. Willis says there is enough ore blocked out to keep the mill running up to its full capacity for ten years, all of the same grade as that now being worked. The great success of the development of this property will induce investors to take hold of other properties in the same vicinity.

At Candelaria.

A correspondent of the *Walker Lake Bulletin* writes as follows:

The Hon. Evan Williams of Empire, Nevada, came in on Monday's train to visit Colonel Sutherland and arrange a contract for starting up the Holmes and other mines in Candelaria belonging to Col. Sutherland and associates. On Wednesday Wm. Forbes Fisher of London and Colorado, representing Wm. Bonbright & Co. of London, arrived to examine the Holmes and Candelaria properties for his people, who will become interested in the properties. Mr. Fisher is a pleasant, genial gentleman and makes friends easily. While nothing has been said as to what arrangements have been made, the writer predicts Candelaria will boom at an early date. The two gentlemen left with Col. Sutherland on his special train Friday morning. Senator Williams will return at once to Empire. Mr. Fisher and Col. Sutherland will stop at Wabuska to examine some copper prospects near that place. Mr. Fisher will then go to Colorado Springs, and Col. Sutherland will go to San Francisco.

Fatal Accident.

On Tuesday of last week Forest Roberts, who passed through Bridgeport a few days before, and obtained a job at Rickey's ranch at Topaz, was thrown by a bucking horse and falling on his head sustained a concussion of the brain and lingered until 2:40 Thursday afternoon, the 11th, when he died. George Roberts, his brother, who was with him on the ranch, took the body to Carson for shipment to his home in Santa Barbara. He was about 19 years old and was well liked by all in the valley, and when the remains left the house there was not a dry eye on the ranch, all feeling much sympathy for the bereaved brother. This was the first fatal accident to happen on the Rickey ranch, which is remarkable for a ranch that has employed such a large number of men during the past 18 years.—*Chronicle-Union.*

A Rich Property

Parke Barnes, who formerly resided in Dayton, arrived here last week Friday from Inyo county, Cal., with 16 tons of ore from a mine he and Mr. Anderson have recently located in that county. The ore was worked at the Pierson & Davis plant here this week and returned $95 per ton in gold. Mr. Barnes left yesterday with his bar of bullion for Carson where he will get it converted into coin. The mine from which this ore came is near Citrus, in Inyo county, and the ledge is from three to four feet in width. The ore worked here was not assorted but came from the croppings at a depth of only fourteen feet from the surface. The ledge can be traced for a considerable distance, and if it holds out as depth is attained Messrs. Barnes and Anderson have the most promising property in Inyo county.—*Times.*

The Surest Way

Adam Farington was up from his dukedom yesterday, as big and as cheerful as ever. He says he will build the Tioga road on his own hook if a raid isn't made on that $25,000 pretty soon; and he also asserts with an air of truthfulness which he can easily assume, that he has discovered a natural roadway across the summit over which he can haul a thousand pounds with two horses at any time. But we have often been entertained by Adam and his mellifluous speech. We regret to say that he shook Bodie tailings from his patent leathers at noon to-day.—*Bodie Miner.*

Real Estate Transfers.

The following deeds have been recorded since May 18, 1899.

A Bartu to Fannie Druillard—Sept 23 1898, 40 acres at Lincoln $1,500

Jed Carpenter to James Lane—May 15 1899, 40 acres at Fish Springs $10

James Lane to J H and J M Connor—May 15 1899 same tract $10.

H D Gill to T B Rickey—May 19 1899 160 acres at Camp Independence $617.40.

Margaret Sanders to T B Rickey—May 12 1899 160 acres known as Goodale ranch Black Rock $1459,

Charles C Stewart to William Hines—May 23 1899, 80 acres at Big Pine $10.

E A Crocker to Lizzie Davis May 16 1899, 30 acres at Big Pine $1950.

L W Allingham to Helen McKnight—March 28 1899 Lot at Bishop $900.

Ben H Yandell commissioner to Margaret Sanders—May 16 1899, Goodale ranch at Black rock $1663.18.

Frank Nicholson to John R Nicholson May 12 1899 Antimony and other mines Sherman dist $10.

James R Nicholson to C L Bryan—May 12 1899, und ⅔ interest Bryan mine Sherman dist $200.

James R Nicholson to C L Bryan—May 12 1899 und ⅔ int in Iron King and other mines Sherman dist, $75.

Bill Harper, a young man well known here, shot a man in the leg at Randsburg last week. He was arrested, tried in the Justice's Court and fined $60.

1866 Memorial. 1899

TO DESCENDANTS OF CONFEDERATE AND UNION VETERANS:

Recognizing the fact that amity has been restored between the Confederate and the Federal Veterans of the late Civil War and believing that their descendents should perpetuate the same, all sons and daughters, grandsons and grand-daughters of Union and Confederate Veterans are cordially invited to assemble at Big Pine on the morning of May 30th 1899, at 10 o'clock to participate in the celebration of Memorial Day, and in decorating graves of Confederate and Federal soldiers and sailors buried at Big Pine.

By order of Committee.
W. H. UHLMEYER,
Son of Union Veteran.
DOUGLAS ROBINSON,
Son of Confederate Veteran.

A. W. D. Carroll expects to visit Ireland in a short time. He says that his friend Mr. Bailey is now at his home in the Emerald Isle after a second trip around the world, having spent considerable time in South Africa. Mr. Carroll has lived here continuously for the past ten years.

LEGAL.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNty of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above-entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant, James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 112, I am commanded to sell, and by said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, state of California and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, state of California, to which records reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances thereunto belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United States.

WM D DEHY, Commissioner

Dated at Independence, Inyo Co., Cal., May 25th, 1899

The woman who throws herself at a man's head will soon find her place at his feet.

Ask for Kleeno Washing Powder.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circularr, free.

"Out of Sight Out of Mind."

In other months we forget the harsh winds of Spring. But they have their use, as some say, to blow out the bad air accumulated after Winter storms and Spring thaws. There is far more important accumulation of badness in the veins and arteries of humanity, which needs Hood's Sarsaparilla.

This great Spring Medicine clarifies the blood as nothing else can. It cures scrofula, kidney disease, liver troubles, rheumatism and kindred ailments. Thus it gives perfect health, strength and appetite for months to come.

Kidneys—"My kidneys troubled me, and on advice took Hood's Sarsaparilla, which gave prompt relief, better appetite. My sleep is refreshing. It cured my wife also." MICHAEL BOYLE, 373 Denny Street, Pittsburg, Pa.

Dyspepsia—"Complicated with liver and kidney trouble, I suffered for years with dyspepsia, with severe pains. Hood's Sarsaparilla made me strong and healthy." J. B. EMERTON, Main Street, Auburn, Me.

Hip Disease—"Five running sores on my hip caused me to use crutches. Was confined to bed every winter. Hood's Sarsaparilla saved my life, as it cured me perfectly. Am strong and well." ANNIE ROBERT, 49 Fourth Street, Fall River, Mass.

HE HAD A BAD HABIT.

And It Made Him a Poor Insurance Risk in Kentucky.

The manager of a life insurance company had the floor.

"Life insurance companies," he was saying, "are as particular about the people they already have on their lists as they are about getting them on in the beginning. They are rich, of course, but they are no more anxious to take in a man who will die of disease within the first year or two than they are to take in a perfectly healthy man and have him hazard his life by taking personal risks in dangerous pursuits or by travel in unhealthy countries.

"I remember a funny instance that occurred once while I was living in New England. One of our $10,000 men had a way of calling a man a liar in the most careless and indiscriminate manner and with only the merest or no provocation. One day he was in our office and casually mentioned the fact that he was going to make a trip to Kentucky.

"'When?' inquired the manager alertly.

"'Next week.'

"'On business or pleasure?'

"'Going to buy a pair of horses.'

"'Um—er—er!' hesitated the manager. 'Before you start I wish you would stop in and see me.'

"'What for? Want me to buy a horse for you?'

"'No; I want to arrange about your policy.'

"'What do you want to arrange about it? Isn't it all right?'

"'Yes, as long as you stay in this country. But if you go down to Kentucky we'll have to advance the rate until you come back.'

"'Well, what in ——,' began the policy holder hotly, when the manager interrupted him.

"'Don't fly the track, my dear fellow,' he said gently. 'It's all right here and the rate is satisfactory to us; but, by Jove, we can't give you the same rate and let you go to Kentucky and call men liars like you do in this section. Not much! We haven't got $10,000 policies to give away like that, and you oughtn't to expect it.'"—Washington Star.

Making a Football.

A football requires a vast amount of work before it is ready for kicking over the gridiron.

The balls are covered with cowhide which must have remained in the tan pits a year or more. The hides are from 7 to 8 feet long, 6 to 7 feet wide and before splitting weigh from 25 to 30 pounds. The skin has to be split into two layers. The part to be used is soaked for a few days in a cleansing preparation. It is "slecked" out to make it firm. It is fed and cut into shape. The strips are stitched, always by hand. The bladder is or should be of the finest Para rubber, and undergoes perhaps more processes than the cowhide. It is as necessary to the football as pneumatic tires are to the cycle; in fact, even more so, since no effective substitute for an air bladder has yet been discovered. The bladder is of immense strength, and is fitted with a nozzle through which the air is injected. These bladders are an expensive item and represent a considerable portion of the cost of manufacture. The bladder is inserted through the unlaced slit, and the next process is to blow it up.

The rubber nozzle fits over a metal tube on the machine. A few turns of the hand wheel and the ball is inflated. It is now laced up and handed over to the shaper, who pats down any unevenness in the seams.

The Truthful Marksman.

An extraordinary shooting adventure is recorded by A. L. Butler of the State museum, Selangor, Malaya. One day in last July a Malay woodcutter went out into the jungle to cut fuel, taking with him an old single barreled, muzzle loading gun loaded with the rather unscientific charge of a bullet and four buckshot. Moving quietly through the jungle, he suddenly came upon a tiger feeding on the carcass of a sambhur, and with touching confidence in his weapon fired at a distance of 20 paces. The tiger rolled over, and when the Malay cautiously approached he found not one dead tiger, but two, the second having been hidden from the sportsman, though only a few feet distant from the animal he fired at.

Mr. Butler, who made a post mortem examination of the tigers after they had been skinned, found that in each case a single buckshot had gone to the heart. One had also an insignificant wound on the head from another pellet. "For a really appalling fluke," as Mr Butler says, this achievement of the Malay woodcutter will be hard to beat. It certainly is not a performance any sane white man will try to parallel, much less to eclipse.

There are 26 pencil works in Bavaria, of which 23 are in Nuremberg, the great European center of the lead pencil trade. These factories employ from 8,000 to 10,000 workers and produce 4,300,000 lead and colored chalk pencils every week.

The habit of reading at the dining table is strongly condemned by L'Hygiene Moderne, though it thinks looking over the paper at breakfast is comparatively harmless.

HEAD ACHE
"Both my wife and myself have been using CASCARETS and they are the best medicine we have ever had in the house. Last week my wife was frantic with headache for two days; she tried some of your CASCARETS, and they relieved the pain in her head almost immediately. We both recommend Cascarets."

SERMONS OF THE WEEK

Onward.—The divine summons to move onward is as urgently needed today as it ever was.—Rev. W. J. Chichester, Presbyterian, Chicago.

Vital Convictions.—The trouble with some is that they have no solid, vital convictions and are already half conscious that what they avow as their belief will not stand the light.—Rev. Minot Savage, Unitarian, New York.

The Present.—It has been too much the custom to discount the present for the future, and to overlook the needs of to-day in anticipating the glory of a brighter world to come.—Rev. F. R. Cole, Presbyterian, Oakland, Cal.

A Church in Name.—A church may be a church only in name, or one in reality. A church in name is a society, organized by men under an apparently divine authority, yet without God.—Rev. V. W. Tevis, Methodist, Indianapolis, Ind.

Christ's Greatest Triumph.—Christ's greatest triumph is that He holds God and man together. He is the Great Keystone that connects humanity with the infinite love of the Almighty.—Rev. W. P. George, Presbyterian, Kansas City, Mo.

Cause for Thanks.—Perhaps in no period of our history as a nation have we ever had reason to be more grateful to Almighty God than at this time for what has occurred within the last year.—Rev. A. C. Morehouse, Methodist, New York City.

The Rock of Ages.—We may raise high in the world and pass the ideal of our ambition, but it will come to naught unless we put our trust in the Rock of Ages and in the Refuge of our souls.—Rev. S. A. Northrop, Baptist, Kansas City, Mo.

An Everyday Church.—We must make our church an everyday church, adapted to the needs of the day, for the churches that adapt themselves to the needs of the day are to be the churches of the future.—Rev. A. J. Canfield, Universalist, Chicago, Ill.

Epochs.—In epochs famed as the zenith of culture and science, vice, so reasons the pessimist, has always been cloaked with stronger effrontery and worship with more exultant and defiant abandon.—Dr. E. G. Hirsh, Hebrew, Chicago, Ill.

Highest Form of God's Glory.—Manhood and womanhood employed in worship and in charitable or common acts done lovingly and joyfully "in his name" are the highest form of God's external glory known to us.—Rev. C. K. Nelson, Bishop of Georgia.

Moral Forces.—I believe in moral forces more than in physical, and do not think that the destiny of people can be determined by commercial forces, either from the within or the without.—Rev. Jenkin Lloyd Jones, Independent, Chicago, Ill.

Retributive Justice.—Certainly, the exercise by private individual of retributive justice to the extent of taking human life is never lawful, and it is doubtful if the presence of even 70,000,000 of Americans would legalize a lynching.—Rev. J. J. Baxter, Episcopalian, Boston, Mass.

Great Burdens.—These things which appear to you great burdens, weighing you down to destruction are only so because you fail to appreciate God's purpose. He intends them to be as ministering angels, lifting you up to eternal life.—Rev. H. C. Stanton, Presbyterian, Kansas City, Mo.

Out of the Church.—On Sunday morning the masses of the people in this land are found, not facing Zionward, but with their faces glued to a newspaper. One hundred years ago there were one million people out of the church; to-day there are fifty millions.—Rev. B. F. De Costa, Episcopalian, New York City.

A UNIQUE BRIDGE.

It Spans the Rio Blanco River Below Orizaba, Mexico.

A traveler in Mexico discovered the unique bridge over the Rio Blanco below Orizaba, the Manchester of the sister republic of the South. This city, which is surrounded by several factories and mills, stands high above the sea level, and is the only city along the course of the capricious and beautiful Blanco river to utilize any of its vast motor power. The cut is from Modern Mexico.

A STRANGE BRIDGE.

Taking No Chances.

"There's something the matter with this bar," said the man who was learning to ride the bicycle to the dealer who had lately sold him the wheel. "It looks to me as if it might snap in two at any time."

"Oh, I think not," said the manufacturer's agent. "I think not, sir. At any rate, if it should break, we will, of course, provide you with a new one."

"And who do you think will come and get it?" demanded the beginner, with considerable heat! "my heirs?"—Youth's Companion.

We will be so glad to see spring that we will not object if she brings a bandy-legged man in a golf suit with her.

When a good man dies, they say he has gone to his reward. Why not be equally frank when a man goes to his punishment?

STRONG STATEMENTS.

Three Women Relieved of Female Troubles by Mrs. Pinkham.

From Mrs A. W. SMITH, 59 Summer St., Biddeford, Me.:

"For several years I suffered with various diseases peculiar to my sex. Was troubled with a burning sensation across the small of my back, that all-gone feeling, was despondent, fretful and discouraged; the least exertion tired me. I tried several doctors but received little benefit. At last I decided to give your Lydia E. Pinkham's Vegetable Compound a trial. The effect of the first bottle was magical. Those symptoms of weakness that I was afflicted with, vanished like vapor before the sun. I cannot speak too highly of your valuable remedy. It is truly a boon to woman."

From Mrs. MELISSA PHILLIPS, Lexington, Ind., to Mrs. Pinkham:

"Before I began taking your medicine I had suffered for two years with that tired feeling, headache, backache, no appetite, and a run-down condition of the system. I could not walk across the room. I have taken four bottles of the Vegetable Compound, one box of Liver Pills and used one package of Sanative Wash, and now feel like a new woman, and am able to do my work."

From Mrs. MOLLIE E. HERREL, Powell Station, Tenn.:

"For three years I suffered with such a weakness of the back, I could not perform my household duties. I also had falling of the womb, terrible bearing-down pains and headache. I have taken two bottles of Lydia E. Pinkham's Vegetable Compound and feel like a new woman. I recommend your medicine to every woman I know."

What Love Is.

Miss Sophie Loury employs an exceedingly communicative old colored man to attend to odd jobs about her studio now and then, and his sayings have become proverbial among Miss Loury's familiars. He came to work one day not long ago very full of the goings on of a young man he knew, who was in love.

"But what is love, uncle?" asked Miss Loury.

Uncle wagged his head wisely.

"Miss Sophie," he said solemnly, "love is dizziness, unizziness and inattention to business."

And really I don't know of any definition more concise, complete and altogether adequate than that.—Washington Post.

5 DROPS The Pleasantest, Most Powerful and Effective Never failing Remedy for
La Grippe, Catarrh, Rheumatism.
Will cure any ache or pain known the human body. Send for a trial bottle, 25c. This offer lasts 30 days only. Large bottle (300 doses of 5 DROPS each) $1.00 or 3 for $2.50.

167 and 169 Dearborn St., Chicago.

He Caught O'Connell.

Daniel O'Connell, the famous orator, when taking a ride in the neighborhood of his house, had occasion to ask an urchin to open a gate for him. The little fellow complied with much alacrity and looked up with such an honest pleasure at rendering the slight service that O'Connell, by way of saying something—anything—asked:

"What's your name, my boy?"

"Daniel O'Connell, sir," replied he stoutly.

"And who's your father?" demanded the astonished liberator.

"Daniel O'Connell, sir."

O'Connell muttered a word or two below his breath and then added aloud

"When I see you again, I'll give you sixpence."

Riding briskly on, he soon forgot the incident and fell to thinking of graver matters, when, after traveling some miles, he found his path obstructed by some fallen timber, which a boy was stoutly endeavoring to remove. On looking more closely he discovered it to be the same boy he had met in the morning.

"What!" cried he. "How do you come to be here now?"

"You said, sir, the next time you seen me you'd give me sixpence," said the little fellow, wiping the perspiration from his brow.

A Bad Place For Fat Men.

Among the ancient Spartans everything was considered secondary to military efficiency, and with a view to securing this the boys and men were by law kept in a continual state of "training." No deformed child was allowed to live. The boys were taken from their homes and subjected to military regulations at the age of 7. They were compelled to wear the same single garment winter and summer. At 20 they joined the ranks, and from that age till they reached 60 were required to dine at the public tables, where only a certain quantity was supplied for each man. The magistrates interfered in absurdly small matters. They regulated the degree of fatness to which it was lawful for any citizen to extend his body.

Those who dared to grow too fat or too soft for military service and exercise were sometimes soundly flogged. Aelian, in his history, relates that Nauclis, son of Polytus, was brought before the ephors (magistrates) and the whole assembly of Sparta, and "his unlawful fatness" was publicly exposed, and he was threatened with perpetual banishment if he did not bring his body within the regular Spartan compass and give up the culpable mode of living, which was declared to be more worthy of an Ionian than a Spartan."

A Matrimonial Musing.

The average young man thinks he is in a position to marry if he has $250 in the bank and a steady job. Hope is a great factor in a love affair. After the man is 40 he wonders how he ever did it, and when he eats pie at night and has the nightmare he always imagines that he is marrying again on $250.—Atchison Globe.

Too Much For Him.

It is evidently one thing to work without knowing how much we do and another thing to have our labors mapped out before us in detail. For several months a business house in this city has enjoyed the ministrations of an unusually faithful colored janitor. Always prompt and faithful, unerring in the discharge of his various duties, Tom was a great favorite with the firm, and the prospect was that he would abide with them many years.

One day it occurred to the senior partner that a little more system in Tom's routine would be advisable and perhaps render his work a trifle easier, so he wrote out in plain characters an outline of the chores Tom had been doing every week, arranged perhaps with more convenience to the firm and to Tom. Unfortunately Tom could not read, so the list was given to another man employed on rougher work, with instructions to read it to Tom and explain to him each day's prescribed duties.

When the schedule was read to Tom, however, the effect was astonishing and disastrous. He listened quietly, but his eyes grew bigger and his black wool seemed to bristle on his head. At the end he reached for his cap and said to the porter: "Good gracious! I ain' goin to do all that work." Then he walked out and hasn't been seen since.—Indianapolis Journal.

Tricked the Vicious Camel.

A valuable camel working in an oil mill in Africa was beaten by its driver. Seeing that the camel had treasured up the injury and was only waiting a favorable chance for revenge, the driver kept a strict watch upon the animal. Time passed away. The camel, knowing that it was watched, was quiet and obedient, and the driver began to think that the beating was forgotten, when one night, after several months had gone by, the man was sleeping on a raised platform in the mill, while, as is customary, the camel was stabled in a corner.

Happening to awake, the driver saw by the bright moonlight that when all was quiet the animal looked cautiously around, rose softly and, stealing toward a spot where a bundle of clothes and a burnoose thrown carelessly on the ground resembled a sleeping figure, cast itself with violence upon them, rolling with all its weight and tearing them most viciously with its teeth. Satisfied that its revenge was complete, the camel was returning to its corner when the driver sat up and spoke. At the sound of his voice and realizing the mistake it had made, the animal was so mortified at the failure and discovery of its scheme that it dashed its head against the wall and died on the spot.

The Popping Stone.

"The popping stone" marks the spot where Sir Walter Scott asked Miss Carpenter to marry him. It is situated in the beautiful valley of the Irthing, at Gilsland, an inland watering place near Carlisle. The popping stone is visited by many thousands during the summer months, and, it is said, many a laggard lover has had his courage screwed up to popping point at this romantic spot.

In the immediate neighborhood may also be seen "Mumps Ha," which Scott immortalized in "Guy Mannering," while a little farther afield the Roman wall and Lanercost priory prove attractions to visitors to Gilsland.

Have It Handy.

He cried out in agony, and they ran to the neighbors for help. Sciatica was torturing him. Better run for St. Jacobs Oil, or have it handy. It is known to cure the worst cases.

A Famous Poison Mystery.

England had a famous poison mystery a quarter of a century ago. Two members of a great club in Manchester, both men of position and keen politicians, each received, apparently as a New Year's gift, small boxes containing a few cigars of the very highest quality apparently. Both were taken fearfully ill after smoking, and one of them subsequently died.

The cigars were found to be loaded with poison, and it was said that the man who recovered only did so because he used a cigar holder. The facts were at first hushed up, because, as was said, the suspected sender, whose motive was revenge on account of a lady, was a man of wealth and power.

But this subject was cleared, and the mystery was deepened by the following circumstances: A rich Manchester merchant, traveling one day in a railway car about the time of the incident related, got into conversation with a most agreeably and highly cultivated stranger, who finally offered his cigar case. The Manchester man was found at Leeds almost unconscious and the only occupant of the carriage. He grasped in one of his convulsed hands the cigar he had been smoking and after analysis showed it to be identical with the others. He recovered, but the stranger was never discovered.

Easy Way to Be Generous.

In the Baptist church of a New England village was an old man who had all the Christian graces save one, and that one was the grace of liberality. He would do anything in the world for the cause of religion but give up his money. At the close of the financial year 1869 the church found itself $400 in debt. A church meeting was called, and it was voted to circulate a subscription paper on the spot and endeavor to thus raise the sum needed. This was done, and the old gentleman did not put his name on the paper. The result was rather disheartening, $200 only having been pledged. Silence reigned for a moment, when one of the most generous men in the church moved that "we double our subscriptions." Instantly the old gentleman was on his feet, and with extraordinary fervor cried, "I second the motion."

He evidently felt that he was thus doing his part in hastening a most desirable result.—Harper's Round Table.

Any Girl Can Tell
A physician who makes the test and is honest about it can tell you that, in many cases, the number of red corpuscles in the blood is doubled after a course of treatment with Dr Williams' Pink Pills for Pale People.
That this means good blood may not be entirely clear from the doctor's statement, but any girl who has tried the pills can tell you that it means red lips, bright eyes, good appetite, absence of headache, and that it transforms the pale and sallow girl into a maiden who glows with the beauty which perfect health alone can give.
Mothers whose daughters grow debilitated as they pass from girlhood into womanhood should not neglect the pill best adapted for this particular ill.
Frank B. Trout, of 103 Griswold Ave., Detroit, Mich., says: "At the age of fourteen we had to take our daughter from school on account of ill health. She weighed only 60 pounds, was pale and sallow and the doctors said she had anæmia. Finally we gave her Dr. Williams' Pink Pills for Pale People. When she had taken two boxes she was strong enough to leave her bed, and in less than six months was something like herself. To-day she is entirely cured, and is a big, strong, healthy girl, weighing 130 pounds, and has never had a sick day since."—*Detroit Evening News.*
The genuine Dr Williams' Pink Pills for Pale People are sold only in packages, the wrapper always bearing the full name. At all druggists, or direct from the Dr Williams Medicine Co. Schenectady, N.Y. 50 per box.

Study It Out.

Here is a highly interesting paradox, which may amuse or bewilder, as the case may be. It is supposed to have been invented by Socrates: A. says that all Athenians are liars. A. is an Athenian and therefore a liar. Therefore his statement that all Athenians are liars is not true, and consequently all Athenians tell the truth. A. is an Athenian, and hence tells the truth. Wherefore his statement that all Athenians are liars is true. Therefore he is a liar and his statement false, and so on.

Force of Waves.

In a high gale mile long waves, 200 feet from trough to trough and 40 feet high, roar along the sea at the rate of 20 miles an hour, with a weight of 60,000 pounds for every foot of their length.

Upon these a 600 foot ship, such as the New York or the Paris, will rise like a floating leaf, but if the ill fated ship drifts upon a lee shore blows of 100,000 tons, delivered with remorseless fury, crush it like an eggshell.

She Was Deliberate.

It is said that Dinah Muloch Craik, the famous author of "John Halifax, Gentleman," made a habit of leaving at her bank the manuscript of each of her stories as soon as it was completed. It would remain there perhaps six months and then she would call for it and see how the story affected her after that lapse of time. If it pleased her, the manuscript was sent to the publisher. Otherwise it was rewritten or thrown away.

Avoid the Night Air.

Avoid the night air when damp and cold, and you will often avoid having neuralgia, but St. Jacobs Oil will cure it no matter what is the cuase and no matter how long it has continued.

Libels on Dogs.

After all man does not remember the dog's good qualities as he should. Look at the similes he uses—"you lying hound," "mean as a hound dog," "dog" and "low down cur!" Man hardly can think of a lower name than one connected with dogs. And in horse racing the worthless ones are called "dogs."

It seems a little ungrateful when one remembers all that a dog will bear from a man and still love him.—New York Commercial Advertiser.

THE GOLD SEEKERS.

The panting steamer slowly drops
Away from the crowded pier;
The blackened decks recede from view
And leave me musing here.

Away where the gold so warm and red,
Lies hid in the dark earth's breast;
Little they reck of danger and cold,
Aglow with the golden quest.

The rosy youth with kindling eye,
In his manhood's early dawn,
The pale man with the student's stoop,
The stalwart man of brawn.

All, each and all, with fevered gaze
Fixed on the fields of gold;
Ah, well-a-day! for a faith that's firm
And a heart that is brave and bold.

For those there be who will come again,
All broken and worn and wan,
While others left in the Arctic snows
Will slumber forever on.

And some will empty-handed come,
Who have missed the golden goal,
And some with gold too dear, alas!
The price of a sinless soul.

And those at home will sit at night—
And the wind sweeps where it wills—
With hearts away in a shambling shack
In the wild Alaskan hills.

'Tis thus I muse on the lonely quay,
Whence the hurrying crowd is gone—
Whilst far away for the frozen North
A flag of smoke trails on.
—Overland Monthly.

LOVE AND WAR.

LIEUT. JOSEPH M'KENNOY had been to war—as far as Chickamauga. The inducement? He loved a girl; he hoped, but dared not ask, that the girl loved him; but all girls love a hero; therefore he would perform glorious deeds and make the matter sure.

Now the war was over and he was mustered out; his only scar of battle a stiff neck, souvenir of a case of mumps contracted in camp. Alas, hard was fate!

And so it was with doubting heart that he paid his first call. It was sad. He heard sung the praises of the gallant Rough Riders and the heroic Dewey; he heard the girl declare that did the women have votes Roosevelt should be the next President. Nor was that all. In heart-breaking desperation he had seized the worst possible moment to make an offer of his heart and hand, and the same had been almost contemptuously refused.

"It seems evident," soliloquized Lieut. McKennoy, wending his way sadly homeward, "that my war record is not my strong suit in this deal. But we shall see, we shall see," and he sat late in his room smoking many big, strong, meditative pipes.

The next evening he honored Miss Fremont with another call, at which she was scarcely able to conceal her surprise. It did not seem the natural order of things for the rebuffed—nay, almost ridiculed—suitor to bob up so serenely. Perhaps her sarcasms had not been appreciated. She would make it certain that this young gentleman should no longer be in doubt as to her sentiments regarding soldiers who allowed themselves to be kept safely in camp, while their brothers—men of sterner stuff—were battling in blood for their country's glory.

"I am so glad that your poor wounded neck does not keep you indoors," was her sarcastic greeting. "Such a serious hurt was enough to keep any man out of battle."

McKennoy smiled grimly. "You are pleased to be facetious, Miss Fremont. But it was not so easy as you imagined to get to the front. We tried our best."

"Yes, you are right. It needed men. Why, from the beginning even the newspapers knew that if there was to be any fighting Teddy's Terrors would be right in the thickest of it, and they were. Col. Roosevelt is a man with a will. Ah, if we poor women could vote, how quickly we would make him President!"

"Yes, so you said last night," interrupted McKennoy, hoping to get her out of that strain.

"Ah, jealous!" she cried, "jealous! Really, Mr. McKennoy, if you are so jealous of those who have proven themselves men of sterner stuff than yourself, you should at least have the tact to conceal it."

"Women are always cruel," the lieutenant remarked sadly.

"Cruel," she cried, indignantly straightening up in her chair. "Cruel! But I noticed that Company D was so utterly lacking in cruelty, so fearful of hurting someone, of wounding the poor Spaniards' honor, that they were careful not to leave their camp. Lieut. McKennoy, I should think that you would expire from shame. Twenty thousand heroes bore the suffering of crowded transports, and bearded the enemy in his lair. The gallant Rough Riders charged him the first day. Their brothers, their fighting brothers, were not behind. Their names are writ in blood on the slopes of Cauey and San Juan. Nothing kept them from the front. Forward, ever forward, they went right up to the cannon's mouth; 'guns to the right of them, guns to the left of them,' men dropping around them like hail—or — er — bullets — bullets, dropping around them like hail, men falling as—er—as grass before the scythe. Heroes they were, etc."

McKennoy had always known that she was a beautiful girl, but as she stood before him now with eyes flashing, a burning red spot in each cheek, trembling in her enthusiasm, she made such a glorious picture that he vowed a mighty vow in his inmost soul that she should be his; and the Rough Riders, and all other heroes, individually and collectively, might rot in their graves before they got her.

"In the drama of war, Miss Fremont," he said, "all the star parts are not cast on the field of battle. Some of the sublimest scenes are acted out in the quiet camp, unheralded to the public, seen only by the few. Those whose lot it is to fight, it may be to fall—to shed from bullet wound or saber gash their life's blood—are fortunate indeed. They may be brave men; they may be cravens who go forward only because they fear the jeers of their comrades; these are cowards. Whatever their impelling motive, they are urged on by the knowledge that an expectant nation at home will greet with loud acclaim their slightest deed; their triumphal arches are sure to be awaiting them. But we poor devils in camp, Miss Fremont—who hears of us, or cares to hear? And yet, believe me, those few who know consider some of us 'camp loungers' as deserving of praise as are any."

He had spoken feelingly, and his listener was becoming impressed.

"I am sure I do not understand," was all she could say.

"How should you? You have heard only one side. You knew Charlie Malloy, the old dressmaker's only son?"

"Yes."

"Well, he died—not gloriously, at the cannon's mouth, but shamefully, cowardly, you would say, in a camp hospital. His last words were—I was with him—'Oh, my poor mother! who will care for her?' But his was a coward's death, so what does it matter? He only had the fever. And Dr. Stanley—you were berating him last night—'shameful shirk,' I believe, was your rather strong expression. Yet that boy, seeing all his chances of what the multitude, the unthinking, consider the only service deserving of plaudits and praise—work on the field of battle—slipping away from him one by one, cheerfully and patiently continued his duties among the sick around him. You no doubt read of Dr. Bob Church's heroism at Las Guasimas. We got the news one night about supper time, and Stanley, giving no sign of the bitter disappointment he was feeling because no such lucky chances were to be his, spent the rest of the night in the hospital caring for his charges, who were not suffering from battle wounds, but only prosaic fever. There was no glory in it—only duty. And you do not call that noble?

"Ask some of those poor devils whose lives depended on his tenderness and skill at Chickamauga, Miss Fremont, and they will tell you stories of that youngster that should make you proud to call him your friend."

"I had never thought of all that," she said.

"There were a hundred chances of dying in our camp," he continued, as she did not speak, "to one among those heroes at Santiago. They could lie in their trenches, secure from Spanish bullets, but how could we dodge the contagion of typhoid, of malaria, of—er—of mumps?" (She was a young thing.) "Death was in the air we breathed, in the water we drank. Far be it from me to praise myself, Miss Fremont; but when a fellow has tried his best, and done his full duty, too, if I do say it, it comes hard on him to be abused and ridiculed, especially," in a lower tone, "by one from whom he had hoped such different things."

McKennoy had risen, and stood looking around as if for his hat. He had left it in the hall, as he well knew.

"Surely you are not going so early," she said, in sudden anxiety, laying her hand on his arm.

"Yes, I do not feel as if I could bear more to-night."

"I did not mean to hurt you; I did not mean to be cruel," said the girl.

"I suppose I will have to get used to that sort of thing," he answered, martyrlike. "I should be thankful to be safely out of that death's hole, where so many brave fellows—ah, pardon me, cowards—were left in their graves. My souvenir will soon be healed," and he moved his neck stiffly, an expression of pain flitting over his face.

"Oh, Mr. McKennoy—Joseph—forgive my cruelty."

"Yes, Miss Fremont, I do. It hurt, but you did not know. I forgive you freely."

"Oh——"

"I would say more, would say again that I love you, but you would consider it no honor to be loved by a coward——"

"Joseph—my dearest—hush. I never said that; I never meant it. You are the most really brave, noble man"—(in some way or other she was in his arms this time)—"Oh, be careful of your poor neck."

"It hurts only when I turn it sideways, not when I bend it straight down," and Lieut. Joseph McKennoy kissed Miss Louise Fremont again by way of illustration.

Which, I suppose, makes an end of this story.—New Orleans Times-Democrat.

To Prevent Sleep Walking.

A device to prevent sleep-walking is to lay upon the floor, by the side of the somnambulist's bed a sheet of iron, zinc or other metal, wide enough to insure that he will step upon it. When the sleep-walking fit comes upon him his foot touches the cold surface of the metal and he instinctively draws that leg into bed again. After two or three attempts the somnambulist gives it up and settles down in bed.

Clocks Without Hands or Faces.

In Switzerland they are making clocks which do not need hands and faces. The clock merely stands in the hall, and you press a button in its stomach, when, by means of the phonographic internal arrangements, it calls out "half-past 6" or "twenty-three minutes to 11," as the case may be.

Heavy Cable.

The latest cable which has been laid across the Atlantic weighs 650 pounds to the mile. This is the biggest of all the cables.

Every time a man gets a chance he tells of some one who hasn't treated him right.

Conscience enables people to feel sorry when they're found out.

A Woman May Be Most Fashionably Attired Without Going to Excessive Expense—A Cloth Dress Is a Good Investment—New Ideas.

New York correspondence:

FINE feathers may not make fine birds, but a fine bird must have the feathers to feel fine, and this season it is the fault of her own pretty self if the bird does not have just the plumage to make her look and feel the finest. No matter what the dressmakers say, money has not so much to do with it. A woman can buy an ugly and unbecoming dress for from $50 to $200, or make herself in the fashion and very attractively attired for from $5 to $50. When it comes to deciding on a new gown, it will be apparent that a cloth dress is a good investment, whether the outlay is to be large or small. Fashions are pretty well settled, and a new gown now will not be badly out of style next fall. As to the style in which the cloth gown is to be made, there is a sufficient range of permissible sorts to insure suiting everyone. The first of the models shown to-day is a good one for a very tall woman who is a bit too slender at the hips. In the case of just such a figure such cutting up of the material is excusable, though in general it is altogether too wasteful. This dress was of the latest camel's hair in a warm, bronzy brown. The coat showed one of the latest one-side effects in the opening at the neck, its lapels were faced with brilliantly flowered silk and the dicky of lawn was adjustable. This coat was boned like a bodice, and the dress being for warm spring out-of-door use, the bodice was not planned to serve over an under waist.

THREE TYPES OF SPRING'S FINE FEATHERS.

A great kindness to slender women is apparent above the belt in many finely fashionable gowns. This lies in the preservation of Russian blouse lines. These blouse echoes are found in many forms, but none is more attractive than was the combination of blouse and polonaise put in the next picture. Here they were blended in a very graceful and modish garment. The bodice really ended at the belt and what seems to be the continuation of it below was a part of the skirt, but it might be made separately if preferred. The skirt was a two-piece, rather than a double skirt; that is, the upper part of stone gray cloth was one with the silk that showed below the points. The latter portion was dark gray bengaline, with figures in blue outlined in black. Black ribbon velvet edged the cloth, and blue crystal buttons were added. To have sleeves to match the under dress or an effect of it is to hint that you are in touch with at least one of the latest wrinkles.

TWO METHODS OF TRIMMING WITH CLOTH.

The polonaise is so finely adapted to all-over lace materials, which of themselves are very stylish just now, that it is sure of fashionable favor throughout the summer. The example of this treatment shown here was expensive, including a tea-colored silk underskirt, sleeves and yoke, with polonaise of heavy Irish lace. The blend of colors where the silk showed through the lace was lovely, and lace was so carefully cut that the opening of the polonaise did not show, the pattern seeming to be continuous. The presence of costly models like this shows that such designs are liked by elaborate dressers, and that there will be a chance for women with less money is apparent from the means provided for copying such dresses inexpensively. It now looks as if like dresses in wash stuffs would be plentiful. Certainly all-over hamburgs are to be combined with lawns and other wash goods, and perforated linens are also to be used. The latter will be as beautiful in effect as the perforated cloths shown in the finest dresses.

Every year as summer stuffs appear the temptation arises to go in strong for ruff and furbelows. This year the temptation is stronger than usual because of the tendency of current fashions. But though polonaise and other overskirt styles, with countless other devices of elaboration, are well indorsed the woman with a beautiful figure has an excellent chance to display it in a gown of artistic simplicity. There remains in to-day's large picture a model that will serve her purpose. It was sketched in fawn colored drap d'ete, that lovely clinging cloth that is more beautiful than ever in weave and finish, and was an admirable combination of the princess and polonaise ideas. A dainty finish of black velvet ribbon velvet, for which there is a decided fad just now, and a perfectly fitted and carefully shaped yoke of pale blue silk corded and embroidered in white, with the lower part of the sleeves to match, completed the scheme, which was not extreme in any way. The skirt was molded to the figure, so copiers should be sure of loveliness of outline, and the fastening at the back of the bodice and down to just below the hip line at the back of the skirt was laced with silk cord so perfectly that it was hardly noticeable. This design might be relieved by a round waist effect, and the skirt could be made to fasten at the side under a fob of velvet, but for a slender and good figure the plainer the gown the more successful it will be.

ANOTHER APPLIQUE OF CLOTH.

Some of the season's striking cloth gowns are trimmed by the most simple means, yet with such liberality as to make particularly effective adornment. Stitching is a simple and generally satisfactory method, and cotton, cloth and silk dresses all are stitched, but not always in the simple manner that the term implies. Scalloped edges of cloth are stitched, the stitching following the scallops, and these pieces are set on to the gown, taking the place of passementerie or flounces. The third of these pictures shows this device. This was a gown of dark red cloth trimmed with stitched bands of cloth a shade darker, the bands being shaped to suit their use on the gown. Sometimes such bands are shaped into flounce-like pieces, which are faced with silk and set on the skirt to simulate the free edge of a polonaise or overskirt. Such stitching is usually in silk of a contrasting color.

This cloth applique idea is sometimes so greatly elaborated that a large, carefully modeled and scroll-edged band of cloth circles the skirt, as in the second figure of this picture. This was a gown of tea-colored bengaline, inlaid thus with pale green cloth, the edges of the cloth scrolled and finished with applied ribbon. Still another treatment of applique cloth is presented in the next and last sketch. Here a border of cloth was cut into elaborate design and extended from throat to hem. The goods was tobacco brown cloth, and the applied cloth was a rich green edged with black soutache braid and still further finished with an edge of black lamb's wool. This is an odd touch for a spring gown, but even some of the summer dancing frocks already shown are completed by a touch of fur contrasted with lace and chiffon.

Gout Rare in Ireland.

Gout is rarely known among the working classes of Ireland. Their immunity from this complaint is thought to be due to the fact that their food consists largely of potatoes.

PAINTED A DEAD CZAR'S FACE.

Deathbed Confession Recalls a Tragic Occurrence in Russian Intrigue.

At Zverevo, a little town in the "government" or province of Voronej, in the Don country, Russia, there has just died Osen Ivanovitch Schtchotka, a gray-haired teacher, who, when he felt death approaching, called for a priest, though he had previously never professed religion. His father, he said, had been a citizen of St. Petersburg up to the end of March, 1801. He died in Zverevo in 1860, making a deathbed confession to his son.

This was Ivan Shtchotka's death-bed confession, according to his son, Osen Ivanovitch:

"In 1801 I was one of the most promising pupils of the St. Petersburg Academy of Sciences, a government institution which was under strict military rule. I was not particularly noted for my work with the brush, but, despite my youth, had already gained some reputation as a portrait painter.

"During the night of March 22 or the morning of March 23 I was awakened by Cossacks, who ordered me to dress, take my brush and palette, and follow them. After a rapid drive of a few miles we halted before a palatial building, into the cellar of which I was hustled through an opening. We passed through a labyrinth of recesses and up several flights of back stairs. At last the handkerchief bandage was removed from my eyes, and I found myself in a stately room half filled by solemn-looking men in rich dress. The floor was covered with rugs that seemed to have been thrown down without regard to decorative effect.

"A tall man, in whom I recognized Plato Zuboff, the great Catherine's lover, approached me and said, pointing to a divan covered with a black cloth, over which seemed to be a giant figure in an attitude of repose:

"'Are you skillful enough to restore the face of a dead man who suffered violence, cuts, and strangulation, so as to regain its natural appearance? Your art must last three days, for the body is to be exhibited in the cathedral. You must not spare the red; it will be given out that the person died of apoplexy.'

"Remembering the threats of the Cossacks, I did not hesitate to answer in the affirmative. 'Very well,' said Zuboff, 'you will go to work at once.' And, in a low voice, he added: 'That your conscience may not prick you, understand that the late Czar was not a Romanoff. He was only the natural son of Catherine II. and Soltikof.'

"With that he removed the black cloth, and I saw the body of the Emperor Paul I., dressed in full general's panoply. He was gloved and spurred. His neck was swollen and his face a mass of bruises.

"I can well realize the report afterward spread, viz., that he sold his life dearly. The emperor had been sleeping in the ante-chamber of his wife's bedroom on a lounge, as was his wont to do, when the conspirators came upon him. The guards in and around the palace, and particularly in the corridor leading to the Czar's private apartments, were all in the conspirators' pay, with the exception of a hussar, whom Zuboff cut down with his saber before he entered Paul's chamber. The emperor, I was told, offered at first no resistance. On his bended knees he begged and implored that his life be spared, promising to sign any instrument of abdication they might choose to submit. More, he would himself proclaim his son (afterward Alexander I.) Czar.

"But the murderers advanced fiercely, and Paul attempted to escape by way of the window. Prevented, and bleeding from a cut hand, he defended himself with a chair, killing one of the assassins. But now the rest assailed him with their sabers. A heavy blow on the temple floored him, and again he supplicated for his life with outstretched hands.

"Then Zuboff tore off his sash, wound it twice around the emperor's neck, and, taking hold by one hand, commanded another officer to help him strangle the unhappy monarch.

"In the struggle preceding the final act Paul's face had been hacked and cut, and it required four hours' work on my part to get it into presentable shape. When I declared my work finished a handsome young man was ushered in with great ceremony—the new emperor, Alexander. I heard him say in French:

"'It is well.' The widowed empress, too, passed through the room, but could evidently not bring herself to look upon her husband's face. Poor woman, she had tried to come to Paul's assistance, but had been prevented by a threat of instant death.

"After that two soldiers took me, and between them I was marched out into the corridor and down the stairs. When we reached the cellar I was ordered to wait, and a person whose features I could not make out approached me.

"'Would you like to become an imperial drawing master, with a salary of 2,000 rubles per year for life?' he asked. I was so astonished that I hardly knew what to say in reply.

"'Decide quickly,' spoke the stranger again. I assured him that was at his orders.

"On March 23, at 7 a. m., I was speeding toward the Don country," concluded the deathbed confession. "I have kept faith with the government, and the government has kept faith with me."

Talking Toy Books.

Talking toy books are novelties from Paris. By pulling a string attached to the book the child operates small bellows and reeds concealed in the binding, and the cows, horses and other animals depicted in the book proceed to express themselves in their customary manner.

But few collisions occur on the paths of virtue.

OUR BOYS AND GIRLS.

THIS IS THEIR DEPARTMENT OF THE PAPER.

Quaint Sayings and Cute Doings of the Little Folks Everywhere, Gathered and Printed Here for All Other Little Ones to Read.

Millie and papa and bonnie Brown Bess, the pretty horse with the seal-brown coat, were out for a winter's sleigh-ride.

All at once papa said, "A rabbit ran along beside the road here this very morning, early. He was in no hurry, but went along as though he were out simply for a stroll! When he got as far as this some snow fell off that tree over there and gave Bunny a great start. How he ran! Pretty soon he stopped, stood up on his hind legs and looked all about."

"Why, papa," cried Millie, "you sound just like a fortune-teller! How do you know what happened here this morning?"

Papa laughed. "Then the rabbit started off as fast as he could go," he went on. "Along about here he began to get over his fright, and went more slowly." They were just going down a short hill. At the foot of it papa said. "At this point a partridge had been having his breakfast, and Bunny stopped to see what the bill-of-fare had been."

Millie was too astonished now to say "Oh!"

Brown Bess was trotting gaily along as papa went on. "After Bunny had gone by this place a big dog got over that stone wall and started after him, though the rabbit wasn't in sight, for the animal was only going at a 'dog-trot' when he went along here!"

Pretty soon papa said, "There, I feel relieved! The dog changed his mind when he got here and gave up following Bunny! Maybe he suddenly remembered how he could get a breakfast a good deal easier."

Millie had found her voice by this time.

"Papa Harold," she said, "do tell me this minute how you know all that!"

Papa laughed again. "By the tracks along the roadside," he said. "It stopped snowing about 4 o'clock this morning, so the tracks must have been made after that. Rabbits' tracks are in pairs, side by side. When Bunny went slowly the pairs of tracks were near together. I knew he was frightened by a bit of falling snow, because I saw where a little bunch had fallen, and from there on for several rods the pairs of tracks were far apart. That meant he was running.

"There was a peculiar pressure in the snow that meant to me, 'Here Bunny stood up to see what that soft noise was.' He felt satisfied that no harm was near, because his tracks were near together after that. I saw where a partridge had dug away the light snow to find its breakfast, leaving its footprints in the snow, and Bunny's tracks showed that he stopped and looked into the hole. I knew a dog's track, too, and followed his course in the same way."

"Why, papa," said Millie, "it's just reading a page out of 'Nature's Story-Book,' isn't it?"

"Yes," said Papa Harold, "a white page, with the writing all done by the author's feet!"—Youth's Companion.

Odd Signs of Respect.

The people of different races have ways of their own of greeting one another. Some of these ways are very queer—to us. For instance: When an Esquimau wishes to show admiration and devotion to another man he pulls the man's nose. The greater his respect the harder he pulls. That being the case, it would seem that a man who placed much value on his proboscis would not strive to become popular. Some tribes of Hindoostan show respect by stretching out the arm and placing the tip of he thumb on the other's nose. In South Africa a man turns his back to his superiors. As a general thing, South Sea Islanders sit down when speaking to a person of higher rank than their own—which is just the oposite of our rules of etiquette. A Chinaman's idea of showing respect is to put on his hat where we would take it off. Another thing worth noting is this: That most common method by which our relatives express their affection when meeting—namely, kissing—is looked upon as sure evidence of heathenism by many people—as native Australians, New Zealanders, Papuans and Esquimaux, for instance. They never think of such a thing. Their laws of propriety don't allow it. If a mother over there should kiss her little boy or girl she would be regarded as a "crank" and excluded from good society.—Chicago Record.

His Sister Has Her Choice.

Mamma—Bobbie, I notice that your little sister took the smallest apple; did you let her have her choice, as I told you to?

Bobbie—Yes; I told her she could have the little one or none, and she choose the little one.

He Knew Willie.

"George," said his mother, "I will not whip you this time, if after this you promise to be a good little boy like Willie Jones."

"Mamma," said George, earnestly, "whip me, please."

Moving Out of the District.

A little girl of Los Angeles, whose family was about to move to Arizona, and who had heard that country spoken of as a forlorn and particularly God-forsaken place, was saying her prayers at her mother's knee the night before their intended departure. She said all she had been taught, and then, with peculiar emphasis, she said: "Now, good-by, God, for to-morrow we are going to Arizona."

LONGEST KNOWN.

The Sentence Pronounced Upon an Italian Swindler.

The tribunal of Modica, in the Sicilian province of Syracuse, has just pronounced a sentence which is declared to have no parallel in the judicial annals of Italy, as it has probably few in those of any other country. A man named Lupo Salvatore, of Comiso, had passed himself off as an advocate, and had with consummate skill committed sixty-three different acts of serious fraud, in which he succeeded in using the machinery of the law. He had forged the signatures of the president and judges of the high court, of the king's procurator, and of the chancellor of the court. From this last-mentioned official he had even, with splendid audacity, stolen for a short time the seal of the chancery, which he needed to give effect to his fraudulent documents. The sentence is even more remarkable than the crimes. Salvatore was condemned to three years' imprisonment on each of the sixty-three cases, which brings the total of the sentence to 189 years, though the longest incarceration which the convict can be legally made to undergo is thirty years. The penalty inflicted is in each case the minimum for the offense. Had the court decided upon the maximum, which is ten years, the aggregate term of imprisonment would have been 630 years.

The man who changes a counterfeit bill returns good for evil.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JUNE 2.....1899

In a powerful and elegantly written leader on the subject of the peace conference the editor of the San Francisco *Call* says: "It is well to look facts in the face. We are no longer propogandists of the principals of the Declaration of Independence, but we are abroad in the world standing on the mere physical brutalities of the Ostend manifesto. The temples of the Prince of Peace are closed and that of Janus is opened. The declaration of Colonel Denby, Commissioner to the Philippines, that having the power to do so we propose by aggression and conquest to take by force, wherever we find it, whatever we find will be to our material advantage, is a frank expression of our present attitude to the rest of the world. Our old policy has demonstrated, in a short century and a quarter, a brief forenoon in the life of a nation, its wisdom in its results in the progress we have made. The opposite policy upon which we have entered is a novely to us, but its results may be studied in the imperial experiments which have gone before. In the conference we have nothing to offer in our former character of a non-military republic. We are there just as the other glory-seeking nations are there. Before us and before their vision rises the glorious panorama of Asiatic splendor. The aroma of the bloom islands of the tropical sea is in every nostril. Populations of peaceful people, incapable of defense, numbering three-quarters of a billion souls, bend to their tasks, while their countries welter in sunshine and invite conquest and spoilation. The weak everywhere shade there eyes and scan the horizon in vain for a friend. Justice has no temple in which they can have a day in court against the strong. In the conference we are estopped from pleading their cause. It is doubtful if even the cruelties of war will be checked by agreement. The world's sky is full of hawks, and the dove of peace flutters to the jungle for safety."

The State Board of Agriculture is anxious to give the next State Fair a State character and make it as broadly useful to every section of the State as possible; to make it the medium for the supplying of agricultural and industrial information, the promotion of internal developments and the encouragement of desirable immigration. To this end the Directors of the State Society have addressed letters to the Supervisors of all the counties proposing that an exhibit of the products of each county be prepared for the approaching State Fair. A separate portion of the exhibition pavilion will be set apart for these county exhibits which will be set up by the Society without expense, and a proper and qualified attendant will be put in charge who will present and explain them in detail to travelers and the general public. If the county or any Board of Trade, immigration society or Chamber of Commerce organized within it desires to supply any literature or printed matter for distribution in connection with this display it will be so distributed by the person in charge. These exhibits, when properly prepared, will be of principal importance to the counties making them, but when all prepared will constitute an industrial and agricultural map of California, and will be of such general benefit that it is to be hoped that every county will, with proper public spirit, contribute its share.

It is undeniable that in every State in the Union efforts are surely but quietly being made to commit Federal Senators on the score of friendship to the reversal of uniform precedents and the violation of clear and distinct constitutional law, by seating Mat Quay, under the appointment of the Governor of Pennsylvania, after he had failed of an election by the joint committee of the Legislature of that State. It is hard for intelligent and patriotic citizens to conceive that their great national council, filled with the representatives of autonomous American States, occupying a legislative position analogous to the judicial distinction of the Supreme Court of the United States, in the plan of its construction and in its historical dignity powerful and grand beyond comparison, should be even suspected of an intention to sacrifice its honor for personal considerations. Such a calamity is not to be lightly anticipated. But there are many indications that it is believed to be possible. Should it actually occur it will be accepted throughout the world as positive evidence tha the Federal Senate is a "millionaire club," and as conclusively proving the necessity of placing the power of selection directly in the hands of the people.

Stories of the fabulous richness of the newly discovered placers in Lower California are beginning to find their way into the daily papers. The mines are reported to exist over a tract of country twenty miles square. There is absolutely no water, no means of obtaining supplies within several hundred miles, and the chances are that the Mexicans in whose country these deposits are found will secure the best of the ground, and no doubt have already done so. Still the rush has commenced and may assume large proportions, dependent somewhat upon the continued success of those now in the field. Reports of large and fabulously rich ledges, mother lodes and other like fanciful deposits of gold galore may now be looked for from the same source.

General Gomez intends to visit President McKinley. It is a safe wager that the Cuban general will not discuss [illegible] as equally embarrassing to tell what he did.

FORCING ASPARAGUS.

Simple and Profitable Ways of Doing It In the Field.

Asparagus is commonly forced by transplanting mature roots to some warm place, as in hotbeds or under greenhouse benches. Strong plants 4 or 5 years old are removed from the field late in the fall with as little damage to them as possible and stored in a cold place until wanted for forcing, when they are set close together in the beds prepared for them and covered with several inches of soil. In about two weeks cuttings can be made, and the plants will continue to yield for about six weeks. Since forced plants do not grow by becoming rooted in the soil, but are produced from material stored up in the roots the previous summer, when this reserve material is exhausted the roots must be thrown away and replaced by others. Commenting upon this method as a rather wasteful and expensive one of forcing asparagus, a recent bulletin of the department of agriculture enumerates various means which have been devised to force asparagus in the field, where it is so well established that it continues growth in the summer as though it had not been forced the previous winter.

A simple and rather common method of accomplishing this is to place barrels or half barrels over clumps of asparagus very early in the spring and pile fermenting manure about them, the warmth from the manure forcing the shoots into rapid growth. When the forcing season is over and danger from frosts is past, the barrels are removed and the plants continue growth in the open air.

Sometimes asparagus is forced by placing frames covered with sash over the plants in the field, the rows of asparagus being set rather close together. This is considered a very profitable method by many market gardeners.

Another method of forcing asparagus in the field is to dig ditches between the rows and fill them with fermenting manure. The surface of the bed may also be mulched with manure. Sometimes brick tunnels are laid between the rows and hot water pipes placed inside them to furnish the heat.

Tillage Unlocks Plant Food.

Writing of potato experiments at Cornell university, a correspondent of The Rural New Yorker says that for several years the experiment station has been making a careful study of tillage and the plant food of the soil. Potatoes have been grown upon a soil which carries far less plant food than the average soils, yet without any commercial fertilizers or barn manures crops have been grown which are far above the average of the state. The secret of the uniformly good results, if there is any secret, seems to lie in tillage. The soil, which is gravelly, is most thoroughly prepared before the potatoes are planted. The seed is deeply covered, and then intensive culture is practiced. Bordeaux mixture and paris green are freely used, and the foliage is preserved from attacks of the beetles and blight.

A HEALTHY POTATO PLANT.

The most important lesson which has been derived from the experiments so far is that complete and thorough preparation of the soil before planting the crop is of the utmost importance. No after tillage or spraying can make amends for a lack of proper preparation. The figure, from the paper mentioned, shows how a healthy potato plant should grow and how the tubers form in the soil when it is perfectly fitted. Wide, deep furrows were made and the seed pieces were dropped in by hand.

Making a Hotbed.

The American Cultivator tells that the right way in preparing a hotbed is to make a stout frame of heavy plank and sink this into the ground a foot or more deep. All the part below the surface should be filled with horse manure and soil to the depth of five or six inches should cover this. The frame should front to the south, and its rear side should be six inches higher than its front. It is likely that for a time the horse manure will make the soil above it too hot to grow good plants. But after it has cooled down the hotbed made now will give much better satisfaction than one hurriedly put up only two or three weeks before it is needed for use.

One Thing and Another.

Alfalfa hay from the fourth cutting was found to be fine, green and just the quality for feeding to hogs at the Kansas station. Some farmers claim that they realize from $40 to $50 per acre a year from alfalfa.

It has been officially estimated that of the 600,000,000 acres of public lands yet remaining the water supply is sufficient to reclaim about 70,000,000 acres. Of this the intermountain states have: Colorado, 8,000,000 acres; Utah, 4,000,000 acres; New Mexico, 4,000,000 acres; Idaho 7,000,000 acres; Wyoming, 9,000,000 acres; Montana, 11,000,000 acres.

The Irrigation Age says the splendid snows this winter have made sure the water supply for the leading irrigation districts for 1899, and the farmers may smile.

L. H. Read of Wisconsin tells in The Rural New Yorker that in his opinion the Japan Panicum Crus Galli introduced by the Hatch experiment station of Massachusetts is the most valuable forage plant that has been introduced in the last 25 years.

The Honeymoon.

An early Anglo-Saxon custom, strictly followed by newly married couples, was that of drinking diluted honey for 30 days after marriage. From this custom comes the word honeymoon or honeymonth.

ABSORBED IN WHIST.

A Game That Cost General Doubleday a Fortune.

Not many years ago a famous whist game was played at Sudbury, Vt., two of the sitters in being General Doubleday and Henry Dater of the well known firm of Dater, Thompson & Co. It was something like 5 or 10 cents a corner; so you see it was easy for a man to lose as much as $1.90 in an afternoon. Play began after the Sudbury dinner hour, half past 1, and lasted until tea time. The old roosters became so wrapped up in the game that nothing short of an earthquake could have disturbed them. Brokers in New York could do nothing to shake the interest.

The game was played at the time of the historic Hannibal and St. Joe corner, engineered by Kennedy, Hutchinson & Co., in the interest of their client, John Duff of Boston. Doubleday was selling the stock short through Van Schaick & Co., and at a quarter to 2 on the eventful day he received a telegram from his brokers advising him of the situation. The game was stopped just long enough for him to read it and lay it aside. In 20 minutes a second dispatch arrived, was read and cast aside. Doubleday was winning at the rate of 35 cents an hour. What did he care about Hannibal and St. Joe? Later in the afternoon a third summons came from Van Schaick & Co., and at 5 o'clock a fourth. Then Doubleday arose and remarked: "Gentlemen, I have enjoyed the game. My winnings are exactly $1.65. I must say good afternoon, as it is necessary for me to take the first train for New York." The next morning his brokers informed him that he could settle for $100,000. At the time the first telegram was sent he could have settled for $25,000, at the time of the second for $50,000, the third for $75,000. He had ample warning, but in the thick of the Sudbury game of whist he believed the rise was only a threatening flurry.—New York Press.

SCOTCH SIMPLICITY.

The Mason, the Budding Architect and a Conscience Stricken Lad.

The Scotch are fond of telling stories which illustrate the peculiar simplicity of mind of their country people. This simplicity at least saves them from wicked guile.

One of these stories relates that an honest mason once had a contract to build a small house of stone. He came early and began from the inside to lay the stone, working very fast. At noon his young son brought him his dinner, peeping over the wall as he handed the basket to his father. With honest pride in his eye, the mason looked over to the boy.

"Weel, Jock, hoo d'ye think I'm gettin on?" he asked.

"Ye're getting on famous, feyther," answered Jock, looking at the solid wall, in which there was no break. "But hoo d'ye get out?"

The mason looked around. It was true. He had provided the house with no door at all, and he was on the inside. He looked kindly and very admiringly at the boy.

"Mon, Jock, ye've a grand heid on ye!" he exclaimed. "Ye'll be an architect yet, as sure as yer feyther's a mason!"

Another story shows how unsuccessful as a thief the rustic Scot may be. Two young plowmen went into a garden at night to steal gooseberries. The bushes surrounded a plot of potatoes, and as one of the lads groped about he got a handful of potato plums, which he quickly put into his mouth. Then he gasped to his comrade:

"Oh, Jock, I'm poisoned! For ony sake, shove me through the hedge again, for I wandna like to dee i' the auld man's gairden!"—Youth's Companion.

Tobacco In England, 1845.

When I was a lad, fully half the population of both sexes, rich as well as poor, the banker equally with the workingman, were snufftakers. My first schoolmaster always carried his snuff loose in his waistcoat pocket, and innumerable were his dips into it with two fingers and a thumb in the course of the day, while the big gauffered frill which protruded from the bosom of his shirt was always thickly sprinkled with it. We used to notice that he never seemed to relish one of his huge pinches so much as immediately after having administered a sound castigation to some recalcitrant pupil.

On the other hand, there was little or no open air smoking, except in the case of laboring men going to or from their work. In this respect lucifer matches have something to answer for; but for them the practice of outdoor smoking would never have grown to its present enormous proportions.—Chambers' Journal.

An Unexpected Call.

"You are just going out, I see"—

"Yes, an important engagement. What was it you wanted?"

"It was about that little debt I owe you."

"Ah, yes! Take a seat."

"I was going to ask you for a little delay"—

"Oh—excuse me, but I'm already late."

"I say, I was going to ask you for a little delay when I met a fellow who paid up what he owed me, and"—

"Why on earth don't you sit down? Will you take a glass of wine?"—Paris Figaro.

No Faith In Anything.

"Aunt Josephine is a thorough skeptic."

"She is?"

"Yes; she puts mucilage on the back of every postage stamp she uses."—Chicago Record.

Things That Are Told.

A German experimenter is said to have demonstrated that about 30 per cent of marl added to a manure heap reduced the loss of nitrogen 60 per cent.

C. W. Martfeldt says in the St. Louis Republic that sugar beets, like the Chinese or African sugar cane, cannot be grown for sugar on lands recently fertilized, either by farm or commercial fertilizers. Of course the fertilizers will ordinarily produce large beets, but these will have only a low percentage of sugar.

Pull out the stumps of peach trees cut down on account of the "yellows." Sprouts will shoot out from them, and the disease will thus spread as well as if the tree had been left. Might as well have them for winter fuel, says The Farm Journal.

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending March 31st, 1899.

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

Notice of Forfeiture

STATE OF CALIFORNIA } ss
COUNTY OF INYO }

To FRANK COLE and JOHN SULLIVA.

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, called and recorded in the mining records of said County, as the "Black Rock mine," as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under Section One of an Act entitled "An Act relating to the working rights of way, easements and drainage of mines in the State of California," approved March 3, 1891.

FRANK HARRIS.

Dated January 13, 1899.

Notice of Forfeiture.

STATE OF CALIFORNIA } ss
COUNTY OF INYO }

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, called and recorded in the mining records of said county, as the "Flora mine," as will appear from certificate filed in the office of the County Recorder of said Inyo county, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under Section One of an Act entitled "An Act relating to the working rights of way, easements and drainage of mines in the State of California," approved March 3, 1891.

NOTICE IS HEREBY GIVEN by the undersigned, Executors of the last Will and Testament of

EDOUARD CHENOT

deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice to the said Executors, at the residence of P. W. Forbes, in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of the said estate in the County of Inyo, State of California.

J. E. SHEPHERD and
W. L. HUNTER,
Executors of the estate of Edouard Chenot deceased.

Dated at Independence, Cal., November 30th, 1898.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

Notice is hereby given by the undersigned, administrator of the estate of Luther Clarke deceased, to the Creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Ten Months after the first publication of this notice to the said administrator at his place of business on Edwards Street in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

J. C. IRWIN,
Administrator of the estate of Luther Clarke, deceased.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Edouard Chenot, deceased.

It appearing to this Court, by the petition this day presented and filed by J. E. Shepherd and W. L. Hunter the Executors of the Last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said decedent, to pay the debts of decedent and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said Superior Court on MONDAY, the 29th day of May, A. D. 1899, at 10 o'clock a. m. of said day, at the court room of said Court, at the Court-house, in the town of Independence, in the county of Inyo, State of California, to show cause why an order should not be granted to the said Executors to sell so much of the real estate as shall be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated April 24th, 1899.

P. W. FORBES, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 24th day of April, A. D. 1899.

D. J. HESSION,
Clerk.

(SEAL)

By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the Estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by this Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this Fourth day of May, A. D. 1899.

D. J. HESSION,
Clerk.

Methodist Church.

During my absence in Nevada there will be no preaching service at any of the Independence Charge appointments. Sunday-schools, however, will meet as usual. Due notice will be given of when there will be preaching service again.

JOHN J. PARDEE, Pastor.

DIED.

CLARKE—At Bishop, June 1, 1899, Edward M. Clarke, a native of California, aged 32 years.

Miss Mamie Hession is visiting relatives at Big Pine.

Frank Sherrer, Esq., returned to San Jose to-day after a three weeks pleasantly spent here.

E. T. Anderson, of Barnes & Anderson, left for Los Angeles last Monday to be gone about two weeks.

Silas Reynolds arrived home last week from Randsburg and will remain a short time visiting with his parents.

L. F. J. Wrinkle arrived home on Wednesday's train from Virginia City, where he went to survey some mining ground that was in dispute.

Mrs. A. V. Davidson and Miss Nettie Irwin will arrive home to-morrow morning. The former has been visiting at Redlands, and the latter has been attending school at El Paso, Texas.

Miss Matilda Meysan returned to her home at Lone Pine on Wednesday's train, her term of school at Big Pine having closed last Friday. Miss Meysan is one of the most popular young teachers in the county.

C. H. Radcliffe arrived at Independence last Tuesday from Ballarat, and left for Sacramento yesterday morning. Mr. Radcliffe is the discoverer of the famous Radcliffe mine at Ballarat now owned by Godsmark & Harrison.

Clifford Baxter arrived home from San Francisco yesterday. He came by stage to Sequoia, and from there he walked. He camped at Bull Frog near the summit of the Sierras on Wednesday night, and a foot of snow fell. John Bell met him there yesterday.

Superintendent Hoskins of the Reward states that his company expects to resume operations in a very short time. This will be good news to everybody in the vicinity, as it gives employment to a large force of men with the consequent consumption of supplies.

John E. Jones Jr. of Round Valley, accompanied by Mrs. Jones, has been visiting the southern end of the Valley this week. The Cambrian Flouring Mill has established a reputation for turning out a fine article of flour and he is having no difficulty in placing his orders.

Those who have pianos that need tuning will be pleased to know that R. S. Gibbs, who scattered harmony throughout the county two years ago, is to make another trip through here early in June. Don't miss the opportunity to have your piano well tuned and renovated.

Coe & Tracey last week finished up a run of forty tons of ore from the old McMurry mine at Fish Springs now owned by Jerry Mairs. A. K. Eubley shipped the bullion on Tuesday's train, and it will yield about $1,000. Mr. Coe has transferred his interest to Arthur Cole.

Ten Chinamen arrived here Wednesday evening from Hawthorne to work for the California Borax Company at Salt Wells Valley. With the advent of warm weather it was found that the white men employed could not stand the heat, and it made the employment of Chinese necessary. Jerry Mairs left yesterday with the entire outfit loaded on a six-horse team for the works.

Patrick Reddy, formerly State Senator from San Francisco, will act as counsel for the union miners of Wardner, Idaho, in their struggle with their employers. He is now at the outbreak. It is expected that the fight of the unions will be one of the most desperate of the country, and it is understood that the Standard oil and allied monopolies have determined to crush out the union—*Times*

E. Newman received a telegram yesterday, and he left on to-day's train. He will accept a situation with the Santa Fe people, and it is doubtful whether he will return here for some time, if ever. He has been interested in the Mazourka placers for several years and tried to induce capital to operate on a large scale, but so far his efforts have been unsuccessful. He has paid all his bills, and the only man in the world who has a kick coming is Newman.

MEMORIAL DAY.

How It Was Observed at Big Pine.

Nearly eight hundred people gathered at Big Pine from different parts of the Valley to participate in the observance of Memorial Day. The people of Big Pine had made every preparation to receive the visitors and the national colors draped many houses. At 10 o'clock, the Veterans, some forty in number, were ordered to fall into line, and under the able supervision of Marshall Stewart and assistant Marshall Collins the following order of march was observed: President of the Day Irv H. Mulholland, Orator P. W. Forbes and Chaplain Wilcox, G. A. R. Post, sons and daughters, grandsons and grand daughters of Veterans, children of the public school and Indian school, carriages. The flag of the Post was furled with a band of crape and wreathed with flowers, and a bunch of flowers decorated the breast of each Veteran. To the inspiring notes of fife and drum the column marched to the cemetery, where Chaplain Wilcox read the burial service of the Post over the graves of the soldiers buried there, and the Veterans decorated their graves with beautiful flowers and fired the parting salute. The rite was most impressive, and old and young alike were affected by the solemnity of the occasion, while in every breast the chord of patriotism was struck. After discharging this duty of love and respect to their departed comrades the members of the Post were royally received at the Church by the Ladies Aid Society, and a repast such as these ladies are noted for serving was spread before them. After the inner Veteran was refreshed Commander Shirley led the Post to Educational Hall where a large crowd had already assembled. After reading the orders for the day as issued and forwarded from the Department of California and Nevada, G. A. R., Mr Shirley introduced Irv H. Mulholland, President of the Day. After a few introductory remarks Mr. Mulholland announced the numbers of the programme which were rendered as follows:

Prayer.....Chaplain Wilcox
Music.....Choir
Recitation, Yankee Consul General, Jesse Thomas
Reading, Poem.....Mrs. Marion Collins
Music.....Choir
Recitation.....Miss M. L. Allen
Recitation, Music On The Rappahannock Miss Lilian Shirley
Music.....Choir
Recitation, The Pride of Battery B, Miss Clara Eldred
Music, Vocal Solo.....Miss Gertie Gunter
Oration.....Hon. P. W. Forbes
Reading, Lincoln's Address At Gettysburg.....Arthur Shirley
America.....Audience

The recitations and songs showed wise selection and careful preparation and were most appropriate for the occasion. Prof. Hampton's violin accompaniment to "Music On The Rappahannock" was very effective. The oration of P. W. Forbes Esq. was one of the happiest efforts of this well known speaker and was a noble tribute to the heroes in the ranks of both the blue and the gray. "The North" said Mr. Forbes, "had a foe worthy of its steel, or it could not take such credit to itself over the outcome of that terrible war. The men of the South, as well as the men of the North, showed their metal in the Civil war, and they proved it again fighting shoulder to shoulder in the late war with Spain. During the peaceful afterglow of thirty-five years each foe has had a glimpse of the opposite side of the shield and has realized that the point of view had everything to do with the attitude of the combatants. The Veterans may proudly do their share in binding up old wounds, healing old sores, in clasping the hands of the living and decorating the graves of the dead brothers of the South. By this perfect reunion of those who were estranged and the honoring of the dead heroes in both the North and the South, Memorial Day of 1899 will go down in the history of our great Nation as a day sacred indeed and one never to be forgotten."

With the singing of America the audience dispersed with the feeling of patriotism and reverence for our dead heroes fanned to a bright flame in every breast.

Montezuma

One of the first discoveries of mineral in this county was made by A. Walker of Olancha. In the early 60's he found a large quantity of lead boulders and float at the base of the Inyo range about 15 miles north of San Carlos. Subsequent search developed what is known as the Montezuma mine. A large mass of ore in ledge form was found but with the walls entirely broken up. A furnace was built at a point on the river near the mine, and about 2,000 tons of ore smelted. Development showed, however, that the deposit was only a slide or break, and a great effort was made by the company to find the main ledge, but they never succeeded. A few years ago Andy Fife and a man named Rochford came into possession of the property and under Mr. Rochford's direction a tunnel was started about 200 yards above the old workings. It was run 70 feet and a shaft sunk 23 feet, when the ledge was struck. From the shaft a tunnel was run 100 feet on the dip of the ledge and has developed an ore body varying in width from two to twelve feet in well defined walls with clay casings. At a point where there is ten feet of ore a drift has been run 30 feet, all in ore. This is the extent of the development. The property is now owned by Thos. W. Hill and J. H. Coe of Big Pine. The ore is low grade lead carrying galena and carbonates, and varying from 12 to 30 per cent. It will average about 16 ounces silver per ton and carries some gold. The owners are experimenting with concentrates, and if the ore can be successfully handled in this manner it will prove a valuable property.

Obituary.

We were greatly shocked last evening by receiving a telegram from Bishop announcing the death of Ed. M. Clarke It was not known here that he was ill. The deceased was a most exemplary young man, was well known throughout the county and held in the highest esteem for his worth and integrity. He was the first white child born in Bishop, and with the exception of a college course at Toronto, Canada, spent all his life here. He early evinced a love for animals of all kinds and took up the study of veterinary practice, eventually graduating from the greatest Veterinary college of America, that of Toronto. About six years ago he was united in marriage with Miss Mamie Coughlin, who with their one child survives him. When one is prepared for and expecting the end by long sickness or advanced age it is even then a sad shock; but when a young man is cut down in the full flower of his manhood with little or no warning, the pain and sorrow are almost unbearable. Human sympathy is a weak and simple thing to offer, but the bereaved ones have that of the entire county. If there ever was a person without an enemy and universally beloved, it was poor Ed Clarke

Real Estate Transfers.

The following deeds have been recorded since May 25, 1899.

Harry Lockett to E. T. Anderson—May 23, 1899; undivided ½ int in Mayflower mine, Beveridge Dist., $5.

C. A. Burcham and J. D. Snyder to Menlo Mining Co.—May 10, 1899; Santa Rosa and Santa Cruz mines, Argus Dist., $7,500.

It started to rain yesterday afternoon and for an hour poured heavily. It continued falling lightly through the night, and it is cloudy to-day. Considerable snow fell on the Inyo range and some on the Sierras. The storm will prove of great benefit to the southern end of the Valley. Aside from the direct advantage of wetting the ground, it greatly facilitates the spreading of irrigating water, and the cloudy weather reduces evaporation to a minimum. For the time it lasted it was the heaviest downpour we have had for three yeaas.

E. M. Dineen, wife and child are guests at the Norman House.

R. S. Miner Esq. left for Bodie on Tuesday last.

LEGAL.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above-entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant, James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 142, I am commanded to sell, and by said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, State of California and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, State of California, to which record reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances there unto belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United States.

WM D DEHY, Commissioner.
Dated at Independence, Inyo Co., Cal., May 25th, 1899

DESERT LAND-FINAL PROOF.

A STRONG MAN'S SECRET.

The strongest man on earth says the secret of his wonderful power is perfect digestion. Hostetter's Stomach Bitters makes digestion easy, and cures all complaints arising from a weak stomach, such as indigestion, biliousness, liver and kidney ailments. As a tonic it is marvelous. Everybody needs it at this time of the year.

Mme. de Girardin: It is not easy to be a widow; one must resume all the modesty of girlhood, without being allowed even to feign ignorance.

SHAKE INTO YOUR SHOES.

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Now that a base ball trust is threatened its definition is plain: "rust—Confidence; base ball—a game; e. g., a confidence game. "Quod erat demonstrandum."

To Cure a Cold in One Day.

Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure. 25c.

It is generally the man with castles in the air who has no real estate.

A Household Necessity.

Every home should have handy for use a little box of Cascarets Candy Cathartic, as a perfect guardian of the family health. All druggists, 10c., 25c., 50c.

The man who lives by his wits alone is always the pawnbroker's best customer.

DEAFNESS CANNOT BE CURED

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE LTD. 930 Arch St., Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

I never used so quick a cure as Piso's Cure for Consumption. —J. E. Palmer, Box 1171, Seattle, Wash., Nov. 25, 1895.

The projected peanut trust is probably the biggest shell game yet, but the farmers will work it on the city chaps this time.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

A Wonderful Appetite.

The digestive power of the heron is remarkable, as well as its capacity and ability to swallow large fish, says Forest and Stream. The neck seems to expand as if made of india rubber—the fish slips down, and the bird is ready for another. In eating beef, large bones are swallowed intact. On one or two occasions after feeding beef this way, great alarm was felt, as the birds showed signs of great distress, but the uneasiness was soon calmed when the bird threw up a large bone, clean and white, the meat having been thoroughly digested.

In eating catfish they instinctively pierce it with their strong beaks, until there is no question in their simple minds but that it is harmless. If in their hurry to swallow their food, it goes down the throat covered with sand or trash, they immediately eject it, carry it to the water and, having rinsed it well, swallow it again.

The Intelligent Jury.

Law court stories were especially attractive to Hicks, and he told many of them. His great story, which was almost a dramatic sketch, was of the acquittal of a Cornish doctor who was charged with the murder of his mother-in-law by mixing arsenic with a dish of rabbits and onions, which he gave her for supper. The setting of the court, the swearing of the jury, the speeches of counsel, and the judge's charge were all related by Hicks with marvelous humor.

The climax to the fun was the confabulation of the jury as to the verdict they should give, and their individual reasons for returning a verdict of acquittal—from the juryman who "didn't hold with old 'oman eating rabbits and onions for supper" to the juryman who declared that "it wasn't a ha'po'th of odds to him, and 'twas but an old 'oman."—Cornhill Magazine.

"Durability is Better Than Show."

The wealth of the multimillionaires is not equal to good health. Riches without health are a curse, and yet the rich, the middle classes and the poor alike have, in Hood's Sarsaparilla, a valuable assistant in getting and maintaining perfect health. It never disappoints.

Scrofula—"Three years ago our son, now eleven, had a serious case of scrofula and erysipelas with dreadful sores, discharging and itching constantly. He could not walk. Several physicians did not help for sixteen months. Three months' treatment with Hood's Sarsaparilla made him perfectly well. We are glad to tell others of it." MRS. DAVID LAIRD, Ottawa, Kansas.

Nausea—"Vomiting spells, dizziness and prostration troubled me for years. Had neuralgia, grew weak and could not sleep. My age was against me, but Hood's Sarsaparilla cured me thoroughly. My weight increased from 125 to 145 pounds. I am the mother of nine children. Never felt so well and strong since I was married as I do now." MRS. M. A. WATERS, 1329 33d St., Washington, D. C.

Eczema—"We had to tie the hands of our two year-old son on account of eczema on face and limbs. No medicine even helped until we used Hood's Sarsaparilla, which soon cured." MRS. A. VAN WYCK, 123 Montgomery Street, Paterson, N. J.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; non-irritating and the only cathartic to take with Hood's Sarsaparilla.

Belief.—You can not make a man believe in a God that you do not convince him you believe in yourself.—Rev. Dr. Parkhurst, Presbyterian, New York City.

Trust.—Trust is a positive, helpful virtue or grace. Distrust, in its very nature, is negative and destructive.—Rev. T. Jefferson Danner, Episcopalian, Pittsburg, Pa.

Influence.—Like produces like, and all influence, good or bad, makes an eternal imprint on thought and character.—Rev. Benjamin F. Fritz, United Brethren, Columbus, Ohio.

A Transition Period.—Another transition period has come to the race, with its struggles, its anxieties, its perplexities.—Rev. George V. Stone, Unitarian, Kansas City, Mo.

Effective Work.—We will be effective in doing God's work in proportion to the experience we have had of God's love and power.—Rev. J. F. Carson, Presbyterian, Brooklyn, N. Y.

Familiarity.—Familiarity without appreciation makes things seem commonplace. It is here in the commonplace lives that men are living that their best work is done.—Rev. George L. Perrin, Universalist, Boston, Mass.

Revival of Religion.—In order to obtain a widespread revival of religion, for the quickening of dormant energies and the saving of the unconverted, there must be increased liberality.—Rev. Dr. Adams, Methodist, Brooklyn, N. Y.

Christianity.—Christianity is large in its orbit, its spirit universal, its heart is as large as the world. But still we must remember "that he that careth not for his own is worse than an infidel."—Rev. J. A. Milburn, Presbyterian, Indianapolis, Ind.

Human Experiences.—All our human experiences are the opportunity for divine possibilities to appear, the means by which we prove God and our relation to God, and what is possible to us because of that relation.—Mrs. Gestefeld, Christian Scientist, Chicago, Ill.

The Basis of Existence.—There is but one law in all the spiritual, moral and physical universe. It is the basis of existence, and by its operation the universe and all it contains exist, and it is coexistent with all that is.—T. B. Wilson, Theosophite, Kansas City, Mo.

The New Thought.—To the new thought, space is the presence of God, time the order and sequence of his will, nature the unfolding of himself. His force is equally present in the remotest star and in the heart of man.—Rev. Dr. Samuel R. Calthrop, Syracuse, N. Y.

The Tendency of the Times.—The tendency of the times is to search for truth, no matter where it may lead us. No truth ever came ready made from heaven, the idea being that the mind of man must first be prepared for what is to follow.—Rev. Gustav Gottheil, Hebrew, New York City.

The Corner-Stone of Our Liberty.—Another step in the education of the children that has not, I believe, been recognized is, that not only should the head and hand be taught, but the soul as well. It is the corner-stone of our liberty.—Rev. William S. Rainsford, Episcopalian, New York City.

True Theocracy.—The true citizen should first practice right principles in his own street, then in his own city, then in his own State, and then for the benefit of the nation at large. That is the sequence in a true theocracy, and a true theocracy is a true democracy.—Dr. E. G. Hirsch, Hebrew, Chicago, Ill.

The Hardest Work.—The hardest work is to make men realize that power does not mean privilege; that power means responsibility. It is difficult to make men realize the greatness of the divinity of Christ, in getting them to realize the need of a Savior.—Rev. Dr. Storrs, Congregationalist, Brooklyn, N. Y.

BISMARCK'S TOMB.

Sarcophagus in Which the Remains of the German Prince Will Rest.

The accompanying sketch represents the sarcophagus in which the remains of Prince Bismarck will rest in the new mausoleum at Friedrichsruh. The sarcophagus, writes a Berlin correspondent, is constructed of marble found in

BISMARCK'S TOMB.

the Bavarian Alps. Its delicate rose tint gives it a much warmer appearance than the usual white marble. The base is of black syenite. It is 8 feet 10 inches long, 4 feet 7 inches wide, and 5 feet high. The end bears the inscription designated by the great Chancellor himself, viz: "Fuerst von Bismarck. Geboren 1 April, 1815; gestorben 30 Iuli, 1898. Ein treuer deutscher Diener Kaiser Wilhelm I." (A faithful servant of Kaiser Wilhelm I.)

Practical Charity of a King.

King Oscar of Sweden and Norway, always ready with his purse in the promotion of scientific research, appears to have rendered a great service to mankind by having, at his own expense, caused a deaf and dumb man to be trained under a certain system of massage of throat, ears, etc., advocated by a great Swedish surgeon, with the result that the lucky patient has begun to speak and can hear.

Correct.

"What is raised mostly in damp climates?" asked the teacher.

"Umbrellas," replied Johnny.—London Tit-Bits.

The woman's idea of a thoroughly good husband is one who is better to his wife's kin than to his own.

It is a matter of surprise when some people die that their acquaintances don't plant their graves in smartweed.

"I DO MY OWN WORK."

So Says Mrs. Mary Rochiette of Linden, New Jersey, in this Letter to Mrs. Pinkham.

"I was bothered with a flow which would be quite annoying at times, and at others would almost stop.

"I used prescriptions given me by my physician, but the same state of affairs continued.

"After a time I was taken with a flooding that I was obliged to keep my bed. Finally, in despair, I gave up my doctor, and began taking your medicine, and have certainly been greatly benefited by its use.

"Lydia E. Pinkham's Vegetable Compound has indeed been a friend to me.

"I am now able to do my own work, thanks to your wonderful medicine. I was as near death I believe as I could be, so weak that my pulse scarcely beat and my heart had almost given out. I could not have stood it one week more, I am sure. I never thought I would be so grateful to any medicine.

"I shall use my influence with any one suffering as I did, to have them use Lydia E. Pinkham's Vegetable Compound."

Every woman that is puzzled about her condition should secure the sympathetic advice of a woman who understands. Write to Mrs. Pinkham at Lynn, Mass., and tell her your ills.

Quaint Old Colonial Document.

New Amsterdam had been in British hands four years when this quaint and curious customs order, the oldest in existence and but recently unearthed from a mass of colonial records, was penned.

"Instructions for Mr. Cornelius Van Ruyven, Collector of the Customes in ye City of New York by Order of Colonell Francis Lovelace, Governour, May 24, 1668.

"You or y'r clerk are to be dayly at ye Custome House from nine in ye morning untill twelve at noone. There to receive ye Customes both in and out, as the Merchants shall come & enter, ye merchant is to make foure Bills, and signe them with his hand, writing his name to them, & ye same time, when you have signed ye Warrant, or one of ye Bills, you are to demand ye Custome, either in kinde at 10 P Cent inwards or double ye vallue of its first Cost in Holland, in Beaver. And likewise outwards for Peltry you are to receive 10½ P Cent according to ye vallue in Beaver, for Tobacco one half penny Pr. pound Ster'g; which is noe more than all Englishmen doe pay. * * * You to tell ye Merchant you are not to give credit. * * * If they doe not like your propositions, you are not to pass their Bills. * * *

"And Lastly pray lett ye Books be kept all in English and all Factoryes and Papers, that when I have occasion to satisfy myself I may better understand them."

Not Quite Satisfactory.

A dog belonging to a west side family has the sociable habit of visiting throughout the neighborhood. During a recent wet spell the dog went over to a next door house and "tracked" mud all over the front porch. The woman of the house was indignant. She sent word that the dog was a nuisance. The woman who owned the dog was offended. She resolved to make the complaining neighbor ashamed of herself.

"Mary, you take a bucket of warm water and a brush and go over and scrub Mrs. Brown's front porch," she said to the servant girl. "Make it cleaner than it has been in a year."

The girl did as she was ordered. Mrs. Brown stood in the front door and watched her, not at all abashed.

"That's very nice," she said when Mary had finished. "Now come around and begin on the back steps."

She kept the girl at work for two hours, and now there is a deadly feud.—Chicago Record.

Grows Stubborn.

Any complaint becomes chronic by neglect, and rheumatism grows stubborn by not using St. Jacobs Oil, which is its sure cure and conquers the pain promptly. Every sufferer should use it.

Polish Jehus.

To drive slowly over cobblestones is not a joy, but to drive four Russian horses at a gallop over cobblestones was something to make you bite your tongue and to break your teeth and to shake your very soul from its socket. I most solemnly assure you it was anything but a simple drive to one fresh from the asphalt of Paris, for, like Jehu, they drove furiously. Their horses are all wild, runaway beasts, and they drive them at an uneven gallop resembling the gait of our fire engine horses at home, except that ours go more slowly.

Sometimes the horses fall down as they drive across country, or stop only for stone walls or moats. The carriages must be built of iron, for the front wheels drop a few feet into a burrow every now and then, and at such times an unwary American is liable to be pitched over the coachman's head.

"Hold on with both hands, shut your eyes, and keep your tongue from between your teeth," would be my instructions to one about to "take a drive" in Poland.—Lilian Bell in Woman's Home Companion.

Sour Stomach

"After I was induced to try CASCARETS, I will never be without them in the house. My liver was in a very bad shape, and my head ached and I had stomach trouble. Now, since taking Cascarets, I feel fine. My wife has also used them with beneficial results for sour stomach."
JOS. KUEHLING, 1231 Congress St., St. Louis, Mo.

School Hygiene.

G. Stanley Hall has the right idea concerning school education. He tells us that "the great danger in our schools arises from imperfect health. It has become the custom in some countries that some of the best and most progressive city wards provide doctors to examine every child in the lower grades of the schools. This doctor examines the child's complexion, eyes, muscles, and as to appetite, etc., and gives directions according to the needs of the case. For myself, I say, 'what shall it profit a child if it gain the whole world of knowledge, and lose its own health? Or what shall a child give in exchange for its health? We have forgotten that children cannot sit still, yet it is one of the commands that resound in the school room from morning till night. We have found that the idea that children can sit still must be abandoned, and teachers must learn to possess their nerves and patience if the children do not sit still. We all live for life. There is nothing so good as being alive."—Journal of Hygiene.

Where Is the College-Made Man?

Andrew Carnegie having recently asked: "Where is the college made man?" the Superintendent of Schools in Sioux City, Iowa, has directed a systematic search for the missing individual, with no little success. A canvass of the leading men in the following named professions and occupations in the principal towns of Iowa gave these results, which are published in the Educational Review for March:

Profession.	Whole number canvassed.	College bred.	Per cent.
Ministers	67	60	90
Teachers	65	55	85
Lawyers	78	53	68
Doctors	85	52	60
Bankers	66	26	40
Editors	53	16	30
Merchants and manufacturers	119	31	26

—Philadelphia Record.

The School Grounds.

It will not be difficult to educate school boys to respect flower borders, window-boxes, vines, and shrubbery, if teachers themselves will display intelligent interest and affection for the school grounds. When these are of considerable size a great educational field can be opened by teachers who know something of botany, plant-growth, and forestry. Such surroundings can be employed to the highest advantage in cultivating in children observation, and in imparting elementary ideas of natural science. How many teachers are there who care for these things or are qualified to instruct children in the laws of plant-growth? We apprehend that there are comparatively few who do not need an elementary education in botany and forestry. The beginning of this educational reform really lies with the teachers themselves.—New York Tribune.

Praise for American Schools.

Dr. Krohn, a prominent educator, a graduate of Yale and who has studied in France, Germany, Austria, Italy and England, says that he is firmly convinced that the system of public schools in this country is far in advance of all other nations, but that our system has too much forcing, and unless much care is exercised in that regard it will tell on the children. He further says that precocity, unless carefully guarded and directed, is almost as dangerous as imbecility.

Any Language but Her Own.

A writer on one of the newspapers published in an Eastern city lately overheard a conversation between two high school girls. This, acording to his report, is what they were saying to each other:

"What do you think I done to-day, Clara?"

"Well, what did you do?" asked the other.

"I translated four pages of French exercises. Wasn't that fine?"

"Fine? I should say so. I wish I had done as good as that. I only translated two."

It is unnecessary to comment on such a revelation of the English spoken by promising young students of French, except to say that it must be some one's duty to teach them less French and more English. Sometimes we learn our own language the better for acquiring a knowedge of a foreign one, but that peculiar sort of philogical enlightenment comes only after we have acquired at least a fair speaking knowledge of our own tongue.

Quite a Land Collector, Too.

Cecil Rhodes is a man of varied tastes, of which his home at the Cape shows many signs. He has a fine library, and is a great reader, his predilection being chiefly for the classics. He is a collector of old things, and has some beautiful furniture, china and curios generally, and many oak chests. He also goes in for gardening, and has a menagerie, in which he keeps lions, ostriches, zebras and other animals, but does not confine them to cages. He incloses them in a huge tract of land on the mountain side.

How He Gets His Money Back.

Wyseman—I make it a rule never to ask a gentleman to return money he has borrowed of me.

Pratt—Then how do you manage to get it?

Wyseman—Oh, after I wait a reasonable time, if he fails to pay up, I conclude that he is not a gentleman, and then I ask him.—London Tit-Bits.

Expelling Foreigners.

Kaiser Wilhelm's tactics of expelling foreigners from Germany are being applied to Germans by some of his neighbors. Prof. Leo Mayer, for thirty-three years professor of comparative philology at the University of Dorpat, in Livonia, has been dismissed and a Russian appointed in his place.

One seldom hears life referred to as being a lottery except by men who have drawn blanks.

The next thing to worry about will be funnel-shaped clouds, with forked lightning playing about them.

A FIVE FRANC PIECE.

ONE THAT IS THE HOPE OF EVERY CREDULOUS FRENCHMAN.

The Story of Napoleon's Famous Coin and the Immense Fortune That Is Popularly Believed to Be Concealed Within It.

If you happen to have in your possession the particular French coin known as a 5 franc piece, you may unwittingly be a millionaire.

Such, at least, is the belief shared by hundreds upon thousands of credulous Frenchmen and Frenchwomen, many of whom spend most of their spare time destroying quantities of 5 franc pieces in the hope of realizing a fortune.

Dr. Marco-Leonardo Nardez, the well known numismatist and one of the recognized authorities on coin lore, speaking of this curious condition of affairs, said:

"It is quite true that half France still believes in the existence of great wealth hidden in a 5 franc piece, although many numismatists hold that the fortune in question was long ago discovered and appropriated by one of the Rothschild family.

"The story of the strange 5 franc fortune legend may be briefly told. A 5 franc piece, to begin with, is a silver coin, and is worth about 4s. 2d. Napoleon I was very anxious to make the coin a popular one, and with this end in view he caused it to be circulated everywhere throughout France that he had inserted in one of the silver pieces before it left the mint a bank note or order for 1,000,000 of these same 5 francs—roughly, about £200,000. Whether he really did this or not I cannot say for certain, but the weight of evidence would seem to show that it was done.

"In the manuscript memoirs of the Duc de Feltie, Napoleon's minister of war, it is expressly stated that the emperor inclosed a note on the Bank of France, duly signed by the governors of that institution, in a split 5 franc piece; that the halves were then welded together, partially reminted and thrown in a heap of similar coins, which the emperor mixed with his own hands. These coins Napoleon took with him in a bag when he went to Boulogne and distributed lavishly en route, even dropping some of them out of his carriage windows. In this way it was impossible to keep track of the lucky coin.

"The news of this odd lottery spread far and wide, and the 5 franc piece leaped into immediate favor. From that day to this mutilation of the coin has been common in France, Switzerland, Belgium and elsewhere. Every year the Bank of France is requested to make good scores of pieces split in a vain search for the 5,000,000 franc bank note.

"There are many stories dealing with reputed finds of the fortune. Indeed when a man becomes suddenly rich in France it is common to hear people whisper, 'He must have found Napoleon's famous coin.'

"Some assert that the emperor kept the coin himself, but this hardly agrees with Napoleon's character. Still it is a current theory that some of the money which enabled Napoleon III to reach the imperial throne was found in the lucky silver piece, which his mother, Queen Hortense, had wheedled out of her brother-in-law.

"It was also common talk that General Boulanger had acquired the famous coin until the discovery that his money supplies came from the Duchess d'Uzes set that belief at rest.

"The most likely explanation as to why the 5 franc piece fails to turn up is that Baron Ferdinand de Rothschild, a French member of the great Jewish banking house, secured it. This account states that Baron de Rothschild, having investigated the tradition and found sufficient proof of its truth, deliberately set to work to locate the note.

"He quietly bought in and collected every 5 franc piece he could get, and his agents were notified to preserve and forward to Paris every 5 franc piece which reached them in Europe, Asia, Africa or America. In his office the baron kept three trusty men hard at work bisecting the coins.

"Some say that he had invented a plan for welding them together again, so as to defy detection; others maintain that he melted down the silver and sold it to the government en bloc. The work was colossal, but in the end the baron's sytem is said to have conquered.

"He found the note for 5,000,000 francs, having spent nearly 1,000,000 to obtain it. The order was duly presented at the Bank of France and cashed by that institution.

"Plausible as this narration may seem, the great mass of Frenchmen refuse to credit it, and go on, year after year, splitting open their 5 franc pieces to look for Napoleon's note. It is certainly a tantalizing thought that somewhere in the world a check for £200,000 is knocking about hidden in an ordinary silver coin worth less than 5 shillings."—Pearson's Weekly.

Explained.

The Cleveland Plain Dealer tells a story to show that there is sometimes a great deal in the way of putting anything:

"I understand that you said my eldest daughter was as homely as a mud fence, professor."

"You are quite mistaken, my dear madam. What I said was that your esteemed child reminded me of a mixture of terra firma and aqua pura combined in a practical boundary line."

"Oh! Is that all? Dine with us on Sunday, professor."

In the eighteenth century begging was a frightful nuisance in the German states. In Bavaria whole regiments had to be sent out to arrest and punish the professional beggars, and Cologne, with a population of only 40,000, had nearly 10,000 paupers.

"We like the idea of simplified spelling," says the editor of the Perkins Junction Palladium. "But we don't think we could ever become used to writing it 'He wawkt down the ile, leeving the trax of his larj and muddee shuez on the flore. The marx ar vizzibl yet.'"—Chicago Tribune.

Feel the Influence.

Cold and heat alike aggravate neuralgia, because the nerves feel the cold and heat sensitively, but nerves are sensitive to treatment and feel the influence of St. Jacobs Oil, which cures the ailment promptly.

FOR THIRTY DAYS MORE YOU CAN TRY IT FOR 25 CENTS.

5 DROPS [TRADE MARK.]

Cured of Rheumatism.

CANNOT FIND WORDS ENOUGH TO PRAISE YOUR WONDERFUL REMEDY "5 Drops."

Swanson Rheumatic Cure Co., Chicago, Gentlemen:—I thought that I would write you a statement and tell you how I have got along since I have used your "5 DROPS." I must say that I am entirely well once more, **thanks to your wonderful remedy.** It has accomplished more good from the sample bottle and the dollar bottle than the thirty dollars worth of medicine I have used of other manufacturers. I tried all kinds of medicine I saw advertised for Rheumatism **but could not get any relief from the dreadful suffering till I got a sample bottle of your "5 DROPS,"** and after taking the same for a few days I began to have less of those severe pains racking through my body. After I got the sample bottle most used up I could begin to rest some every night; after I had used about half the dollar bottle then all my pains left me. **Oh! what a comfort it was!** when I could sleep again at night without any more suffering. I am so thankful to you and your "5 DROPS" that I cannot find words enough in praise of your wonderful remedy for the cure of Rheumatism, **and I can safely recommend it to all suffering humanity** and say that they cannot purchase any better medicine than "5 DROPS" for all their ills. Thanking you, gentlemen, for all your kindness, I remain, forever, your friend, R. M. LEE, Porterfield, Wis., Feb. 10, '98.

SUFERRED THE TORTURES OF THE DAMNED.

President Swanson Rheumatic Cure Co., Chicago. My Dear Sir.—After suffering the tortures of the damned for a long time from an attack of Rheumatism, I wish to say that your Rheumatic Cure "5 DROPS" **has cured me of all my troubles,** which were all caused by one complaint:—Rheumatism. I had Heart Trouble, Piles, Bladder Trouble and Constipation. I would not take $500 and do without the remedies even if it only cured the Catarrh for me, which it has done. Therefore, I willingly take the agency for the sale of your medicines, **for they are a boon to mankind.** Gratefully yours,
J. W. DENNIS, 120 Normal Av., Buffalo, N. Y., Feb. 8, 1898.

"5 DROPS" cures **Rheumatism, Sciatica, Neuralgia, Dyspepsia, Backache, Asthma, Hay Fever, Catarrh, Sleeplessness, Nervousness, Nervous and Neuralgic Headaches, Earache, Toothache, Heart Weakness, Croup, Swelling, La Grippe, Malaria, Creeping Numbness.**

FOR THIRTY DAYS LONGER to enable sufferers to give "5 DROPS" at least a trial, we will send a sample bottle, prepaid by mail, for 25 cents. A sample bottle will convince you. Also, large bottles, (300 doses) $1.00, 3 bottles for $2.50. Not sold by druggists, only by us and our agents. **Agents wanted in new territory. Write us to-day.**
SWANSON RHEUMATIC CURE Co., 167-169 Dearborn St., CHICAGO, ILL.

No Half Way Invalid.

"My friend," said the nervous man, "don't you think you ought to take something for that cold? You know what a great deal of trouble may arise from a slight cough."

"That's all right," answered Derringer Dan. "I never had a slight cough in my life. When I cough, I cough like blazes."—Washington Post.

FOR MEN ONLY.
DR. FOOTE & STAFF
161 ADAMS ST., CHICAGO.

Men requiring unsurpassed treatment should consult personally or by letter **"Free"** with the pioneer and only exclusive mens' specialists in United States. **Diseases of men** made the study of a lifetime. Unfortunates everywhere should immediately communicate with Dr. Foote of Chicago. Everything confidential. Remedies sent everywhere in sealed packages and letters in plain envelopes. Correspondence solicited. Latest **Surgical, Medical and Electrical** methods adopted. Deluging the stomach with drugs abandoned. Avoid drugs recommended by the un-authorized and self-styled specialists in Western towns; few genuine specialists locate out side of New York or Chicago. In these cities your private affairs are safe. Unequaled treatment for all diseases and weaknesses of the Genito-Urinary, Sexual, Reproductive and Nervous Systems. Impediments to marriage removed. **"Syphalis"** positively purifies the blood, cures syphilis and removes all white ulcers in the throat or mouth, copper colored spots on body and eruptions on skin, also catarrh and rheumatism. **"Vigorain,"** the only permanent restorer and invigorator, gives vigor to vital organs and nerves, prevents and cures grip. $1 per bottle, 6 for $5. Trial bottles, either remedy, half price.

In Sympathy.

"But did not the neighbors send you anything after the fire?" inquired the poor commissioner of the widow whose home and belongings had been totally destroyed three nights before by the relentless flames.

"Yes, sir," was the reply. "Mrs. Cleaver, across the street, sent me a beautiful drawn work doily with her card, and Miss Hushington, in the next block, a very pretty cut glass knife and fork rest."—Detroit Free Press.

Delay Makes It Harder.

Mis-steps have made the worst sprains, but it is no mis-step to use St. Jacobs Oil. It makes a cure by strengthening, soothing and conquering the pain. Every hour's delay makes it harder to cure.

Siamese Magic.

Siamese magicians profess to be able to destroy your enemy for you. They first bewitch part of a buffalo till it becomes as small as a pea. When your enemy has been induced to swallow it they make it return to its original size, and after suffering great agonies he suffocates. Pig's flesh and fish are also used. When these people die, the reason can be detected, because at their cremation some part of their body refuses to burn, and when it is cut open it contains fish or meat of some animal. A small boy died recently and was cremated. A certain part of the child's chest refused to burn, and they got it examined and found it to be a piece of salt pork!

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

Then George Subsided.

"I could never see anything great in your trip across the Rubicon," said Washington. "Now, when I crossed the Delaware I had to contend with a great mass of ice."

"Yes," replied Cæsar, "but look at the risk I ran of meeting a frost when I reached the other side."

And even one of the Roman senators smiled.—Philadelphia North American.

Big Loaves of Bread.

The largest loaves of bread baked in the world are those of France and Italy. The "pipe" bread of Italy is baked in loaves two or three feet long, while in France the loaves are made in the shape of very long rolls, four or five feet in length and in many cases even six feet.

A Burman mile is about equal in length to two English miles. The word for "mile" in Burmese means "to sit," and a mile is the distance that a man goes before he considers it necessary to sit down.

The highest value of an English postage stamp is $25. The stamp is of oblong shape and very seldom used.

LODGING.....
BOARD ...

...winter's comin' on.
But baby Nan, the stay-at-home,
Jis laughs, an' never knows
That all on earth she has to wear
Is ole made-over clothes.

There's books to buy f'r them at school—
It makes a pore man sick
To hear 'em holler "joggafy"
An' "mental 'rithmetic."
But, thank the Lord! the stay-at-home
Is not so hard to please;
Jis gits the fam'ly almanac
An' reads it on her knees.

An' writin' books an' drawin' books—
They never seem to think
How much it costs to buy sich truck,
An' pencils, pens, an' ink.
But little Nan, the stay-at-home,
She knows her daddy's pore;
Jis gits a charcoal pen an' writes
Her lesson on the floor.

There's boots to buy f'r Buster Bill,
An' boots to buy f'r John,
An' shoes f'r Jane an' ma an' I,
Till all my money's gone.
So Nan, the last, the stay-at-home,
Is left to do without;
Jis wears her home-made moccasins,
An' crows, an' crawls about.

Years like that all I rake an' scrape
Won't hardly satisfy
The pressin' needs o' Bill an' John
An' Jane an' ma an' I.
But baby Nan, the stay-at-home,
Is full o' sweet content;
Jis cuddles up in daddy's arms
An' never wants a cent.
—Century.

THE MIDDY'S CAPTIVE

I.

"BLUBBERING won't do any good; you had better report the matter to Captain Wilson at once," said the navigating lieutenant of her majesty's ship Triumph, as he gazed quizzingly down at the chubby-faced midshipman who stood in such comical dismay before his superior officer. "Come with me; I'm going to his stateroom now," the speaker added, not unkindly, as he noted the lad's evident distress.

"I'm not blubbering, and I don't care if he does stop my leave!" indignantly responded the youngster, drawing himself up to his full height.

"What is it, Stuart?" inquired the captain, as the twain entered his cabin.

"I merely wish to say that we are ready to get under way whenever you please, sir; but Robson has a report to make," said the lieutenant.

"Not seasick yet, I hope?" ejaculated Captain Wilson, ironically. "Well, I'm listening."

"Please, sir, it's the 'First Lord;' he's bolted! He ran off while we were shipping the soft tack—I mean the bread!" incoherently stammered Robson.

"The 'First Lord' bolted with the soft tack!" exclaimed Wilson in astonishment. "What does he mean, Stuart? Who's the 'First Lord?' Is the boy a raving maniac?"

Lieutenant Stuart had perforce to explain that the cadet, being in charge of a boat sent ashore to ship provisions, had lost one of his men—an able-bodied seaman answering to the name of West, but who was, by reason of his superior bearing, nicknamed by his companions "the First Lord of the Admiralty."

Charley Robson meekly endured the reproaches of his commander, who was a stern martinet, and made no allowance for youthful inexperience. "But at any rate," mused the young fellow, when he was at length dismissed, "he said nothing about stopping my furlough." And then his volatile spirits threw off the recent discomfiture as only youth knows how to, while his thoughts wandered far away to that pleasant country home in Surrey, with all its attendant attractions, from which he had been separated for one long year. And if among the dream faces conjured up there was one which eclipsed all others, the fact should not cause undue surprise.

The usual steps taken to secure the arrest of the deserter were of no avail. His description was circulated by the police throughout the country, and all the majesty of the law invoked to capture the runaway, but the man disappeared as completely as if the earth had opened and swallowed him up. He was of a strangely reserved nature, mixed but little with his companions, and had evidently once occupied a far superior station in life.

There was one person, however, who did not forget the runaway. Robson often in imagination ran the scoundrel to earth.

Little did Charley Robson imagine as at the commencement of his long-deferred leave he lounged in a first-class smoker on his way to Guildford how soon, or under what strange circumstances he would meet the villain of his melodrama.

"And you have come home; Alice will be able to resume her interrupted country walks," said the mother of the youthful sailor next morning. "But of course," added she, addressing the girl, "Charley has not heard of your latest admirer. I don't know whether the girl's nerves are out of order," continued Mrs. Robson, "but she declares that a strange man has been following her about during the last few weeks although no one else has ever caught a glimpse of him."

"I shan't be afraid of any loafers while Charley is with me," responded the maiden. "In proof of which, he shall convoy me for a walk now." And Alice Westerne buoyantly danced off to array herself for the proposed jaunt.

The eyes of mother and son followed ...sful look as she ...om.

"I suppose nothing has been heard of him?" queried the latter.

"No! Your father thinks there never will be. Doubtless Sir Richard died abroad, believing to the end that he was a murderer."

"And Allie is still ignorant of her father's sad history?" queried the lad.

"Yes. We have decided not to say anything to her until she is of age, unless some contingency should arise, such as your obtaining a sublieutenancy, and being of the same mind as you are now."

Robson colored at the hint delicately conveyed by his mother, and so well understood by himself. To see their only son mated to their ward was the dearest wish of Admiral and Mrs. Robson, yet they had the good sense to restrain the impetuosity of the youthful couple until both arrived at years of maturity.

II.

With the course of true love running thus smoothly, and the crisp, frozen ground under their feet, the twain started upon their ramble.

With buoyant steps they breasted the "Hog's Back," from which favorite vantage ground a splendid view of the surrounding country could be obtained.

"Yes, there's the dear old Towers," said Alice, "where I should be living now if the pater had not died."

"You've found another home," whispered Charley, "and other parents."

"I know that, dear," responded the girl. "But you cannot imagine what it feels like to have one's birthplace given over to ruin and decay, and to know one hasn't a single living relative. Only to think I cannot even visit my father's grave, because he died in some far-away outlandish place!" Then, with returning vivacity, she added: "Don't you remember that day in your school holidays when we walked over there and rambled through the disused rooms? How we thought there was a ghost in the hall, and ran all the three miles back home without once stopping?"

"I should just think I did," said the young officer. "You caught a chill through being overheated, and the governor said he would make a tailor of me for being such an idiot."

"You wouldn't be afraid now?" queried the girl.

"No fear!" laughed her companion. "Life on a man-of-war soon knocks all the fear of spooks out of a man."

"Let us pay another visit, then!"

A sharp walk soon brought the twain to the rusty lodge-gates of Westerne Towers.

"How dreary it looks!" said the girl. "I wonder if that scullery window is still unfastened?"

Charley tried, and to his surprise the sash slipped up without difficulty. "It's a case of gentlemen first this time," said he, stepping through the aperture. "Come along, tomboy. If you're not careful you'll tear your dress. The window's no bigger than the lubber-hole of a brig."

The casement being negotiated in safety, together they wandered through the cobweb-festooned rooms of the once palatial residence. Ascending to a second story, Robson carelessly threw open a door of a room which faced the landing. Here an unexpected sight met their gaze. Sitting before a wood fire was an elderly man, contemplating the flames with a ruminant air. At the sound they made he turned his face toward them and started in alarm.

The next moment the youth was across the room and grappling with the stranger. "You villain!" he panted, "I've got you at last! Run, Allie, bring some one quickly! I can't hold him long; say he's a deserter from the navy."

The trembling limbs of the girl failed to carry out his behests as she stood fascinated, watching the unequal struggle, which was speedily ended. Youth and agility were no match for the sailor's sinewy arms, and in a short time Robson was ignominiously pinned against the wall.

With lowering brows and eyes, which boded no good to his captive, West stood staring at the lad as if undecided what to do with him. Then, catching sight of the pale face of Alice, who was petrified with horror upon recognizing in her companion's antagonist the man who had so persistently dogged her footsteps of late, his own features assumed a softer expression, and he muttered: "It is kismet!"

After a pause of breathless silence the ex-sailor, addressing his captive, said: "You are not so muscular as was your father in his youth, young fellow. The Charley Robson that I knew would never have allowed an old man to get the better of him; but let that pass and come to the crux of the matter. You want to arrest me for deserting from the navy. Very well, you shall, if you still wish to after hearing what I have to say."

Releasing the grip upon his would-be captor, the elder man, in a strangely cultured voice, addressed his auditors.

"Years ago," said he, "I was known and respected in this neighborhood, a man of substance, and a member of the diplomatic corps. Unfortunately, in my official capacity, I became embroiled in a quarrel with a political opponent, and, as was more common even fifteen years ago, the result was I had no alternative between fighting a duel or being dishonored.

"Not to make a long story, my adversary and our seconds journeyed to Guildford with me late one night, intending to settle our differences at daybreak, on the following morning. With the courtesy that such affairs demanded, I offered the whole party hospitality for the night.

"From the moment my head touched the pillow until I was awakened the next morning my mind was an entire blank, but judge of my horror when, assaying to rise, I found the bedclothes dabbled with blood, and at the foot of my couch a gory hunting knife belonging to myself. Simultaneous with my horrible discovery the servant found the man I was to have fought lying foully murdered.

"Although conscious of my innocence, I dared not face the inquiry which was sure to follow, as who would believe my own theory of the matter, which was simply that I committed the terrible act in my sleep, as from childhood I had been subject to attacks of somnambulism. Hastily caressing my infant daughter, the only pledge left me by my departed wife, I left the house like a felon and fled the country, and it was hunger for a glimpse of my dear child's face that has worked my undoing. My faithful secretary connived at my escape, and subsequently sent me the news of the charge of the willful murder against Sir Richard Westerne. Yes. You will be able to deliver up to justice a more important person than the deserter West. My devoted retainer Burton, who assisted me at such great risks to himself, is not here to help me now. He is dead."

"He was a villain, Sir Richard!" cried Robson, in wild excitement. "It was he himself who killed Lord Marcus, and artfully foisted the blame upon you in order that you should not discover his defalcations. My father possesses his dying confession to that effect."

The sudden revulsion of feeling was almost too much for the baronet. Tottering to the nearest chair, he buried his face in his toil-worn hands. Silence reigned in the room for a few intense moments. Then Sir Richard, feeling a gentle hand upon his shoulder, looked up into a sweet but still scared face and two half-frightened gray eyes.

"Daddy, dear," Charley heard a tremulous voice murmur softly as he stole from the room. * * *

Powerful friends at the admiralty soon glossed over the delinquencies of the seaman West, and Sir Richard Westerne once more assumed his proper rank and station. As time wore on, and the vividness of his past misery faded, he could even afford to joke about the matter; and sometimes, upon the rare occasions that he saw a certain young officer, would, much to the amusement of his daughter, simulate extreme terror and cry in affected dismay: "He has come for me at last!"

When some few years later a very excited youth, with a golden circlet upon the arm of his new uniform coat, burst unceremoniously into the room, he was greeted by the same old joke, and in response blushingly replied: "I'll let you off this time if you will give me Alice as a hostage." And as the girl seemed to be a willing sacrifice, Sir Richard gave them his blessing.

THE YOUNGEST DEPOSITOR.

Flaxen-Haired Girl to Whom Someone Is Always Kind.

Once every month, in the long line of men and women that forms in front of the teller's window on "open day" at the Union Dime Savings Bank, a flaxen head appears—at the height of their elbows. Looking down, one sees that close against the breast of a shabby frock is tightly clasped a bank-book—and then, says the New York World, the secret is out. The flaxen-haired little girl is the bank's and New York's youngest depositor.

Alice Metz is her name, and her home is close by Hell's Kitchen. She is barely eight years old. How she gets the money nobody knows, but each month there is a deposit of fifty cents to swell her account, which has now reached the sum of three dollars. There she stands patiently in line till some one less hurried and preoccupied than the rest bends to question her.

"Will you help me?" asks the little maid, breathlessly. "I have fifty cents—two quarters. Johnny got it changed for me; there were fives before. And I want to put it in there," pointing to the window, "and they write it down here in the book," finding the row of figures. "But I don't know how by myself. Will you do it? O, yes, I can put down my own name, 'cause I couldn't bring my money till I learned to do that."

She is so engaging in her pretty youthfulness that men or women, as the case may be, forthwith fill out the deposit blank. Alice laboriously inserts her name, and is in a state of ecstasy when she is lifted up to give in those precious quarters.

Her December helper was a woman. When the ceremony was over it was already dark.

"Where do you go now, little one?" she said, fearing for the child's safety.

"Oh, Johnny's waiting across the road," replied the little depositor.

So they traveled in company, and sure enough there was Johnny, sturdy and fat, one year older than his small charge.

"It's in!" Alice cried, gleefully. "The lady did it! She's ever so good!"

"Somebody's always good to you, I guess," was Johnny's comprehensive reply. "But did you count?" and together the two heads bent over the column. Over and over they counted.

"Three dollars, that's it," concluded Johnny, at last, with a sigh of relief. "It's in for keeps, Allie."

She clutched the book once more to her bosom, and hand in hand the two trotted off into the darkness.

New English Dictionary.

Dr. Murray expects to have more than half of the new English dictionary published by the end of the century—up to the middle of the letter L.

Half the people in the world are unhappy because they can't afford the things that make the other half miserable.

The wire trust lacks the ability to control political wire pulling.

It seems queer that an intelligence office should supply stupid servants.

RIGHT TIME OF DAY.

NOT SO READILY DETERMINED AS ONE MAY IMAGINE.

When It's Noon in New York City It's All Sorts of Times, the Same Day and the Next, in Other Parts of Uncle Samdom.

The time of day—in other words, what o'clock it is—is a simple matter, well understood and easily comprehended by everybody in a city or in approximately the same locality. But when people are separated, some being to the east or the west of others, the simplicity of the answer to the question, What time is it? is by no means so apparent.

Indeed, confusion has so often arisen in consequence of the difference between clocks, say, at New York and Chicago, that it has been found decidedly advantageous to divide the United States into time districts, each district differing from the adjoining one by just one hour of time. Thus in the United States to-day there are Eastern time (corresponding to the seventy-fifth meridian of longitude west from Greenwich), Central time (corresponding to the ninetieth meridian west from Greenwich), Mountain time corresponding to the one hundred and fifth meridian west from Greenwich), and Western time (corresponding to the one hundred and twentieth meridian west from Greenwich).

Owing to this simple arrangement it therefore follows that when it is high noon in Eastern time at New York, for instance it is 11 o'clock in Central time at Chicago, 10 o'clock in Mountain time at Denver, and 9 o'clock in Western time at San Francisco. This division of time, though not astronomically correct, is sufficiently so for all practical purposes. Since the adoption of Standard time, as these times into which the mainland of the United States is divided are called, the dominion of the country has been extended. It now comprises islands in the Atlantic ocean and islands in the Pacific ocean. Havana, most people have the idea, lies to the eastward and southward of New York. Instead, it is situated nearly south of Key West, about midway between Eastern and Central times. Undoubtedly Eastern time will be the time to which Cuban clocks will eventually be set.

San Juan is situated in longitude 66 degrees 7 minutes 28 seconds west. This reduced from arc to time by dividing by 15 gives four hours 24 minutes and 30 seconds. Here again, perhaps, Eastern time will be adopted when trade between these West India islands and the ports along the Atlantic seaboard has increased to the great volume which is sure to come with peace and prosperity.

Now for the great West. San Francisco lies eight hours, nine minutes and 38 seconds distant in time from Greenwich, though, according to our adopted standard time, it is regarded commercially as only eight hours distant. Honolulu, in the Sandwich islands of the United States, is distant by sun 10 hours, 31 minutes and 36 seconds from Greenwich. It would certainly be more convenient to drop the minutes and seconds and consider the Hawaiian group as a round 10 hours distant from Greenwich, or two hours from San Francisco or five from New York.

So far, this question of time has been comparatively easy. We have been following the sun to the westward, taking our date and day with us, the same with which we started from Greenwich or New York, but after we move off from the Sandwich group and head for our tight little island of Guam we encounter a difficulty that is decidedly puzzling to the landsman, and even the nautical man has to sit down and work it out.

The difficulty lies in the adding or dropping from our calendar of an entire day, according as we may be going to the east or to the west of that meridian of longitude called 180 degrees.

Guam lies in the Pacific ocean in longitude 144 degrees 39 minutes 30 seconds east. In time this is nine hours, 38 minutes and 31 seconds east of Greenwich. This means that the sun rises over that island 14 hours, 38 minutes and 38 seconds before that luminary shines over the island of Manhattan.

The common day, often called the civil day, lasts from midnight to midnight—24 hours. In order that the civil day may have the same number or date the world around the leading nations have agreed to use the date of the days as they begin on the one hundred and eightieth meridian.

Thus with every place its dates are counted from midnight to midnight, and each day takes the same date as that given to the latest new day on the one hundred and eightieth meridian. We may think of the new date as traveling westward with the midnight. The date is given to each place as soon as the midnight reaches it. When midnight again occurs in the one hundred and eightieth meridian another date begins its journey around the earth.

When vessels cross the one hundred and eightieth meridian they either drop a day or add one to the calendar. As the new date begins on that line, a vessel sailing eastward across the line goes out of the area having the new date and must therefore go back a day. Sailing westward the vessel enters the area having a new day and must therefore add a day to the calendar. Thus, when sailing eastward across the line, Monday is dropped for Sunday; but sailing westward over the line Saturday at once gives place to Sunday. The medium of 180 degrees, at which all new civil days begin, is called the "international date line."

As a matter of fact the international date line is an arbitrary line and does not conform strictly to the one hundred and eightieth meridian. Many islands in the Pacific, notably those which are in close commercial touch with Australia, use East Greenwich time, though geographically they lie in west longitude. But our far-off Pacific possessions are not of these.

Guam, then, is well ahead of New York—more than 14½ hours—so that when it is noon at the city of New York it is 2 o'clock, 38 minutes and 31 seconds in the morning of the next day at Guam. Manila presents a similar phase of the question of day and date. Our newest and maybe our richest possession is situated in longitude 120 degrees 58 minutes 3 seconds east. In other words, it lies eight hours, 14 minutes and seven seconds east of Greenwich, and since New York is five hours from Greenwich, Manila is 13 hours, 41 minutes and seven seconds distant from the city hall in New York.

TIME IN UNCLE SAM'S POSSESSIONS.

THE STANDING ARMIES OF THE WORLD COMPARED.

The Czar's proposal to check the increase of armaments is not without a flavor of irony, proceeding as it did from a monarch who not only has by far the largest army in the world, but who was also busy increasing his navy when he made his famous proposal.

European nations spend a terrible proportion of their energies and their resources in preparations for war. Though it may be an exaggeration to say that Europe is one vast camp, there are something like four millions of its male inhabitants constantly under arms as soldiers or sailors even in times of peace, and when it is borne in mind that all these have to be maintained in non-productive work and supplied with the most costly appliances, some idea may be formed of the gigantic waste. The following tables, compiled by St. Paul's, will enable one to compare the armaments of the leading nations:

	Population.	Army in peace.	Army in war.
Russia	129,166,561	860,000	3,503,000
United States	62,622,250	25,000	140,627
Germany	52,279,915	585,440	3,000,000
Austria-Hungary	41,231,342	385,697	1,827,178
France	38,517,975	615,413	2,500,000
Great Britain	38,104,975	163,569	562,226
Italy	31,114,589	231,355	1,268,308

A still more convincing method of estimating the burden of military service in the various countries will be found in the following table:

	No. of inhabitants to each soldier, in peace.	No. of inhabitants to each soldier, in war.	No. of soldiers to 1,000 inhabitants, in peace.	No. of soldiers to 1,000 inhabitants, in war.
France	63	15	16	63
Germany	89	17	11	57
Austria-Hungary	115	22	9	44
Italy	135	25	7	41
Russia	150	37	7	27
Great Britain	233	72	4	14
United States	2,489	445	4½	2

The late Lord Randolph Churchill once put the cost of this blood tax forcibly:

"Out of the life of every German, every Frenchman, every Italian, every Austrian and every Russian, the respective Governments of those countries took three years for compulsory military service."

BIG MORTARS FOR DEFENSE.

Uncle Sam Will Build One Thousand Terrible War Implements.

The type of heavy breech-loading motrar relied upon by the U. S. army for inner-line harbor defense is one of the most terrible implements of war that have been devised. The high-powered rifle is mounted in the coast defenses with an effective range of eight to ten miles, and is calculated to open fire upon a blockading fleet the moment it comes within reach. The mortar battery is concealed well away from the big guns, where it cannot be reached except accidentally by the fire of the enemy, nor is this battery intended to be brought into play until the rifles in the main fortifications have been completely or partially silenced by the enemy.

MORTAR IN LOADING POSITION.

The mortars have a limited range of about four and one-half miles, and their tremendous bursting charges are fired high in the air, with the certainty of plunging into any vessel occupying a plotted position upon a chart which is in the possession of officers equipped with range-finders of delicate precision, located at a considerable distance from the concealed battery. This chart is divided into minute squares, and as the enemy's ships cross the intersections of imaginary lines the men handling the mortars although they cannot see the vessels, aim, load and discharge with the certainty born of long practice that every shot will tell.

These new mortars, of which 1,000 are provided for in the existing scheme of national coast defense, and of which 320 have already been mounted in positions commanding the entrances of the principal harbors on the Atlantic coast, fire a 12-inch shell weighing 1,000 pounds. This, following a high trajectory, is intended to fall upon the unarmored decks of vessels and, by exploding, demolish the machinery, destroy the crew, and perhaps sink the vessel. These weapons each weigh about thirteen tons, are 11 feet 9 inches long, and their 12-inch rifled bore is 10 feet in length. Their great diameter at the breech is 3 feet 2 inches. This great mass of metal is so nicely balanced that it can be loaded, aimed and fired by two men. The loading is performed by simple mechanisms, and with a trained gun company of six men one accurate shot can be fired every two minutes.

MORTAR IN FIRING POSITION.

Railroad Cooking.

Traveler (in dining-car, fast express)—Waiter, these eggs are too soft.

Waiter—S'prised to heah dat, sah.

Traveler—They were taken out of the hot water too soon.

Waiter—Well, sah, I'll put 'em back an' let 'em boil another mile, sah.—New York Weekly.

It is surprising how well a homely girl looks in a picture.

There are some women who never look quite as proud as when going to a party with a white crocheted thing over their hair.

Drowning is a terrible thing; it would kill most people to die that way.

OFFICE.—COURT HOUSE.

Thrilling Experiences of ... of the Early Riders.

The pony express began to run in 1859 between St. Joseph, Mo., and San Francisco. It was a marvel of rapid transit at that period; in 1861 it carried President Lincoln's message over two thousand miles in seven days and seventeen hours, the quickest time for horseback riding ever made in this or any other country. The plant of this fast mail route was five hundred horses, one hundred and ninety stations, two hundred men to take care of the stations, and eighty riders, each of whom rode thirty-three and one-third miles, using on his route three ponies. The letters carried were written on the finest of tissue-paper, and the postage charged was five dollars a letter. Hundreds of these tissue-paper letters were carried in a bundle no larger than an ordinary writing tablet.

The trail which the express followed was infested with "road agents" and hostile savages, ready to rob and murder the express rider. "The Great Salt Lake Trail" tells the experiences of Colonel Cody, one of the authors of the book. They show the dangers that environed a pony express rider.

The "road agents" (highwaymen), in some mysterious way, learned that a large sum of money was to be sent by pony express. They killed one rider, but he did not carry the money. Cody carried the valuable package, and when, at the relay station, he heard of the murder, he schemed to outwit the robbers. He put something in a second pair of saddle-pouches and hung them in sight. The pair which contained the money he so folded in his saddle-blanket that they could not be seen unless a search was made for them.

He flew along the trail, revolver in hand, thinking that he might be halted in a certain lonesome spot in a valley. As he drew near the place, two men stepped out, covered him with their rifles, and on bringing him to a halt, said:

"Hands up, Billy! We know yer, and what yer carries."

"I carry the express, and it's hanging for you fellows if you interfere with me."

"We don't want you, Billy, unless you force us to call in your checks. We want what you carry."

Cody began to unfasten the pouches which were in sight. Raising them with one hand, he said, in an angry tone:

"If you will have them, take them!" and he hurled the pouches at the head of one robber. He dodged, and as he turned and stooped to pick them up, Cody fired his revolver with his left hand at the other bandit. The ball shattered the man's arm. Spurring his pony, Cody rode over the stooping man; the horse knocked him down and bounded on.

The pony rider gave a yell of triumph as he galloped off. He was highly praised for saving the money, and had the satisfaction of a true prophet. The two robbers were captured and hung by vigilants.

"There's Injun signs about, so keep your eyes open," said the station boss one day, as young Cody started for his fifteen-mile flight. The fleet pony ran like the wind. Far down the valley which he was approaching Cody's eyes fell upon a dark object above a boulder directly in his trail. He saw it move, and then disappear. "There's an Injun behind that rock!" he muttered, galloping on his way, and noticing that on one side of the boulder there was heavy timber, and on the other a cliff.

When almost in range of a bullet from the concealed Indian, Cody wheeled, and in an oblique course headed for the cliff. Instantly came the crack of a rifle, and a puff of smoke rose above the boulder. A yell came from the timber, out of which a score of Indians rode to head off the express-rider. Two braves sprang from behind the boulder, fired at him, the bullets pattering under the horse's hoof, and then ran swiftly toward him.

The mounted braves swept to overtake the white rider. Their chief, riding a horse that was much faster than the others, drew quickly ahead. Cody, keeping his eyes alternately on the trail and on the chief, saw him seize his bow and fit an arrow, while he slackened not his horse's speed. Cody's revolver sprang from his belt. He fired. With a yell, the chief fell from his saddle. A shower of arrows was sent by the braves, and one wounded the horse.

It was a hot chase, but when they came in sight of the next station, the Indians drew off. Cody flashed in on time, and in another minute was away on his next run.

Colors of Lakes.

It is well known that the water of many lakes exhibits characteristic colors. The Lake of Geneva, at the western end of Switzerland, is blue, while the Lake of Constance, at the eastern end of Switzerland, is green. Blueness implies purity, since the natural color of water is blue. A green lake has its water slightly clouded with impurities, which may be exceedingly fine particles, separately invisible. Prof. Spring, of the University of Liege, says that green lakes sometimes becomes absolutely colorless for a time, and he has found that this sudden change of hue is due to the washing into the lakes of mud-colored red by oxide of iron. Red is complementary to green, and the result of the mixture is that the green color of the water becomes for the time being neutralized.

Changeable.

"Yes, in one day the mercury varied 47 degrees."

"Almost equal to my wife's temper."—Cleveland Plain Dealer.

Mrs. Newed—Was I nervous, dear, during the ceremony? Her friend—Well, a trifle at first, darling; ever after William had said "yes."—...

[illegible] unanimously adopted. As against these resolutions, the Episcopal Bishop of Ohio recently publicly declared that polygamy was really practiced all over the country, the laxity of the divorce laws permitting husbands and wives to change mates almost as frequently as they desired. The Bishop thought that we should have a national divorce law, and that the church should co operate by refusing to sanction the remarriage of divorced persons. That there is something wrong with our social system is apparent to any thinking man or woman, but the increasing interest manifested by these discussions gives ground for hope that we are on the eve of the inauguration of reforms that will do much to check the growing evils which threaten society. Intelligent legislation, backed up by an educated public sentiment, is what is needed. No permanent good can result in any line from extreme legislation, which sometimes almost assumes the shape of persecution, but if press and pulpit will cooperate for the better education of the whole people, a halt will be called before it is too late.

Reports from the Cape Nome gold fields, almost on the edge of the Arctic circle, continue to be received by each returning vessel. The tales of fabulous wealth are intermingled with stories of claim jumping, death from exposure and improper food, and now soldiers are to be sent to maintain the peace. From the south come other exciting telegrams of a scope of country in the desert region of Lower California, where nuggets as large as marbles can be had merely for the trouble of picking them up. These golden fields present two extremes of climatic conditions. One, those of cold, high winds and abundance of rain; the other, of heat, destitution of water and every conceivable discomfort. That each locality will draw heavily from the restless men and women of the Pacific Coast there is no doubt. The gold fever is as fatally contagious as the most virulent disease.

H. J. Corcoran, the manager of the transportation company at Stockton, and by the way, one of the brightest men in this State, has written a letter to New Orleans saying that good laboring men were scarce in California, and that a goodly lot of industrious negroes could find employment here. The dispatch from New Orleans making the statement says that they could be spared from that city without any tears. It is a melancholy fact that good, reliable labor cannot be found in many of the avocations in California; but it is a fact never to be forgotten that it is not desirable to import any other kind of labor into the State—especially if the men are to become voters. The white man has not demonstrated the fact that he can shoulder the self-government burden, and if he is going to get away with it, the less he is hampered by other races the better. —*Colusa Sun*

The question of the right of an original locator to relocate a mining claim upon which he has failed to perform the amount of assessment work, or to place an equivalent in improvements, is an important one. This question came up before the Superior Court of Utah and the court decided that an original locator had such right. It is a recognized fact a prior locator may renew his location by resumining work. While the court in this instance recognized the right of the prior locator to relocation, it should be understood that it also requires that assessment work should not only be resumed but completed in order to assure possession.

It is reported that Secretary Alger will control the granting of franchises in Porto Rico, and Republican office seekers are seeing many jobs ahead for which their party must stand responsible. When we get the Filipinos "benevolently assimilated" there will be another field open for franchise grabbers, but the men in the trenches will get none of the profits.

The President has had to yield to the office seekers and five thousand positions placed by Cleveland under the protection of civil service have been opened up on the political reservation. Civil service is an attractive plank in a platform, but it will not pay the political debts of men like Mark Hanna.

Mark Twain has decided that he will write only two more books, one for publication and one for remote posterity. What a godsend it would be for suffering humanity if a large percentage of the present day authors would decide on a similar course.

What has passed over the soul of Jerry Simpson of Kansas, that he announces in his own paper that his State is weary of sending freaks to Congress? Possibly the sockless statesman has had a palm-reader measure him accurately.

Should the contributions to the Dewey fund be as numerous as the children who have been named for him, he can be given two or three houses.

The millennium appears to be near at hand. Zola, acknowledged to be one of the greatest living authors of fiction, says he is glad truth prevails.

The Court of Cassation has granted Dreyfus a new court-martial.

[illegible] and Plaquemines [illegible] the chief centers of the [illegible] culture of Louisiana, the fruit also grows well in the parishes of Orleans, Jefferson, St. James, St. John Baptist, St. Charles, Assumption, St. Mary, Terrebonne, Lafourche, Vermilion, Cameron, Iberia and Sabine. The orange tree begins to bear at about the seventh year, although it is not reckoned to have reached its full growth until its twelfth or fifteenth year.

The orange culture in Louisiana is probably the most profitable industry of the state under favorable conditions, a full grown tree producing from 3,000 to 5,000 oranges, the fruit on the tree generally selling for $10 a thousand, and as some of the largest orchards in the state yield as many as 3,000,000 oranges their market value gives a princely income to the owners of the trees. Comparatively a very small acreage of the state is devoted to the growth of oranges—possibly not more than 2,000 acres.

The sweetness, delicacy and juiciness of the Louisiana orange, the best of which are regarded in the markets outside of Louisiana as superior to even the oranges of Cuba, to which island the fruit is indigenous, render the Louisiana oranges highly prized in the north and west of the United States, so much so that the supply is not by any means equal to the demand.—New Orleans Picayune.

TAYLOURS AND SMYTHS.

They Were the Commonest Trades In the Thirteenth Century.

The manufacture of leather in the thirteenth century seems to have been important, showing that leather jerkins and breeches were commonly worn. We have 19 skynners, 40 barkars, 6 saddelers, 3 cordeweners, 167 souters, (shoemakers) and 8 glovers. The surname feuster is a trade name denoting a maker of pack saddles.

The commonest trades are taylour and smyth, since one lived in almost every village. The taylours number 407, of whom 140 are called by the Latin name of cissor. In addition to 261 smyths, several are specialized. There are two arusmyths, three lokesmyths, three goldsmyths, five ferours (shoeing smiths) and six marshalls (farriers).

The wryght wrought both in wood and metal. The number catalogued is 186, of whom 81 are called by the Latin name faber (French favre), one of the few cases in which the Latin translation of a trade name has become a common surname. The wryghts' trade, like that of the smyths, was specialized. The arkwryght made the great arks or chests in which the clothes or meal were stored, and we find a plowwryght, a wheelwryght, two shippewryghts, 11 cartwryghts and two glasswryghts (glaziers), who were probably concerned with the windows of churches. Glass windows in houses were rare, as is still the case in Sicily or Egypt.

The bakesters are few (15), suggesting that families baked their own bread. There are 26 butchers (fleshewer, bocher or carnifex), whence Labouchere, while the surname potter shows that this trade was in existence. The fyashers (43), were opulent, being taxed 12 times as much as laborers.—Notes and Queries.

The Tuna.

My introduction to this prince of the Pacific was on this wise: My brother and I were trolling for yellowtail off the island of Santa Catalina. Suddenly out of the summer sea a flying fish—the humming bird of ocean—flashed athwart our bows and then, not a dozen yards distant, the waters parted and a huge tuna, in its resplendent livery of blue and silver, swooped with indescribable strength and rapidity upon its quarry, catching it, mirabile dictu, in midair. In a fraction of a second the deed was done. The ocean, recording the splash of the leviathan, rippled applause, and our questions pattered like hail upon the somewhat hard understanding of our boatman, a son of Alsace.

"Yes," he said, his white teeth in curious contrast to a lean, bronzed face—"yes, messieurs, that is a tuna, a 200 pounder, at least!"—Pall Mall Gazette.

Beau Nash as a Gambler.

When the late Earl of T——d was a youth, he was passionately fond of play and never better pleased than with having Mr. Nash for his antagonist. Nash saw with concern his lordship's foible and undertook to cure him, though by a very disagreeable remedy. Conscious of his own superior skill he determined to engage him in single play for a very considerable sum. His lordship, in proportion as he lost his game, lost his temper, too, and as he approached the gulf seemed still more eager for ruin.

He lost his estate. Some writings were put into the winner's possession. His very equipage was offered as a last stake, and he lost that also. But when our generous gamester had found his lordship sufficiently punished for his temerity he returned all, only stipulating that he should be paid £5,000 whenever he should think proper to make the demand. However, he never made any such demand during his lordship's lifetime, but some time after his decease, Mr. Nash's affairs being in (sic) the wane, he demanded the money of his lordship's heirs, who honorably paid it without any hesitation.—"History of Gambling in England."

Capacity of St. Paul's.

As many as 36,000 people have been accommodated in St. Paul's cathedral, but that has been with temporary galleries, etc., erected. On festivals only between 6,000 and 7,000 people find seats. At an ordinary service about 4,000 people will make the cathedral look quite full.

Two Points of View.

"My children," said the poor man sadly, "are crying for bread."

"Which shows," replied the rich man coldly, "how much you have to be thankful for. Now, mine are crying for bonbons."—Brooklyn Life.

[illegible] Own Ind[illegible]

[illegible] departure with rhubarb, or a [illegible] fast one not generally known or practiced, is forcing it in a dark cellar. A writer who has been giving a detailed account of the process in The Rural New Yorker says: Do not be afraid to use a cellar with a cement or other hard floor, only supply loose earth enough to fill up all spaces underneath and between the roots. Being closely trimmed, the roots will not grow to any extent during the forcing season. Have no fear

A "CELLAR" FOR FORCING RHUBARB.

of using the house cellar, as no odor or dampness will arise, not even as much as from the potato bin. Never peel the dark grown rhubarb for table use, as it grows so crisp and tender that there is no necessity for it, and by so doing one loses much of the flavor and rare coloring of the sauce or other relishes.

Set the roots closely together, leaving occasional narrow passageways for convienence in gathering. The roots may be dug out at any time and may be set in the cellar as late as the middle of February. They will stand from four to six weeks of heavy forcing after beginning to pull, depending on the vigor of the roots. When the stalks begin to grow weak or spindling, the roots should be removed from the cellar, piled up with sufficient covering to prevent too much freezing and thawing, and left until the season will permit of transplanting. They can then be divided with a spade into three or four parts and reset in rich ground four to five feet apart, each way, where, with thorough culture and plenty of manure, they should be left to make root, and they will be ready for forcing again in from two to three years. The rhubarb from these roots should not be gathered in summer. Merely pull out the seed stalks, and let all the tops go back on to the ground.

In regard to making a "cellar" for this purpose, the writer presents the accompanying illustration and explanation: The cellar is 12 by 50 feet and holds between 500 and 600 plants, set either side about five feet wide, with a passageway of about two feet in the center running the entire length. The ground was excavated about two feet in depth and boarded up about a foot above the ground. The roof is of sufficient pitch to shed water, giving a height to the cellar of three feet at sides and about seven feet in center. The roof is of boards running lengthwise and covered eight inches with manure. The entrance is at one end of the cellar through an outer door leading into an entry way about 6 by 12 feet for the storage of wood, etc. An inner door leads into the main cellar, entirely excluding light and frost. A small box stove is used for heating, setting back about one-third the distance through the cellar. The pipe extends back to a flue at the rear end. When sufficient manure is at hand to cover the cellar to a depth of 18 inches or two feet, little other heat will be required.

Early Work on Strawberries.

Where a mulch is not used on strawberries and especially if the land has not been properly treated the first year, it sometimes becomes necessary to work the ground in the spring in order to keep it free from weeds. In this case the Michigan station advises that the cultivation should be given as early as possible and should not be kept up after the plants are in blossom. Where the hill plants have not been mulched there will be even greater necessity for spring cultivation. Some growers dispense entirely with the mulch, but even though it is not used in the fall, the best fruit will only be secured when the plants are mulched, and if they are not mulched in the winter it should be applied in the spring before the fruit has set. It will not only keep the berries clean, but it will be of great value in conserving moisture if the season is dry. Many growers who mulch in the fall find it advisable to cultivate their plants, however, in the spring, and to do this the mulch must be taken off and again replaced after the cultivation has been given. By throwing four or five rows together it can be done with little labor.

A Homemade Level.

The cut from The Farm Journal shows an easy way to decide whether the bottom of a ditch is level or inclined without getting down into it with straightedge and spirit level.

Nail a long and short board at exactly right angles and have the edge of

HANDY IN DITCHING.

bottom board straight. Hang a plumb-bob on the perpendicular board and make a black line in the center at right angles to the bottom of the lower board. A level or an incline is then shown at a glance when the device is placed in the ditch.

Smoke One With Me.

"Do you smoke?" asked the middle aged man. "You didn't two months ago. You oughtn't to smoke, my boy; you're too young and not strong looking." Then the elderly adviser started to light a cigar. "Have a cigar?" he said absentmindedly, as he scratched a match. The young man took the cigar and bit off the end.

"These are very mild," added the speaker, presumably for the benefit of his conscience—"very mild, and won't hurt you any."—New York Commercial Advertiser.

[illegible] of California:

GENTLE[illegible]

I herewith submit my report of the receipts and disbursements of this office for the quarter [illegible]

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of Edouard Chenot, deceased.

It appearing to this Court, by the petition this day presented and filed by J. E. Shepherd and W. L. Hunter the Executors of the Last Will and Testament of Edouard Chenot, deceased, that it is necessary to sell the whole or some portion of the real estate of said decedent, to pay the debts of decedent and the expenses and charges of administration.

It is therefore ordered by this Court, that all persons interested in the estate of said deceased appear before the said superior Court on MONDAY, the 29th day of May, A. D 1899, at 10 o'clock a. m. of said day, at the court room of said Court, at the Court-house, in the town of Independence, in the county of Inyo, State of California, to show cause why an order should not be granted to the said Executors to sell as much of the real estate as shall be necessary, and that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a weekly newspaper published in the said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court.

Dated April 24th, 1899.

P. W FORBES, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff, vs. ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you, in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 20th day of April, A. D. 1899.

D. J. HESSION,
[SEAL] Clerk.
By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this Fourth day of May, A.D. 1899.

D. J. HESSION,
[SEAL] Clerk.
P. H. Mack, Independence Cal. Attorney fo plaintiff.

TO LAKE TAHOE

A TRIP OF RARE ITEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno.

During my absence in Nevada there will be no preaching service at any of the Independence Charge appointments. Sunday-schools, however, will meet as usual. Due notice will be given of when there will be preaching service again.

JOHN J. PARDEE, Pastor.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

MONDAY, June 5, 1899.

Estate of Emmett F. Hill deceased—Letters of administration granted to Reuben W. Hill.

The Mairs' cattle started for Long Valley last Sunday.

The Reward mill is expected to start up on Monday.

Vernon Smith came down from Big Pine yesterday returning to-day.

Tom Keane arrived from Ballarat yesterday and will remain for a few days.

Ben H. Yandell is spending a few days at Big Pine looking after some legal business.

E. M. Dineen has rented the Moffett house and expects to make his home here.

George Montgomery came in from Ballarat yesterday to remain for the summer.

W. M. Rickey has rented a house in Bishop and moved his furniture there this week.

Mrs. D. J. Hession has been visiting with relatives in the upper end of the Valley all the week.

S. E. Vermilyea Esq., was down from Bishop early in the week. He is interested in a water suit in Big Pine.

A shipment of ore from the Surething mine at Coso will be made in a few days. The ore is reported to assay over $2,000 per ton.

The weather has been much warmer during the past week and as a result there has been a greatly increased flow of water.

H. M. Moffitt, Deputy United States Marshall, arrived Wednesday from San Francisco and went to Bishop the following morning.

Sinking is being continued on the Copper Queen mine near Citrus. The shaft is now down thirty feet and the prospect is very flattering.

Last Saturday on his thirty-second birthday, Ed Clarke was buried at Bishop. The funeral was the largest ever seen in the county.

J. H. Shannon came down from Bishop yesterday, going to Lone Pine today, where he will remain until the meeting of the Board of Education.

It is expected that the Reward mill will start up as soon as satisfactory arrangements can be made with the Eastside Canal Company with regard to water.

The warm weather of the past three days has about doubled the volume of water in the creeks, and the farmers are kept busy seeing that none of it goes to waste.

An expert representing London capital has been looking over the situation here. He visited the Johnson mine last Monday and the Barnes & Anderson property the next day.

A. Cohn and George Watterson were down from Bishop early in the week, their presence here being necessary to prove the will of a man named Hill who died at Bishop recently.

A. M. Squires and E. Squires arrived here yesterday morning from Los Angeles, and went to Mazourka the same day. They are interested with E. Newman in some placer claims there.

Mrs. Jane Stanford last week deeded property to the value of $10 000,000 to the Stanford University. The munificent includes railroad stocks and bonds and real estate in half a dozen counties in California.

Painter Reynolds is making things loom up around town in great shape. He has finished painting the Woods and Rhine buildings and is now at work upon Eibeshutz's store. It makes a great difference in the looks of things.

Darwin is reported to be very quiet. The Lane mine has closed down completely, the Superintendent and everybody else having left. The Defiance has closed down to one man, and with termination of work at the Minnietta for the summer, it makes Darwin a dull ...

End 2000, Standard No. 1 1500, Standard No. 2 1500, Lundy 1500, Del Monte (owhed here) 600, Dunderberg 600, During the summer another plant will be in operation at Copper Mountain witn a capacity of 1500 tons, enabling us to treat more than 11,000 tons of tailings per month.

Ice an inch thick formed last Sunday night. Tuesday it must have been a foot thick according to our sensations. Wednesday, snow and blow. Thursday snow and blow. Then rain and drizzle, and now we don't know what, but it's nasty and sticky.—*Bodie Miner.*

A Beautiful Light.

Some time since Leece & Watterson began making investigations concerning the new light, acetylene gas, and as the result have put in a 20-light plant by which their hardware store at Bishop is illuminated. The first cost of the complete outfit was eighty dollars. The generator is a simple affair, occupying but little space and is absolutely safe. There is no risk of asphyxiation as with coal gas, and there is such a very small quantity generated at a time that the danger of explosion is reduced to a minimum. Once in operation, its cost as compared with kerosene is less than one-half and it gives a beautiful and more satisfactory light. The calcium carbide from which the gas is generated comes in 100-pound packages and in convenient shape for handling. As its use becomes better understood it will undoubtedly supplant kerosene as a lighting agent.

Whitewashing To Delay Blooming

The use of whitewash to retard blooming was fully discussed in the RURAL of Nov. 13, 1897. We have no doubt it will delay blooming from two weeks to a month. It has been demonstrated that the first activity of the tree comes not from soil temperature and root action, but from temperature in stem and branches. Whitening these reflects the sun heat which would be absorbed by dark-colored bark, and coolness is secured which delays bud swelling and bloom. There is little danger of injury to the tree and there is rather a chance of better bark by the cleansing effect of the lime. At the same time we would prefer to use lime which has been air slaked for a time and its causticity dulled a little by absorbtion of carbonic acid from the air.—*Rural Press.*

The Fort Independence Indians want to thank all those who helped them in making the last payment on their schoolhouse. On Sunday, June 4th, the Indians met and raised $12, all that they needed to pay all bills. Twenty-nine dollars were raised by friends in and near Independence, for which the Indians are very grateful.

JOHN GOODALE.
GEORGE RAMSEY,
Committee.

John C. Quinn has just about concluded his cyanide operations at Ballarat and is expected here in a short time. Immediately upon his arrival operations will be commenced at Beveridge. It is reported that the P. D. Q. Company has obtained the large tailing pile at the Casey mine and will proceed to work it right away.

H. B. P. Hollyday of Washington, D. C., accompanied by two assistants, C. W. Bickel and C. E. Heaton, arrived at Independence on Wednesday's train. They are here for the purpose of reporting upon the Government surveys made in this vicinity by Hansen a couple of years ago.

The last band of sheep for the season went north this week, making about 40,000 altogether which have passed through this county. This is one-seventh of the number that usually come here every year, and the absence of the remaining number will be seriously felt about tax-time next Fall.

The big fight between Fitzsimmons and Jeffries comes off before the Coney Island Club at New York to-night. While sporting men generally think that Fitz will win easily, the unexpected is always likely to happen in a battle between heavyweights.

Mr. and Mrs. W. L. Hunter and Miss Nellie Hunter left on Wednesday for Porterville, traveling by way of Walker's Pass. Mrs. and Miss Hunter expect to spend some time visiting with relatives in San Francisco before returning home.

The Whitney House at Lone Pine has closed its culinary department and visitors to that town must take chances on getting meals, as there is no other hotel or restaurant in the place. Sleeping accommodations, however, can be had as usual.

J. N. Rose is in very poor health. He spent about a month in Keeler and this seemed to strengthen him some, but he is still very weak. He is contemplating a trip to San Francisco and no doubt will be greatly benefited by the change.

The Bryan mill owned by the South Park Development company is being moved up to the World Beater mine in Pleasant Canyon, and Mr. Montgomery states that it will be in running condition by the first of July.

LEGAL.

DESERT LAND, FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL.
June 5, 1899.

Notice is hereby given that Laura Mitchell of Independence, Inyo Co. Cal., has filed notice of intention to make proof on her desert-land claim No. 800, for the N ½, Sec. 23, Tp. 13 S, R 35 E, M D M, before the Register and Receiver at Independence Cal., on Saturday, the 15th day of July, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: John C. Willett of Citrus, Cal., Joseph Vaughn of Citrus, Cal., Michael McSweeney and William H. Mitchell, both of Independence, Cal.

S. W. AUSTIN, Register.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above-entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant, James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 112, I am commanded to sell, and by said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, State of California and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances thereunto belonging or in anywise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United States.

WM D DEHY, Commissioner.

Dated at Independence, Inyo Co., Cal., May 25th, 1899

DESERT LAND-FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL.
May 23, 1899.

Notice is hereby given that Irving H. Mulholland has filed notice of intention to make proof on his desert claim No. 756, for the SE¼ Sec. 10, Tp. 13 S., R 35 E., M. D. M. before Register and Receiver at Independence, Cal., on Friday, the 30th day of June, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Edward B. Smith James R. Moffett, Alexander Clarke and John Keegan, all of Independence, Cal.

S. W AUSTIN, Register.

NOTICE FOR PUBLICATION.

U. S. LAND OFFICE, Independence, Cal.,
May 8, 1899.

Notice is hereby given that the following-named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before Register and Receiver at Independence, Cal., on June 17, 1899, viz.: James Edward Rose for the S. E. ¼ of S. E. ¼ Sec. 26, E½ of N. E. ¼, and N. W. ¼ of N. E. ¼ Sec. 35, Tp. 10 S., R. 34 E., M. D. M.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz.: Marshall H. Naylor, Alexander D. Gilbert Charles N. Rose and George H. Rose all of Independence, Cal.

S. W. AUSTIN, Register.

HOMESTEAD, FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL.
April 28, 1899.

Notice is hereby given that the following-named settler has filed notice of his intention to make final proof in support of his claim and that said proof will be made before the Register and Receiver at Independence Cal. on June 17, 1899, viz.:

JAMES W. WRIGHT,
for the SW¼ sec 15, T 12 S, R 34 E, M D M.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz.: Benigno Aguirre, Chas. Walter, Edward B. Smith, William R. Deans, all of Independence, Cal.

S. W. AUSTIN, Register.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

Hall's Family Pills are the best.

Your Grocer sells Kleeno Washing Powder.

Arab Music.

Arab music has been described as the singing of a prima donna who has ruptured her voice in trying to sing a duet with herself. Each note starts from somewhere between a sharp and a flat, but does not stop even there, and splits up into four or more portions, of which no person can be expected to catch more than one at a time.

Wasted Grandeur.

"Men are so stupid."

"Why do you say that?"

"We paid $500 for our parlor furniture, and my husband wants me to keep the window shades pulled down at night."—Chicago Record.

An Undesirable Distinction.

Mae—Why did you let him kiss you?

Ethel—I didn't want to be the only girl he had never kissed.—New York Journal.

"Spring Unlocks The Flowers

To Paint the Laughing Soil."

And not even Nature would allow the flowers to grow and blossom to perfection without good soil. Now Nature and people are much alike; the former must have sunshine, latter must have pure blood in order to have perfect health.

Hood's Sarsaparilla cures blood troubles of all sorts. It is to the human system what sunshine is to Nature,—the destroyer of disease germs. *It never disappoints.*

Poor Blood—"The doctor said there were not seven drops of good blood in my body. Hood's Sarsaparilla built me up and made me strong and well." SUSIE E. BROWN, 16 Astor Hill, Linn, Mass.

Dyspepsia, etc.—"A complication of troubles, dyspepsia, chronic catarrh and inflammation of the stomach, rheumatism, etc., made me miserable. Had no appetite until I took Hood's Sarsaparilla, which acted like magic. I am thoroughly cured."—N. B. SEELEY, 1874 W. 4th Ave., Denver, Col.

Rheumatism—"My husband was obliged to give up work on account of rheumatism. No remedy helped until he used Hood's Sarsaparilla, which permanently cured him. It cured my daughter of catarrh. I give it to the children with good results." MRS. J. S. MCMATH, Stamford, Ct.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills, the non-irritating and only cathartic to take with Hood's Sarsaparilla.

...ical or theoretical ...edge of horsemanship. He was the motorman of a Fourth avenue car bound toward the terminal at the bridge. The horse was one of those angular, cockeyed, ungainly beasts that no amount of carrying and feeding could make respectable.

It had stopped square in the middle of the track and had spread its feet apart as though its mind was made up to hold the street against the world. In a few minutes four trolley cars were backed up behind the cart and more were in sight down Center street. Motormen, conductors, truck drivers, assorted citizens and a policeman stood around and gave the usual advice. The driver kicked the horse and two or three men called to the policeman to stop him. Then they in turn made humane suggestions about starting a fire under the beast's stomach. A woman said that it would be easy enough for any one to coax him along with a lump of sugar.

The motorman of the fifth trolley car, which had by this time reached the end of the blocked line, walked up and surveyed the situation.

"Whose car is this?" he asked, pointing to the first car that had come up behind the wagon to which the balky horse was attached.

"It's mine," said another motorman, who was fingering a brass motor handle as though he would like to brain the horse with it.

The motorman from the rear hoisted the car's front fender and strapped it in place, folded against the dashboard.

"Now," he said to the motorman who had claimed the car, "go ahead, very easy." Then, turning to the disconsolately profane driver of the horse, he said, "Get up and take hold of the reins."

The car ran forward until the fender reached the tailboard of the wagon. "Now," said the self appointed master of ceremonies to his fellow motorman, "start up as fast as you durn please, and don't stop until you get to the bridge."

The car started. The wagon started. The horse in the shafts simply had to start. He slid and shoved back for a few inches and then broke into a helpless gallop. The car came banging along behind, giving the horse no chance to change his mind and balk again. The spectators cheered. The ingenious motorman looked the assembly over with a sneer.

"Say!" he said. "Say! Some people are dead slow, eh?"—New York Sun.

Her Private Punch.

The women hurried along Adams street from the Art institute on their way to the Woman's Euchre club at Handel hall.

"Just run in with me here a minute," said one. "I've got to get me a punch."

The clerk showed a collection of punches that made holes of various shapes.

"No," said the shopper. "I want just a simple, round punch—this size." And she abstracted a cardboard from her pocket that showed the size of the perforation.

"Oh, very well!" said the clerk. "We have it. But it's not called for very often for private games." And the punch was brought out and sold promptly.

The second woman wondered what her friend wanted of that particular punch, but kept her curiosity to herself. The game was exciting, and, as the friend is a good player, she won eight games. The second woman noticed this particularly. But when the score cards were exhibited the friend had 11 credit marks punched in her score card. The other woman saw then the wherefore of the particular punch they had bought. The friend had won eight games, and then had done a little punching with a private punch.

The prizes at these club contests are quite valuable, and the spirit of gambling has become so pronounced among some of the players that they are not above resorting to unfair means to capture them.—Chicago Inter Ocean.

"The Boot of Dukeronomy."

A nervous curate the other day announced from the reading desk, "Here beginneth the second chapter of the duke of Bocteronomy." His vicar looked severely at him, and the young man blushed, coughed and repeated, "The boot of Dukeronomy."

There must have been germs of mispronunciation lurking in the air, for at a later period in the service the vicar read out, "I publish the manns of barriage," etc.

The curate beamed with satisfaction in spite of the solemnity of the occasion.—Household Words.

BAD BLOOD

"CASCARETS do all claimed for them and are a truly wonderful medicine. I have often wished for a medicine pleasant to take and at last have found it in Cascarets. Since taking them my blood has been purified and my complexion has improved wonderfully and I feel much better in every way." MRS. SALLIE E. SELLARS, Latrell, Tenn.

Christ.—Christ ... time, but of the eternities. ... Christ of God.—Dr. G. H. Combs, Independent.

Vast Treasures.—A simple thing; it is to say, "God is spirit;" but the phrase holds vast treasures in the knowledge of God.—Rev. Dr. Behrends, Congregationalist, Brooklyn, N. Y.

Annihilated.—Try to imagine in what condition we should be and what we would do if all the past could be annihilated and we should start afresh.—Rev. B. F. Mills, Evangelist, Boston, Mass.

Society.—Society is not the result of a compact freely entered into and freely broken. It is a natural state, a necessary state and the effect of divine will.—Dr. Conaty, R. C., Washington, D. C.

The Influential Man.—The influential man in a city is, therefore, he who quietly thinks out the eternal laws of God and teaches them, and is true to them.—Dr. Joseph Stolz, Hebrew, Chicago, Ill.

God's Purpose.—Christ came into the world to make known the purpose of God and to furnish the means by which this purpose should be accomplished.—Rev. I. P. Coddington, Universalist, Rochester, N. Y.

Death.—Death is not the end. Death is the unfettering of the soul. The life beyond is the continuation of the life here, only enlarged, enriched, ennobled.—Rev. J. F. Carson, Presbyterian, Brooklyn, N. Y.

Spiritual Life.—The germ of the spiritual life is in every man. Ignore it and it will make of him a devil; cultivate it and it will transform him into a noble man here and hereafter.—Rev. W. H. Carwardine, Methodist, Chicago, Ill.

Happiness.—All happiness must rest on a solid foundation if it is to be real and lasting. Those who tie themselves to the things of this world forget that earthly honors are fleeting and perishable.—Cardinal Gibons, R. C., Baltimore, Md.

Fatalism.—The doctrine of fatalism, teaching that men and women are not morally responsible for their deeds, would work more harm if generally accepted than could be done by an epidemic of cholera or smallpox.—Rev. Dr. Dille, Methodist, Oakland, Cal.

Venerable Traditions.—You are face to face with the laws of the universe and your relations to the source of all life cannot be affected by man, by any church, no matter how venerable may be its traditions.—Rev. G. W. Stone, Unitarian, Kansas City, Mo.

A Higher Life.—It is the teaching of a higher life that city missions and such agencies are engaged in to-day. This is a discontented age, but a vision of the brotherhood of man is gradually stealing in to relieve.—Rev. R. Thomas, Congregationalist, Boston, Mass.

Methods.—When the church adapts its methods to the people about it they will give it a hearing, and if the baptism of power be upon the minister and people those who come to be entertained will remain to pray.—Rev. J. A. B. Wilson, Methodist, San Francisco, Cal.

A Dangerous Tendency.—There is a dangerous tendency in Christian republics to falsely glorify God and worship materialism at the expense of manhood. It is a stern rebuke to the English people and of our civilization.—Rev. Wm. Rader, Congregationalist, San Francisco, Cal.

A Plan in Life.—There is a plan in every man's life, and, being a plan, it has a purpose. Nothing helps us more, nothing more certainly makes the mystery of life easier to bear, than to keep that truth firmly fixed in the mind.—Rev. W. L. Phillips, Episcopalian, New Haven, Conn.

REAR ADMIRAL CARPENTER.

Commandant of the Portsmouth Navy Yard During the Recent War.

Rear Admiral Charles C. Carpenter, who committed suicide in a Boston sanitarium recently, was one of the oldest retired officers in the United States navy in point of service. The rash act which ended his life was done in a moment of partial insanity. He had been for sometime a sufferer from attacks of nervous prostration.

C. C. CARPENTER.

Rear Admiral Carpenter was born in Massachusetts 65 years ago. He entered the navy as a midshipman in 1850. During the civil war he served for a time with the South Atlantic Squadron, and during the latter part of the conflict at the Annapolis Naval Academy. He became captain in 1880, in 1893 was appointed commodore and a few years later was promoted to rear admiral. He had command of the Asiatic Squadron during the China-Japanese war and under his orders a shot was fired at a Chinese ship, enforcing demands of the government and averting an impending breach of the relations between the United States and China. He was retired in 1896, but was called from retirement to act as commandant of the Portsmouth navy yard, where the Spanish prisoners were confined, during the war with Spain.

Deaf and Dumb Beggar (on unexpectedly receiving sixpence)—Oh, thankee, sir! Benevolent Passer—Eh? What does this mean, sir? You can talk. Deaf and Dumb Beggar (in confusion)—Y-e-s, sir. Ye see, sir, I'm only minding this corner for th' poor deaf and dumb man wot belongs here. Benevolent Passer (quickly)—Where is he? Deaf and Dumb Beggar (in worse confusion)—He's gone to th' park t' hear the music.—Tit-Bits.

She—When you asked me to be your wife you deliberately deceived me. He—In what way, Martha? She—You told me you were well off. He—Well, I might have said it, Martha, ... how well.

...departure with rhubarb, ... not generally known or prac... ...of California: ...in a dark cellar, ...

Tradition says "woman ... and young women are so ... There is a little truth and a great deal of exaggeration in this. If a young woman suffers severely she needs treatment and her mother should see that she gets it.

Many mothers hesitate to take their daughters to a physician for examination; but no mother need hesitate to write freely about her daughter or herself to Mrs. Pinkham and secure the most efficient advice without charge. Mrs. Pinkham's address is Lynn, Mass.

The following letter from Miss MARIE F. JOHNSON, Centralia, Pa., shows what neglect will do, and tells how Mrs. Pinkham helped her:

"My health became so poor that I had to leave school. I was tired all the time, and had dreadful pains in my side and back. I was also troubled with irregularity of menses. I was very weak, and lost so much flesh that my friends became alarmed. My mother, who is a firm believer in your remedies from experience, thought perhaps they might benefit me, and wrote you for advice. I followed the advice you gave, and used Lydia E. Pinkham's Vegetable Compound and Liver Pills as you directed, and am now as well as I ever was. I have gained flesh and have a good color. I am completely cured of irregularity."

Feudalism In Hungary.

Inconceivable as the anachronism may seem to the western mind, the agrarian system of Hungary has not yet issued from the feudal form. The Hungarian farmer of today is virtually a serf, bound to his master, the hereditary owner of the soil which the peasant tills, by the tangible tie of personal liability. The Hungarian feudal lord of today is entitled to 50 days' labor from each male adult who dwells on his land. The seignior is at liberty to demand this feudal contribution at whatever time may seem best to him, with the frequent result that the tenant farmer is employed in gathering his master's harvests while his own crops are rotting after a rainfall or are being consumed by an early frost or suffer damage from one or more of the many possible causes which render destructive the slightest delay on the part of the harvester in gathering the fruits of a year's labor.—S. Ivan Tonjoroff in Arena.

Makes the Spot Vanish.

A slight rap may cause a bruise, or a slight blow a black one, sore and tender. But it is easy to cure a bruise by the use of St. Jacobs Oil, and make the spot vanish and the soreness heal.

"Ashes of Angels" Cake.

I once knew an estimable lady who in the absence of her cook undertook to make a certain kind of cake. She took "some" of one kind of ingredient, "a little" of another and "a small quantity" of something else. To her delight and surprise, the result was a cake of which neither she nor any one else had ever heard. It was an entirely new cake and an extremely delicious one. Proud of her achievement, the lady gave the cake the beautiful and poetic name of "ashes of angels," and on the very next occasion when the absence of her cook made it possible for her to venture into her kitchen she tried to repeat her success.

This event happened in the year 1883, and ever since that date the unfortunate lady has been vainly trying to reproduce her wonderful cake. She has never once succeeded, although she has made at least 200 different varieties of cake and pudding, each one of which has been more deadly than the other. She is still hoping that one of these days she may hit upon her "ashes of angels" again, but as that cake was purely the result of chance the prospect that she will be able to make it a second time is not bright.—W. L. Alden in Pearson's Magazine.

Not So Bad.

Dotty Thimble rushed up the stairs to Lucy Cleary's room and burst through the door.

"He isn't such a fool, after all!" she exclaimed.

"Who isn't?" asked Lucy wonderingly.

"That Gerald Thompson."

Lucy's lip curled. "What makes you think so?" she asked.

"'Cause he kept us all guessing for three hours at Maria Evesen's library party last night."

"Did he? How?"

"He came in with a bicycle lock tied on his shoe."

"What did that mean?"

"That's what none of us could make out until it was time to go, and then he told us and it was so simple he made us all feel like fools."

"What book was it that he represented?"

"Locke 'On the Human Understanding.' He's coming over to call tomorrow night."—Detroit Free Press.

Feminine Features.

"While woman may have her face on the dollar," said the cynical philosopher, looking thoughtfully at the coin, "yet, to tell the truth, she is more apt to have her eye on the 38 cents."—Indianapolis Journal.

The depth of water affects the speed of steamers very considerably, the vessels moving more slowly in shallow than in deep water.

About one German woman in every 27 works in a factory.

"Telep... wives." "W... of not speak... to."

She—"What is meant by the ... that a man is convalescing?" He—"That he has outwitted his doctor, I suppose."—Topeka Capital.

"The single-scull race!" exclaimed an old lady, as she laid down the paper. "My gracious! I didn't know there was a race of men with double sculls!"

Baggs—"It is said that Dame Fortune knocks once at every man's door." Jaggs—"Well, it was her daughter, Miss Fortune, who called on me."—Boston Traveler.

McLubberty—Of'd loike to take a trip around the wurruld. Mrs. McLubberty—Sure, thot wud be foine! McLubberty—Yis; but t'ink av the cost av gittin' home ag'in!—Puck.

"What is firmness, father?" "Firmness, my boy, is obstinacy in ourselves." "And what is obstinacy?" "Obstinacy is firmness in somebody else."—Chicago Evening Post.

Osmond—"Well, thank heaven, you have never seen me run after people who have money." Desmond—"No; but I've seen people run after you because you didn't have money."—Life.

"I had supposed, until yesterday, doctor, that the days of the bleeding of patients were past." "And so they are. But what changed your mind?" "The bill you sent me."—Harper's Weekly.

Maud—"I think it perfectly disgraceful! Her fiance hadn't been dead six weeks when she married the other man." Mabel—"But you know her trousseau would have soon gone out of fashion."—Bazar.

"You ought, like us, to have holidays in honor of your great men," said the Russian beauty. "But in the American year," said the major, "there are only three hundred and sixty-five days."—Philadelphia Press.

She—"Do you know there's something about you which reminds me of Cervera's fleet while it was bottled up at Santiago?" He—"Indeed! What is it?" She—"Your mustache. It's such a long time in coming out."—Chicago News.

Old Lady—"Now, porter, you're quite sure you've put all my luggage in?—the big portmanteau and——" Porter—"All right, mum." Old Lady—"And you're certain I've not left anything behind?" Porter—"No, mum, not even a copper."—Tit-Bits.

Bridget—"There's a man in the parlor wants to see you, sir." Mr. Ardup—"I'll be there in a minute. Ask him to take a chair." Bridget—"Sure, sir, he says he's going to take all the furniture. He's from the installment company."—Brooklyn Life.

Patent medicine proprietor—Hereafter all testimonials must be accompanied by orders for at least half a dozen bottles of medicine. Clerk—Yes, sir. Patent medicine proprietor—If these people want to see their names in print they ought to pay for it.—Puck.

"What did Colonel Stilwell say about the brandied peaches we sent to cheer his convalescence?" "He said he was afraid he wasn't strong enough to eat the fruit," replied the little girl, "but that he appreciated the spirit in which it was sent."—Washington Star.

Mr. Wigsby—See here, my love, there is some mistake; the baggage delivery man has left seven trunks on our front porch. Mrs. Wigsby (who has just returned from the mountains)—Imbecile! Don't you understand? He's coming back after dark for the extra five.—Cleveland Plain Dealer.

Wife (with a determined air)—I want to see that letter. Husband—What letter? Wife—That one you just opened. I know by the handwriting it is from a woman, and you turned pale when you read it. I will see it, sir! Give it to me, sir! Husband—Here it is. It's your milliner's bill.—Tit-Bits.

"You think this man had been drinking," said the cross-examining attorney; "did he appear to have more than he could carry." "I'll not say that," replied the cautious witness; "but I do think that he would have been wiser to have gone twice after it."—Detroit Free Press.

Uncle (to nephew playing the game of war with a companion of his own age)—If you take the fortress within a quarter of an hour I'll give you a dime. Youngster (a minute later)—Uncle, the fortress is taken; now let me have the dime. Uncle—How did you manage it so quickly? Youngster—I offered the besieged a nickel and they capitulated.

Fashionable lady member of a parish church (to poor old woman)—"We have got a fine new organ now into our church, and it will be played the first time there on Sunday next. Will you come and hear it?" "Oh, na, na, ma'am," was the reply, "I dinna trouble myself wi' the like o' thae things. Ye see I canna dance."

"You will observe," said a teacher, "that the higher the altitude attained, the colder the temperature becomes." "But isn't it warmer up in the mountains?" asked the youth at the foot of the class. "Certainly not," replied the professor; "why do you think it would be warmer there?" "I thought the atmosphere was heated by the mountain ranges," answered the youngster.—Chicago News.

...ient, Indigestion ... Dr. Williams Pink Pills for Pale People ...cause these glands to resume their normal action and good digestion follows.

Artificial ferments (of which most so-called Dyspepsia cures are composed) may give temporary relief, but Dr. Williams' Pink Pills for Pale People afford a permanent cure.

Poor digestion often causes irregularity of the heart's action. This irregularity may be mistaken for real, organic heart disease. A case in point: Mrs. Ellen Colsom, Newpoint, Ind., had suffered for four years with stomach trouble. The gases generated by the indigestion pressed on the heart, and caused an irregularity of its action. She had much pain in her stomach and heart, and was subject to frequent and severe choking spells which were most severe at night. Doctors were tried in vain; the patient became worse, despondent, and feared impending death.

She noticed that in intervals in which her stomach did not annoy her, her heart's action became normal. Reasoning correctly that her digestion was alone at fault she procured the proper medicine to treat that trouble and with immediate good results. Her appetite came back, the choking spells became less frequent and finally ceased. Her weight, which had been greatly reduced, was restored and she now weighs more than for years.

That others may know the means of cure we give the name of the medicine used—Dr. Williams' Pink Pills for Pale People. These pills contain all the elements necessary to give new life and richness to the blood and restore shattered nerves.

—*New Era, Greenburg, Ind.*

Sold by all druggists or sent postpaid by the Dr. Williams Medicine Co., Schenectady, N.Y. Price, 50¢ per box, 6 boxes, $2.50. A diet book sent FREE.

Remember 1897-8?

Dry season, wasn't it? Maybe next year will be dry, too,—then what? Better send TO-DAY for our Catalog—we've sold 1,600 pumping plants.

Hercules Gas Engine Works
305 MARKET ST., San Francisco, Cal.

Consumption and Fresh Air.

It is a matter of common knowledge, says an English exchange, that the late Sir Andrew Clarke cured himself of consumption by living as much as possible in the open air. The principle involved has since been generally recognized by the medical profession, with the result that the old bad practice of keeping consumptives in warm, stuffy rooms has been almost entirely abandoned. It is fresh air which is mainly responsible for the cures worked at such places as Davos, where the patients spend 14 hours a day out of doors, breathing cold, bracing mountain air, while they are exhilarated by bright sunshine. The result is that each diseased spot in the lungs is cut off from the healthy tissue by a ring of stretched cells, across which disease germs cannot pass, and so the malady is arrested until the strengthened body can overcome it.

Will Get Down To It.

It is certainly true that as deeply imbedded as the sciatic nerve is, St. Jacobs Oil will get down to it and cure it. It is a proof of how penetrating and efficacious are its curative powers.

Took the Same.

Lawyer—You say that you were in the saloon at the time of the assault referred to in the complaint?

Witness—I was, sir.

Lawyer—Did you take cognizance of the barkeeper at the time?

Witness—I don't know what he called it, but I took what the rest did.—Boston Courier.

Good Use For Them.

She (singing softly)—"Would that I had the wings of a bird."

He—What earthly use would they be to you, my dear?

She—I was just planning the trimming for my spring hat.—Detroit Free Press.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

Had Not Forgotten It.

The ward heeler, with whom the ambitious politician had been in consultation an hour or more, shook his head slowly.

"I don't know how it will turn out," he said. "But I'll do the best I can for you. How about the liquor question?"

"I was about to ask it," replied the ambitious politician. "What'll you take?"—Chicago Tribune.

Belgian workmen are fond of cock crowing competitions. The other day one well trained bird crowed no less than 463 times in the course of an hour.

In ancient times many of the mountains of Palestine were terraced, and some of these terraces still remain.

LOVE.

out one day.
e: "I'll go my way
broken-hearted.
e without your aid;
man or maid—"
they parted.

ty Youth alone;
time in merry tone
oked behind him.
at home, was sad and sore,
for merry Youth once more.
could not find him!

had not been walking long
shed his merry song—
s full of sorrow.
ard to stay away
if only for a day—
back on the morrow.

Love and Youth apart would die
Like flowers without dew or sky—
They'd fade if they would sever!
As long as there is tide and time
In every land, in every clime,
Youth and Love will be together.
—Philadelphia Times.

"ALL'S WELL THAT ENDS WELL."

ds has happened,"
forced calmness. "I
and thought we
were
lends, but you can
see that it is impossible for me to marry. It is my duty to take care of papa and my brothers and try to take the place of my poor mother."

"I felt from the first," said Harry sorrowfully, "that it was hopeless to think of you. You are too good for me."

"Don't say that, please, for I like you much more than any one I know. If I ever did to marry, it would be just such a man as you—good, clever and generous. But you see that it is impossible, don't you?"

He looked into her appealing eyes, but could not answer. Nothing is so sublimely tragic as a beautiful girl sacrificing herself to a mistaken sense of duty, and she appeared so sublime to him that he couldn't help thinking her in the right.

In affairs of the heart a man, especially a young man, needs a disinterested woman to guide, to encourage, or to check him, as the case may require. Now, Harry Watson was so fortunate as to have a charming widow as his confidant and friend. She was several years his senior, and he was once much in love with her—or thought he was. She had poohpoohed his proposal and told him that, although she thought him a fine, clever young fellow, she had no desire to take a boy to raise, and that he mustn't talk nonsense. Of course he was tragic and went out West to hunt for grizzlies, hoping to be mastricated by one, but he presently came to his senses and returned to the city. He was naturally rather shame faced when he met the widow, but she was so jolly that he soon forgot his previous absurdity, and they became fast friends.

"You poor boy!" said the widow in humorous sympathy. "What would become of you if it were not for me? But if you obey my orders I will guarantee that you will win her."

After thinking the whole matter over Harry felt comforted, and he felt sure that the clever widow was going to do all in her power to help him. But he did not imagine that while they were discussing the subject the peerless, self-sacrificing Esther was weeping bitterly and almost rebelling against her fate. It was only by magnifying her duty to an appalling grimness that she finally recovered her composure and soothed the pain at her heart to an aching numbness.

As soon as the widow felt that Harry had recovered from the first bitterness of his disappointment, she ordered him to go and call on Esther. He obeyed, and a few such calls restored to some extent their old relationship, and they could talk more like brother and sister. And one evening she talked to him in a most sisterly fashion, warning him wistfully to beware of the wiles of the widow.

"You know I look on you as a brother and should not like to see one of my brothers as much in her company as you are. Of course she is nice, but people say she is so designing."

"The little minx," said the widow when she heard of it. "I know I am designing, but she will find that it is for her happiness I am doing it now—and incidentally for my own—or just the reverse."

She of course diagnosed the case as one of jealousy, and was pleased. Harry didn't understand the last part of her remark, but he did not question.

"Are you going to the Madison musicale?" the widow asked.

"Yes. Esther and her father will be there," Harry replied.

"Well, I shall be there, too, and I may want you to do me a favor. Will you do it?"

"Certainly."

On the night of the musicale the widow was triumphantly beautiful. There was the light of battle in her eyes, and that with good reason, for she had brought her own affairs and those of several other people to a crisis. But no one could look at her perfect figure and animated face without feeling that she could conquer the most obdurate by her charms and have her will. Harry had never seen her looking so bewitching, for he had never seen her so thoroughly alert and aroused. Had Esther not been present to allure and yet repel him with her lilylike sweetness and nobility of soul it is possible that old thoughts might have been aroused. But his eyes were dwelling constantly on her pure, calm face, and she seemed to him more than ever unattainable. When the evening was well advanced, the widow tapped him on the shoulder with her fan.

"I have come to ask you for that favor," she said.

"I am ready to do your bidding."

"Take Esther into the conservatory and propose to her."

"I can't."

"You must. If you do, I think I can promise you that you will win her—if not to-night—soon afterward. But you must propose to-night."

Hope made him courageous, and he did as he was directed.

When he had found a sufficiently retired alcove in the conservatory, he renewed his proposal with the stately beauty. But it was in vain.

"It cannot be," she answered. "My duty is quite clear to me, and I must sacrifice my own feelings to it. I feel that to take care of my father in his declining years is a trust imposed on me by my dead mother."

"Then you are not indifferent to me?"

She was too honest to deny her love. She bowed her head in assent, and the tears welled in her eyes.

"I must get papa to take me home."

She turned and walked away from him quickly. Before she had gone a dozen paces she stopped as if transfixed and looked with dilated eyes into an alcove she was passing.

Then she ran back to Harry, and almost fainting, caught his arm.

"Take me home! Take me away from here!"

He hastened to call a carriage. When they had entered it Esther began to cry, and he tried to console her. Instinctively he put his arm about her, and she did not resist. A moment after—it was the natural thing to do—he kissed her, and, leaning her head on his shoulder, she wept until her sorrow had abated. He could not imagine what was the matter, but when they arrived at her home she enlightened him. As she was leaving him in the conservatory she had seen her father kneeling before the widow, proposing to her, and had seen her grant him a kiss of acceptance. All her illusions about duty vanished in an instant. Her father was getting another to take care of him, and her occupation was gone.

"I shall leave home!" she cried, angrily. "If he marries her I must leave home!"

"I have a home to offer you," said Harry.

It never occurred to Harry that the widow had ordered him to propose to Esther so that she could bring her father, as if by accident, to see the little scene. She had watched his movements, and, judging the correct moment to a nicety, had brought Mr. Townsend to that part of the conservatory. He liked Harry too much to interrupt, which the widow had taken care to learn before she took the step, but he was naturally surprised. Of course she promptly sympathized with him on losing his housekeeper, and so wrested from him the proposal which she had long ago planned. She had not counted on Esther overlooking her part of the drama, but that only hastened the action of her plot, and she was not sorry when she heard of it.

Harry was naturally profuse in his thanks, for his happiness so blinded him to everything else in the world that he thought it was for his sake that it had all been done. When this dawned upon the widow, she laughed loud and long.

"Oh, go away," she laughed, "to your billing and cooing with Esther! You are such a pair of fools you should be happy together." And she added, somewhat mischievously: "You see, I am, in a sense, taking a boy to raise, after all. But you will find me an indulgent mother-in-law."

QUEER STORIES

When the planet Mars is nearest the earth it is 36,000,000 miles away.

The California woodpecker will carry an acorn thirty miles to store in its nest.

In Russia servants kiss their mistress' hands both as morning and evening greetings.

The longest canal in the world is in Russia. It extends from St. Petersburg to the frontier of China, and measures nearly 4,500 miles.

In Peru it was once the custom for domestic servants to have two of their upper front teeth extracted. Their absence indicated their servitude.

The drill of the Roman soldier was exceedingly severe. It comprised not only the use of weapons, but running, jumping, climbing, wrestling, swimming, both naked and in full armor.

The largest hornet's nest that has ever been taken undamaged was more than a yard in circumference and one foot four inches in length. It was found suspended from a roof of a house on the Earl of Clarendon's estate, and weighed barely three pounds. It was said to contain 780 insects.

The deepest lake in the world, so far as known, is Lake Baikal, in Siberia. While nine thousand square miles in area, or nearly as large as Lake Erie, it is four thousand feet to 4,500 feet deep, so that it contains nearly as much water as Lake Superior. Its surface is 1,350 feet above sea level, and its bottom nearly 2,900 feet below it.

Naturally.

This story, relating to a young pork-packer in Kansas City, is circulated quietly among his acquaintances:

A new baby had arrived in his family, and he was very proud of it. While several friends were congratulating him in his office, and smoking cigars at his expense, one of them asked him:

"By the way, ——, how much did the cherub weigh?"

"Ten pounds, dressed!" exclaimed the delighted young father.

Long st Cable.

At present the longest single submarine cable is 2,700 miles.

Having faith in the wrong kind of a man is like having money in a poor bank.

THE PARTITION OF CHINA

THE fall of the Chinese empire and its actual partition among the western peoples have furnished one of the most dramatic spectacles to be found in the history of the nations. It came about through the Chinese-Japanese war. The pretensions of a vast empire were exposed within three months. The war demonstrated that China was made up not of one people, but of many peoples—peoples who spoke different languages, had differing customs, entertained differing beliefs, held differing ambitions. In a general way, it had been known that a man from Canton could with difficulty make himself understood in Hong Kong, but the world dreamed of nothing like the racial separation which existed within the far-reaching confines of the flowery kingdom. All of these interior and exterior peoples believed in a vague way that the emperor was the son of the sun, but they were not willing to fight for it. The generals were venal, cowardly or incompetent. The navy was a sham. The army was not above the ridiculous. The state was rotten through and through. Japan accomplished the exposition, but was held off. It wished to seize Corea and a large part of the Chinese mainland. It got only some money and the Formosan islands, which have been a white elephant. Russia, Germany and France interfered. England was appealed to, but failed to interfere. England fights only its own battles.

The vast Chinese kingdom was left open and palpitating. The emperor's head rolled uneasily on his shoulders. Rebels were to the north, south, east and west of him. His revenues were stopped. Anarchy threatened. His family had been taught by more than fifty years of experience that it costs money to appeal to England. He knew little of Russia, beyond the fact that it had proved friendly in fending off Japan. He turned to Russia. That country acquiesced promptly. The price paid has been greater than Britain would have exacted. Russian agents swarmed into Manchuria. Russian troops followed them in thousands and are still there. Russian ships prowled along the coasts, the waving black lines of smoke signaling to him that his powerful friend was still aiding him.

Mr. Pavloff, Russian representative at Pekin, elected himself the special guide, counselor and friend of the tsung-li-yamen and it was forced to take his advice. Russia demanded and obtained treaty rights, occupancy rights, railway concessions, mining privileges, changes in customs and anything else which the Czar's minister thought might prove of advantage. The Chinese government acted like a child. It pouted and whimpered. It appealed tearfully to England one day; the next it would not receive the English ambassador. It lied to Russia, to Germany, to England. Steadily the Russian pressure continued. Nothing could lighten it. It is still exerted. Nominally leasing only a part of the Liatong peninsula Russia now controls all of Manchuria, which is being opened by the Siberian and Manchurian railways. It controls all of the province of Pe-Chee-Lee, which includes Pekin. It controls Shanshi and Shenshi, over which a Belgian corporation (which hides a Russian corporation) is driving a railway. It controls Kansu, unexplored, but said to be rich in minerals, and the northern part of Thibet. This mysterious land, which is closed to England from the south, is wide open to Russia from the north and is being surveyed by Russian engineers. With these territories Russia dominates every caravan route through Koko-Nor and Turkestan. The price has been high.

Directly south of the Russian "sphere" lies the British "sphere." The space, occupying the center of the map, includes the great Yang-tse valley. For more than a quarter of a century it has been regarded as the bondmaiden of British trade. This is China—actual China—the China of the Chinese, not the China of the Manchurians or the Manchu dynasty. It contains 300,000,000 people, or three-fourths of the entire population of the empire. It contains hundreds of huge cities. It is twenty times worth the other portions of the kingdom. It is, so far as cultivation is concerned, the garden of the world. The seat of the British governance of this royal territory is now and has been for many years Shanghai. Until last year not one of the European governments had sought to question the British right to control this valley. Russia now denies it absolutely. Payloff asserts that British dominance of the Yang-tse is a myth; that no guaranteed rights of possession have been granted to England by China and that Russia has every right to build through the valley or to take any action she may please looking to the development of Russian trade. It is over the valley of the Yang-tse that battles of the future may be fought.

Impinging upon the British "sphere" to the south is the French "sphere." Russia has gained its foothold through diplomacy and promises of aid. France has fought for hers. French diplomacy in China has not been a success. The French have been compelled to find excuses for wars and to take with the strong hand. Years have been spent by the Gallic government in endeavoring to increase its holdings in Annam. It has succeeded only in obtaining concessions to build two railways. It is contemplated that one of these shall go north to a point on the Yang-tse River, where it is to join a Russian road running south from Pekin. If the scheme is carried out the Yang-tse valley, now dominated by England, will be pierced through and through by a road, one end of which will be owned by Russia and the other by France. This road would be the future grand trunk line of China; it would be dominated by French and Russian officials; its tariffs would be fixed by France and Russia; its trains would be run to suit the convenience and purposes of those countries.

The German possessions in China are much smaller than the Russian or French possessions, but are more compact and more advantageously situated. No one doubts that Russia and France agreed that Germany should have this territory when the three powers were throttling Japan. The immediate excuse for German occupation was the murder of three missionaries. A force of marines was landed at Kiao-Chou, the Chinese ran away, promptly the German flag was hoisted and the deed was accomplished. The result has been that Germany now owns the entire Shan-tung peninsula; has reserved the right to build railways and do mining in that part of the empire; handles the customs as a matter of course; has obtained an ice-free port for its warships, and stands ready to take a hand when the final slicing begins. It demands also the right to construct a parallel line to the contemplated French and Russian line through the Yang-tse valley, thus placing a railway owned by a third inimical power in the territory supposed to belong to England. If the French claims for an extension of "sphere" are allowed, the French will cut the British line of communication between Central China and British China. This is made clear by a glance at the map.

The difference in the policies of the three great powers briefly stated is: Great Britain, confident in its commercial prowess and the value of the foothold it has obtained by half a century of occupation, wishes to throw open to the world the trade of the 400,000,000 subjects of the Emperor. Russia, Germany and France have wished to partition China commercially among themselves, reserving certain portions for their own trading and barring out competitors by means of customs regulations, local taxes, railway tariffs, etc. It may be stated here that Great Britain has maintained the open door in her "sphere" since the acquisition of her "sphere," and that her trade with China is three-fourths of the entire trade of the empire with the outside world.

The accompanying map marks the portions of the empire which have been grabbed by the contending Western powers, and it is common prediction in European circles that the world war of the future is to come from the clashing of these "spheres." The militaires of England declare that if their country fails to preserve her domination of the great river of the Yang-tse she will be forced to fight to preserve her influence from utter ruin; if she does finally stake out her "possessions" she will be forced to fight over a matter of boundary lines. The parties to the quarrel have been arranged as follows: Russia and Germany on the one side with France helping them, not only because of a community of interest, but because of the Franco-Russian alliance; Great Britain on the other, with Japan helping her, because of resentment of Russia's conduct after the close of her successful war. To these prospective combatants must be added Italy, presumably willing to assist England, and the United States, which favors the English policy of the "open door"—in other words, free ingress and egress for commerce to and from the empire.

MAP SHOWING FOREIGN "SPHERES" IN CHINA.

Boston Mayor's Suggestion.

Mayor Quincy, of Boston, has suggested that the city should build a municipal crematory in which to incinerate the bodies of paupers, criminals and others whose burial devolves upon the city. The idea is to do away altogether with the potter's field. It is asserted that the city could cremate bodies at a cost of only $1 each, while it costs $3 to dig a grave. The present potter's field will be filled before the expiration of the present year. The burials now amount to about 500 a year, and increase in number yearly.

Valuable Metal.

Aluminum is now worked on a large scale for all sorts of industrial purposes, and has taken its place as one of the five or six commercial metals of the world. Weight for weight, it is already cheaper than copper and tin; it does not tarnish, is suitable for all kinds of cooking utensils, is largely used in shipbuilding and is a most valuable adjunct to metallurgy, inasmuch as a small addition of aluminium to a mold of steel or brass insures absolutely solid castings.

When newly married people read the advertisements in the street cars and in the programs at the theater, instead of talking, it is one sign their dream has ended.

The next time you think you have heart disease recall what you ate for dinner, and you will remember that you ate pie.

Setting Wagon Tires.

There are many jobs that a farmer can do for himself, if he only makes the attempt. One of these, says the American Agriculturist, is the setting of the tires on the wheels of his vehicles. The usual charges at a shop for one wheel will exceed the cost to the farmer of setting all four, and the time spent in hauling them to and from the shop, to say nothing of the trouble and vexation of unsatisfactory work or ruined wheels, is far greater than it would be to do the work himself. To do this, it requires an outlay of only the cost of a metal trough and linseed oil, about half a gallon to a set of wheels, though more than enough to

WHEEL IN POSITION FOR SETTING.

do the work will be needed, as the trough, while boiling, must be filled so as to cover the felloes.

This trough (a) can be made of galvanized iron, by a tinner. Set it on brick or stone in such a way that a fire can be built and kept up under it. Put in enough oil to cover the felloes, and let come to a boil. You are now ready to put in the wheels. The way this is done is shown so plainly in the illustration that description is unnecessary.

To prepare the wheels, let them soak in water until the tires are tight, washing out all the mud and dirt possible. After being placed in the oil, the wheel should be slowly turned to prevent charring. The length of time required to boil a wheel depends on its condition, as does the amount of oil it takes for a set. Two sets of wheels can be easily set in half a day. This job will prove far more satisfactory than one performed by a blacksmith, who, often on account of the dry wood swelling after he has shrunk the tire, ruins a wheel by dishing it.

Slow-Germinating Seed.

There are some kinds of seeds, like the salsify, that are so hard and dry that it seems impossible to germinate them quickly enough in spring so as to keep ahead of the weeds. We advise putting such seed in water made almost scalding heat, or about 150 degrees to 160 degrees, for a few minutes at a time, withdrawing the seeds and repeating the scalding until the seed shows signs of swelling. Then plant such seeds, and if the soil is warm the plants will be up as quickly as the weeds. Onion seed may be treated the same way. Some kinds of plants which come up very small and are not conspicuous can be cultivated quite near to the rows by dropping a few radish seed in the row where the more valuable crop is grown. The radish will show sooner than almost any other garden plant, and what radish are thus grown can be pulled out and used by the time the other crop can be seen to hoe closely to it.

A Good Milk Stool

is shown in the accompanying illustration. It is made of two boards 22 inches long and 10 or 12 inches wide. Nine

USEFUL MILK STOOL.

inches from one end saw half way through each board and split off the long end. Across the elevated end nail a board about 12 inches long for a seat. Place one-half inch cleats on the lower portion, upon which the pail is to rest. The pail is thus kept clean and is not easily upset.—Orange Judd Farmer.

Forcing Young Chickens for Market.

A great many of the young chickens that are hatched every spring would bring more money to their owners if forced for broilers than if allowed to come to maturity. The secret of forcing is to give food that is cooked and that is easily digested. Steamed oatmeal is excellent for them, followed a little later on with boiled wheat. Some meat food should be given them occasionally, together with crushed bone to help grind the food in their gizzards. This forcing process would not answer for fowls that are to be kept, but it will put a great amount of tender flesh on young chickens, that, considering the short time it is done, may be as profitable as the eggs from a hen kept until she is old enough to lay.

The Leaf of Young Grain.

There is much difference in the breadth, size and color of leaf in young grain as it comes up. It is partly dependent on the character of the seed, as the plant sends up its first leaves mainly from the starchy matter which encloses the germ and which the germ uses until it is able to put forth roots into the soil. Barley being larger and heavier than oats has always a broader leaf, though if oats are sown on rich land and somewhat late they will come up with a leaf that looks like barley. But this rank growth early is not regarded favorably by the cultivator, for he knows that it is liable to be followed by rust of stalk or grain later in the season. Harrowing grain that comes up with too small and thin a leaf bruises these first leaves, and as it also stimulates root growth it causes the plant to send up new shoots with much broader leaves. This dries out the soil, thus preventing the excessive growth later that invites rust.

Breeding Turkeys.

The best results in growing turkeys are from yearling hens bred to a gobbler two years old, and three would be still better. The young hen will lay more eggs the first year than she will in any year after, and if she mates with a gobbler two years or over the young turks will be active and vigorous. Watch the hen turkey carefully, and remove her first eggs as soon as laid, lest they become chilled. Two and sometimes three settings of turkey eggs must be taken from the young turkeys and set under common hens before the hen turkey will sit steadily herself. The hen turkey must be confined mornings when she has young chicks, or she will draggle them through the wet grass and thus kill them.

Barn Truss.

I send sketch of barn bent. I think any one who will give it a thorough study will decide that it is strong, self-supporting, and no danger of spreading. The purlines and some other timbers are drawn out of proportion to the rest, so that the construction can be understood. The plan is original with myself, and has not been practically tested, but I am confident that there is no possible chance for an outward thrust, for the long brace, A, A, passing through between the timbers forming the purline and on through the short tie B, and through the double studding C, will forever hold the barn from giving out. The purlines may run from the ground sills, passing between the cross sill D on up to the purline plate, showing the mode of construction at E. The dotted collar beam at F F is to be fastened to the inside rafters on a level with the cross at G, in order to fasten the rangers for a track to run a hay fork. The lower end

NEW BARN PLAN.

of purline at H H is to be cut so as to fit over the sill, and showing spikes to be driven. This frame can be made to resist an indefinite amount of pressure.—J. H. Fisher, in Ohio Farmer.

Wood Ashes for Apple Trees.

In some tests at the New York Experiment Station it was found that the foliage was greatly improved in sections of the orchards treated with wood ashes and the trees were freer from scab. The color of the fruit was also improved in some seasons and with some varieties, but during the seasons which favored the perfect development of the fruit the color was not helped. Apparently the use of ashes has a tendency to hasten the perfect development of the fruit. Some seasons this ripening process was carried so far where ashes were used that the apples did not keep as well as on plants untreated.—Orange Judd Farmer.

The Home Price of Feed.

When farmers feed much that they produce to stock kept by themselves it is not fair to the stock to charge for the feed what it would bring in the market. Feeding at home saves much labor in marketing, and there is besides the manure pile, which returns to the soil a great deal of the plant food that the crop has taken from it. If the stock is reasonably good it ought to pay the farm value of the grain and fodder that it eats. In that way the farmer is making more than he could by selling it. By improving his stock the farmer can make it pay market prices for all the grain he feeds it.

Good Roads.

The latest cure for bad roads is crude oil, experiments with which are being made at the suggestion of good road associations. One barrel of oil is said to be sufficient to create a waterproof strip 100 feet long and 12 feet wide. Major Meigs, a civil engineer of Keokuk, Iowa, claims that no other material is as cheap and effective, and offers to have oil sent to responsible parties wishing to experiment, if they will pay the freight.—Epitomist.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JUNE 16.....1899

Some opposition is found among eastern farmers to the proposed irrigation of arid lands by the Federal government, which is now beginning to receive the serious attention of congress. These eastern people claim that such work would be of only local benefit to the west and would only injure eastern farmers by opening more western land, whose products would compete with their own. It is encouraging to note that there are many broad minded people in the east who take a far more liberal view of this important question. Thus, that sterling agricultural paper, the American Cultivator, in the course of an article on the subject, makes the following sensible and pertinent remarks:

"Would the products grown on western irrigated land in any way compete with those of the east? Take southern California, for instance. There are now in that state large areas of irrigated land and there are millions more acres subject to irrigation with proper water supply regulations. How do the crops of southern California affect the eastern market? Her principal products are oranges lemons, olives, grapes (and raisins,) wheat, dried apricots, peaches, etc The fruit products last year of southern California amounted to $21,000,000. California grain is shipped to Liverpool and the Orient, and does not compete with the eastern states, simply adding slightly to the world's supply. Her fruit which comes east does not in any way compete with the eastern farmer. The eastern farmer has not even contributed to any extent that $21,000,000 to southern California's wealth; that has been paid mostly by the cities and the comparatively wealthy class. But, on the other hand it is *not to* be supposed that money which goes to California stays there. It is immediately sent east again to purchase manufactured articles of all sorts, and the manufacture of these articles in the east creates a demand for the products of the eastern farm. As a matter of fact, the further development of the west, by irrigation or otherwise, would further develop the east; would further stimulate its manufacturing industries, and these are dependent for support upon the eastern farm products.

It seems to me that the most significant statement heard in the Ohio Republican convention was made by Grosvenor. It was not among the lying planks of a juggling platform, but came out in the heat of one of those oratorical outbursts so dear to the fancy of Mr. McKinley's right bower in Congress. "What we want," exclaimed Mr. McKinley's Congressional jumping-jack," is a President with an army and navy big enough to back him in all his policies." Whether Grosvenor was drunk with pride of oratory or simply with plain whiskey, I wot not, but he certainly told the truth. That is what these men want. That is what Mark Hanna wants. That is what the trusts want. And that is what their tool in the Presidential chair wants. They want enough troops to imprison editors and suppress newspapers in every state as they have done in Idaho. They want to set up the same arbitrary government in New York and Pennsylvania and Ohio and California that they have illegaliy set up in conquered provinces. And they want the military power to keep fast hold of the government in case the people beat them at the polls. They stole the Presidency in 1876. Does any one think they would hesitate to keep Mr. Bryan out of his own in 1900 if they felt strong enough to risk a fight? I tell you these men are bold and dangerous. They meditate now the overthrow of popular government. They prefer to use bribery, to subsidise the most infamous press that ever crawled on its cowardly belly in any free land, to debauch elections and to win by all the methods known to chicane. But when those methods fail they will surely try force, if we are fools and blind enough to put the force at their control. It has come to pass where the very existence of free institutions trembles in the balance of a single election.

The question of the moneyed trusts, which the policy of the Republican Administration has encouraged and fostered, will be one of the main issues in the coming national campaign. From the Republican party, controlled as it is through its leaders by these same trusts, no relief can be expected. Its platform declarations on this subject will sound well and read well, but being base and hollow mockeries, in the light of the past, will lack the true ring of sincerity. The nation at large is ready to admit that these trusts, which in the aggregate have reached stupendous, even fabulous, proportions, stand to-day as one of the greatest menaces to the commercial and political freedom and general prosperity of the land. To what extent they can be regulated will furnish one of the most serious of problems.

Dealers in wheeled vehicles as well as users will do well to bear in mind the fact that the new wide tire law goes into effect in this state on the first day of next January. The law was passed by the Legislature of '96-97, and is entitled, "An Act to regulate the width of tires of wagons to be used on the public highways of the State of California." It was signed by the Governor on March 20, 1897, and though an effort was made by the last Legislature to amend the act, the effort proved unavailing. Consequently, it will be in full force and effect in a few months.

In an able article written for the *Call* Hon. P. Reddy shows that the situation at Wardner, Idaho, is one that must be probed with a sharp stick.

FARM AND GARDEN

THE IDAHO PEA.

Its Seeds Are Said to Possess High Feeding Value.

The Idaho pea is being talked of lately as a new forage plant, and its cultivation has been highly recommended in the west on account of the value of its seeds for horse feed and as a substitute for coffee. From the forage plant investigations of the department of agriculture it is learned that gram, Idaho pea or chick pea (Cicer arietinum) has been in cultivation in eastern countries longer than any other leguminous crop. It is estimated that there

GRAM OR IDAHO PEA.

are now in India 5,000,000 acres devoted to its cultivation either alone or as a bycrop with wheat. Next to the cereals gram forms the largest part of the food used in India and in portions of northern Africa, Spain and other countries bordering on the Mediterranean.

This plant is a branching annual, with many upright stems from the same root. The leaves resemble those of the vetch, having seven pairs of small leaflets. These are oblong, soft, hairy all over, one-half inch long or less, and sharply toothed on the margins. The flowers are borne singly in the axils of the leaves on short stalks about one-half inch long. The pods are bladdery, inflated, from one-half to three-fourths of an inch long and finely pubescent, with glandular hairs. Each pod contains one, or very rarely two, large seeds, which are wrinkled and bear a fanciful resemblance to a ram's horn, whence the Latin name arietinum. The seeds are a little larger than those of the common garden pea, to which they are quite similar.

The Idaho pea was cultivated in 1895 and 1896 at the Colorado experiment station. Professor Cooke states that it "has demonstrated its ability to make a large growth with plenty of water and a fair growth with a very limited supply." It belongs to the pea family, and is grown in rows 30 inches apart, and the plants 60 to 12 inches apart in the rows. Its growth indicates that it can be raised for about 1 cent a pound.

About 30 to 50 pounds of seed are used per acre, depending upon whether it is sown in drills or broadcast. All authorities agree that it is better suited to arid and semiarid regions than to humid ones, the crop apparently requiring a great many sunny days during its season of growth. Better results are obtained in growing it with irrigation than without, although it makes a fair yield on comparatively dry soils. If continued experiments with this plant in the west prove that its average yield is as high as has been claimed, it will undoubtedly prove a valuable addition to the list of forage plants suitable to semiarid regions.

The gram plant is very sensitive to cold. The seed should be sown not earlier than May 15, or, at the higher altitudes, about the 1st of June, and if some of the short season varieties are procured there will be less danger of their being caught by early frosts. Gram is sown in India as a winter crop. It is said to be adapted to almost any soil from light sandy to heavy clay or loam, apparently preferring the latter. It might prove of some value in parts of the southern states as a winter crop and soil cover on lands which are unsuited to the vetches and the crimson clover. It requires only moderate amounts of moisture and is said to be injured by prolonged cloudy weather or abundant rains, which cause it to flower prematurely and thus materially affects the yield of seed.

Bush Bean Plants.

As the weather begins to brighten and the days to lengthen the handling of this crop becomes much less troublesome, the seeds germinate more freely, and there is much less danger of damping off, yet, for all that, plenty of seed should be allowed to guard against possible blanks. Thinning out to the proper thickness is easily done once they are safely under way. The soil for these should not be overrich, neither stiff nor retentive. Allow ample space, not less than 15 inches, between the lines to give the plants sufficient room for development, and a night temperature of 55 degrees, with a rise of 15 degrees by sun heat, is quite enough to insure strong, healthy growth. A much higher temperature results in the plants becoming drawn, when they are apt to fall around, to the certain injury of the crop, says William Scott in American Gardening.

News and Notes.

Mills' endurance potato is said to be blightproof, and, according to good authority, seems to possess to a remarkable degree qualities which enable it to resist blight.

Consider your market when selecting varieties of tomatoes. Some consumers have very decided preferences in the matter of color. Bright reds may lead in one market, while in another the purplish tint will be preferred.

The hop crop of the world last year, as estimated from reports from hop growing centers, is said to have been less than the average.

Air slaked lime is liberally applied to prevent clubroot in turnips.

FLOOR BOARDS IN HIVES.

How They May Be Loose Usually, but Fastened When Necessary.

Some hives have the floor boards or bottoms fast, and some have them loose. There are times when one kind is better, and times when the other is better. In view of these facts, Dr. C. C. Miller gives the following information in The National Stockman and Farmer:

In the spring of the year it is often desirable to clean the dead bees and filth off the hive. At such times, if the bottom is nailed on, there is no way of making a clean job of it but to take all the bees and combs out of the hive, a troublesome job and sometimes resulting in injury to colony, especially if the weather be cold. If the floor board be loose, it is an easy thing to raise the hive and put a clean floor board in place of the dirty one, then after the dirty one is cleaned it can be given to another hive, and so on. The practice of tiering up hives, having them two or more stories high, is becoming more and more common all the time, and there is no possibility of doing this unless the floor board be separate from the hive.

There are, however, times when it is very desirable to have the floor boards secured to the hive. Those who haul hives to and from out-apiaries must have the floor fast to the hive, so there is no danger of bees getting out. There may be other times when it is necessary to have the floor fast to the hive, but most of the time I would rather have the floor separate.

It is not a very hard thing to have hives so made that the floors shall be loose most of the time, but fastened securely to the hive when needed. Formerly I fastened the floors to my hives with screws when I wanted to haul them, then took the screws out when they were not needed. But I found out a better and a less expensive way. I now fasten them on with staples, which can be bought for 10 cents a pound or less. The staples are what are sometimes called tobacco staples, and sometimes they go by other names. They are the same as double pointed tacks, only on a larger scale. The staples I use are 1¾ inches wide, and the two legs are seven-eighths of an inch long. Of course a size a little different from this would answer. When a staple is driven in, one leg in the hive and one in the floor board, it holds as firmly as a nail driven in, perhaps more so. It is driven in not quite full depth, and then it is very easily drawn out. For hauling, four staples are used to fasten the floor to the hive, but for a hive that is merely to be carried into the cellar two will do one about the middle at each side.

The first hives I had were so constructed that the frames came within

A FLOOR BOARD.

half an inch of the bottom of the hive. That made it so that whether the bottom were fast or loose the bottom bars of the frames had a space under them, and were in no danger of being glued to the floor. For good and sufficient reasons a space is left above the frames of about one-quarter of an inch. When, then, one story was put over another, instead of a space of one-quarter of an inch between the upper and lower sets of frames, the space was three-quarters of an inch, and the bees filled this space with comb and honey, making a sticky, dauby mess when the upper story was taken off. To avoid this, the hive must be shallow enough to let the frames come clear to the bottom, and the construction of the floor board must secure the necessary space under the frames. Looking at the picture, you will see that a cleat three-eighths of an inch thick is nailed on the two sides and on the back end of the floor board. Below the floor board you see a cross section of the floor, showing a lap in the two parts of the board, so that if the two parts shrink apart the floor will be still bee tight.

A Side Hill Poultry House.

If the land slopes to the east, dig into the bank so as to make a level floor. Dig a trench and fill with loose stones for a foundation. On this build a cement wall of rough stones as shown.

A WARM POULTRY HOUSE.

Then cement the floor. This will give an exceedingly warm pen. The cut shows a section of the earth, the straight dotted line indicating the position of the cemented floor and the other dotted lines the stone foundation and the cemented stonework. The open scratching shed is coming to be greatly prized by poultry men, says The Farm Journal, in giving this plan.

BABBTT METAL.

In lots to suit, from 1 pound to a ton

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Jedediah S. Collins, deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins, deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said decedent, for the purpose of the ends set forth,

It is ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the County of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court.

Dated June 12th, 1899.
P. H. MACK, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 20th day of April, A. D. 1899.

D. J. HESSION,
Clerk.

[SEAL] By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Ipwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court room of said Court, at the Court house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this Fourth day of May, A. D. 1899.

D. J. HESSION,
Clerk.

[SEAL]

P. H. Mack, Independence Cal. Attorney for plaintiff.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

JOHN J. MCLEAN,
Observer.

*Record beginning March 6th 1898.

Methodist Church.

Services for Sunday, June 18th, 1899.

Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m. following service of song.

The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

Felix Coblentz was in town a couple of days this week.

P. J. Ginser of Ballarat is spending a few days in this vicinity.

A number of rattlesnakes have been killed on town creek recently.

Mrs. A. O. Collins of Poleta is visiting with her daughter, Mrs. Bertrand Rhine.

The Misses Alice and Emily Rhine intend to spend the summer in Alaska.

A sharp shock of earthquake was felt here last Sunday morning about eight o'clock.

Charley Meroney came up on Tuesday's train and is spending a few days in this vicinity.

E. M. Dineen left for Ballarat yesterday and expects to be absent about ten days. J. C. Quinn will accompany him on his return.

Several fishing parties are off on the creeks near here, and in consequence there is a heavy drain on the local supply of antidote.

Anybody knowing the whereabouts of a small white mule and big brown burro will please notify this office and receive suitable reward.

J. S. Gorman has been quite ill this week. He worked very hard fighting fire in trying to save his place and caught a severe cold.

Leon and Arthur Marx and Billy Cameron have gone up on Shepherd's Creek for a few day's camping and fishing.

R. J. Laws, accompannied by the Misses Laws and Miss Blanche Sharon of Virginia, went to Keeler on Wednesday.

J. J. Gunn came in from Modock last Saturday, having closed down operations at the Minnietta until the hot weather is over.

The name of George Ramshaw instead of George Ramsey should have been signed to the card of thanks in our last issue.

Miss Simona Aguirre brought her sister Paulita home from Bodie last Friday. The latter has been very ill, her trouble being caused by the high altitude of Bodie. Simona started back to Bodie Saturday.

Haying is in full blast in this vicinity. The first crop will be no heavier than the first cutting of last year. It is expected, however, that the second crop will be unusually heavy as water is coming down in plenty.

Independence received the telegraph news of the big fight between Jeffries and Fitzsimmons at New York last Friday night, and when it was announced that a California boy had won the championship of the world, there was lots of enthusiasm.

The river has been rising rapidly for the past week, and in places it is now dangerous to ford, swimming a horse. As we have contended all the Spring, there is plenty of snow on the mountains high up, and it only needed warm weather to send down an abundance of water.

Remember that road, poll and hospital tax will be delinquent after the end of this month. For the convenience of the public it may be paid to A. C. Harvey at Lone Pine, B. H. Yandell at Independence, A. K. Eugley at Big Pine and J. E. Meroney, W. A. Chalfant and W. W. Yandell at Bishop.

Mrs. John Baxter and Miss Jennie Baxter met with what might have been a severe accident last Saturday. They were crossing Shepherd's Creek when their team became frightened and unmanageable. They jumped from the buggy and fortunately become free from the conveyance before it was overturned and completely demolished.

The Board of Education has been in session all the week, and it is having an effect on the small boys around town. Any time you turn a corner you are liable to be knocked down with a word of a dozen syllables. Fred Stewart of Lone Pine and John Dehy of Bishop are being examined for first grade certificates and Miss Maggie Peterson of Big Pine and Miss Effie Roeper of Independence for second grades.

It's All Right.

The report of another strike yesterday induced us to visit the new mining camp in the Inyo range east of Citrus. From town a good road leads to the base of the range, a distance of eight miles. From this point to Willow Spring is two miles over a good trail. About four inches of water can be developed, which is ample for milling purposes. The Barnes & Anderson mine is distant one and a half miles in an air line and two miles by trail from the spring. On arriving at the mine we found four men at work taking out and sorting ore. About twelve tons of material which will amalgamate not less than sixty dollars per ton are broken up and ready for sacking. There is a shaft down twenty-seven feet, and the vein averages four feet in width from top to bottom, standing nearly vertical and encased in clay seams or gouges, indicating a true fissure vein. The character of the ore has not varied a particle from top to bottom and consists of a lively white quartz carrying free gold, which is coarse and plainly visible without a glass. Rich pieces of specimen rock can be picked up on the dump anywhere. The vein crops big and strong throughout the entire length of the claim, and appears to be on a contact of lime hanging and quartzite foot wall. When twenty tons of ore are out another run will be made and great care excersised in making a thorough test of the sulphurets, which are believed ts be very rich. The property is not for sale as the owners have sufficient rich ore in sight to pay for developing it. There is no question that it is a very valuable property. For a couple of weeks past Wells Barnes and H. P. Cartier have been sinking in the south extension of the Barnes & Anderson. At a depth of twenty-eight feet they struck some very rich ore, the quartz being thickly sprinkled with coarse gold At the point where they sunk there appears to be a break in the ledge. They are now drifting toward the main ore body, and the indications are that they will reach it in less than fifteen feet. That it will be good when struck, the good ore already struck proves. It is a cool, pleasant place to work, fuel is plentiful and water costs about four cents a gallon for packing. The camp is in its infancy, and under the present system it will be some time before ore is worked on a large scale, as the owners are poor men and are making the mine pay for its own development. But it will come in time. J. J. Gunn visited the Johnson & McGinnis mine yesterday and speaks highly of the property. We intend to visit this mine and will have something to say about it next week.

Silver Peak

A correspondent to the *Walker Lake Bulletin* writes as follows:

Leidy & McAfee's new mill is about ready to run and will be a godsend to this country. One can safely estimate on getting a fair deal now. They have about 100 tons of high grade ore to start on and have a large amount of second grade ore in the Great Gulch mine.

Harry Jacobs has been shipping to San Francisco and finds it has paid him to do so. He has a large amount in the Homestake to take out and will probably work it in the new mill.

Sam Case has a crushing out and is taking out more daily.

The leaching works are running tailings through the second time and ship a bar about every three weeks. There were about 10,000 or 12,000 tons altogether, and the first time they were leached they paid a fortune to the owner, and they are good enough now to pay for working.

There is very little doing at Alida valley. The boys are taking out some high grade silver ore.

McNamara and Burger have a streak of rich gold ore about 8 inches wide in their mine and will probably take out a crushing shortly.

I hear that Ingalls & Maney are doing well in Tule Canyon.

Bell & Bourt are doing development work on their new strike in the San Antone mountains.

Nothing is known here in regard to orking the Silver Peak mines. I expect some mining men will eventually get hold of them, and if they do things will hum. I don't believe any more leases will be given and sincerely hope they won't.

It is infernally dull here and will remain so unless the big mines on the hill are worked.

Another Mazourka Tunnel.

The Squires brothers are getting things in readiness to run a tunnel on their gravel claims in Mazourka canyon. The tunnel will be started just above the Janvier mine, and Mr. Squires expects to reach bedrock in about two thousand feet. For three years past parties have been trying to get to the bottom of Mazourka but no one has yet succeeded. J. C. Roeper has sank two shafts, one 120 feet deep and the other 80 feet. Thorpe & Co. sunk 104 feet. Water was struck in both deep shafts, stopping further work. Thorpe & Co. have run a tunnel 2600 feet in length and have not yet got bedrock. They will prospect the bottom of the canyon or die trying. They have now been at work steadily for a year and a half. The Squires brothers have ample means to push their contemplated work to a conclusion, and Mr. A. M. Squires has assured us that they mean to do it. There are a large number of very rich gulches emptying into Mazourka, and another Alder Gulch may be developed when bedrock is finally reached.

Contemptible Cussedness.

Some miscreant started a fire about three miles north of town last Sunday morning and as a result several hundred acres of feed is destroyed and Jas. Malone and J. S. Gorman have lost considerable fence. Only a persistent effort on the part of a large force of men working steadily for thirty-six hours prevented the entire country and probably the town from being burned. There has been a great deal of devilry perpetrated here lately and a vigilance committee will be organized at once with the view of protecting the town from further outrages.

Real Estate Transfers.

The following deeds have been recorded since June 9, 1899.

Nancy L. Dorrance to Rawson Ditch Co.—May 4, 1888, certain water rights in Rawson & Ford Ditch.

Joseph J. Chatterley to William A. Hartt—May 17, 1899, General Lee and other mines in South Park District. $5.

Joseph Danielson to Archibald Farrington,—June 6, 1899, Und. ½ int in Emma mine Lead Canyon $1.

William E. Harrison to William A. Hartt—May 25, 1899, Radcliffe group of mines, South Park Dist $5.

Al Williams to Clarence E. Shuey—May 2, 1899, und ⅓ int in Hillside mine Jail Canyon $5.

M. Alford to E. E. Huston—April 27, 1899, und ¼ int in Alta group Argus dist $250.

Samuel Levy to Maria N. Celayo—May 3, 1899, Lot in town of Lone Pine $100.

Arthur S. Bell and wife to D. R. McLaren—May 31, 1899, 21 acres near Bishop $500.

Samuel P. Roberts to J. H. Bulpitt—June 5, 1899 Baltic mine, Deep Spring Dist. $25.

Fire at Rhodes Marsh.

At noon Sunday a fire was discovered at Rhodes Marsh Borax works, and despite all efforts to extinguish it the entire property was destroyed. The borax works, boilers, pumps, engines, the store with a stock of general merchandise including about twenty tons of flour and grain and seven tons of borax, are a complete loss. One flat car, two rails and twenty ties is the loss of the railroad company. Charley Breslin managed to save some furniture, the company's books and his typewriter. His gold watch and greyhound were burned up. The Indians worked faithfully and saved the boarding house and tanks, though the latter were badly scorched. The loss is estimated at $10,000. The origin of the fire is unknown, but it is believed to have been caused by Indians smoking cigarettes under the building.

LEGAL.

DESERT LAND, FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL., June 5, 1899.

Notice is hereby given that Laura Mitchell of Independence, Inyo Co Cal., has filed notice of intention to make proof on her desert-land claim No. 800, for the N ½ S ½ Sec. 23, Tp 13 S., R 35 E, M D M, before the Register and Receiver at Independence Cal., on Saturday, the 15th day of July, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: John C. Willett of Citrus, Cal., Joseph Vaughn of Citrus, Cal., Michael McSweeney and William H. Mitchell, both of Independence, Cal.

S. W. AUSTIN, Register.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above-entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 112, I am commanded to sell, and in said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, State of California and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances thereunto belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United States.

WM D. DEHY, Commissioner.

Dated at Independence, Inyo Co., Cal., May 25th, 1899

DESERT LAND FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL., May 23, 1899.

Notice is hereby given that Irving H. Mulholland has filed notice of intention to make proof on his desert claim No. 756, for the SE ¼ sec. 10, Tp. 13 S., R 35 E., M. D. M. before Register and Receiver at Independence, Cal., on Friday, the 30th day of June, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Edward B. Smith James R. Moffett, Alexander Clarke and John Keegan, all of Independence, Cal.

S. W AUSTIN, Register.

NOTICE FOR PUBLICATION.

U. S. LAND OFFICE, Independence, Cal., May 8, 1899.

CHINA'S POWERFUL SWORD.

There is a dreadful sword in China. It gives to the holder power to cut off the head of any one he wishes without punishment. All people flee from this sword as stomach ills flee before the approach of Hostetter's Stomach Bitters. This famous remedy cures all forms of stomach troubles.

A man's idea of practicing economy is to preach it three times a day to his wife.

SHAKE INTO YOUR SHOES.

Allen,s Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

A cabman is about the only one who can drive away his customers and still keep them.

Beware of Fraud!

Every success breeds imitators and counterfeiters. Look out for substitutes when you ask for Cascarets Candy Cathartic. All druggists, 10c, 25c, 50c.

Times are so dull that a man has to take a doubled barreled shot gun to collect his thoughts.

For 90 days, sugar beet, alfalfa, and fruit lands, $15.00 to $25.00 per acre, easy terms, watered by the largest irrigation system in America, annual water rental $1.25 per acre. Climate equal to California. Address, F. G. Tracy, Eddy, New Mexico.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for FREE $2.00 trial bottle and treatise. DR. R. H. KLINE Ltd., 931 Arch St., Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

My doctor said I would die, but Piso's Cure for Consumption cured me.—Amos Kelner, Cherry Valley, Ills., Nov. 23, '95.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligation made by their firm.

WEST & TRUAX, Wholesale Druggists, Toledo, O.
WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

Hall's Family Pills are the best.

Through Lovers' Eyes.

Clara (on the wrong side of 30)—I am sure I don't know what he sees in her.

Cholly—Well, they say love is blind.

Clara—Blind! Nonsense! I never saw a man in love yet who did not see ten times as much in his sweetheart as I could.—Harlem Life.

"Evil Dispositions Are Early Shown."

Just so evil in the blood comes out in shape of scrofula, pimples, etc., in children and young people. Taken in time it can be eradicated by using Hood's Sarsaparilla. In older people, the aftermath of irregular living shows itself in bilious conditions, a heavy head, a foul mouth, a general bad feeling.

It is the blood, the impure blood, friends, which is the real cause. Purity that with Hood's Sarsaparilla and happiness will reign in your family.

Blood Poison—"I lived in a bed of fire for years, owing to blood poisoning, that followed small pox. It broke out all over my body, thinking themselves. Tried doctors and hospitals in vain. Tried Hood's Sarsaparilla. It helped. I kept at it and was entirely cured. I could go on the housetops and shout about it." MRS. J. T. WILLIAMS, Carbondale, Pa.

Scrofula Sores—"My baby at two months had scrofula sores on cheek and arm. Local applications and physicians' medicine did little or no good. Hood's Sarsaparilla cured him permanently. He is now four, with smooth, fair skin." MRS. S. S. WORKS, Farmington, Del.

Sore Eyes—"Humor in the blood made my daughter's eyes sore, so that we feared blindness, until Hood's Sarsaparilla made her entirely well." E. B. GIBSON, Henniker, N. H.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; non-irritating and only cathartic to take with Hood's Sarsaparilla.

SURE CURE FOR PILES

ITCHING Piles produce moisture and cause itching. This form, as well as Blind, Bleeding or Protruding Piles is cured by **Dr. Bosanko's Pile Remedy**. Stops itching and bleeding. Absorbs tumors. 50c a Jar at druggists or sent by mail. Treatise free. Write me about your case. DR BOSANKO, Philada., Pa.

He Got the Fees.

Sagar, the verger of Halifax parish church, was quite a character in his way. He figured in several good stories in Dean Pigou's "Phase of My Life." On one occasion a bridegroom discovered after the service that he had no money with which to pay the fees.

Sagar went to the bride in his most winsome way and asked her: "Hast ever seen Black Bibles? We've a rare lot on 'em in this 'ere vestry."

"No," she replied, not having the faintest idea of what a Black Bible was.

"Coom along. I'll show yer them."

He lured her into the inner vestry.

"There's the Bibles," he said, pointing to them, locked up as they were in a bookcase with glass panels, of which he had not the key. "Wait awhile till I come back."

He turned the key of the vestry on the bride and, going to the bridegroom said, "Lass is all right, but you'll no have her till you have paid."

The "brass" was immediately forthcoming.

A Happy Introduction.

An Englishman who is an enthusiastic Alpine clubbist came in one night to carry a friend off to a lecture which the veteran mountaineer Whymper was giving at Westminster on his pet theme, "Twenty Thousand Feet Above the Sea." The friend could not go, for he was otherwise engaged, but Whymper's name reminded him of a story of Sir James Linton, the late president of the Royal Institution of Painters In Water Colors. He had to introduce the well known artist E. M. Wimperis to the Alpinist, and he did it in the following fashion: "I want to make two distinguished men known to each other. The one is Mr. Whymper, the other Mr. Wimperis." For an impromptu this is not bad.

A Surprised Barber.

"Wearing wigs has not gone out of style by any means," said a New Orleans barber who has an eye for the odd[illegible] of the trade. "The only reason [illegible] don't notice so many of them is [illegible] we made a great deal better than they used to be. Why, even the barbers get fooled now and then.

"The other day a gentleman came into the shop to get shaved. The barber finished the job without noticing anything unusual, and as he laid aside the razor he sprung the usual chestnut. 'I notice a good deal of dandruff is accumulating on your scalp,' he said, 'and if you don't look out you'll begin to get bald.' That seemed to tickle the customer, and he grinned from ear to ear. 'Oh, I guess I've got hair enough to last for awhile!' says he, still grinning. 'You have plenty now,' says the barber, 'but with all that dandruff it will soon commence to thin out. Better let me give you a nice shampoo.'

"As he spoke he ran his hands through the gentleman's hair and gave it two or three hard rubs, and, upon my word, the whole thing came off just as if he had been scalped. The poor man yelled murder, and the barber stood there paralyzed, holding the wig in his hands and his eyes sticking out like hat pegs. He told me afterward he was never so scared in his life. Since then he hasn't said a word about dandruff."—New Orleans Times-Democrat.

The Rushlight.

Home manufactured rushlights and candles were in constant use by the Scotch peasantry. Boiled animal fat gave the required tallow, and the same green rushes as were used for cruisie wick supplied it also in this case.

In making rushlights all the green coating of these rushes was stripped off, but for candle wick a thin strip was left on either side of the pith to strengthen and support it. Otherwise the manufacture of these two lights was very similar. This substance from the rushes when dried was tied to a rod, then dipped into the boiling fat and allowed to cool, and this process was repeated until the rushlight, or candle, had become the desired thickness. In later years candles were made in molds. The tape was passed through a hole in the center of the mold and knotted to prevent it slipping. The fat was then poured in and allowed to cool.

These molds, during the days of the candle tax, were jealously guarded by the owners and hidden in the most secret corners from the prying eyes of the exciseman. The candles were usually made at night in some outhouse, and watchers were posted at convenient corners to give timely warning of any approach of the ubiquitous officer.—Good Words.

It's Your Own Fault.

How long have you had lame back? It's your own fault. St. Jacobs Oil would have cured it promptly, and will cure it now, no matter how long it has remained neglected.

William Black's Disturbed Dip.

There lingers in Oban a legend to the effect that one hot day William Black, the novelist, went to a quiet place out of sight to swim. He undressed in a remote part of the rocks. When he was in the water, a woman, deeply immersed in a blue volume, which was "The Princess of Thule," came and sat unwittingly near his clothes. The swimmer, tired with his exercise, was anxious to return to his garments, but the lady on shore was far too engrossed with the fortunes of Princess Sheila to heed the coughing intimations of his presence. Presently matters came to a crisis. A sportsman passed along the rocks and discerned Mr. Black's dark head bobbing above the waves. He took it for a seal and was taking a deadly aim when Mr. Black jumped up in the water and implored: "Don't fire. I'm a human man."

The Largest Trees in the World.

The largest tree in the world is to be seen at Mascali, near the foot of Mount Etna, and it is called "the Chestnut Tree of a Hundred Horses." Its name rose from the report that Queen Jane of Aragon, with her principal nobility, took refuge from a violent storm under its branches. The trunk is 204 feet in circumference. The largest tree in the United States, it is said, stands near Bear creek, on the north fork of the Tule river, in California. It measures 140 feet in circumference. The giant redwood tree in Nevada is 119 feet in circumference.—Ladies' Home Journal.

"Spare me!" pleaded the trembling captive, falling upon his knees.

"Very well," replied the cannibal, with a grin. "I will save you for my Sunday dinner."—New York Journal.

ALABASTINE

ALABASTINE is the original and only durable wall coating, entirely different from all kalsomines. Ready for use in white or twelve beautiful tints by adding cold water.

LADIES naturally prefer ALABASTINE for walls and ceilings, because it is pure, clean, durable. Put up in dry powdered form, in five-pound packages, with full directions.

ALL kalsomines are cheap, temporary preparations made from whiting, chalks, clays, etc., and stuck on walls with decaying animal glue. ALABASTINE is not a kalsomine.

BEWARE of the dealer who says he can sell you the "same thing" as ALABASTINE or "something just as good." He is either not posted or is trying to deceive you.

AND IN OFFERING something he has bought cheap and tries to sell on ALABASTINE'S demands, he may not realize the damage you will suffer by a kalsomine on your walls.

ENSIBLE dealers will not buy a lawsuit. Dealers risk one by selling and consumers by using infringement. Alabastine Co. own right to make wall coating to mix with cold water.

THE INTERIOR WALLS of every schoolhouse should be coated only with pure, durable ALABASTINE. It safeguards health. Hundreds of tons are used annually for this work.

IN BUYING ALABASTINE, see that packages are properly labeled. Beware of large **four-pound** package light kalsomine offered to customers as a **five-pound** package.

DISANCE of wall paper is obviated by ALABASTINE. It can be used on plastered walls, wood ceilings, brick or canvas. A child can brush it on. It does not rub or scale off.

ESTABLISHED in favor. Shun all imitations. Ask paint dealer or druggist for tint card. Write for "Alabastine Era," free, to ALABASTINE CO., Grand Rapids, Michigan.

JOLLY JOKER.

She—You say you met your friend accidentally? He—Yes; I fell in with him while skating.—Yonkers Statesman.

The maid—I'll be a sister to you. The man—Not much! I've just got enough collar buttons for myself.—New York Evening Journal.

"You married me for my money." "What of it? You married me for my beauty." "Well, both securities have depreciated."—Life.

The sister—I have become engaged to Fred. The brother—Whatever induced you to do that? The sister—Why, Fred, of course!—Judge.

Miss Fondart—Jack, what do they mean when they speak of a first-water diamond? Jack—One that's never been soaked.—Jeweler's Weekly.

Visiting Englishman—How do you account for this policy of expansion? Mr. Starzenstripes—Well, you see, we got hot. Heat always expands.—Life.

She—In this story it refers to empty bottles as "dead men." That's absurd. He—Where's the absurdity? She—Well, dead men tell no tales; empty bottles do.—Moonshine.

"It's depressing, isn't it, to find feathers sticking to your Thanksgiving turkey?" "Well, it certainly does make one feel down in the mouth."—Philadelphia Bulletin.

"Who is the smartest boy in your class, Bobby?" asked his uncle. "I'd like to tell you," answered Bobby, modestly, "only papa says I must not boast."—Harper's Bazar.

Graduate—Now that I have my medical diploma, professor, where would you advise me to practice for wealth? Professor—In any first-class health resort.—Detroit Free Press.

Tall one (angrily)—Don't dare to contradict me again, sir; don't you know that I could eat you if I chose? Short one—Ah! but I should disagree with you even more, then.—Ally Sloper.

Senator Depew—At this point, Mr. President, I am reminded of an anecdote—— Several other Senators—Mr. President, I move he have leave to print the anecdote.—Chicago Tribune.

Mrs. Jimlet—Harold writes from college that he's larnin' to fence. Farmer Jimlet—Good enough! I'll let him string more'n half a mile o' barb wire fence as soon as he gits hum.—Judge.

Lady—I wish to get a birthday present for my husband. Shop-walker—How long have you been married, madame? Lady—Ten years. Shop-walker—Bargain counter to the right, madame.—Boston Traveler.

Captain (to young cadet just arrived on board)—Well, youngster, the old story, I suppose—the fool of the family sent to sea. Young cadet—Oh, no, sir. That's all been altered since your day.—Melbourne Times.

"Bridget, what is that child crying so wildly for?" "Sure, mum, he's just drinked all his soothin' syrup and ate the cork, and I don't know now what ails him, unless it's the bottle he wants to swallow!"—Tit-Bits.

"I," said the orator, "am an American of the good old stock, rooted deep in the soil——" "The only stock I ever heard of that rooted deep in the soil," said the farmer in the audience, "was hogs."—Indianapolis Journal.

Blobbs—What nonsense it is for newspapers, in their accounts of weddings, to describe the brides being led to the altar! Slobbs—How so? Blobbs—Why, most of the girls could find their way in the dark.—Tit-Bits.

Jones—Dear me! You say you often lay down the law to your wife; how do you go about it? Bones—Why, all you need is firmness. I usually go into my study, lock the door, and do it over the transom; all you need is firmness in the door!—Puck.

"What did Colonel Stillwell say about the brandied peaches we sent to cheer his convalescence?" "He said he was afraid he wasn't strong enough to eat the fruit," replied the little girl, "but that he appreciated the spirit in which it was sent."—Exchange.

Farmer Oatley (reading from newspaper to his wife)—"It is estimated that the recent dinner given by Mrs. Bunderblank was served at a cost of at least ten dollars a plate." What must the victuals have cost? Mrs. Oatley—Land's sake, Joshua! And such folks always has a different plate for everything they eat.—Harlem Life.

Boatswain (to newly joined cadet)—Come, my little man, you mustn't cry on board of one of her majesty's ships of war. Did your mother cry when you left? Cadet—Yes, sir. Boatswain—Silly old woman! And did your sister cry? Cadet—Yes, sir. Boatswain—Stupid little thing! And did your father cry? Cadet—No, sir. Boatswain—'Ard 'earted old beggar!—Punch.

Counsel—What is your age, madam? Witness—Forty-seven, sir. Counsel—Married or single? Witness—Single. I never had an offer of marriage in my life, and if it is of any interest to the court I don't mind saying that I have worn false hair for nearly thirty years. Counsel—Hem! That is all, madam. There is no use in trying to shake the direct testimony of so truthful a woman as you are.—Exchange.

The other day the police made a raid on a betting club, and after taking the names of the men they found there told them to appear at the court the next morning, which they did. To one of the delinquents the magistrate said: "What are you by trade?" "A locksmith, sir." "Well, what are you doing when the police made the raid?" "Well, sir, I was just making a bolt for the door."—Family Doctor.

At the Browning Club.

Member—Browning, you know, is like Wagner——

Friend—I see. At first you don't understand him, but after a while you think you do.—Puck.

When newly married people read the advertisements in the street cars and in the programs at the theater, instead of talking, it is one sign their dream has ended.

Nearly every man says his wife dresses "too young."

TUMOR EXPELLED.

Unqualified Success of Lydia E. Pinkham's Vegetable Compound.

MRS. ELIZABETH WHEELOCK, Magnolia, Iowa, in the following letter describes her recovery from a very critical condition:

"DEAR MRS. PINKHAM:—I have been taking your Vegetable Compound, and am now ready to sound its praises. It has done wonders for me in relieving me of a tumor.

"My health has been poor for three years. Change of life was working upon me. I was very much bloated and was a burden to myself. Was troubled with smothering spells, also palpitation of the heart and that bearing-down feeling, and could not be on my feet much.

"I was growing worse all the time, until I took your medicine.

"After taking three boxes of Lydia E. Pinkham's Vegetable Compound Lozenges, the tumor passed from me.

"My health has been better ever since, can now walk quite a distance and am troubled no more with palpitation of the heart or bloating. I recommend your medicine to all sufferers from female troubles."

It is hardly reasonable to suppose that any one can doubt the efficiency of Mrs. Pinkham's methods and medicine in the face of the tremendous volume of testimony.

IT WAS NOT TOO LATE.

A Story of European Diplomacy and Our Civil War.

The Outlook gives an interesting story of the Spanish administration, when, during our civil war, the Emperor Napoleon formed the ingenious plan of uniting European nations in a change of the international law governing blockades. The admiralty law of the world at present extends the jurisdiction of any nation for one marine league from its shores. If, therefore, any blockade runner could get within three miles of Jamaica, Cuba or Porto Rico, he was safe from any interference from our blockading fleet.

Napoleon proposed that, instead of one league, the limit of local sovereignty should be extended to three leagues from shore, and he persuaded the Spanish minister to come into his plan.

Such an extension of neutral limits would have greatly hindered the operations of our blockading fleets. All the negotiations were conducted with great secrecy, but orders were sent from Spain to the West Indies, instructing authorities there to extend threefold the range of their dominion over the sea. These orders had already gone when Horatio Perry, the American secretary of legation, got wind of the treachery of our ally.

Mr. Perry told his wife. She told the Duchess of Montpensier, who hated Louis Napoleon, and the duchess told her sister, the Spanish queen. Then the queen sent for Mr. Perry and asked what it was all about.

"You are injuring your best friends," said he after explaining the matter, "at the solicitation of this intriguer whom you have reason to believe is your enemy."

The queen regent sent for her prime minister and interrogated him. He replied that her majesty had signed the order on such a day.

"But no one told me what it meant," said Queen Isabella. "No one told me that this is a heavy blow to my American allies."

No one had told her! The minister was sorry if her majesty disliked it, but it was too late to help it. Why was it too late? Because a steamer had gone to the West Indian fleet with the orders which changed one league to three.

Then said Isabella, "It is not too late for me to accept your resignations."

But the senor don did not want to resign, and the other senores dons did not want to resign. So they found a fast steamer to take out orders rescinding the other orders, and the blockade was maintained for the next year.

Makes the Muscles Strong.

From hard work or excessive exercise soreness and stiffness sets in and lays up. St. Jacobs Oil will cure it after a few applications and make the muscles limber and strong.

A Good Parrot Story.

A maiden lady of a certain town in Cornwall owned a parrot, which somehow acquired the disagreeable habit of observing at frequent intervals, "I wish the old lady would die." This annoyed the bird's owner, who spoke to her curate about it.

"I think we can rectify the matter," replied the good man. "I also have a parrot, and he is a righteous bird, having been brought up in the way he should go. I will lend you my parrot, and I trust his influence will reform that depraved bird of yours."

The curate's parrot was placed in the same room with the wicked one, and as soon as the two had become accustomed to each other the bad bird remarked, "I wish the old lady would die," whereupon the clergyman's bird rolled up his eyes and in solemn accents added, "We beseech thee to hear us, good Lord!"

The story got out in the parish, and for several Sundays it was necessary to omit the litany at the church services.

Lazy Liver

"I have been troubled a great deal with a torpid liver, which produces constipation. I found CASCARETS to be all you claim for them, and secured such relief the first trial, that I purchased another supply and was completely cured. I shall only be too glad to recommend Cascarets whenever the opportunity is presented." J. A. SMITH, 2920 Susquehanna Ave., Philadelphia, Pa.

SERMONS OF THE WEEK.

The Helm of the Universe.—This is not going to be the devil's world. The hand pierced on Calvary's cross is on the helm of the universe.—Rev. S. A. Northrup, Baptist, Kansas City, Mo.

The Day of Better Things.—There is much selfish littleness in this selfless and large world of ours. But the day of the better things is approaching.—Dr. E. G. Hirsch, Hebrew, Chicago, Ill.

Circumstances.—As the serpent coiled around Mother Eve, so circumstances are proving the ruination of many a human being of to-day.—Rev. Dr. H. C. Stanton, Presbyterian, Kansas City, Mo.

The Idea of God.—The idea of God is supreme, and there is nothing behind it. You will make the mistake of your life if you do not make it supreme.—Rev. Dr. Patton, Presbyterian, Princeton, N. J.

Motto for Philanthropists.—The truest benefactors of the poor are those who teach self-help. Not alms, but a friend, is a wise motto for philanthropists.—Rev. T. J. Villers, Baptist, Indianapolis, Ind.

Progress.—The one great thought that God has been continually impressing upon the race is that of progress. "Speak unto the children of Israel that they go forward."—Rev. W. J. Chichester, Presbyterian, Chicago, Ill.

Sharp Contrasts.—Jesus makes all things brighter by sharp contrasts—by making midnight darkness and midday brightness sleep in the same cradle.—Rev. F. DeWitt Talmage, Presbyterian, Milwaukee, Wis.

Present Phase of Civilization.—Herein lies the one great cause of failure of the present phase of civilization, that its social conscience is utterly lacking, or, at best, only rudimentary.—Rabbi Charles Fleischer, Hebrew, Boston, Mass.

The Word Consist.—The word consist means to hold together, to stand firm. Christ is that Almighty power that spans the universe and holds the eternities of the past and the future together.—Rev. W. P. George, Presbyterian, Kansas City, Mo.

Human Nature.—We can trust human nature, our human nature, to do its duty when it sees it, at least on the battlefield. Once more we have learned that men who live indifferently can die gloriously.—Rev. Jenkin Lloyd Jones, Independent, Chicago, Ill.

Domestic Unhappiness.—Masculine selfishness explains the source of nearly all domestic unhappiness. When men are indifferent, thoughtless, inconsiderate and selfish, trouble comes only too swiftly.—Rev. Wm. Radcliffe, Presbyterian, New York City.

The God Man.—Until we reach, in order of history, the God man, we do not find perfection of character nor a complete model in any one individual, but are to choose those lineaments and traits that combine to produce a life well pleasing to God.—Rev. C. K. Nelson, Bishop of Georgia.

The Tendency of the Day.—The tendency of the day is toward a pure, simple, plain, practical religion, and the belief that a man's salvation depends more upon his spiritual relations with Christ than his belief in any philosophical or theological principle is rapidly gaining ground.—Rev. F. M. Bristol, Methodist, Washington, D. C.

The Tutelage of Sorrow.—Culture and character come through suffering. Life is God's university; happiness is the graduating point, but trouble and adversity are among the chosen teachers. The world is built for joy, but man comes to his full estate through the tutelage of sorrow. Even Christ, who brings glad tidings of great joy, is exhibited as passing through the uttermost of pain on his way upperward.—Rev. Dr. Hillis, Congregationalist, Brooklyn, N. Y.

Modern Portraiture.

Even the human countenance seems to reflect the changes of fashion. No one who studies modern portraiture can fail to note the resemblance that runs through the works of the fashionable painters. It is not merely their characteristic style, but the type which they have transferred to canvas, and which borders on sameness. These well-born, carefully trained beauties of to-day are as much alike as peas in one pod. They only vary in degrees. Of course, the artist "idealizes;" he would not be an artist did he not find more in the face before his easel than is visible at a glance. All the sumptuous detail of costume also adds to the variety of a picture; but in pose, in expression, there is traceable only this one woman of the end of the century, a creature of superb physique, clothed or unclothed, like a royal princess. Compare her with the pictured women of one hundred or two hundred years ago, and see how altogether changed is this "eternal feminine."

Independence Monument.

A Texas independence monument is to be erected at Washington, Washington County, by the school children, to commemorate the signing of the Texas Declaration of Independence.

FRANCES WILLARD [illegible]
USES PE[illegible] CAT[illegible]

The Frances Willard Hospital, Chicago, Ill.

Miss Georgiana Dean was for three years missionary in Liberia under the M. E. Church from the training school in Chicago. After her return she studied nursing, graduating from the present Frances E. Willard National Temperance Hospital of Chicago. She is an enthusiastic friend of Pe-ru-na, as is evident from the following letter:

Chicago, Ill., Jan. 20, 1899.
Pe-ru-na Drug M'f'g Co., Columbus, O.:
Gentlemen—You will be glad to know of the happy results obtained from the use of Pe-ru-na among the patients under my care whenever prescribed by the physician. I have seen some very remarkable [illegible] very obstinate catarrh of [illegible] where Pe-ru-na was the [illegible] used. I consider it a reliable [illegible] cine. Georgiana Dean.

The symptoms of catarrhal dyspepsia are: Coated tongue, pain or heaviness in the stomach, belching of [illegible] dizzy head, sometimes headache, [illegible] spondent feelings, loss of appetite [illegible] pitation of the heart and irregularities of the bowels.

Send for a free book written by Dr. Hartman, entitled, "[illegible] Beauty." Address Dr. Hartman, Columbus, O.

Remember [illegible]=8?

Dry season, wasn't it? Maybe next year will be dry, too,—then what? Better send TO-DAY for our Catalog—we've sold 1,600 pumping plants.

Hercules Gas Engine Works
305 MARKET ST., San Francisco, Cal.

Melancholy Thought.

When a man really gives his thoughts up chiefly to eatables and drinkables, he generally ceases to think of anything else after awhile. It is related in an old book on French cookery that Fontenelle, a French author of the early part of the eighteenth century belonging to the school of the precieuses, or literary exquisites, was found one beautiful morning lying at ease on the slope of a hill.

In the valley was a large flock of sheep. They skipped about daintily, waiting for their guardian to take them home. A friend of Fontenelle surprised him gazing meditatively upon these sheep.

"Aha!" said the friend. "The amiable philosopher ponders without doubt upon the vicissitudes of life."

"Y-yes," said Fontenelle. "I had been carefully looking over this flock, and I said to myself, 'It is possible that among these 200 sheep there is not one tender leg of mutton!'"

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

A French writer has ascertained that Napoleon's favorite dish was bean salad, and that he held that 60 cents a day ought to be enough for any one's meals. Louis XV, on the contrary, had a favorite dish, made of the eggs of various birds, which cost $100.

Strong as a Steel Ramrod.

If you want to feel your spine is a pipe stem ready to snap, just get lumbago. If you want to feel as strong as a steel ramrod, use St. Jacobs Oil; it has magic.

Very Different.

"Snaggs and I have quarreled," said Squildig to McSwilligen.

"Then when you separated of course you did not exchange assurances of distinguished consideration?"

"On the contrary, we exchanged assurances of extinguished consideration."—Pittsburg Chronicle-Telegraph.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

THE OLD-TIME HERO.

...kler to the core was he,
T... way was the universe;
...grace and gallantry
O... a kiss or cut a purse;
...lost to him, in truth,
...failed to break a lance;
...leman, forsooth—
...oon of old romance!

...we know his jerkin's cut,
...of his gay cockade!
...bluster and his strut,
...ke the glitter of his blade!
...how we've loved his platterdash—
Aye, every one of us that reads!—
And joyed to see him cut and slash,
And gloried in his gory deeds!

Ah, there's the hero to our mind!
No languid airs for him, parfay!
A damsel in distress to find
Hot foot he'd travel night and day;
And when he found her, as was sure,
Ods ...zers! there was sport for him.
The rog... who thought themselves secure
Were not ...chances mighty slim?

A tankard of good ale, mine host,
Or shandygaff—the best ye can!
Come, one and all! We'll drink a toast
To our enchanting gentleman!
A prodigy of valor he,
The very prince of all gallants,
Whose like we ne'er again shall see—
The picaroon of old romance!
—Munsey's.

MERCY FOOTE'S RECONSTRUCTION.

A RUG pathway meandered from the kitchen door to the parlor door, with ramifications on either side to chairs and sofa and table. Square rugs and round rugs and oblong, octagonal, oval rugs filled up all the chinks. There was scarcely a square inch of the carpet visible anywhere.

The two or three ambrotypes and steel engravings in solemn black walnut frames were befogged behind veils of mosquito netting. The comfortable-looking lounge was draped in crisp, clean newspapers to protect the new covering underneath. The face of the clock on the mantel looked out coyly through its veil of netting.

It was dim and cool in the big, clean room—and empty. They sat in the kitchen or, on especially hot evenings, out on the porch. There was so much danger of flies in the sitting room, and dust and sun-fading and all sorts of dreadful things, especially in dog days. It was dog days now.

Mercy Foote was upstairs in the unfinished chamber, "resting"; but it was so hot and so close that even to rest was hard work. She never dreamed of going into one of the spotless, speckless chambers and "mussing up" one of the white, plump beds. Mercy Foote was a very neat woman—some of the neighbors openly called her "p'ison neat."

About midway of the afternoon Nathan Foote came up through the orchard from the hay field. He walked very slowly, as if it hurt him. Every minute or two he mopped his bald, shiny head with his handkerchief and drew long, tired breaths. Nathan was almost an old man—a good deal older than Mercy.

He had been working hard all day, and every individual old muscle felt strained and sore; and how his back ached! It was a rather long way, too, up to the house.

Mercy put her lips to the window-screen and called sharply to him when he came into sight round the corn house.

"Nathan, go in through the stable," she called, "and mind you slide the door to real quick behind you! I've been out there fly-powdering. I don't want to have flies following you in. Shut it the instant!"

"Yes, Mercy," Nathan said, wearily. It looked like a long, circuitous route into the house, and he was very tired. He slid into a narrow crevice in the door, rubbing his aching bones against the edges. Then he braced himself and slid back the heavy door.

In the sudden transition from the hot glare outside to the dusky interior he felt dizzy and blinded, and had to sit down on a wagon thill a minute. Then he shuffled up the steep stairs and through the "shop" and woodhouse to the kitchen, opening and shutting all the doors with conscientious dispatch. Mercy's voice drifted down to him, muffled but incisive.

"Don't wash in the best washdish, Nathan. I've got it all scoured up. You get the old one over the tubs in the woodhouse, and mind you empty the water out in the asparagus bed. I don't like to have the sink all wet up."

"Yes, Mercy."

He got the old basin and filled it and set it on a chair with the soft soap crock. Some of the drops splashed to the shining floor, and stooping with evident pain, he wiped them up carefully.

"I declare," he murmured, "I don't know as I was ever more beat out than I am this afternoon! I don't know as I was ever! I guess I've got to lie down a spell."

"Nathan!"

"Yes, Mercy."

"If you're thirsty, you'd better draw some water out of the well; the pump's all dry and clean. I gave it a hard cleaning to-day, the last thing."

Nathan took the basin of water out through the shop and stable door and emptied it over the asparagus bed. He made a second journey over the same toilsome route for a drink of water.

"I've got to lie down somewhere right away!" he muttered. "I'm all beat out!"

"Nathan!" Mercy called.

"Yes, Mercy."

"Did you rub your feet on the mat in the porch and the scraper?"

"The scraper's out to the kitchen door, Mercy!" Nathan called back, raising his voice with an effort.

"Did you rub 'em on the porch mat?"

"Yes. I don't know as I did all the times. I did once."

A groan, muffled but clearly audible, descended to Nathan.

"I can't help it!" he muttered. "I guess I'll go lie down on the sitting room sofa for a minute. I'll have to; I can't stand up."

He took off his boots and padded softly along the rag pathway. It was so dim in there that not till he got close to the lounge did he notice the newspapers covering it. He lifted one of them off with a determined twitch of his lips, but replaced it hastily, and padded softly back to the kitchen. He went to the door.

"Mercy," he called up, "where's the last paper? I don't see it anywhere."

"Goodness, Nathan Foote, shut that door! You'll let in a mess of flies!"

"Where's the last paper, Mercy?" Nathan's diminished voice rose, patient and tired, to Mercy's ears through the closed door.

"It's all piled up nice, Nathan. You don't want it now. You take the almanac over the kitchen table and read the jokes!" she called back. He got the almanac and put on his boots. Then he dragged them wearily, step by step, out to the stable. His grizzled, seamy face was drawn with exhaustion and pain.

Mercy Foote came downstairs at precisely 5 o'clock to get supper. Just as she stepped over the kitchen threshold the last stroke of the clock was clanging. That was her rule. Mercy was as methodical as she was neat.

"Goodness," she exclaimed, "there's a fly!—there's two flies!" She caught up one of the deftly folded newspapers that she kept hidden in handy nooks and proceeded to wage war.

"Nathan's so careless!" she fretted. "But I didn't think they'd find their way clear in from the stable!"

She peered into the sitting room, and noticed that one of the papers on the lounge was awry. "Nathan's been in there—yes, there's a wisp of hay on the speckled rug! Now I s'pose I've got to go to sweeping!"

It was quarter of 6 before supper was ready on the little kitchen table. Mercy had arranged the dishes precisely, but there seemed very few of them. "It's too hot to light the fire, and 'twould muss up dreadfully—the shavings and all. We'll have just a cold lunch. Nathan oughtn't to eat hearty victuals after haying and getting all heated up.

"Nathan! Na-than!" she called from the porch door, which she warily opened only a crack. He was not out there. She could not find him anywhere.

She went all over the house, and peered from all the tightly screened windows. She put on her sunbonnet and blew the dinner horn. She always put on her sunbonnet when she blew the horn, nobody knew why. Mercy didn't know herself.

There was a little circular hole in the upper part of the kitchen door, protected by a swinging disk of wood. It was to blow the dinner horn through. Nathan made it for her so that she need not open the door and run the risk of the entrance of flies. She slid away the wooden cover and quickly inserted the end of the horn into the hole, and blew long, resonant blasts. They echoed back to her lonesomely.

The clock struck six—seven. Still Nathan did not come. Mercy went out to the hayfield and all over the little farm. Her heart grew heavy with new, unacknowledged dread. Where was Nathan?

"I'm beginning to get scared," poor Mercy confessed to herself. Why was it that she kept remembering the sharp words she had said to Nathan? Why did she remember how old and tired out he had looked at dinner?

Terrible things she had read of and heard of kept recurring to her mind with dark insinuation. Could it be possible that weary old men with fussy, scolding wives ever—ever—Oh, no! But where could Nathan be? Eight o'clock—one, two, three, four, five, six, seven, eight slow, solemn, significant clangs! Mercy went out into the woodshed—into the stable—anywhere, away from the sound of the clock's voice that scolded incessantly.

The hungry old horse in his stall was whinnying and pawing for his supper. Mercy stroked his nose.

"I'll get you some hay, pony," she said. She went upstairs to throw it down to him, and there was Nathan asleep in the hay! He lay in the profound, relaxed slumber of utter weariness. The yellow almanac had fallen from his fingers and lay beside him. She knew he was tired, and not very well. He had been driven to take his rest in the barn!

Mercy tiptoed back into the house, breathing, long, free breaths all the way, and forgetting to shut the doors.

She built a fire and filled the teakettle and made many trips to the pantry, coming back with sundry dishes that Nathan liked, and crowding the table with them. She took a lighted lamp into the sitting room and set it on the table. With a vigorous sweep of her arm she bundled together the newspapers on the lounge and carried them out.

"There," she said, "now I'll fetch a pillow and put the paper handy."

A few minutes later she stood in the porch door and blew long, steady, penetrating calls on the horn. Nathan heard them and came in, looking guilty.

"I guess I went to sleep, Mercy," he said. "I must have. I was all beat out when I came in."

They sat down together to the savory little supper. The pungent, pleasant odor of steaming tea filled the room. Nathan ate with the hearty relish of a well-rested man, and Mercy watched him with delight.

Suddenly Nathan suspended his knife and fork and looked across at Mercy, troubled.

"If there ain't two pesky flies!" he said, ruefully.

Mercy's eyes were glued with dogged heroism to her plate.

"Where?" she said, cheerfully. "I don't see 'em, Nathan."—Youth's Companion.

The average girl's cup of joy is a mustache cup.

OUR BOYS AND GIRLS.

THIS IS THEIR DEPARTMENT OF THE PAPER.

Quaint Sayings and Cute Doings of the Little Folks Everywhere, Gathered and Printed Here for All Other Little Ones to Read.

Some little Spring Beauties lived far away
In the wildwood, out of sight,
But they wore their best gowns for every day,
From earliest morning till night.
For they said to each other, "You never can know
When callers may drop in to see us, and so
Let us always take care how we look,"
So their lovely pale pink satin dresses they wear,
And to see if the color goes well with their hair,
They peep at themselves in the brook.
And sure enough! without knocking at all,
In popped such a nice little breeze.
And a sunbeam paid them a morning call,
As she strayed through the dark old trees.
And the children came next in a blithe little troop,
And they shouted with glee when they saw the sweet group
Of flowers by the rivulet's brink;
And the beauties all whispered together, "'Tis well
We were ready for calls!" and each gay little belle
Blushed for joy, just the prettiest pink.
—Youth's Companion.

Why Washington Crossed.

Teacher—Why did Washington cross the Delaware River? Johnny Thicknecк—To git on the other side.

His Father's Way.

Teacher—"Why didn't you ask your father how this sum was done?" Johnnie—"Cause I didn't want to be sent to bed."

What Columbus Did.

Teacher—"Now, boys, who was Columbus?" No answer. Teacher (promptingly)—"The man that——" Class (readily)—"Broke the bank at Monte Carlo."—London Judy.

A Free Show.

Tommy—"Goin' to the show ter-night, Johnny?" Johnny—"Naw. We're goin' to have a free show at our house to-night. Pa's goin' to put down a carpet."

Reason for the Whipping.

"Now, Johnny, do you understand thoroughly why I am going to whip you?" "Yes'm. You're in a bad humor this morning an' you've got to lick someone before you feel satisfied."

One Slow Foot.

One of your feet walks faster than the other one. People who get lost in the woods travel for hours thinking they are going straight ahead, but they find after a while that they have been going around in a circle.

You can try this, and have a great deal of fun out of it by getting your boy friends to join you on a lawn or other open place. Blindfold them one at a time and start them straight for the gate or some other object about fifty feet away. Not one of them will reach it. Try this and see if you are left-footed or right-footed.

Cutting Animals from Paper.

A reader writes that he frequently amuses his nephews and their little friends in "cutting animals," and says he caught the knack of doing such scissors art work when only four years of age. The accompanying cut illustrates the perfection which this skill with the scissors may attain. He says the amusement is exhaustless in its power to amuse children and suggests that the children may find it to their pleasure to practice the art. Animals cut from white paper and pasted on a black background, or vice versa, show to the best advantage.

CUT OUT WITH THE SCISSORS.

Making and Baking Bread on Camels.

There are very few American families that do not stay at home long enough to eat and also to prepare their meals. But then American customs differ in every way from those of the Bedouins, as some of the wandering tribes of Arabia are called. The religion of a Bedouin tribe seems to be to "move onward." Having once begun the nomadic life, it becomes almost necessary for them to keep it up. In the first place they don't want to settle down, and they wouldn't have any place to stop if they wanted to. Sometimes it becomes expedient that they make great haste in these long journeys. Wandering around over the plains are other tribes whose only occupation is "moving on." There is frequently enmity between two of these Arabian families, and should one pursue the other it behooves the pursued to hasten onward with all the speed their animals are capable of. Or it may be that the springs of water are so widely separated that hard travel is necessary to make the distance from one to the other in a day. When either of these contingencies arise they cook and eat while on the march. They don't eat much. Two or three dinners such as American boys and girls are used to every day, with something extra for Sundays and company, are supposed not to agree with Bedouin children's stomachs. When on the road bread is their chief food. This is baked while riding. One woman will mix the coarse flour which is carried in a sack on the back of her camel, another will roll and shape the dough, which is brought to her in small quantities, and a third will make a fire in an earthen vessel and attend to the baking. Women or boys on foot run along from one cook to the other and carry the material, and when the feast is ready they distribute it among the various members of the tribe.

Deceptive Names.

"Longfellow knew what he was talking about when he said that things are not what they seem," exclaimed Herbert, vehemently. "Or, rather, they are not what they are said to be. Everything is a snare and a delusion. We are living in the midst of a great big falsehood."

"Land alive," exclaimed his Aunt Lucy, who was startled out of her usual calm by these pessimistic utterances and took three false stitches in her crochet work in consequence. Even Herbert's mother, who was used to her boy's tragic way of putting things, looked up a trifle anxiously.

"What's the matter now, Herbert? What do you see that is sailing under false colors?"

"Just look at this table," said Herbert, pointing his right forefinger at the offending table in question. "Everything you see lying thereon is going by a name that doesn't really belong to it. Here's this card tray. It is a fine specimen of German silver, but in reality it doesn't contain a grain of silver, being an alloy of zinc, nickel and copper, and moreover, it wasn't made in Germany. Then there is that whalebone that you are going to put in auntie's dress. It was never within a thousand miles of a whale, but is some kind of steel sliced down real fine. That plaster of Burgundy that you are going to stick on grandpa's rheumatic shoulder is not pitch, but a combination of resin and palm oil, and is not made in Burgundy. Then there is that bunch of tuberoses, which are not roses at all. The black lead pencil I scribbled my exercises with a few minutes ago is not lead, but a mixture of carbon and iron. The sealing wax with which I am going to seal my letter when I finish it contains no wax. The steel pen I am writing with hasn't a particle of steel in its make up. To wind up the long list of deceptive names, I've been writing to Cousin James about the Turkish baths grandpa has been taking for his rheumatism, which is the worst of all, for baths like that have never ever been dreamed of in Turkey."

Herbert resumed his writing. His mother and Aunt Lucy looked at each other in amazement.

"My land," said Aunt Lucy, "doesn't that beat all? It's really wonderful how boys learn so much these days. I never knew any of that, and I'm 50 years old."

"I believe Herbert is generally right, though, in these odd bits of information," said his mother, softly.—Chicago Record.

RECENT INVENTIONS.

Sand beaches can be formed along the banks of streams by the use of an Ohio man's device, consisting of wooden cribs to be filled with stone and sunk into the water, projecting arms being arranged at the sides to prevent the crib from tipping over as it sinks, allowing the water to deposit soil and form the beach.

Dental floss for cleaning the teeth is easily manipulated by a new tool, which has the floss wound on a spool, suspended between two hollow arms, through which it is threaded, passing from the tip of one arm to the other, to be drawn tight by a reel and inserted between the teeth.

A Maryland inventor has patented an electric switch which has no metallic surfaces to be thrown in and out of contact, the ends of the wires being barred and extended into a chamber partially filled with mercury, so that a turn submerges the wires in the fluid and completes the circuit.

Two Westerners have patented an improvement in ice tongs by which the prongs are made to grip the cake more securely, the handle being shaped like an inverted U, with the tongs pivoted at the ends, a sliding member inside the handle being raised to pull the tongs apart and release the ice.

In an improved oil stove the burners are carried by a piston, which rises and falls in a well connected with the oil reservoir, the latter being air-tight, so that when the oil is pumped in the burners are lifted by the pressure and maintained at the level of the oil.

Doctor Jenner's Self-Reliance.

The late Doctor Jenner was essentially a self-reliant man. His patients numbered kings, queens and princes. One who knew Jenner well once hinted that his many responsibilities must be sufficient to render sleep impossible.

"Sleep!" replied Jenner in his characteristic way. "I don't think that anxiety about a patient ever kept me awake five minutes. I go to a bedside. I do my best. What more can I do? Why should I not sleep?"

Private Graveyards in China.

There are no large cemeteries in China. Every family has its own graveyard, as spacious as possible, and thus a large part of the best land is given up to the dead, the worship of whom is the first principle in Chinese religion.

Many a wife dusts the billiard chalk from her husband's coat and sheds tears of sympathy because of the late hours he must spend at his desk close to a whitewashed wall.

CHILD IS A CRIMINAL.

QUEER STATEMENT OF A MODERN EDUCATOR.

Dr. G. Stanley Hall, Who Is Combating Kindergarten Fads—Too Much Sickly Sentiment in Rearing Children Makes a Race of Weaklings.

Quite a little tempest was stirred up by Dr. G. Stanley Hall, president of Clark University, Worcester, Mass., by his expressed views on children, wherein he combats present theories and tendencies.

"Every child," says Dr. Hall, who by the way is the foremost psychologist of the country, "is a born criminal. All children are murderers. The angry child doubles up its puny fists and strikes its mother. The blow is a mere tap, it does no harm and the mother perhaps does not even feel it. But that she is not killed or severely injured is not because of lack of will upon the part of the child, but of physical weakness. In his primitive, savage state a man fought with his neighbor over a bone in a cave. His one thought was to secure the greatest possible advantage for himself. So it is among children. They have no logical idea whatever of right and of wrong. Everything is a matter of expediency. Unless Tommy is a mere manikin, a namby-pamby little milksop, he doesn't refrain from stealing apples because his conscience troubles him. Not a bit of it; he hasn't any conscience to trouble him. If he lets green apples alone it is for one of two reasons only—he knows that his mother will whip him if he

DR. G. STANLEY HALL.

eats them, or he knows by hard experience that the pain of stomach ache more than offsets the pleasure of eating. In a child's mind the fear of punishment takes the place of moral reasoning. As he grows older by nature's processes he becomes a reasoning animal.

"What I contend for is the exercise of plain common sense and the acceptance of facts rather than fine-spun theories. Now, for example, the kindergarten spends a lot of time telling the club women that they must not punish their children. Oh, no, the dear little things must never hear a cross word, much less feel a smart slap. Punishment must come upon the child as the natural result of its misdemeanor. Nature, and not the mother, must administer a castigation. I grant that this theory is all right, but I can prove by the mothers themselves that in nine-tenths of the ordinary childish high jinks it won't work. Now, a child puts its tiny, tender hand on a hot stove and is burned. Not many mothers, I fancy, give their children a whipping on such occasions. Common sense tells them that the child has suffered enough, and will apply the lesson. But suppose a boy plays hooky, suppose he won't carry in wood, what thunderclap is going to fall on him out of the sky? In a case like this I believe a thorough dose of Dr. Spank's remedies is the best specific. Mothers can raise children without a kindergarten formula. Knowledge can be applied without its having been reduced to a system. Children are animals. They are dear, sweet little things, I admit, but animals just the same.

"The idea of teaching a child to turn its left cheek when it is struck on the right one! Fiddlesticks! Unless you want to make a selfish, knock-kneed weakling of him, teach him to double up his fists and strike back. Now, there would, of course, be limitations to this course. Some boys are so pugnacious by nature that they ought to be discouraged a little, rather than encouraged to fight. Generally speaking, I believe in healthy children's quarrels and fights. When I went to school in the country we all knew who could whip the rest of us. We used to stand up and fight it out for hours. I don't believe in too much tenderness. I think we are in danger of becoming over-sentimental, rather than overbrutal. Physical courage is the foundation for moral courage later in life. One is to the child and the savage what the other is to the grown and cultured man.

"One of the most effective means of discipline in reform schools is the teaching of boxing. When an incorrigible boy is unable to control his temper teach him boxing. In a boxing match he has to control his temper or he gets hit. He misses his guard and his opponent punches him. Anger is a species of epilepsy and destroys for a moment the mind's balance. I think every boy ought to learn boxing, but I don't advocate teaching it in the public schools. We can't have everything which it may be desirable to know taught in the public schools. The system is crammed and jammed to overflowing now. Life must not be made too easy. Plenty of children nowadays, especially the children of the rich, are suffering from having too much pleasure. They are surfeited with pleasure. Their minds are filled with goody-goody sentimental stories. They will grow up to be selfish milksops. A child who has nothing to do but enjoy himself will become a degenerate, selfish man. Luxury brings decay. I believe in pain and pleasure both. Every soul needs to experience the extremes of pain and pleasure. But pain is the great educator. Hunger and cold, and a hundred other sufferings are nature's great spurs.

"I believe in punishment for children. I believe in corporal punishment in the schools. It should not be carried to excess, but the fact that an incorrigible boy knows that the teacher may whip him is a tremendous support to the teacher. I don't want to whip a boy severely, but if I am to control him I want him to know that I can give him a licking. You would break a man's leg to reset it straight, and sometimes it is necessary for the good of a child that he have his will broken. I believe in allowing children to bully and 'fag' each other at school within reason. The English have the right idea in their schools. The children there soon find out who is the master."

DR. G. STANLEY HALL'S SYSTEM OF EDUCATION.
Chicago Times-Herald.

WHY THE AMERICAN GUNNERS ARE THE BEST.

That the marksmanship of the gunners in the American navy is the best in the world is admitted even by British experts. The accompanying chart, prepared by one of them, compares the results of target practice by the men of the United States battleship Texas, which holds the record in the American navy for 1898, and those of her majesty's protected cruiser Imperieuse, the flagship of the British Pacific squadron. The record of the American gunners is 93 per cent of hits, while that of the English is only 50 per cent.

Credit for the superior marksmanship shown is given to the greater opportunities for target practice given by the regulations of the United States navy. In 1898 we spent $1,000,000 on target practice, while for the much larger English navy less than $750,000 is allowed.

In the English navy there is one trial practice each month and an annual prize firing, but the allowances of ammunition are so small that the practice is small.

Under the present regulations each United States war vessel is allowed fourteen opportunities for practice firing at sea. The ranges employed by the navy are from 800 yards for the small guns to 3,000 yards for the large. The speed of the ship must exceed eight knots. Under the regulations in force prior to July, 1897, each ship must be prepared as if for battle on two occasions during each year, and two prizes, one of $5 and $10, may be awarded for every twenty-five men who take part in the practice.

On the accompanying chart most of the American shots are seen to have struck at or below the water line, where they will do the most damage. Many of the British shots, on the other hand, are represented as striking the funnels or rigging of the vessels, where they are comparatively harmless. One reason for the greater percentage of American hits below the water line is due to the fact that American gunners fire when the opposing ship is on the downward roll, while the gunners of other nations generally "cut loose" when their opponent is riding.

Bench and Bar.

Irish Barrister (addressing the bench)—Your honor, I shall first absolutely prove to the jury that the prisoner could not have committed the crime with which he is charged. If that does not convince the jury I shall show that he was insane when he committed it. If that fails I shall prove an alibi.

When the late Judge Pinney was a member of the Wisconsin Supreme Court a young lawyer who was arguing his first case began: "Ancient history teaches us——" The judge, looking up from the printed brief, remarked: "Young man, just pass over the ancient and mediaevai periods and begin with the modern era." The young lawyer was put out for the nonce, but learned a lesson which has stood him in good stead ever since.

A pompous Chicago lawyer in the midst of his argument remarked: "Gentlemen of the jury, I once sat on the bench in Iowa." "Where was the judge?" inquired the opposing attorney, and the argument of the pompous gentleman went to pieces right there.

The late Right Hon. Richard Dowse, who was a baron of the Irish Court of Exchequer from 1872 till his death in 1890, was trying a case on circuit where the prisoner could only understand Irish, and accordingly an interpreter was sworn. The prisoner said something to the interpreter and the interpreter replied to him. "What does he say?" demanded the judge. "Nothing, my lord." "How dare you say that when we all heard it? Come, sir, what did he say?" "My lord, it has nothing to do with the case." "If you don't answer I shall commit you, sir. Now, what did he say?" "Well, my lord, you'll excuse me, but he said, 'Who is that old woman with the red bed curtain round her sitting up there?'" "And what did you say?" asked Mr. Baron Dowse. "I said to him: 'Whisht, my boy, that is the old fellow as is going to hang you!'"

Zangwill Answers Choate.

During the February blizzard Ambassador Choate and Israel Zangwill found themselves snowbound between Boston and New York. If we may believe all accounts, the exchange of epigrams and repartee was something sparkling. Here is one of them:

"Could an apple tempt you?" said Mr. Choate, sampling the lunch counter at one of the way stations.

"I wouldn't be human if it couldn't," replied Mr. Zangwill, with a smile.

Out of Sawyer's Line.

Ex-Senator Philetus Sawyer, of Wisconsin, was last season taken to see the Oshkosh base-ball team play a visiting club. "I don't know much about this game," said Mr. Sawyer, presently, "but it seems to me our team would get along better if we had a few more men in the field."

Happiness may resemble either a mountain or a molehill. It depends on the distance you are from it.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JUNE 23.....1899

Some days ago the *Record Union* announced that a a movement is afoot to call a State convention to consider the conservation of water in California. the storage of the flood waters rushing down the flanks of our mountains in winter that they may be utilized in the dry season to preserve the carrying capacity of silt bearing streams; to contribute to the mining industry and to protect and promote agriculture in the valleys. Since that publication an open letter has been addressed by several prominent citizens to commercial and other prominent bodies upon this subject, and in every in instance an affirmation of the call made in the letter has been received. The startling importance of the subject has been perceived by each of the bodies addressed, and it may be therefore concluded that the convocation in view will be soon called together. It will, in our opinion be one of the most notable in history. It is now known that the Federal Government has completed the survey of forty-four sites for storage reservoirs in our mountain ranges, the construction of which is entirely feasible. water rights along our rivers and their tributaries have been taken already to the full extent; there are no contests to be met with in that direction. The surplus waters we now have run to waste whenever they overload the streams. To store such waters for use in maintaining the integrity of the rivers in the dry season, is therefore one of the very highest offices to which good citizenship can devote itself. Congress is not likely to undertake the work. Indeed it may be accepted as settled that it will not. It becomes therefore a State question of first importance.

In accordance with an Act of the last Congress, the President has appointed a Commission to report upon the most feasible and practicable route for a canal across the Isthmus of Panama. Rear Admiral Walker, who was Chairman of the Nicaragua Canal Commission, is Chairman of the present body. It is understood that the provision of the Act in question, calling for a survey of the Panama route, as well as the route of Lake Nicaragua, was inserted through the efforts of the opponents of an interoceanic canal, and simply for the purpose of delaying the construction of the Nicaragua waterway. There is no doubt that the Nicaragua route will be selected, in preference to that across the Isthmus of Panama. Lewis M. Haupt, one of Philadelphia members of the new Commission, is quoted to the effect that the Panama scheme is wholly impracticable, but that the speculators who control the Isthmian canal will do their best to saddle it upon the United States. England too, he thinks, will do all she can to delay the construction of the Nicaragua Canal by the United States for commercial reasons. Mr. Haupt seems to regard the work of the Panama Commission as a pure waste of time and says it may occupy two years in going over ground that has already been explored. It is said that the practicability of a canal across the Darien Isthmus will also be considered by the new Commission, though none of its members have any faith in the route. It is announced that the Panama Commission will soon sail from New York to Colon, and it appears that Admiral Walker is disposed to push the work. The people of the Pacific Coast will assuredly be pleased to see the labors of the Commission completed with the utmost expedition, and the construction of the Nicaragua Canal begun at the earliest date possible.

After several years of lonely confinement upon Devil's Island, that malarial and deadly spot off the coast of French Guiana. the famous or notorious—as the case may be—Captain Dreyfus is now on his way to France for a revision of his trial by the Court of Cassation. The French Court of Cassation holds a certain though not exact relation to our own Supreme Courts. The term "cassation" is derived from the verb *casser* to break or annul, inasmuch as this court can annul the decision of any other court or judicial tribunal, civil or military, in in the land. It may thus be regarded, in a certain sense, as the last and highest court of appeal in the whole country. But as everything is excluded beyond the question whether or or not view taken of the law and of the proper method of administrating it, by the inferior tribunal, has been the right one, the idea attached to this institution is less than of a court in the ordinary sense than a department of government to which the duty of inspecting the administration of justice is assigned. The action of President Loubet in endorsing the revision of the Dreyfus case. while it has aroused the enmity of the royalist and military element, undoubtedly receives the support of the country at large, and will receive the support of a majority of the Chamber of Deputies. The evidence connecting Colonels Esterhazy and Paty de Clam with the forging of the treasonable documents instrumental in the conviction of Dreyfus is gathering weight every day. The latter officer has been committed to prison. Zola has returned to Paris, and everything points to the conclusion that the spirit of justice, innate in every people, will at last assert itself, and that the infamous plot which resulted in the imprisonment of an innocent scope goat will be disclosed

The Hawaiian labor problem threatens to become like the old slave labor question, on a smaller scale, of course, but just about as offensive in its nature; and Congress is going to have a lively time in solving it. It is evident that whenever a country in the middle zone annexes a tropical island it annexes trouble.

HAPPY MOMENTS.

Ho For the Hen and the Cow!

Sing ho for the South Dakota cow,
Sing hi for the little brown hen!
Such a couple was never on earth below
To feather the nests of men.
With the golden products of good Queen Bess
No "udder" can compare,
While the snowy fruit of the cackling "bute"
Brings a solace for every care.
Men risk their lives for the shining ore
Deep laid in a frozen clime,
When these faithful servants bring them more
And peace at the selfsame time.
With pasture in plenty and bugs galore
They never will lack for feed.
Their stock is at par at the grocery store
For things that the farmers need.
Then three times three for the bovine "she,"
And three for the female fowl!
At the farmer's door, which they feed before,
No wolf has a chance to howl.
No poet's dream ever hatched a theme
More worthy a poet's pen
Than the kindly queen of the prairies green
And the busy, cackling hen.

—Sioux City Journal.

Impossible Task.

The fortune teller excused herself for a minute and left the room.

"I'll have to give it up," she said to her confederate.

"What's the matter?'

"Why, how can I be expected to tell the fortune of that big gawking idiot successfully when I can't worm any sort of a tip out of him as to the kind of a fortune telling he wants to hear?"

Yes; there are many difficulties of which we little wot or entirely wot not, as the case may be.—Chicago Post.

No Wonder She Died.

"What a farmer needs in this world to be successful," remarked Farmer Hayseed, "is a good wife; then he's all right. My wife could git up in the morning at 4 o'clock, milk 15 cows, feed six horses, git breakfast for 20 hands an be ready for a day's work before 6 o'clock. That's what I call a good wife."

"Doesn't she do it now, Farmer Hayseed?" he was asked.

"Oh, no," he replied, wiping away a tear; "she's dead."—Nuggets.

Obliging.

First Passenger—Would you be good enough to lend me your spectacles a moment?

Second Passenger—Certainly, sir, with pleasure.

First Passenger—Oh, thanks! Now, as you can no longer read your newspaper, will you have the kindness to pass it to me?—Boston Globe.

Not a Resigner.

I bear a charmed existence!
Though resignations fly
With perilous persistence,
They always pass me by.
So listen to Sagasta;
It's a politician slow
Who quits unless he has ter—
So I won't let
let
go!

They said we had no money.
But we tried an I O U.
With a trustful smile and sunny
And a dulcet "parley-voo."
It wasn't much they'd offer—
Just a million francs or so—
But it fits my frugal coffer,
So I won't let
let
go!

—Washington Star

THE LISTENER.

The late George Muller, the philanthropist, of Bristol, England, left an estate valued at $800.

Obadiah Sands of Chicago is known as the "butter king." He owns 80 creameries and controls as many more.

Colonel Tom Ochiltree, so long a familiar figure in the corridors and bar of the Hotel Waldorf, in New York, has gone to Europe for his health.

Of the ten soldier presidents of the United States whose services in that office cover practically 40 years of the existence of the republic William McKinley is the first to call the nation to arms.

Lord Waldegrave, captain of that ancient corps known as "Her Majesty's Yeomen of the Guard," has been transformed into one of the wealthiest peers in the kingdom by the death of Lord Carlingford. He is very popular.

Captain Charles Weaver of an Arkansas company wears a sword that was first carried by his great-great-grandfather in the Revolutionary war, again by his great-grandfather in the war of 1812 and next by his uncle in the rebellion.

M. Deibler, Jr., son of the French public executioner, was lately married to a young lady once a cigar maker in a government factory. Young Deibler is now an assistant at executions and hopes some time to succeed his father in his grewsome office.

Colonel Robert H. Crockett, a grandson of the famous pioneer and patriot, "Davy" Crockett, is a typical southern gentleman of the old school. He is of medium height, with white hair and beard and stands as straight as an arrow, although he is now 70 years of age.

B. L. Stevens of Atlantic City, who was a gunner under the brave Dewey when the latter was a lieutenant on the Mississippi at New Orleans, in 1862, says that Dewey directed the shot which put the Manassas out of the fight and that he showed wonderful nerve in the battle.

Charles Boone, who has been appointed as a naval cadet at Annapolis, has supported himself and his mother and gained a good education by selling papers in Dayton, O., and was the only one of 50 applicants for the appointment who did not have recommendations from wealthy men.

The will of the Rev. Horace S. Bishop, rector emeritus of Christ Episcopal church, East Orange, N. Y., contains a bequest of $2,000, the income of which is to be used to supply altar lights and incense for the parish church. Mr. Bishop in his lifetime was never classed among the ritualistic clergy of the Episcopal church.

The father of the French chamber, M. Henri de Lacretelle, who is 83 years of age, is retiring from parliamentary life. He has represented Macon, but recently became so infirm that he had to be carried in and out of the chamber and appeared to be perfectly indifferent to the speeches and scenes which went on around.

THE PAINTERS.

The late Aubrey Beardsley is said to have done his best work at night by candlelight.

Although 79 years of age, Rosa Bonheur, the great painter of animals, appears as active as ever so far as her work is concerned. She spends about five hours a day perched on a ladder in her studio.

William Haskell Coffin, whose remarkable picture, "Karma," attracted so much attention in Washington art circles not long ago, is only 20 years of age and is the son of a former assistant comptroller of the currency.

Mr. T. R. Lamont, who has just died in London from an attack of pneumonia, was the original of the Laird in "Trilby." He and Mr. Du Maurier had been fellow students. As an artist he devoted himself especially to water color, and he was long an associate of the Royal Water Color society.

Georges Montbard, the artist, was a communist rather more than a quarter of a century ago and could frequently be seen careering about the Latin quarter on horseback and girded with a huge saber. When the Versailles troops entered Paris, he fled to England, and has since prospered with his pencil.

To Give Up Every Vice.

"Well, sir," demanded Horatio Bullion, "what particular reason have you to offer for asking me to let you have my daughter Gladys?"

"I—I love her, and she loves me," Reginald Biddlethwaite replied.

"Oh, of course," the blunt old magnate retorted. "I've heard that song from half a dozen others. That's to be taken for granted. But what other qualifications have you?"

"I must confess," the trembling young man answered, "that I am not rich, but I can truthfully say that I have no expensive habits. I don't drink. I don't gamble. I don't chew tobacco. I don't smoke. I don't"—

"Hold on!" the millionaire broke in. "That's enough! You'll do. Your board and clothes won't cost much more than the gas you've been burning lately. What I object to is supporting fellows like my other three sons-in-law, who have all the faults you say you have not. I don't mind furnishing the husbands of my daughters with the necessaries of life, but I do hate to have to settle the bills for their luxuries. Now, there is just one other point I want to have settled before I give my consent."

"What is that?" Mr. Biddlethwaite eagerly asked.

"Promise me that you will not start a newspaper. The others have all tried it, and I can't stand many more such experiences."

Reginald's promise made three hearts happy.—Cleveland Leader.

Vaseline Pancakes.

Cæsar's creek, on the Florida coast, was named after a famous old pirate called Black Cæsar, whose profession added to the risks of marine insurance. After the pirates the Florida wreckers came, of whom H. A. Willoughby, in his "Across the Everglades," tells this story:

A large steamer was stranded on the reef not far from Cape Florida. No sooner had she struck than the news spread rapidly along the shore. The people for 20 miles around gathered on the beach opposite the stranded steamer. Among them were a number of Indians from the Everglades, who chanced to be down there and knew what a "wreck" meant to the wreckers.

The steamer, loaded with an assorted cargo, began to break up, and barrels, cases and boxes drifted gradually ashore. There were casks of wine, boxes of soap, cases of bottles of wine and iron and a hundred other articles. The Indians seized upon the wine and soon were in a condition that allowed the white men to secure the more valuable prizes.

The squaws struck a bonanza in a case of vaseline. They thought it a new variety of the white man's frying fat and, starting a fire, fried pancakes in it. What a dish—pancakes a la Seminole!

Messages by Vibration.

Curiously enough, the fact appears, according to a recent traveler among the Indians of Catuquinarn, between the rivers Embrya and Embyrasu, that these people have long employed a wireless telephony, but rather after the order of unwritten science.

It is made by digging a hole in the ground inside a house and laying the bottom with coarse sand, well piled. On this is laid a wooden drum or hollow cylinder of wood, half filled with fine sand and layers of broken wood, bone and powdered mica—the upper part of the cylinder, which is empty, rising above the floor of the hut and closed first by leather, then by wood, and lastly by india rubber. Outside, the cylinder is packed round with fragments of wood, leather and resins, and covered with hard rubber at the level of the soil.

To use this peculiar apparatus the drum is struck by a wooden hammer, and the vibration is evidently transmitted through the soil. The answer is heard in the drum, which acts as a resonator, and messages are thus sent over 1,500 yards from house to house.

Shut Him Up.

Stranger (to chance neighbor at a restaurant)—Can you speak many languages?

Chance Neighbor (shortly)—No, but I can hold my tongue in one.—Ally Sloper.

Done For.

"I'll never ask another woman to marry me so long as I live."

"Refused?"

"No; accepted."—London Fun.

Too Much of a Good Thing.

Experience is a teacher good
And makes his lessons understood,
But then we learn a thing or so
That we'd much rather never know.

—Brooklyn Life.

Beecher's Only Poem.

It was related by Mrs. Beecher that during their courtship Mr. Beecher once "dropped into poetry" and wrote a few lines of verse teeming with affection for his sweetheart. But the verses were always kept sacred by Mrs. Beecher, and nothing could win them from her.

One day Mr. and Mrs. Beecher were in the office of Robert Bonner, the publisher.

"Why don't you write a poem, Beecher?" said Mr. Bonner.

"He did ence," said Mrs. Beecher.

"Recite it for me, won't you, Mrs. Beecher?"

But the eyes of the great preacher were riveted on his wife, and she knew that he meant silence.

"Come," said Mr. Bonner, "I'll give you $5,000 if you will recite that poem to me," addressing Mrs. Beecher.

"Why, it ran"— quickly said Mrs. Beecher.

"Eunice," simply said Mr. Beecher.

And although Robert Bonner offered to double the sum first offered he never got the poem from Mrs. Beecher. It had been hidden away ever since by Mrs. Beecher and cherished as one of the dearest treasures her husband left her.—Boston Globe.

Man's Most Vulgar Habit.

"If men were compelled to wear skirts for a period, I think they would insist more than they now do that their fellow men should stop the nasty habit of spitting in public," writes Edward W. Bok in The Ladies' Home Journal. "There is no practice of man which is more distressing to women than this disgusting habit. Women constantly complain of it, especially in our larger cities, where sometimes the sidewalks are scarcely fit for them to walk upon. They revolt at the practice, and they are right in so doing, yet year in and year out the habit not only continues but increases, and the protection of cleanliness, to which every woman walking upon our streets has a perfect right, is denied her."

OFFICIAL.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING MARCH 31ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter M:r

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United states, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty three cents each, your interests in said claim will become the property of the subscriber under said Section 2324 of the Revised Statutes of the United States, and under Section One of an Act entitled "An Act relating to the working, right way, easements and drainage of mines in the State of California," approved March 31st 1891.

FRANK HARRIS.

Dated January 13, 1899.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Jedediah S. Collins, deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said decedent, for the purposes therein set forth.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated June 15th, 1899.

P. H. MACK, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; for within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 20th day of April, A. D. 1898.

D. J. HESSION,
Clerk.

By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this Fourth day of May, A.D. 1899.

Methodist Church.

Services for Sunday, June 25th, 1899.

Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m. The service on Sunday evening will be special Children's Service, consisting of songs and recitations, after which there will be a short sermon for the children. The music will be bright and lively and the recitations good. Come and bring the children with you.

The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

BORN.

DENSMORE—At Independence, June 19, 1899, to Mr. and Mrs. F. E. Densmore, a daughter.

MARRIED.

DOYLE—MCKNIGHT—At Bishop, Cal., June 14, 1899, by Rev. G. E. Wilcox, Dr. Guy P. Doyle to Dr. Helen M. McKnight.

Charley Meroney returned to Mojave on Wednesday.

Jeffries and Sharkey are matched to fight next October.

Sheriff Given went South last Friday and has not yet returned.

E. M. Pincen has returned from his trip to Ballarat. J. C. Quinn is expected here in a few days.

Three and a half tons of ore from the Johnson & McGinnis mine were worked at the Reward Mill this week.

P. H. Mack Esq. leaves for Los Angeles this evening and will probably be gone until about the 10th of July.

Captain Cummings, a special agent of the General Land Office, arrived here last Tuesday morning on official business.

Miss Blanche Bunney is expected home Monday evening from San Jose where she is attending the State Normal School.

Billy Balch, an old time Inyoite, came in with E. M. Dineen from Ballarat this week. Mr. Balch was one of the noted Jehus of this section when daily stage ran to Mojave.

J. W. Stewart came up from Keeler Tuesday morning. He says Mr. Scheu will probably arrive here about July 1st, when operations on the Saline copper mines will be commenced.

Marshall Naylor and Niel Bell are at work on the old Rex Montes mine. A great deal of rich ore is known to exist in the lower levels, and they will make a determined effort to reach it.

Julius Schroeder and Oscar Fausel are still sinking on the Copper Queen mine for C. H. Jordan. At a depth of thirty feet the vein is becoming more regular and some very high grade ore is being encountered.

Bishop is going to have a grand Fourth of July celebration. Big Pine will do the proud at the coming Fair, and Independence will be a nice quiet place to rest in when tired of amusing yourself at the other places.

Fleming and Gruber have a shaft down about thirty feet on their new discovery about a mile north of the Golden Star. The vein is there three feet wide and prospects very well. A test run of twenty tons of ore will be worked soon at the Reward mill. H. Levy and Dr. I. J. Woodin are part owners in the claim.

The Carson & Colorado R. R. Co. will sell tickets to Bishop and return as follows: From Hawthorne, $7; Soda, Rhodes, $6; Candelaria, Belleville, $5; Benton, $2; Alvord, $1.25; Independence, $2; Lone Pine, $2.50; Keeler, $3. Tickets issued on an after July 1st; not good for return after July 8th. Transportation from Bishop station to Bishop and return free.

A gentleman named McPherson arrived here last Sunday from Orange county and is interviewing the people of this section on the proposition of a sugar-beet factory. He represents W. H. Holabird of Los Angeles who is largely interested in beet growing in Southern California, and who is anxious to get into an irrigated country, the last two seasons having, as Arnold would remark, "put a taste in his mouth" that wasn't sugar.

Cost of Mining.

A question frequently asked is, "How cheaply can a mine be worked in California?" There are so many factors entering into the economy of mine equipment, development and management that no arbitrary answer can be given this question. An important consideration is the width of the vein. Another question of almost equal importance is the character of the rock, whether hard or soft, easily supported or requiring close and immediate filling. Still another question of great importance is the manner of recovering the ore bodies, whether by means of tunnels or through shafts. The quantity of water, cost of timber, cost of labor and supplies, distance from mine to mill, kind of motive power and its cost—all of these are important considerations which have a direct bearing upon the cost of mining. The beneficiation of the ore is a distinct branch, and a large number of conditions have to be considered. Here the hardness of the ore has a direct effect on crushing capacity, but large capacity per stamp is not always productive of the best results. The fineness of the gold or its association with other minerals determines in a large measure the capacity of the mill. A free milling quartz can be milled more cheaply than one which is only partly free and requires concentration or other subsequent treatment. Some ores cannot be successfully milled at all or at least milling cannot successfully compete with smelting. To obtain the best results at the lowest cost is the object throughout, and to accomplish this result requires careful consideration of equipment and methods of mining to be pursued. The ore, having been brought to the surface with as little handling as possible, should reach the mill as quickly as possible, and when dumped on the grizzlies it should pass automatically downward by gravity from one operation to another, until the pulp passes to waste down the gulch, having been relieved of all the precious metal it is economy to extract. Under favorable circumstances mines have been operated in California at less than fifty cents per ton, this covering all cost of mining, milling, etc., but in these operations the ore bodies were extensive and were mined in the open cuts; the tonnage per stamp was large, the rock an ideal free milling material, and the power employed free water.—*Mining and Scientific Press.*

The County Fair

At a meeting of the Fair Board the date of the Fair was fixed for September 19, 20, 21 and 22, 1899. Bonds of Treasurer were fixed at $2,000 and those of Secretary at $500.

Report of Educational committee was adopted and an opportunity given to the young people by earnest work to gain some of the liberal premiums.

LEGAL.

Administrator'c Sale.

Notice is hereby given, that in pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the tenth day of June, A. D. 1899, in the matter of the estate of Luther Clark, deceased, the undersigned the Administrator of the said estate, will sell at public auction to the highest bidder for cash, lawful money of the United States, and subject to confirmation by said Superior Court, on Monday, the seventeenth day of July, A. D. 1899, at two o'clock p. m., at the Court House door and in front thereof, in the town of Independence, County of Inyo, State of California, all the right, title, interest and estate of the said Luther Clarke at the time of his death, and all the right, title and interest that the said estate has, by operation of law or otherwise, acquired other than, or in addition to that of the said Luther Clark at the time of his death, in and to those certain mines, mining claims and mining interests, to wit:

An undivided one-third interest of, in and to that certain mining claim, situate, lying and being in the County of Inyo, State of California known and designated as the "Tip Top" Mine and Mining Claim.

Also, an undivided one-third interest in and to that certain mine and mining claim situate, lying and being in the County of Inyo, State of California known and designated as the "Three Formation" Mine and Mining Claim.

The said mines and mining claims are situated in the Sierra Nevada mountains, about seven miles from Round Valley, in a Westerly direction.

Terms and conditions of sale: Cash, lawful money of the United States; ten per cent of bid payable at the time of sale, and the balance upon confirmation of sale by said Superior Court. Deed at the expense of purchaser.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above-entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant, James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 112, I am commanded to sell, and by said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, State of California, and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances there unto belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United States.

WM D DEHY, Commissioner.

Dated at Independence, Inyo Co., Cal., May 25th, 1899

DESERT LAND, FINAL PROOF.

FRANCE'S NEW PRESIDENT.

The new president of France is calm, sane and a trifle bourgeois. He looks like a man who would infuse into French politics as much vigor as Hostetter's Stomach Bitters will into the run-down system of anyone who uses it. It is an absolute cure for all stomach disorders.

The man who has a cold heart should not complain if his wife has cold feet.

SHAKE INTO YOUR SHOES.

Allen,s Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

The bloomer girl is a living illustration that the clothes does not make the man.

A Guaranteed Cure.

Most difficult to cure—Chronic constipation. Yet Cascarets Candy Cathartic are guaranteed to cure any case or money refunded. Druggists, 10c, 25c, 50c.

A great many men change their opinion as often as they do their shirts.

For 90 days, sugar beet, alfalfa, and fruit lands, $15.00 to $25.00 per acre, easy terms, watered by the largest irrigation system in America, annual water rental $1.25 per acre. Climate equal to California. Address, F. G. Tracy, Eddy, New Mexico.

Betting on "straight tips" has caused many a confidential clerk to go crooked.

FITS Permanently Cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for **FREE $2.00** trial bottle and treatise. DR. R. H. KLINE Ltd., 931 Arch St., Philadelphia, Pa.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

I believe my prompt use of Piso's Cure prevented quick consumption.—Mrs. Lucy Wallace, Marquette, Kans., Dec. 12, '95.

Ask for Kleeno Washing Powder.

Supreme Court Sustains the Foot-Ease Trade Mark.

Justice Laughlin, in Supreme Court Buffalo, has ordered a permanent injunction, with costs, and a full accounting of sales, to issue against Paul B. Hudson, the manufacturer of the foot powder called "Dr. Clark's Foot Powder," and also against a retail dealer of Brooklyn, restraining them from making or selling the Dr. Clark's Foot Powder, which is declared, in the decision of the Court, an imitation and infringement of "Foot-Ease," the powder for tired, aching feet to shake into your shoes, now so largely advertised and sold all over the country. Allen S. Olmsted, of Le Roy, New York, is the owner of the trade mark "Foot-Ease," and he is the first individual who ever advertised a foot powder extensively over the country. He will send a sample Free to any one who writes him for it. The decision in this case upholds his trademark and renders all parties liable who fraudently attempt to profit by the extensive "Foot-Ease" advertising, in placing upon the market a spurious and similar appearing preparation, labeled and put up in envelopes and boxes like Foot Ease. Similar suits will be brought against others who are now infringing on the Foot-Ease trademark and common law rights.

PEOPLE WANT SOMETHING BETTER.

How many women are saying just now: 'Oh, I want a change in my wall decorations; I am tired of wall paper.'

How many dealers are saying: "Oh, what a nuisance the wall paper business has become; how much time and investment it takes and how little the profit!"

How many painters and decorators who have lent their influence to push forward the wall paper craze now find their occupation gone.

To all such we would say, "Use, sell and advocate the durable cold water Alabastine."

Alabastine can be used on either plastered walls, wood ceilings, brick or canvas. It is absolutely fire proof in its nature, is durable, and any one can brush it on. Alabastine is sold by paint dealers everywhere. Ask your dealer for card of tints.

HOW'S THIS?

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free.

Hall's Family Pills are the best.

Your Grocer sells Kleeno Washing Powder.

"And you say the idiot of a teacher told you that you had an extravagant fool of a father?"

"That's what he meant."

"But what did he say?"

"He said it was criminal folly to waste money on the education of such a chump as I am."—Cleveland Plain Dealer.

"Better Be Wise Than Rich."

Wise people are also rich when they know a perfect remedy for all annoying diseases of the blood, kidneys, liver and bowels. It is Hood's Sarsaparilla, which is perfect in its action. It so regulates the entire system as to bring vigorous health. It never disappoints.

Goitre—"For 42 years I had goitre, or swellings on my neck, which was discouraging and troublesome. Rheumatism also annoyed me. Hood's Sarsaparilla cured me completely and the swelling has entirely disappeared. A lady in Michigan saw my previous testimonia land used Hood's and was cuirely cured of the same trouble. She thanked me for recommending it." MRS. ANNA SUTHERLAND, 406 Lovel Street, Kalamazoo, Mich.

Poor Health—"Had poor health for years, pains in shoulders, back and hips, with constant headache, nervousness and no appetite. Used Hood's Sarsaparilla, gained strength and can work hard all day, eat heartily and sleep well. I took it because it helped my husband." MRS. ELIZABETH J. GIFFELS, Moose Lake, Minn.

Makes Weak Strong—"I would give $5 a bottle for Hood's Sarsaparilla if I could not get it for less. It is the best spring medicine. It makes the weak strong." ALBERT A. JAGNOW, Douglastown, N. Y.

Bad Blood.—"When 65, a cancerous eruption appeared under my eye. Hood's Sarsaparilla purified my blood and the eruption disappeared." JOHN M. KERR, 3519 Wood St., Chicago, Ill.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills; non-irritating and only cathartic to take with Hood's Sarsaparilla.

25 CTS. FISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS.

NO CIGARETTES WANTED.

But the Worst in the Lot Got a Place After All.

The boss inserted an advertisement in one of the newspapers for an office boy, and he got down to the office half an hour earlier than usual to receive the applicants for the place.

There was a long line of them in the hallway in front of the office. He called the boys into his office one by one and subjected each of them to a searching examination as to experience, fitness, etc. He invariably finished up with the question: "Do you smoke cigarettes?" The boys invariably declared that they did not.

"Never smoked one o' ther dope sticks in me life," declared the first boy called in.

"Didn't, eh?" replied the "old man." "Let me see your fingers." They were stained a deep, dirty yellow. He was told that he was not wanted.

"Dat's not cigarette stain, dat ain't," insisted the second boy. "Dat's paint off me fader's house."

The excuse didn't work, and he was ushered out, as were several more young aspirants for office honors.

Finally, a bright-eyed, red-headed youngster entered and answered all the questions propounded to him in a satisfactory way.

"Now, my boy," came the final test, "tell me truthfully, do you smoke cigarettes?"

"What's them? Those little paper cigars?" answered the youth.

"Yes, exactly."

"Nope; neveh drew one uf them inter me lungs in me life."

"Let me see your hands."

The boy poked out a chubby fist at him. The man examined it critically, but failed to detect the slightest evidence of tobacco stain.

"You're engaged," he finally said.

"Bully for you," said the youth. "So long; I'll be ter work in de morning." He then went out whistling, "There's Only One Girl in the World for Me," and joined his anxious comrades in the hallway.

"Youse fellers can all go home," he said.

"What yer givin' us? Did yer get der job?" piped half a dozen voices.

"Bet yer life," replied the urchin.

There was a loud murmur of surprise from the crowd, and finally one of the youngsters exclaimed:

"How'd yer do it, Chimmie? De ol' man said that he didn't want no dope-stick smokers, an' yer knows yer de wurstest dope fiend in der push."

"Oh, youse fellers was so slow dat yer make me tired," replied "Chimmie" in a disgusted tone of voice. "Course I bit de dope sticks, but d'ye t'ink I wasn't cute 'nough to keep it from de ol' man?"

"Guess yer had a pull or yer wouldn't have fooled his joblots," said one of the youngsters.

"Easiest t'ing in de world," answered "Chimmie." "As soon as I read his advertisement in de papier I knode dat he wus agin dope sticks, so what does I do but soak me fingers in terpentine all night, an' in de morning dey wus as clean as a new-born babes."—New York Tribune.

IMITATION RUBIES.

Jewelers Admit They Cannot Tell the Artificial Gems from the Real.

One of the prima donnas at the Metropolitan opera house wears in one role a beautiful parure of diamonds, and she horrified another singer in the company by telling her that they were French imitations that had not cost one-fiftieth of what they seemed to have cost.

The other woman was distressed because all of hers were real, and the thought of the money invested in them was too much for her.

Imitation jewels have come to be so finely made that detection is almost impossible. Even for ordinary wear they are accounted beautiful, and it is only the knowledge of their falsity which makes them unpopular. For every ordinary purpose they are as useful as the genuine pieces.

The last jewels to be imitated with wonderful success are rubies, and they happen to be a fashionable stone just now. The manufactory which has these imitation rubies on the market is situated in London, and it has already been said there that the price of real rubies will certainly fall in consequence of the discovery of these wonderful imitations. The profits of the company making the rubies are said to be $185,000 a year.

Artificial rubies weighing 40 carats can be produced, but are not, as there would be no sale for stones of that size. An authority has said that there is no way known to him by which these stones can be told from the genuine ones.

A London jeweler questioned as to the possible results of these good and cheap imitations said that the stones impossible to imitate might become the most valuable and most fashionable, eventually.—New York Sun.

An Ancient Town.

The ancient town of Rye, in Sussex, proposes to celebrate this year the 600th anniversary of its municipal existence. The little borough must have possessed the privileges of local self-government for much more than six centuries, for it has been a Cinque port since the time of Henry III., and some of its charters date back to Edward the Confessor. But the possession of a complete list of 600 mayors has probably induced the burgesses to rest their claim to incorporation upon no earlier grant than that of the twenty-seventh year of Edward I. Rye has struggled pluckily against difficulties before which many communities would have succumbed. The sea has retired and left it high and dry, and it has lost its parliamentary representation. Yet the little red-brick town still looks cheery and comfortable.—London Chronicle.

Mere Guesses.

"It is said that if man were to live as long as the sun endures he would, at the end, be learning still."

"Yes, and the office boy would probably think he knew more about the business than the old man did, even then."

What He Growled At.

Mr. Crimsonbeak—You never hear me growl at the table.

Mrs. Crimsonbeak—What, then, were you doing at breakfast to-day?

"I wasn't growling at the table, but at your biscuit."—Yonkers Statesman.

PERIODS OF PAIN.

Menstruation, the balance wheel of woman's life, is also the bane of existence to many because it means a time of great suffering.

While no woman is entirely free from periodical pain, it does not seem to have been nature's plan that women otherwise healthy should suffer so severely. Lydia E. Pinkham's Vegetable Compound is the most thorough female regulator known to medical science. It relieves the condition that produces so much discomfort and robs menstruation of its terrors. Here is proof:

DEAR MRS. PINKHAM:—How can I thank you enough for what you have done for me? When I wrote to you I was suffering untold pain at time of menstruation; was nervous, had headache all the time, no appetite, that tired feeling, and did not care for anything. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound, one of Blood Purifier, two boxes of Liver Pills, and to-day I am a well person. I would like to have those who suffer know that I am one of the many who have been cured of female complaints by your wonderful medicine and advice. —MISS JENNIE R. MILES, Leon, Wis.

If you are suffering in this way, write as Miss Miles did to Mrs. Pinkham at Lynn, Mass., for the advice which she offers free of charge to all women.

He Didn't Need It.

Could the funny sayings and incidents at the tenants' dinners in Scotland be collected they would make an unrivaled book of humor. Mistakes of amusing and sometimes embarrassing nature occur frequently at such functions. One story is told of a guest at a Scottish tenants' dinner who tasted ice cream for the first time on that occasion. He pushed a large spoonful of the frozen mixture into his mouth and jumped from his chair with agony expressed on his face. He let out a yell and cried out, "Ow, ow, ma rotten tooth!" and could not be induced to eat any more.

At another Scottish affair of the kind a good old farmer was seated next to the hostess. She served him a bit of savory omelet, which seemed to cause the old man deep disappointment. His idea of an omelet had always been a dessert with sugar, or fruit or jams, and after tasting the sample before him he turned to the hostess and said, "Weel, ma lady, I canna compliment you on your puddin's."

The late Duke of Buccleuch told a story of a tenant at one of the farmers' dinners on his estates who was asked by the duchess if he would take some rhubarb, a dish she was fond of. The farmer was surprised, but answered politely, "I'm muckle obleeged to your grace, but I dinna' need it."

Two Posers.

Lewis Carroll, the author of "Alice In Wonderland," was fond of puzzling his friends with curious problems. One of them was the question, When does the day begin? If a man could travel around the world so fast that the sun would always be directly above his head, and if he were to start traveling at midday on Tuesday, then in 24 hours he would return to his original point of departure and would find that the day was now called Wednesday—at what point of his journey would the day change its name? The difficulty of answering this apparently simple question has cast a gloom over many a pleasant party.

Another problem was as follows: A rope is hung over a wheel fixed to the roof of a building; at one end of the rope a weight is fixed, which exactly counterbalances a monkey which is hanging on the other end. Suppose that the monkey begins to climb the rope, what will be the result? It is very curious the different views taken by good mathematicians. One says the weight goes up with increasing velocity; others say that it goes up at the same rate as the monkey, while another says it goes down.

Welcome Punishment to Bobby.

A little boy went to church with his mother. The service was somewhat long and utterly incomprehensible to the child. Consequently he fidgeted. His mother reproved him several times. At last she leaned toward him. "Bobby," she whispered, "if you act badly I'll never bring you to church again."

A gleam of hope dawned in Bobby's weary eyes. "Mamma," he said eagerly, "how bad will I have to be?"—Exchange.

Forest Reservations.

The 30 forest reservations of the United States embrace an area of 40,000,000 acres in 13 states and territories. Seven are in the state of California, the largest of which, the Sierra forest reserve, includes 4,006,000 acres. Within the past 35 years it is estimated that 11,000,000,000 feet, board measure, of timber on public land have been destroyed by forest fires.

A Fair Statement.

We do not believe it is fair to find fault with doctors because they don't know much. Nobody knows much.—Atchison Globe.

Biliousness

"I have used your valuable CASCARETS and find them perfect. Couldn't do without them. I have used them for some time for indigestion and biliousness and am now completely cured. Recommend them to every one. Once tried, you will never be without them in the family." EDW. A. MARX, Albany, N. Y.

NO-TO-BAC Sold and guaranteed by all druggists to CURE Tobacco Habit.

Grand Rapids, Mich., has thirty-five furniture factories.

About $100,000,000 is invested in the candy business in the United States.

There are 450 employes to every 100 miles of railroad in the United States.

There are in the world about ninety establishments devoted to spinning silk waste.

Doors and windows made at Tacoma go to England, Africa and all parts of America.

American manufacturers are competing vigorously with foreigners just now for the trade of Argentina.

The Guerin Spinning Company of Woonsocket, R. I., will commence running its plant night and day.

Tacoma flour mills are taxed to their utmost capacity to furnish the markets of Africa, China and Japan.

The Atlanta Journal of Labor states that colored labor has proved a failure in the cotton mills of the South.

The coal mined in the United States annually is worth more than three times as much as the gold mined here.

The Carnegie Steel Company have advanced the wages of about 10,000 day laborers 10 per cent, in all their ten plants.

American cotton has a very keen competitor in the Russian market in Asiatic cotton grown from imported American seeds.

Kansas City Typographical Union has levied an assessment of $1 each on its members toward the proposed labor temple to be erected.

Wisconsin produces annually an average of 10,000,000 pounds of cheese, nearly all of it made by Swiss methods and Swiss people, who imitate the home product fairly well.

Through the factory inspection department of New York several employers of child labor have been fined heavily for swearing falsely as to the ages of children they hired.

It is estimated that there is from $12,000,000 to $15,000,000 invested in the manufacture of jewelry in the New England States.

The planters in Hawaii realize that the contract system is at an end and are now trying the experiment of profit-sharing with the laborers.

Referring to the trade which the United States already has with Formosa, the American consul there says it exceeds that of any other country except China.

The age at which children begin to work is 11 years in England, 14 years in Switzerland, 13 years in Germany and 12 years in France, Holland, Russia and Belgium.

A decision has been rendered by the Supreme Court of California upholding the right of labor organizations to boycott obnoxious employers and denying an injunction except upon a showing of specific acts of a criminal nature.

In Havana cigar factories men make from $2 a day up in Spanish gold. They work by the piece, and an average day's labor varies from eight to ten hours. A good workman rarely fails to earn $3 a day, and the best can earn $5. The men are allowed to smoke all the cigars they want. They lose their own time in making them, but the leaf is furnished by the factory.

Labor circles of the Northwest are much agitated over reports, which are received with general credence, that hundreds of Japanese contract laborers are being brought into Puget Sound cities. Every month from 500 to 1,000 Japanese are said to be landed at Tacoma, Vancouver and Portland. Practically all pass inspection, the requirements of which are sound body and $30 in cash. It is said that hundreds of these men are finding employment on various railroad lines.

The Legislature of New York has passed two laws which will put an end to the abuses of the sweatshop. One of these acts declares that the making of clothing as an industry shall not be prosecuted in any room or apartment in any tenement or dwelling house, and that the factory inspector shall have supervising power over all places where clothing is manufactured. The other act limits the working hours of women and minors.

Submarine Forests in England.

Some curious submerged forests exist in England. Midway between the estuaries of the River Mersey and the Dee, along the shore west of Leasome, is a long stretch of forest growth, which through the encroachment of the sea is being rapidly washed away. At one time the forest was completely covered by sand, but as the water is gaining very rapidly on the land, the forest becomes more and more exposed to view. Many proofs of a submerged vegetable accumulation, with stumps of trees in the position in which they grew, have been traced round the shores of Devon, Cornwall and Western Somerset. A submarine forest occurring at the mouth of the Parret, in Somersetshire, on the south side of the Bristol Channel, was described by L. Horner in 1815, and its position attributed to subsidence. Charles Harris discovered in 1831 evident traces of a fir wood beneath the level of the sea at Bournemouth, in Hampshire, the formation having been laid open during a low spring tide.

Emperor William as a Robber.

Emperor William never plays cards except for very low stakes. Yet in a game with a Leipzig lawyer, once upon a time, the latter lost twenty marks. He laughingly exclaimed: "I have got into a regular robbers' den." Everybody roared with laughter, the Emperor as heartily as the rest. When his majesty was staying, the following year, at Barby, and noticed the lawyer, he went up to him, handed him a twenty-mark piece set in diamonds, in the form of a scarfpin, and said: "Restored by the robbers."

The Loftiest Inhabited Place.

The loftiest inhabited place in the world is the Buddhist monastery of Haine, in Thibet. It is about 17,000 feet above the sea.

Pneumonia.

A bright chap who has traveled much told me that some years ago he met a man where he had camped, in the mining districts of California, who could make the New York doctors ashamed of the regular practice in a case of pneumonia. Said he: "It stands to reason. The claim of the man is this: Unless some part of the digestive process is clogged pneumonia is impossible, and it is even quite difficult to take cold if the circulation of the fluids of the body is free.

"His method is simplicity itself. In the first place, to start with, he gives a big dose of physic and puts his man into lots of blankets, and then he gathers all the bottles he can find in the camp and fills them with hot water and heats every part of the man but his head. As soon as he thinks the physic is out of his stomach, he makes him sip hot water. Just as soon as he sees a drop of perspiration on his forehead he will say: 'I've got you, old man. Keep the heat going until the pills operate freely, and don't let him take cold.' I have seen bad cases where they would have choked to death in less than an hour out and at work in two or three days. He didn't consider it a question of constitution at all. It was only a question of cleaning the man out and keeping him warm."—New York Times.

Knew Him and Didn't Know Him.

A young couple called at a fashionable boarding house in the west end to engage board. They were from Chicago, and the husband had recently secured an appointment in one of the departments. The landlady, an amiable and pretty, if a trifle faded, little woman, showed the couple the vacant rooms, and one of them was finally accepted.

"Now, you'll want references, of course," said the young wife after the terms had been fixed. Then she mentioned the name of a Washington man of some prominence.

"You know him, or of him, I presume?" she inquired. "He is my husband's uncle."

"Well," replied the landlady, "I cannot precisely say that I know him. Nobody ever really knew him. He's something of a mystery. Now, I was married to him for 12 years, and at the conclusion of that period, when I secured my divorce, I don't think I could have conscientiously placed my hand over my heart and declared that I actually knew him. Some men are so difficult to get acquainted with, you know."

The situation was a bit embarrassing, but the young couple took the room they had decided upon anyhow.—Washington Post.

He Failed to Pass.

General Benjamin F. Butler was one of a commission to examine young applicants for admission to the bar, and before him came a youth who failed miserably on all that pertained to jurisprudence, case law, civil law, sumptuary law, unwritten law and due process of law. Finally Butler, who rather liked the chap and wanted to see him through, asked: "What would you like to be examined in? You have failed in everything we have suggested."

The reply came, "Try me on the statutes; I'm up on them."

Butler shock his head solemnly. "My young friend," he said, "I'm afraid you won't do. You may be ever so familiar with the statutes, but what is to prevent a fool legislature from repealing all you know?"

Kerosene on the Carpet.

If you spill kerosene on the carpet, don't leave it to "evaporate." Cover the place an inch deep with bran or cornmeal and set enough hot irons to cover the spot. Let stand until the irons are cool, then sweep off the meal, and usually there is no trace of the spot. If there is, repeat the operation. Unless the oil is removed the dust settles into it and makes a bad looking place in the carpet.

Financial Advice.

"Here's a man," said the old citizen, "who lost $5,000 in a bank whar he put it fer safe keepin. Bill, don't you ever take no risk like that. Ef ever you gits hold of any money, do like your father before you done—bury it, an spen' the rest of your life settin over it with a shotgun!"—Atlanta Constitution.

Careful estimates show that each year there are interred within the limits of the city of London about 130,000 human bodies.

The effort to make sugar from beets dates back as far as the year 1747.

KIDNEY DISEASE,

Caused by Internal Catarrh Promptly Cured by Pe-ru-na.

Hon. J. H. Caldwell, a prominent member of the Louisiana State Legislature, says the following in regard to Pe-ru-na for catarrh:

Hon. J. H. Caldwell.

"I have used Pe-ru-na for a number of years with the very best results for catarrhal diseases. I shall never be without it. I never fail to recommend it when an opportunity presents itself."—J. H. Caldwell, Robeline, la.

Gilbert Hofer, Grays, Ky., says in a letter dated March 7th, 1994: "I have used four bottles of Pe-ru-na and I am well of my catarrh, and it cured my Bright's disease. I had been troubled for two years. I weigh twenty pounds more than I did before I was taken sick. I shall never be without Pe-ru-na."

Send for free catarrh book. Address Dr. Hartman, Columbus, O.

Nervous People.

Nervous people not only suffer themselves but cause more or less misery to everyone around them. They are fretful, easily worried and therefore a worry to others.

When everything annoys you; when your pulse beats excessively; when you are startled at the least unexpected sound, your nerves are in a bad state and should be promptly attended to.

Nervousness is a question of nutrition. Food for the nerves is what you need to put you right, and the best nerve food in the world is Dr. Williams' Pink Pills for Pale People.

They give strength and tone to every nerve in the body, and make despondent, easily irritated people feel that life has renewed its charms. Here is proof:

Miss Cora Watrous, the sixteen-year-old daught[er] of 66 Clarion St., Bradford, Pa., was seized with [illegible] threatened to end her life. Eminent physicia[ns] from impoverished blood, but failed to give [illegible] Dr. Williams' Pink Pills for Pale People were [illegible] vous disorders, and gave them a trial. Before [illegible] the girl's condition improved. After using six [illegible] the pain "got her down" and she was stron[illegible] daughter's life [illegible] Dr. Williams' Pink [illegible] Mrs. Watrous. "Her condition was almost hop[illegible] taking them, but now she is strong and hea[illegible] these pills too highly."—*Bradford (Pa.) Era.* [illegible] commend

Hercules Gas Engine Works
305 MARKET ST., San Francisco, Cal.

The term "infantry" soldiers originated with the Spanish and was first applied to the military force employed by an infante, or young Prince of Spain, to rescue his father from the Moors.

All the land above the sea level would not fill up more than one-third of the Atlantic ocean.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

Could Apply the Parable.

It is not always safe to talk in parables to the young, as the following school board story shows: A correspondent states that one of his pupils caused him some annoyance by uncouthness of speech, dirty boots, and so on, so, says our correspondent: "I drew a verbal portrait for the class of the man who did not shine in the world of polite society. 'You cannot fail to know him,' said I, 'for he never cleans his boots nor washes before meals. He speaks and drinks when his mouth is full and generally uses his knife in place of his fork.'

"Gradually the lad whom this story was designed to profit showed an awakening interest and put out his hand to speak. In reply to my query, 'Well?' 'I know him,' said he. 'He's our lodger!'"—London Chronicle.

MAY.

The blackbirds follow slow behind the plow,
Or whistle from the maple's swaying bough;
The robin builds her nest among the leaves,
And countless swallows twitter 'neath the eaves.

The plow-boy walks behind his smoking team,
And guides aright the plow's unwieldy beam;
The coal-black furrows rising fall and break,
And lie like billows in his journey's wake.

The woods have flung their banners to the world—
Green flags of leaves to every wind unfurled;
And in the fields, by thicket and by fence,
The rabbits hide in grassy cover dense.

Pertly and saucily the old cock quail
Whistles "Bob White" from off the topmost rail;
And when the evening flutters out her cloak,
From roadside ponds the deep-voiced bullfrogs croak.

And jinglingly along the country lane,
With broken chords of rustic, rude refrain,
As sinks the sun from his high, ruddy dome,
In Indian file the cows come trooping home.
—Woman's Home Companion.

Brown Bess.

"I WISH I could sell Brown Bess," said Susie Ross, rinsing the dishes she had just washed.

"Oh, Susy!" cried her brother.

"What in the world do you want to sell Brown Bess for?" her mother asked, looking up from the dough she was kneading.

"I could go to the academy, mother, for two more terms," was the answer. "Then, perhaps I could—get the school at the Corners."

"Nonsense, Susy. I need you to help me," her mother said. "Keeping school is a thankless business."

"It's money," said Susy, "and I do long to help myself, and you, too. Money will do everything that needs to be done."

"Yes, that's a fact," spoke up Tom, "and there's lots wants to be done. I'd like to clear that five-acre lot for potatoes and corn, but I can't do it."

"And the house wants shingling," her mother said plaintively, her careworn countenance taking on another shadow.

"The front door's got a crack all the way across," Tom spoke up again, "and there ought to be a fireplace in granny's room. Then there's the barn; it's all we can do to keep the hay dry."

"I know all that," said Susy. "I know the house is getting to be a scarecrow, and the barn is worse, and that's why I want to be earning. As for the shingles, I should think you could put them on yourself, Tom; yes, and mend the door."

"Where's the shingles?" Tom asked, in his matter-of-fact way. "Where's the nails? Where's the hammer? The old one is broken past mending. And where's the money to get them with, I should like to know?"

"Sure enough," said Susy," unless I could earn it. That's why I want to sell Brown Bess."

"And if you do sell her, you won't get much," Tom said. "She's so full of her tricks—the craziest colt I ever saw."

"I'm more and more afraid to have you ride her," he mother said. "But if you should sell her, there's the mortgage to be paid in October."

"If I sell her," said Susy, quietly, "it will be to finish my education."

"That's always your cry," her mother went on, in plaintive tones; "no matter what's needed; but I s'pose we must give in. Bad as the roof is, it shelters us. What would we do without a house over our heads?"

"I'd sell the cow, too," put in Tom.

"And then grandma would just about starve," the mother supplemented.

Susy turned away from the table, angry and grieved, but she said nothing, only ran upstairs to her own room.

"They don't see it!" she sorrowfully murmured. "They can't understand that it's for their good and comfort I want to get that school. I'm willing to wear old clothes and to walk three miles and back every day for the sake of finishing my education. Let the roof leak awhile—if Tom don't patch it. Let granny sleep downstairs, where there's a fire. I'll help them all in a year or two—but they don't see it—they won't see it. If I can only sell Brown Bess! I'd go and beg time for the mortgage or I'd borrow money—or, maybe I can get enough to repair the house and go to school, too. If only Brown Bess wasn't such a little vixen! It will go hard to part with her, though; it was my father's last gift."

Tears rushed to the dark eyes, but she repressed them and went downstairs.

After helping her mother about the house she donned her sunbonnet and ran into the barn. Tom was rubbing down Brown Bess, whose bright, glossy coat shone like satin.

"Much as I can do to take care of her," said Tom. "She wants a regular groom who would break her of her nasty little tricks. See how she throws her head up, and look at her eyes flashing fire! Are you going to the store? Mother wants sugar and molasses and vinegar—and I've got to go in the field."

"Yes, I'm going," said Susy, "though I dread it, the bill is so large. If I sell Brown Bess that's the first thing I'll pay."

"That and the mortgage," said Tom. "Well, I'll saddle old Dick."

Susy mounted to the back of the slow old cart horse with gloomy forebodings. It was a warm September day. Even in the midst of her anxiety the beauty of the ride to Hillston soothed and delighted her. Every detail of the way was familiar to her, yet when she came to Silver Ledge Falls and saw the white spray leaping over granite rocks and dancing among tiny islands, she stopped old Dick and sat enjoying the scene as if she had never beheld it before.

"Good morning," a voice said behind her.

"Oh, Charlie!" she exclaimed, with a start, "I didn't hear you coming."

"No? The falls are so loud. I saw you at the bend and followed. Going to town?"

"Yes, Charlie," she made reply, and in spite of herself her voice held a curious tremor.

"You're worried over something," he said, the keen lover's eyes noting the shadows.

"Yes, Charlie, a little—the same old trouble. I want to set things to rights—and—it's hard work," she said, in a low voice.

"I knew it. Why won't you leave all these matters and come with me? The house is waiting for you—and so am I. Susy, darling, make up your mind."

He held out his hand, a look of unutterable love making his rugged face beautiful.

"If father had only lived," she said. "But you know it is impossible now, Charlie. I can't leave mother—not yet—and I must finish the course at the B—— Academy, and keep school at least a year before I get things straightened out."

He gave a long, low whistle, then urged on his horse, but stopped again till Susy came up with him.

"You know I'll wait for you, Susy, as long as you say, but it's rather hard on me, as I'm forehanded and ready to marry. Susy, come, make up your mind. My house is a large one. I'll take your mother and granny. Tom can run the old farm, and——"

"What! Let you support me and the family too? Never!" and her eyes flashed. "I would never permit it."

"Well, Susy, I've declared my willingness to help you, if only you would let me," said Charlie, "but since you won't, don't look so sad and worried, my darling. It's worth serving and saving for seven years if I can only win you at last for my wife."

"Oh, Charlie!" she said, brokenly, "your love is priceless. Only be patient."

"I'll try, and keep on hoping," he said, and they parted at the store.

The grocer met her with a smile. Everybody liked Susy. No girl more genial than she under ordinary circumstances, but to-day her face was clouded, her manner pre-occupied.

"Mr. Lee, I have made up my mind to sell Brown Bess," she said, after getting the things she needed. "Do you know anybody that wants a horse?"

"Dear me! Going to sell Brown Bess! Well, I was thinking of buying a young horse for my Alice. Is she safe for a girl of 10, do you think?" the grocer asked.

Susy grew pale. She had not anticipated a question of that sort, but she answered after a moment's indecision.

"She is fond of taking her own head sometimes. No, Mr. Lee, if I find it hard to manage her, she would never do for your little girl."

"Ah, I'm sorry for that, Miss Susy," said the storekeeper. "But I know a man who wants a spirited horse. What would you sell her for?"

"I leave that to the purchaser," Susy made answer. "Papa paid $75 for her more than a year ago, and I wouldn't want to take less than that, for I need the money very much," she went on, "and if you will be so kind as to take an interest in the matter——" She stopped, her eyes wistful.

"Why, of course I will," the grocer responded. "I'll send my boy to your house with the groceries, and he can bring the horse back with him. If anything is done in the way of a sale I'll let you know at once."

Susy thanked him and went on her way home. As she came in sight of the house, an old-fashioned, two-story building, where dilapidation was rendered picturesque by a profuse growth of ivy that covered the front porch and much of the exterior walls, she felt more comfortable as she thought over her prospects. In imagination she had her mother quite reconciled to all her plans, her school life assured and all things going on swimmingly. For who knew but Brown Bess might bring her $100, she was so spirited and handsome?

Work and home seemed brighter. The grocer's boy came for the horse, and though it was hard parting with the pretty creature, Susy, in expectation of results, bore the separation bravely.

"Can't we take a little of the money you get to shingle the roof?" her mother asked as the horse was led away.

"I hope so," Susy replied blithely.

"And you still think of going to school? Ain't you too old?"

"I'm not 18 yet," was Susy's answer. "Many girls go to school till they are 20."

"And there's clothes, to think of, dresses and bonnets and shoes."

"Oh, they'll be provided," Susy said, with a little laugh.

"An' winter's comin'—an' it's two or three miles to the 'cademy," her mother went on, each time throwing a more plaintive cadence into her voice. "Tom's clothes are terrible patched, an' mother needs flannels. I ain't so young as I was once, but I ain't sayin' anything about myself, on'y it's kind o' hard to spare you," and the lines in her mother's weak face deepened.

"Mother, I wish you could see it as I do. I must go to the academy," Susy made reply. "It's the opportunity of my life. But I tell you what I will do. If I get a hundred dollars for Brown Bess I'll divide even. Fifty dollars would go a long way, wouldn't it?"

"Well, yes, fifty dollars would get everything we need," was the reply. "But you're never goin' to get a hundred dollars. You'll be more than lucky if you git fifty."

"Well, mother," said Susy, desperately, "if I only get fifty, I'll divide even. It will be thirty dollars coming in every month if I only get the school."

"I don't see's there's any chance of that," said her mother, with a woe-begone face.

Day after day Susy waited, but no word came about Brown Bess. Tom declared that he believed there was no prospect of selling her, but one day Charlie Grant drove up to the house, his face fairly beaming.

"I thought I'd bring you the news," he said, as he came in the bright living room.

"Have they sold Brown Bess?" Susy asked, her voice trembling in her excitement to hear.

"Well, yes—that is, if you'll take the price they offer," Charlie made answer.

"Oh, I hope it's a hundred," said Susy.

"A hundred!" laughed Charlie. "Is that what you valued her at? Lucky for you that I was in at the bargain. That horse will be worth thousands of dollars before long. The man who bought her trains horses for the race course. He has discovered remarkable qualities in Brown Bess as a trotter, and is willing to give you a thousand dollars for her."

A thousand dollars! Susy stood for a moment like a statue; then she flew into the kitchen, where her mother was making the daily batch of bread, exclaiming:

"A thousand dollars, mother! we're rich! Brown Bess is sold for a thousand dollars! You won't have to work hard this winter. Tom can get two suits of clothes if he wants them, and buy the five-acre lot. Grandma can have all the fire she needs; the roof shall be shingled, the mortgage paid off and—and——"

"What am I to have?" Charlie asked, as she stopped, out of breath, he having followed her into the kitchen.

She turned round, and, blushing beautifully, held out her hands. He clasped them both and drew her to his bosom.

"What do you think of this, mother?" he asked of the glad-hearted woman at the bread pan. "Susy is to be my wife."

"Why, I think it's a good deal better than keeping school," she said.—Waverley.

QUEER STORIES

Some of the stars move with a velocity of fifty miles a second.

The smallest perfect watch ever made is owned by a Russian princess. It was first placed in an exquisite gold case, covered with the most minute but literally perfect Watteau scenes in enamel; then at the princess' desire the works were removed and placed inside a splendid diamond, scarcely two-fifths of an inch in diameter.

After a long and patient struggle the women physicians in Russia have secured a decree placing them upon an equality, both socially and politically, with the male physicians in the empire. All official positions will be open to them equally with men, and they will be entitled to pensions after the required length of service, and this whether or not they are married.

Paris journals declare that dolls are going out of vogue, and one philosophical writer explains why. In the good old times, he says, dolls were sold undressed, and it was the pleasant task of the little girls to make dresses for them. Now they are bought dressed in the latest style, and the children, after playing with them a short time, throw them aside.

The Pacific covers 68,000,000 miles, the Atlantic 30,000,000, and the Indian Ocean, Arctic and Antarctic 42,000,000. To stow away the contents of the Pacific it would be necessary to fill a tank one mile long, one mile wide and one mile deep every day for 440 years. Put in figures, the Pacific holds in weight 948,000,000,000,000,000,000 tons. The Atlantic averages a depth of not quite three miles. Its waters weigh 325,000,000,000,000,000 tons, and a tank to contain it would have each of its sides 430 miles long. The figures of the other oceans are in the same startling proportions. It would take all the sea water in the world 2,000,000 years to flow over Niagara. A tank to hold it all would have to measure nearly 1,000 miles along each of its sides.

Time, Two Minutes.

"Miss Daisy, you are writing to that little brother of yours who is visiting out West, aren't you?"

"Yes. He's a dear little fellow. I miss him so much."

"He is, indeed. Have you sealed the letter yet, Miss Daisy?"

"Not yet."

"Add a postscript, if you please, and tell him I want to know how he would like me for a big brother."

(Demurely) "Mr. Spoonamore, it will be at least two weeks before you get an answer—if you ask him."

(And the matter was settled in about two minutes.)—Chicago Tribune.

A Community of Long-Lived People.

While Frenchtown, N. J., has a population of but 1,050, there are in that number fourteen persons whose ages aggregate 1,185 years—an average of nearly 85 years. Seven of these aged people are men and seven are women. Their ages range from 80 to 96 years. If there is any little town that can beat that for longevity we would like to know it.

Is McKinley's Double.

Maj. O. L. Pruden, assistant secretary to the President, bears a striking resemblance to Mr. McKinley, a likeness heightened by the high hat and Prince Albert coat he always wears. Consequently the professional guides of the capital frequently point him out as the chief executive.

The Most Extensive Cemetery.

The most extensive cemetery in the world is that at Rome, in which over 6,000,000 human beings have been interred.

HATS OF MANY KINDS.

ALMOST ENDLESS VARIETY APPROVED BY FASHION.

The Prevailing Mode Is Not of Any Distinct Order to the Exclusion of Others—Shapes, Colors and Trimmings Are Legion—Hair Dressing.

New York correspondence:

MANY women are of many minds, to judge by the millinery that is put forward for summer. Variety as to colors, shapes and trimmings is usual at this and other seasons, but ordinarily there are certain tendencies that may be classed as characteristic of the new millinery. At present one looks in vain for the characteristics that are striking, generally existing and of this day alone. The observation that applies most generally is that women are growing their flower gardens on their heads, but that is not an unusual feature of headgear at this time of year. More out of the ordinary is the fact that no one sort of blossom is raised to the partial exclusion of others. Among the flowers that top the most stylish millinery are big roses, wonderful violet and lilac colored orchids, pansies, violets and a lot of other flowers named and unnamed. The stylish dresser likes a great rose, the sort that might satisfy a modest June if not another bloomed—that is, June in the milliner's window. Thank goodness! outdoor June has different notions. Most flowers in the hat garden are exaggerated and artificial affairs, and that is where the style comes in, so milliners say. There are some women, however, who do not give over entirely to artificiality, and there are a few hats trimmed with adorable bunches of wild roses, with foliage, or dainty yellow primroses, as natural as if the dew were on them.

In shapes there is none more abundant than the boat sort. It has a way of inducing a face to look oval in the chin curve even when nothing else will do so, and the oval face is the fashion now. The prow of the boat is narrow, rounded and comes down between the eyebrows well tucked forward. It is trimmed as a boat should be, fore and aft, and often has a veil tied about the brim. Though these shapes are plentiful, they don't exclude many other sorts. The wide effect, for instance, is as becoming and as fashionable as ever. Hats are made setting squarely, well down on the forehead, and are trimmed in spreading Dutch fashion. Hats of twisted fibre and straw lace lend themselves to this arrangement, and plumes with quill ends crossed under a knot at the forehead spread to the sides, or else are replaced by a wide bow or some fancy quills. As to quills, it is a wonder what a lot of different kinds the season shows.

Another sort that is well represented is the brimless hat, which has been called turban, toque and lots of other names. It is always pretty, and at the season when it is nice to have a hat that shall be a change from the winter headwear, and that yet must not be too pronounced in style or shape, it is a happy choice. Not all are made with the wide effect, and many have high side trimming. Some are all around affairs, setting well down at the sides and back of the head and showing some of the hair at the forehead, either a suggestion of fringe or the down-pushed curves of the pompadour. For trimming these there is used what may be considered a result of the Audubon Society's campaign; that is, artificial wings made of fanned taffeta that is chenilled in clever imitation of bird making. Now that a well-known opera singer has asked women not to wear birds or even feathers on their hats, fashionables may feel as if they ought to deny themselves. Taffeta and chenille go a long way toward making this self-denial bearable. Some turbans are made of twisted veiling, others of the much-favored closely folded tulle in all colors and combinations.

There is no hat that lends itself to all the different styles of hair dressing as does the toque. One may wear it pushed down over a bare forehead, it may show a trace of a bang or it may set high over a triumphant pompadour. If the last is a woman's preference, she is allowed to mount as high on top of the pompadour as she likes, and in silhouette the effect is sometimes startling. Some brimmed hats, the brim turned close to the sides of the crown, are trimmed in toque fashion with good results. All sorts of fancy straws are used, and in all colors; often a saucy pompon is set on the outside of the upturned brim close to the hair, the rest of the trimming being on the top of the crown at the side. Veils are not worn with these close hats, or at least they should not be so worn.

There is current another sort of close hat that is a little newer than any of these. It is no more than a bunch of flowers caught with a bow of ribbon. The ends of the bow pass around the sides of the head, and tie in a big fancy bow at side or back. The bunch of flowers sits at the front of the head just over the pompadour, the softly knotted hair supports the bow at the back and the hair shows on the top of the head. Of course there is a little foundation in the way of a hat, but the general effect is as described and is very dainty and airy.

It is noticeable that the hair is either done high or half way down the head for almost all the new hats, though when the hat is to be well tipped on the forehead the knot is made rather long, but does not come down to the nape of the neck. This looks as if women were still warding off the chignon. The up-drawn back locks are often puffed out softly to fill out the contour of the head when the hat chosen is one whose greatest dimension is its length. Many hats of this kind are no more than soft masses of flowers—forget-me-nots or violets—with a twist or so of ribbon, velvet or straw lace showing. Tulle is much employed for this style of hat and is self-trimmed, folds lying softly and smoothly about the head. Great pompons of the tulle are set at the sides and front and sometimes a long stemmed quill is thrust through a bunch of these pompons as if to hold them in place. Black tulle is the rage for this sort of hat, but white is much used, and a few hats are shown in brilliant green, bright blue and in brown. The black is much the best, speaking generally. These hats, however, are hardly as good an investment as they were six weeks ago. Then they seemed especially fine with their yards and yards of pleated tulle so laid loose in turban-like fashion that they had much bulk and almost no detail. They were most attractive then because they were finely suited for immediate use. They will do service in summer, too; surely they will have to do so since so many of them are now being worn. Yet it is not a rash hazard to guess that moneyed women will turn to something distinctly different for midsummer. Then the women with tulle tops will be out of it. And the woman who cannot follow their lead and purchase a new hat in July or August will, perhaps, be wiser if she avoids tulle now.

When one is looking at close hats it seems as if they must be favorites, but on looking a little further much is found to draw one from this belief. For one thing, there is a large number and great variety of hats that are odd yet attractive. A few representatives of this class are put in to-day's second group, and for young women, especially those of strong features or piquant expression, they make admirable headwear. But what will more generally distract from the close hats is the array of picture headgear. The brimmed hats certainly make a fine showing, and though most of them are for the garden hat period, they are already on view. The trimmed sailor, too, is a whole class by itself. When trimmed with row on row of gauzy scarfing, and finished off with an audacious quill—how do birds grow them so long!—they are very pretty. An exaggeration of the Spanish brim hat is out that looks very trig with its boxy effect.

Shortly curved and fluted brims are weighted with bows, plumes and flowers. These brims are uplifted at the back, as a rule, and some of them show the hair all around the forehead, the crown size being tiny and the hat fitted to the head by rosettes and bunches of flowers set against the hair at sides and back. One of the latest shapes is a revival of the side-tilted brim and is pretty. The under side of the brim is almost always overlaid with straw lace, a band of straw of contrasting color making a border. It is useless to try to say much about color, because all colors are shown. Violet holds its own, though already far from exclusive. There is a tendency among exquisites to have the hat in distinct harmony with the color of the gown, rather than in deliberate or startling contrast.

Since women's fancy turned to thoughts of spring hats, her ideas as to hairdressing have been dominated by a desire for picturesqueness. The bang that threatened does not appear, and the stiff, high, conventional pompadour becomes more loose and graceful. The knot of hair appears still like a modestly submerged biscuit surrounded by billows or pompadour, and beautiful combs are still much worn. The woman with a gleaming central part, with glossy, smooth locks, and the front hair drawn in a slight loop down at the ears is attracting attention, too. The style is severe and unbecoming to any but a delicate and regular face, but it seems a relief from fluffs. Its sleekness sets off a fine skin and handsome eyes, and the style displays the color and quality of the hair to great advantage. As was hinted in the foregoing, there are indications that the chignon may not be altogether avoided. If women take to looping their overdresses, it will likely come right into fashion, and then won't they be sights?

CHOSEN FROM THE ODDITIES OF HEADWEAR.

FIVE BRIMLESS HATS AND ONE SIDE-TIPPED MODEL.

Telegraphic Blunders.

He was receiving a dispatch from Albany, in which the sender was not overcareful in the matter of spacing his letters. Lawton took the address as follows: "Dr. A. Wing, room car agent, Central Depot, New York."

The dispatch came back with the marginal report that there was no such person at the address named. The operator at Albany was called up and explanations followed, in consequence of which the address was changed to "Drawing-room car agent, Central Depot."

A still more absurd mistake was once made in the same office, when a telegram was received for "James W. Giles, pie clerk, Brooklyn nasty yard." This was afterward amended to read: "James W. Gillespie, clerk, Brooklyn navy yard."—Pittsburg Dispatch.

Hindoo First Steps in English.

A native has been caught at Calcutta scaling the wall of the premises into the compound of No. 3 Chowringhi, dressed in a complete suit of European clothes. The man had, on the previous evening, concealed himself inside a shop, and had employed his time till morning in fitting himself with a complete suit of clothes, including a white shirt, with studs and links, and a red tie, carefully put on, black socks, a pair of boots, a watch and chain, handkerchief, and even a pocket-knife, with a straw hat and stick. He even went the length of writing his name inside the hat. On being caught he said that he wanted to learn English, and as a preliminary step thought it best to dress himself in sahib's clothes.—Bombay Advocate of India.

Cure of Typhoid Fever.

An eminent physician states that typhoid fever can be washed out of the system by water. He gives his patients what would amount to eight or ten ounces an hour of sterilized water. In case of cholera, where the system secretes a large amount of fluid, enormous quantities of hot water are of great benefit.

English wedding cakes are now imported by fashionable brides.

SHEAR NONSENSE

"I would send you a kiss, papa," wrote little Lucy, who was away on a visit, "but I have been eating onions."

As the course of true love never runs smooth, it is supposed that there will always be plenty of friction matches in the world.

"Porter, can I take this train on to Liverpool?" "Well, you can hev a try, miss; but in gen'ral we uses the injjun."—Ally Sloper.

She—I hope you can come next Thursday. We're having some music, and a supper after. He—Oh, yes, I'll come; but—er—I may be late!

"Why is this called Lent? I see Tommy Tucker has raised his hand. Why is it, Tommy?" "'Cause it's too hard to keep."—Chicago Tribune.

The Idler—What became of that cattle car you invented? The Inventor—I couldn't get the railroads to take any stock in it.—Cincinnati Enquirer.

"Papa," said Benny Bloobumper, "why are days of grace allowed on a note?" "To avoid weeks of disgrace," replied Mr. Bloobumper.—Judge.

George—Do you think that your father will consent to our marriage, darling? Ethel—Oh, yes! He has always humored my silliest wishes.—Brooklyn Life.

Mistress—Mary, how was it I saw you treating your friends to my cake and fruit? Mary—I can't tell, ma'am, for the loife of me, for I'm shure I covered the keyhole!

"Jane, did you break the china plate?" "Yes'm. You got fooled on that plate, mum. It's a weak un. It broke the fourth time I dropped it."—Cleveland Plain Dealer.

"How do you do, Miss Leslie? So awfully glad to see you again. So very sorry you weren't at Lady Brown's dance last night. There positively was not one pretty girl in the room." "I am not Miss Leslie. But I was at Brown's dance last night."

Professor—Mr. Oar, the problem in subtraction. Seven down to the river to bathe—them had been told not water. Now, can you many went in? Oar—Michigan University w.

"Billy, you have no classical education now married." "Well—you'll use my college yell on the night." "On your baby? How does that do?" "Why, lots of g. makes him scream for his mother mad."—Detroit Free Press.

Anxious Mamma—Yes, Mr. Lakes the fact is I have three daughters w ought to be settled in life. Is this Western friend of yours a marrying m Mr. Lakeside, of Chicago—Not to great extent, mum. I'm afraid wouldn't want to take more than one of 'em.—New York Weekly.

"It's too bad," said a discouraged-looking Spanish soldier, "that we didn't get those mules that were to be shipped to us." "What difference does that make?" "I'd kind of like to go into battle on a mule. They say a mule is about as likely to go backward as he is to go forward."—Washington Star.

No Escape.—Mrs. Chinner—Ernestine, my darling, do you expect Constant to-night? Ernestine—Of course, mamma. Why do you inquire? Mrs. Chinner—If he asks you to marry him tell him to come and speak to me. Ernestine—And if he doesn't ask me—— Mrs. Chinner—Tell him I am coming to speak to him.—Brooklyn Life.

Doctor—Your husband must have complete rest. Wife—I know it. I talk to him seven or eight hours every day so as to keep his mind off of business. Doctor—On second thought, madam, I conclude that the one chance for your husband is to take him to the hospital, with instructions that no one but the trained nurse and myself be admitted.—Detroit Free Press.

"Now, Bobbie," said the teacher, "spell pipe." "P-i-p-e," said Bobbie. Teacher—That's right. Now, tell me something about pipes. What do people do with them? "Well," said Bobbie, "some boys blow bubbles with them; plumbers put them in; Scotchmen blow music out of them; the Germans make them; and my father smokes them, and I break them. It all depends on the kind of pipes you want me to tell you about," replied Bobbie.

Officer (to new servant)—Murphy, I have left my mess-boots out this morning. I want them soled. Private Murphy—Very good, sor. Officer (later in the day)—Did you take those boots, Murphy? Private Murphy (feeling in his pocket and putting on the table eighteen-pence)—Yes, sor; and that's I could get for them. The corporal bought them said he would have g two shillings had it been pay-day. (lapse of officer.)—Tit-Bits.

"By the way," said the lady, "do you know that there are times when it is dangerous to enter an Episcopal Church?" "What is that, madam?" said the bishop, with great dignity, straightening himself up in his chair. "I say there are times when it is positively dangerous to enter the church," she replied. "That cannot be," said the bishop; "pray explain, madam." "Why," said she, "it is when there is a canon in the reading-desk, a big gun in the pulpit, when the bishop is charging his clergy, the choir is murdering the anthem, and the organist is trying to drown the choir."—Youth's Companion.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JUNE 30..... 1899

The news from the Transvaal is very disquieting. The representative of the British government is reported to have sent word from the Cape Colony that immediate intervention by Great Britain is essential if the English nation is not to stultify itself concerning its boast that it always protects its subjects. He alleges that the rights of Britons in the Boer territory have been grossly trampled upon, and that personal outrages have been committed for which the local Government affords no redress. He charges that the condition of British subjects in the Transvaal is that of helots and that it is simply intolerable that England should any longer permit the condition to continue. The dispatch conveying this information is also to the effect that the greater London papers have notified their war correspondents to be prepared for departure for South Africa at a moment's notice. All in all, if the news is verity, the probability of war breaking out is imminent, despite President Krueger's recent declaration that his government is prepared to make concessions and to avoid war, even at the sacrifice of what they consider to be inalienable rights. The world will divide in opinion as to the justifiability of a war between the great and powerful English nation and the single weak South African State. On this side the water it is probable that the greatest measure of sympathy of our people will go out to the Boers on the ground that Uitlanders can leave the country if dissatisfied with local conditions. In Europe the larger measure of sympathy will be with England on the ground that it is the duty of a great nation to protect its people abroad when they go into foreign parts under laws admitting them freely. Even in our own land there will be marked division of sentiment. It is felt here by many thoughtful people that the Boers are too harsh and exacting in their local regulations, and that if they desired emigrants to remain without their State they should have prevented their entry in the first instance, except under express agreements to abide by Boer laws. On the other hand it will be held by many people that the foreigners came in with full notice of the local regulations and should abide the consequences. Certain it is that if war ensues the Boers will be defeated but not until they have made long and gallant resistance. When they are [illegible]ed the Boer State, as such, will [illegible]ly disappear, and the height of [illegible] ambition will be that much near[illegible]ation, namely, to dominate the [illegible]h African region.

[illegible]r Rogers of Washington has [illegible]ly declined to attend the con[illegible] Governors called by the Gov[illegible] Texas, giving as his reason that [illegible]eves there is no constitutional [illegible] on the part of Legislatures to interfere with buying and selling either by corporations or individuals. Hence, he says all attempted legislation must be ineffective; and he sees "no remedy for the trust evil but public ownership." This, if wholly true, would be a melancholy conclusion. There cannot be public ownership of the thousand and one industries which trusts control, or are seeking to control. That would be for government to undertake to carry on all the business of the country. The situation is not so helpless as Governor Rogers makes it appear. Assuming for the sake of argument that legislation designed to interfere with the business of buying and selling commodities will not stand the test of constitutional law, there remains the power of the State to regulate taxation. Through this power, if wisely used, the trusts may be suppressed. Just as it is practicable to have a graduated income tax, or a graduated tax on land, so it should be to establish a system of taxation or licensing of manufacturing or commercial corporations which would increase the burdens in proportion to the magnitude of the business. In this way the great combinations of capital would be discouraged. It is also practicable for each State to impose conditions and restrictions on the operations of corporations organized under the laws of other States. Most of the trusts are organized under the laws of New Jersey, a State which is very subservient to corporations. While no State could discriminate against New Jersey all States could enact laws which would operate uniformly against corporations organized outside of their limits to carry on a trust business. It should not be beyond the capabilities of legislative ingenuity to cope with the existing difficulties and to accomplish the result sought. But if so the sooner the fact is known the better for the people in order that the needed constitutional amendments may be had.

A series of trials of methods of storing apples was conducted in Canada during the season of 1896-7, beginning in the fall and continuing until the last of July. The tests, made by government experts, included twenty-four varieties of apples and were planned to test the following points: Wrapped versus unwrapped fruit; cellar versus ground floor storage, and close vs. ventilated packages. Specimens wrapped in paper kept best; there were fewer rotten apples and they lost least by evaporation. The ground floor storeroom did not preserve them so well as the cellar. The tight package preserved the fruit best in storeroom but not in cellar; per contra the ventilated did better in cellar than in storeroom.

The outlook for the world's wheat crop this year is not very good. The Russian crop is largely a failure. A late British commercial estimate is that the world's crop of 1899 will be from 8 to 10 per cent below that of last year—a decline of at least a quarter of a billion bushels.

She Didn't Like the Job.

"I used to work for a collection agency in one of the northern cities," said a lady perfumery drummer, "and my experience was tolerably exciting. My duty was to sit at a roll top desk in the office and impersonate the proprietor. Light work, did you say? Just you wait. All day long men would come in red eyed to lick the boss. 'Where's the fellow that sends out these blackmailing letters?' was the usual salutation. Then I would smile sweetly and say: 'I'm the proprietress. What can I do for you?' At that the visitor would look dazed, mutter things under his breath and walk off.

"Well, things went along all right for nearly a month. Then one day a little, wiry chap walked in carrying a black cane. 'Where's the boss?' he said. I gave the usual fairy story. 'Don't believe a word of it,' he replied, 'still I can't beat a woman.' He thought awhile, and something in his eye made me feel creepy. 'I'll have to take it out on the fixtures,' he said finally, and, upon my word, he broke every blessed thing in the shop. He did it quickly and systematically, and you never saw such an awful ruin! As a wind up he broke the chandelier and bade me a polite good day. When the proprietor came in, he had a fit. It was after that I went into the perfumery business. The work is harder, but it is much less trying on one's nerves."—New Orleans Times-Democrat.

Men Who Live In Nests.

In the bushmen of Australia we find, perhaps, the lowest order of men that are known. They are so primitive that they do not know enough to build even the simplest forms of huts for shelter.

The nearest they could approach to it is to gather a lot of twigs and grass, and, taking them into a thicket or jungle, they build a nest for a home, much as does a bird. The nest is usually built large enough for the family, and if the latter be very numerous then the nests are of a very large size.

Into this place they all turn and snuggle and curl up together like so many kittens. Sometimes the foliage will grow together and for a sort of natural covering, but there is never any attempt at constructing a protection from the rain and storms, and it is a marvel how they endure them.

But, though the bushmen of Australia are the very lowest in the scale of ignorance, they possess a rare instinct, that equals that of many animals and is in its way as wonderful as man's reason. It is almost impossible for them to be lost. Even if they be led away from their home, blindfolded, for miles, when released they will unerringly turn in the right direction and make their way to their nest home, and, though these are all very similar, they never make a mistake.—St. Louis Globe-Democrat.

Saved by a Laugh.

A professional nurse at Leeds, England, was remarkably successful in the care of patients suffering from smallpox, diphtheria or pneumonia. In fact, she had never lost a patient with one of these complaints. Not long ago, however, she had a pneumonia case which was given up by the physician, much to the nurse's chagrin.

"He can't live through the night," said the doctor.

Sure enough, when the nurse went to give the sick man his medicine, he only shook his head. The distracted nurse saw her proud record about to be broken and she urged the patient to take his dose.

"No use," he murmured.

"Well, sir," said the nurse in despair, "you've got to take it! And if you die I'll kill you!"

Whereupon the patient began to laugh, took his medicine and got well.

Touch In Telegraphy.

Roland Belfort, who has been interested in some of our articles on wireless telegraphy, writes:

"Having worked most of the Atlantic and eastern cables, I can testify to the ease with which an operator recognizes his distant colleagues by their touch.

"Often I have heard the exclamation, 'There's that confounded X come on!' immediately X transmitted his first signal.

"Some operators' signaling is so weak and shadowy that the work of deciphering the signals is quite doubled.

"It is also easy to tell whether an operator has been in convivial society previous to taking duty. By the signaling a cablist can tell whether his correspondent is tired, angry, depressed, merry or moody."—London Mail.

How Sea Lions Capture Gulls.

In capturing gulls the sea lion displays no little skill and cunning. When in pursuit of a gull, it dives deeply under water and swims some distance from where it disappeared; then, rising cautiously, it exposes the tip of its nose along the surface, at the same time giving it a rotary motion. The unwary bird on the wing, seeing the object near by, alights to catch it, while the sea lion at the same moment settles beneath the waves, and at one bound with extended jaws seizes its screaming prey and instantly devours it.—Scientific American.

The Printer's Joke.

The Arkansas City Traveler says that when the printer who was working on a farm was told by the farmer's wife to set a hen he replied, "Leaded or solid?"

Which reminds us of Uncle John Speer's story of the printer in his office who was setting up a story and had a knight say, "Begone, base brevier!" afterward explaining to the indignant author that there was no minion in the office.—Kansas City Journal.

More Diplomacy.

"I tell you my wife knows a thing or two. The people who inhabit the neighborhood into which we have just moved look at us with awe."

"How did she manage it?"

"Engaged two of the biggest vans in town to move us, when all our goods might have been transported in an express wagon without overloading it."—Chicago News.

Hint From an Expert.

"Billy, which would you get—a new suit or a new wheel?"

"Well, if you wear good clothes maybe you can get trusted for a wheel, but having a new wheel won't help you out any on clothes."—Chicago Record.

Good Stories of a Bishop.

Many anecdotes were told of Bishop Williams of Connecticut, after his death, for the good bishop was as well known for his love of fun as for his earnest piety.

At a meeting of the bishops a measure was proposed and explained by its orginator, but with such incoherence that nobody understood it. A second speaker essayed to make the matter clear, but only darkened it. When he had finished Bishop Benjamin Smith of Kentucky tried to explain the question and also the explanations. Feeling that he had failed, he said:

"Bishop Williams smiles. What has he to say about it?"

"Only this," said the old bishop, "that 'the mess of Benjamin was found to be greater than the mess of any of his brethren.'"

"The humor of Dr. Williams," says a friend, "was always present and ready like the flash of sunlight. It had one peculiarity, it never scorched nor left a scar behind."

At an assemblage of noted men, a lawyer who conducts the legal business of a great railway system tried to "guy the parson" by malicious quizzing. At last he said: "Why don't you get these railway managers to give you a pass over their roads, bishop? You can pay for it by giving them entrance tickets into heaven."

"Oh, no!" gently replied the bishop. "I would not part them so far from their counsel in the other world."

The laugh was general, and the lawyer concluded to "let the parson alone."—Youth's Companion.

The Shape of an Anæsthetic.

It is a Bath physician who tells the following:

"Some time ago I happened to spend the night in a country town not far from Bath, and it happened that there was stopping at the same hotel an itinerant eye specialist.

"We drifted into a conversation, and during the course of the evening he told me of some of the marvelous operations he had performed on the eye. One case in particular he spoke of that caused me considerable astonishment, for I didn't know, I confess, that the operation had been successfully performed. He said he had recently taken out a patient's eye, scraped the back of it and returned it to its proper place. The patient, he said, was never troubled by bad eyesight afterward.

"That was a difficult operation, doctor," said I.

"Yes," said he, "it was."

"I suppose you found it necessary to employ an anæsthetic?"

"Yes, I did," he admitted.

"What anæsthetic did you use, doctor?" I persisted.

"Oh, well, unless you are familiar with such operations, you probably wouldn't understand if I were to tell you. But—well, it was shaped something like a spoon," explained the eminent specialist.—Lewiston Journal.

Unsuspected Energy.

"Law me, but I'm jes' plum beat out frum runnin 'cross lots, but then I seed Mis' Green headin this way, an so I jes' sez, 'Marthy Potts, don't you give thet miserable ole gossip ther satisfaction uv tellin Mis' Brown ther news fust,' an dropped my bakin an rushed right over here. You remember that lopsided, snag toothed Hiram Medders, what went to ther city las' month, or ruther he had to go, fer he wus so ornery an shiftless nobody in town would put up with him? Well, what do you think! He hadn't been in ther city a week before he got in ther way uv a street car, gittin both legs broke an gen'rally jarred up, an doggoned if he didn't have seven thousan dollars given him fer it! Jes' think! Made seven thousan dollars an him only in ther city a week! Laws a massy! An we said he'd never amount to anythin!"—San Francisco Examiner.

A Tailor's Advertisement, 1734.

"This is to give Notice to all Gentlemen and others, That they may have good Druggets, Sagathie, and Duroy Suits made well and fashionable, for the first size Men at £3 10s. a suit, and the larger size at 4£. Cloth Serge, commonly called by the Name of German Serge, suits for £4 and £4 10s. Livery suits for £4 and £4 10s. Colored and black Cloth suits for £5 and £5 10s. At the Two Golden Balls in great Hart-street, the upper end of Bow street, Covent-Garden. Also Horsemen's great Coats to be sold ready made at 20s. each, Morning Gowns, Callimanco, both sides, at 30s. a piece, blue Cloak-bags ready made at 16s. each, blue Rocklers ready made. Superfine black Cloth at 15s. per Yard."—Fog's Journal, 1734.

A Smart Boy.

A good story is told of the crown prince of Germany. Soon after Bismarck's retirement the emperor and empress were at dinner with their elder children and some eminent statesmen when the prince suddenly broke out with:

"They say, father, that now Prince Bismarck has gone you will be able to tell the people to do just what you like all by yourself. You will enjoy that, won't you?"

Elephants' Teeth.

Elephants have only eight teeth—two above and two below on each side. All elephants' "baby teeth" fall out when the animal is about 14 years old, and a new set grows.

Cheering Him Up.

"It very seldom happens," said Mr. Stormington Barnes, "that we are permitted to adopt the career for which we are ambitious in youth. I always wanted to be a comedian and make people laugh."

"Dear me," said the sympathetic young girl. "You ought not to be so disappointed, I'm sure. You make people laugh very often as it is."—Washington Star.

The Sermon Not Long.

"Was my sermon long this morning?" asked a preacher who had been taken to task for running over time, and who had carefully kept within a half hour.

"No, dear doctor," was the reply of the parishioner. "It wasn't long; it only seemed so."—Boston Watchman.

At the pretty village of Holylake, a suburb of Liverpool, there are golf links which are famous as being the oldest and among the best in England, the game being brought there by the Scotch.

OFFICIAL.

Treasurer's Report.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of Section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty three cents each, your interests in said claim will become the property of the subscriber under said Section 2324 of the Revised Statutes of the United States, and under Section One of an Act entitled "An Act relating to the working, rights of way, easements and drainage of mines in the State of California," approved March 31st, 1851.

FRANK HARRIS.

Dated January 13, 1899.

Notice of Forfeiture.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, state of California, called and recorded in the mining records of said county, as the "Fiesta Mine," as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United states, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under Section One of an Act entitled "An Act relating to the working, rights of way, easements and drainage of mines in the State of California, approved March 31st 1851.

LEGAL.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Jedediah S. Collins, deceased.

A. C. Collins, the administrator of the estate of Jedediah S. Collins, deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said decedent, for the purposes therein set forth,

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated June 12th, 1899.
P. H. MACK, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, Plaintiff,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, state of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorneys for Plaintiff.

The People of the state of California send Greetings to Rose Fitzgerald, Defendant

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, state of California, within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 26th day of April, A. D. 1899.

D. J. HESSION,
[SEAL] Clerk.
By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates, Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this Fourth day of May, A. D. 1899.

D. J. HESSION,
[SEAL] Clerk.
P. H. Mack Independence Cal. Attorney for plaintiff.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

Methodist Church.

Services for Sunday, June 25th, 1899.

Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m. The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

TUESDAY, June 27, 1899.

Estate of Mary E. Jones, deceased—Letters of administration granted to W. D. Roberts.

THURSDAY, June 29, 1899.

Estate of Maria Thede, deceased—Letters of administration granted to I. P. Yaney, Public Administrator.

BORN.

DEANS—At Camp Independence, to Mr. and Mrs. W. R. Deans, a daughter.

SHOWALTER—At Camp Independence, June 24, 1899, to Mr. and Mrs. M. F. Showalter, a daughter.

MARRIED.

HARPER — BAXTER — At Independence, Cal., June 29, 1899, at the residence of the bride's parents, by Rev. J. J. Pardee, Mr. O. C. Harper and Miss Jennie R. Baxter.

DIED.

CARRASCO—At Lone Pine, June 25, 1899, Carmalita, wife of Relles S. Carrasco, aged 34 years.

The Board of Supervisors will meet next Monday.

Misses Clara and Oro Eldred are visiting friends in town.

Abe Church and wife left Monday for a visit to San Francisco.

W. D. Roberts of Round Valley spent several days in town this week.

W. M. Rickey came down from Bishop on Wednesday, returning to-day.

Gus. Stecker is at work putting fancy striped duck awnings over the Courthouse windows.

Sheriff Given returned last Tuesday morning from a two weeks' visit to Southern California.

Miss Blanche Bunney arrived home last Monday evening from San Jose and will spend her vacation here.

Hunter & Spear are packing about ten tons of high grade ore to the arastra and will run it through next week.

Independence is being supplied with ice from Round Valley at a cost of a cent and a half a pound delivered.

George Montgomery left for Ballarat on Wednesday in company with L. F. J. Wrinkle and expects to be gone about ten days.

Holland & Carrasco have completed a run of seventeen tons of ore at the Lasky mill at Beveridge which yielded very good returns.

Pat Keyes came in from the mine last Tuesday to make arrangements for packing ore. He has fifty tons of good ore broken ready for sacking.

Lone Pine will celebrate the Fourth with a barbecue and a grand ball. H. Levy says he will take all parties wishing to go from here free of charge.

Miss Ada Lewis, accompanied by her little nephew, Freddie Samuels, arrived home last Monday evening and will remain for several weeks visiting with her mother.

J. J. Gunn made a hasty visit to Manietta this week, leaving here last Monday and returning yesterday. A connection had been made in the mine that he had been expecting and he went out for the purpose of directing new work.

Bishop is making extensive preparations for a grand Fourth of July celebration. The C. & C. people have fixed very low rates of fare and free stages will be run to the station. It will be the biggest affair ever held in the county.

Captain Cummings, a special agent of the General Land Office, has been here for the past two weeks taking testimony in regard to alleged fraudulent entries of lands now owned by T. B. Rickey, on charges made to the Department by Bertrand Rhine.

Harper-Baxter Nuptials.

Last evening, at the home of the bride's parents, Miss Jennie Baxter and Mr. O. C. Harper were united in marriage, the Rev. John J. Pardee officiating. The bride's dress was of white brocaded silk trimmed with jewelling yoke and satin ribbon. She wore a bridal-wreath of white clematis. The brides maid, Miss Oro Eldred, wore a dainty costume of white organdie trimmed with lace. The wedding ceremony was performed under a huge floral bell, and the whole of the spacious residence was a bower of flowers and evergreens. Clifford Baxter, brother of the bride, acted as best man. The wedding supper was served in the large dancing room up stairs, and was one of the finest suppers ever served in the town. The small boys of town were royally treated and doubtless prayed on retiring that there would be a wedding every night. The young couple are very popular in Independence, the bride having been born and raised here, and the groom having lived here for a number of years past; and we echo the sentiment of the whole community in wishing them all happiness and prosperity.

Among the wedding gifts were the following:

Set table linen—Mr. and Mrs. B. Rhine.
Set table linen—Mrs. F. Rhine.
Set water glasses—Dr. J. D. Blair.
Berry dishes—Mr. and Mrs. Harvey.
Fruit dish—Artie, Lutie and Beryl Harvey.
Pie plates—Mr. and Mrs. B. Totten.
Silver butter dish and knife—Dave Rogers.
Silver soup ladle, syrup pitcher and tray Mr. and Mrs. James Malone.
Berry set—Mr. and Mrs. A. W. Eibeshutz.
Fruit set—Mrs. Teresa McSweeny.
Silver bread tray—Mr. and Mrs. J. C. Irwin.
Individual butter trays—Mrs. Mary Mulholland.
Complete set of silver knives, forks and spoons—Dr. I. J. Woodin and Irving Woodin.
Set linen napkins—Mr. and Mrs. P. W. Forbes.
Flower-vase—Mrs. Vincent
One dinner set (112 pieces) Mr. and Mrs. J. Baxter.
Silver butter dish—Etta and Geo. Wood.
Silver Tea Set—Wm. Harper, Clifford and Harold Baxter.
Silver Sboon-holder—Mr. and Mrs. Geo. Willis.
Silver pickle-dish and fork—J. E. Laird.
Silver olive fork—Lizzie Thompson.
Morocco book—Oro Eldred.
Fruit dish—A. M. Given.
Water set—E. Robinson and family.
Parlor lamp—Harry Bert
Silver tea set and case—Mr. and Mrs. J. R. Moffett.
Water pitcher—Maude Cook.
Fancy plates and easels—Birdie Levy.
Complete set silver knives, forks and spoons—Mrs. Chas. Harper and family.
Broom—Mr. Harvey.
Pair of hand crocheted pillow slips—Miss Lucy Harper.

Clippings.

The *Walker Lake Bulletin* is responsible for the following:

Joseph Siegle and wife came in from the copper mines near Soda on Saturday, returning Monday. Mr. Siegle says the mines are looking well and work is being pushed rapidly. An expert smelter builder will arrive this week, when the site of the smelter will be determined. The company has leased the Soda Springs property for one year at a monthly rental of $100, with the privilege of buying for $7,000. This lease does not interfere with any rights of Bob Stewart. Mr. Siegle thinks that within three months a 50-ton smelter will be running on Vulcan ore either at Soda or Hawthorne.

The gubernatorial contest is still going on in Carson. When McMillan's side got through that gentlemen that gentlemen had gained 38, giving him 16 more than Sadler. Now Sadler,s attorneys are working on the counties that gave McMillan majorities, and they expect to bring Sadler out a winner in the end.

Booker & Co. recently received the following order from a Sweetwater rancher:

"Send me a sack of flour, five pounds of coffee and one pound of tea. My wife gave birth to a big boy last night, also five pounds of corn starch, a screw driver and a fly trap. It weighed ten pounds and a straw hat."

The Squires Bros. have their tunnel in Mazourka canyon under good headway. A open cut has been run for about two hundred feet and the portal has now been completed in solid ground. It starts at a point a short distance above the Janvier mine, and it is expected to reach bedrock in about two thousand feet. The cabin and blacksmith shop have been moved to the tunnel mouth, and water is conveyed to the camp by means of a flume and ditch.

No placer mine location can be made by a single individual which shall exceed twenty acres in area, and no claim shall be taken by any association of persons greater than 160 acres, and such association shall not consist of less than eight individuals, who must be bona fide locators. No local laws or regulations of mining districts can restrict the size of placer locations to less than twenty acres, although the locator is not compelled to take that much.

Ernest Laird left for Carson last Saturday morning in response to a telegram from Miss Georgia Johnson requesting him to take her place as Court Reporter, she having been called to Washington D. C. on a case for which she is representing Nevada clients. Ernest is a first-class stenographer and is sure to give good satisfaction.

James Olds arrived here last week from Ventura and expects to start back in a few days with a band of 150 horses which he has had on pasture here for the past year. Mr. Olds says that feed in Santa Barbara and Ventura Counties is better than at any time for years past.

Real Estate Transfers.

The following deeds have been recorded since June 23, 1899.

No transfers recorded.

An unpatented mining claim located on the public domain is not taxable, though the improvements in the way of buildings, machinery, etc,, are. A claim on patented agricultural land is taxable according to its area, being assessed at the same rate as agricultural land, the improvements being also taxable.

When tailings are allowed to flow where gravity carries them without attempt at restraint or obstructions to confine them to proper limit it is considered an abandonment. Tailings thus disposed of may be appropriated by whomsoever claims them.

L. D. Porter and J. F. Cooper came in from Ballarat last Tuesday. Mr. Porter is a member of the firm of Weaver & Porter Bros. and Mr. Cooper owns a valuable mine in Pleasant Canyon and is now putting up a stamp mill on the property.

LECAL.

Notice of Meeting of Board of Equalization.

Notice is hereby given that the Board of Supervisors of the County of Inyo, State of California, will meet as a Board of Equalization on

MONDAY, JULY 3, 1899,

at the office of the said Board, in the town of Independence, to examine the Assessment Book and equalize the assessment of property in said County for the year 1899, and will continue in session for that purpose until the business of equalization is disposed of.

D. J. HESSION,
Clerk of the Board of Supervisors.

Executor's Sale.

NOTICE IS HEREBY GIVEN THAT in pursuance of an order of sale made and entered by the Superior Court of the County of Inyo, State of California, on the 29th day of May, 1899, in the matter of the estate of Edouard Chenot, deceased, the undersigned, the Executors of the Last Will and Testament of said Edouard Chenot, deceased, will sell at public auction, subject to confirmation by said Superior Court, the following described real property, situate, lying and being in the town of Independence, County of Inyo, State of California, bounded and described as follows, towit:

Lots Nos. 10 and 12, and the south half of Lot No. 8, in Block No. 16, as the same appear on the plat of the said town of Independence, County of Inyo, State of California, now on file and of record in the office of the County Recorder of the said County of Inyo; said lots having a frontage on Edwards Street of 125 feet and extending back and west therefrom a distance of 130 feet.

Said sale will be made on Monday, the 24th day of July, 1899, at two o'clock p. m., at the Court House door, in the town of Independence, County of Inyo, State of California.

Terms of sale, cash, lawful money of the United States of America, ten per cent of the purchase money to be paid to the auctioneer on the day of sale, balance on confirmation of sale by said Superior Court. Deed at the expense of purchaser.

Independence, Cal., June 29th, 1899.

J. E. SHEPHERD
and W. L. HUNTER,
Executors of the Last Will and Testament of Edouard Chenot, deceased.

Administrator'c Sale.

Notice is hereby given, that in pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the tenth day of June, A. D. 1899, in the matter of the estate of Luther Clark, deceased, the undersigned the Administrator of the said estate, will sell at public auction to the highest bidder for cash, lawful money of the United States, and subject to confirmation by said Superior Court on Monday the twenty fourth day of July, A. D. 1899, at two o'clock p. m., at the Court House door and in front thereof, in the town of Independence, County of Inyo, State of California, all the right, title, interest and estate of the said Luther Clarke at the time of his death, and all the right, title and interest that the said estate has, by operation of law or otherwise, acquired other than, or in addition to that of the said Luther Clark at the time of his death, in and to those certain mines, mining claims and mining interests, to wit:

An undivided one third interest of, in and to that certain mining claim, situate, lying and being in the County of Inyo, State of California known and designated as the "Tip Top" Mine and Mining Claim.

Also, an undivided one-third interest in and to that certain mine and mining claim situate, lying and being in the County of Inyo, State of California known and designated as the "Three Formation" Mine and Mining Claim.

The said mines and mining claims are situated in the Sierra Nevada mountains, about seven miles from Round Valley, in a Westerly direction.

Terms and conditions of sale: Cash, lawful money of the United States; ten per cent of bid payable at the time of sale, and the balance upon confirmation of sale by said Superior Court. Deed at the expense of purchaser.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant, James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 112, I am commanded to sell, and by said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, State of California and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances thereunto belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United states.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

THE POWER OF STORM.

The Cayman Islands were nearly overwhelmed by the recent storm. Apparently secure things are not safe. Even if you have health be on your guard. Disease works stealthily. An occasional dose of Hostetter's Stomach Bitters will keep the bowels regular and disease at bay. If you have indigestion and constipation try it.

Lots of fathers give their daughters away and have a son-in-law on their hands.

SHAKE INTO YOUR SHOES.

Allen,s Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

After all, a conceited man looks a good deal like other men, yet you wouldn't expect it.

A Pure, Vegetable Compound.

No mercurial or other mineral poisons in Cascarets Candy Cathartic, only vegetable substances, late medical discoveries. All druggists, 10c., 25c., 50c.

It is not the biggest box that contains the best cigars.

For 90 days, sugar beet, alfalfa, and fruit lands, $15.00 to $25.00 per acre, easy terms, watered by the largest irrigation system in America, annual water rental $1.25 per acre. Climate equal to California. Address, F. G. Tracy, Eddy, New Mexico.

We all think, when somebody snubs us, they must be stuck up.

Piso's Cure for Consumption is the best of all cough cures.—George W. Lotz, Fabucher, La., August 26, 1895.

LINCOLN AS A LAWYER.

How the Immortal Abe Won His Early Successes at the Bar.

A suit was brought in the United States court in Springfield against a citizen for an infringement of a patent right. Mr. Lincoln was employed to defend it. Mr. Lincoln went to the most skilled architect in the city, inquired how he spent his winter evenings and received the reply: "If times are brisk, I sometimes work. Otherwise I have no special business."

Mr. Lincoln said: "I have a patent right case in court. I want you as a partner and will divide fees. I know nothing about mechanics—never made it a study. I want you to make a list of the best works on mechanism, as I don't suppose they can be purchased here. I will furnish the money, and you can send to Chicago or New York for them. I want you to come to my house one night each week and give me instructions." In a short time he had witnesses to meet him, and they were thoroughly drilled.

When the trial commenced, Mr. Lincoln put his questions at the cross examination so scientifically that many witnesss were bothered to reply. When his witnesses were put on the stand, so skillful were his questions that the court, the jury and the bar wondered how Abe Lincoln knew so much about mechanism. His witnesses could reply promptly. He gained the suit and a reputation such that Mr. Lincoln was sustained in every patent right case brought into that court up to the time he went to Washington. He went to Chicago, St. Louis, Iowa, Ohio, Kentucky and Michigan to try patent right cases, and the last year of his practice did little else.—Thomas Lewis' "Recollections of Lincoln" in Leslie's Weekly.

Well Answered.

In the early part of this century there lived in Nantucket a young Quakeress whose wit caused many a ripple in the demure circle of the Friends.

When this pretty Martha attended yearly meeting in Newport at the age of 18, her youthful spirits brought her occasional grave looks from the elders, although her real goodness of heart was never questioned.

One evening, during the session of yearly meeting, Martha was the center of a group of young people gathered near the windows of the parlor in the boarding house where some of the Friends lodged for the time. The young people were playing the simple and amusing game of "humorous definitions." Martha's wit caused such frequent laughter that a solemn faced person rose from his seat at the other end of the room and asked, in a loud, stern voice:

"Martha, can thee give me the definition of gravity?"

The pretty Quakeress colored at this public and unnecessary rebuke, but after scarcely perceptible hesitation, she answered demurely:

"I am not able to give thee a definition of my own, Friend Brown, but perhaps that of De la Rochefoucauld will suit thee. He says that 'gravity is a mysterious carriage of the body, invented to cover the defects of the mind.'"—Youth's Companion.

Dead Men's Bones.

The most grewsome apartment in America is probably the demonstrator's room in the Flower hospital in New York, with its fantastic decorations of dead men's bones.

The name of the room is spelled above the door in letters made of finger bones. Upon the wall within appear in the same grewsome lettering the names of Dr. Howard S. Neilson and Dr. Northway Meyer, demonstrators. Besides these legends sits a grinning human skull.

Crossing and recrossing the room strings of bones interlace. Ribs alternate with the slender bones of fingers and toes. Up and down the walls, like ghastly white serpents, crawl coils of vertebrae. Arm and leg bones with highly polished surfaces are hung on the cupboard doors.

Everywhere the eye turns in this curious charnel house symbols of mortality start into relief. But it is on the large table against the south wall that death veritably sits enthroned. In the middle, heaped into a mound, bones from all parts of the human frame are surmounted by a skull. Here a hand, there a crippled foot, a cranium hollowed into a drinking cup—oddities of all grisly shapes surround the mound.

In a chair to the right sits a skeleton in leisurely attitude, leaning one arm upon the table as he watches the skeletons over which the sunlight dances.

The Sacking of the Tuileries, 1848.

The sight that presented itself was the strangest I have ever seen and has remained in my memory almost as vividly as if it were yesterday. The magnificent apartments of the palace were soon filled with as strange a set of ruffians as you could meet anywhere. It seemed as if they were all mad or drunk, and yet they were as jolly as sandboys. They seemed positively to revel in destruction and to yell with delight as they smashed and tore everything to pieces that they came across. There was scarcely a picture that was not cut into ribbons, and ornaments, however costly, were thrown down and broken to atoms.

While I was standing in one of the grand apartments, looking on in wonder, a little man, with a sword almost as big as himself, stood in front of a magnificent mirror that reached from the floor to the ceiling. He surveyed it for a moment, and then, as though he were about to storm a town single handed, went deliberately up to it and with one blow of his great cavalry blade shivered it to pieces. As they fell at his feet he put on a grand air and said "La!" as if this was one of the greatest deeds he had ever accomplished and the proudest moment of his life.—"Sketches From Memory," G. A. Storey.

A Modern Elopement.

The agitated girl looked back through the cloud of dust that rose in their rear.

"Algernon," she exclaimed in terror, "pap is pursuing us!"

"Let him pursue!" chuckled Algernon. "The last thing I did before we started was to slip out and change his storage battery. It's only got about one more mile in it, and then it'll stop dead."

And even as Algernon spake these words his automobile drew away from the pursuer, while from the lagging machine far in the rear came faintly to the ear hoarse cries of impotent rage from the baffled parent.

ALABASTINE

LABASTINE is the original and only durable wall coating, entirely different from all kalsomines. Ready for use in white or twelve beautiful tints by adding cold water.

ADIES naturally prefer ALABASTINE for walls and ceilings, because it is pure, clean, durable. Put up in dry powdered form, in five-pound packages, with full directions.

LL kalsomines are cheap, temporary preparations made from whiting, chalks, clays, etc., and stuck on walls with decaying animal glue. ALABASTINE is not a kalsomine.

EWARE of the dealer who says he can sell you the "same thing" as ALABASTINE or "something just as good." He is either not posted or is trying to deceive you.

ND IN OFFERING something he has bought cheap and tries to sell on ALABASTINE'S demands, he may not realize the damage you will suffer by a kalsomine on your walls.

ENSIBLE dealers will not buy a lawsuit. Dealers risk one by selling and consumers by using infringement. Alabastine Co. own right to make wall coating to mix with cold water.

HE INTERIOR WALLS of every schoolhouse should be coated only with pure, durable ALABASTINE. It safeguards health. Hundreds of tons are used annually for this work.

N BUYING ALABASTINE, see that packages are properly labeled. Beware of large **four-pound** package light kalsomine offered to customers as a **five-pound** package.

USANCE of wall paper is obviated by ALABASTINE. It can be used on plastered walls, wood ceilings, brick or canvas. A child can brush it on. It does not rub or scale off.

STABLISHED in favor. Shun all imitations. Ask paint dealer or druggist for tint card. Write for "Alabastine Era," free, to ALABASTINE CO., Grand Rapids, Michigan.

REVIVALS IN PIONEER DAYS.

Preachers Used to Gather Up Husk Boards by the Armful.

Revival work, said the professor, isn't what it was in the old time. The life is different, and religious experience is different. I have not heard a man or woman shout in church for forty years, and yet I can remember when a service or meeting was not counted much of a meeting if some good sister did not shout. A great preacher would stir a crowd to conviction, an exhorter would make an impassioned appeal, some emotional woman would be asked to pray, and soon the shouting would begin.

The good woman kneeling on the floor, and with bowed head, would begin in a voice almost inaudible, but as she proceeded her voice would become louder and stronger, her figure would become more erect, until finally in the very ecstasy of excitement she would cry aloud in her rejoicing.

Her shouts would be greeted by exclamations of "Amen" and "Glory to God," and then there would be handshaking, singing, and a chorus of ecstatic exclamations. Before such a wild wave of excitement had expended its force dozens and scores would be at the mourners' bench, surrounded by the rejoicing church members.

I have heard my father relate most wonderful experiences in northern Ohio, where, in the old time, it was the rule for church congregations to be greatly moved.

It was the custom then for women to wear busks, or corset boards, instead of stays or corsets. These busks were made of pliable hickory, but they compelled a woman to sit very straight, and imposed some limitations on free movement.

My father said that frequently after a meeting in which there had been excitement and shouting he had gathered up an armful of corset boards which the women in their frenzy had drawn from their dresses and thrown under their seats and forgotten.—Chicago Inter Ocean.

Barry Pain, the humorist, grows flowers and is famous for his double snowdrops. Henry Norman farms and fusses with a camera and his wife, Menie Muriel Dowie, spins.

"Phoebe Tilson" is the name of a book by Mrs. Frank Pope Humphrey, the story of life in a township of Massachusetts, in the beginning of the century—a story well told and thoroughly enjoyable.

Francois Coppee, the French writer, says: "The author I prefer, the author who never leaves me, is dear and delightful Dickens. I have read and reread him ten times: I shall read him yet again!"

J. M. Barrie hopes to have the sequel to "Sentimental Tommy" ready for publication in the year 1900. He has chosen for it so far the title, "The Celebrated Tommy;" but with a likelihood of changing it later.

One of the peculiarities of the eccentric Ouida is that she cannot write at a table, but always writes with a pad on her knee, her ink bottle being on the carpet! It has been stated that she has written twenty thousand words at a sitting, or twelve full columns—a number which staggers belief.

Miss Elizabeth Godfrey, author of the musical novel, "Poor Human Nature" (now in its second impression), says of herself: "I made by debut in Temple Bar, with "A Green Door," the first thing I ever wrote for publication. * * * It is such an odd thing to want to know all about any one whose book chances to become popular."

Miss Marie Corelli's favorite amusement is music; Marion Crawford is a great yachtsman; Mr. Crockett cycles and golfs; I. Zangwill rides on horseback; George Gissing's favorite recreation is natural history; Bret Harte's one amusement is golfing; W. D. Howells likes theaters and long walks; Rudyard Kipling fishes and cycles; Andrew Lang golfs, plays cricket and fishes, and Richard Le Gallienne cycles in a very attractive get-up.

The new novel, "Windyhaugh," by Graham Travers, author of Mona Maclean, seems to be attracting much attention in England. It is described as the story of a modern woman, but a story which will be read by men and women alike. The heroine "carved no statue, painted no picture—she did not even write a book; but when all these things have been excluded, there remains that little art of living which has been open in all ages alike to the wise and the simple." It is understood that the American publishers are D. Appleton & Company.

A Nation's Dead.

The well-known saying, "Westminster Abbey or glorious victory," attributed to Nelson when he boarded the San Josef at the battle of Cape Vincent, seems to point to the hero's own wishes as to an abbey grave. But for some unknown reason, when the end came at the famous battle at Trafalgar (1805), Nelson was buried at St. Paul's, and the abbey authorities, finding crowds going there to gaze on his last resting-place, had an effigy made of him and set it up near Kempenfeldt's monument, in order to attract people back to Westminster, with the desired result. The figure now stands in the Islip Chantry Chapel with the other funeral effigies, and is a very life-like and good representation of the great man. It is said to have been copied from a smaller figure for which Nelson sat, and all the clothes except the coat he actually wore. Maclise, who borrowed the hat for his picture of "The Death of Nelson," found the marks of the eye patch on the inner lining, and the stamp of the period in the crown.

Germany's Youthful Criminals.

In Germany 45,251 persons under 18 years of age were convicted of crime or misdemeanor in 1897. Of these 22,544 were sentenced for theft, 7,537 for violence to the person and 3,667 for fraud.

As soon as a singer does fairly well on a church hymn she begins to reach out with step ladders for the high notes and makes a failure.

THEY WANT TO TELL

These Grateful Women Who Have Been Helped by Mrs. Pinkham.

Women who have suffered severely and been relieved of their ills by Mrs. Pinkham's advice and medicine are constantly urging publication of their statements for the benefit of other women. Here are two such letters:

Mrs. LIZZIE BEVERLY, 258 Merrimac St., Lowell, Mass., writes:

"It affords me great pleasure to tell all suffering women of the benefit I have received from taking Lydia E. Pinkham's Vegetable Compound. I can hardly find words to express my gratitude for what she has done for me. My trouble was ulceration of the womb. I was under the doctor's care. Upon examination he found fifteen very large ulcers, but he failed to do me good. I took several bottles of Lydia E. Pinkham's Vegetable Compound, also used the Sanative Wash, and am cured. Mrs. Pinkham's medicine saved my life, and I would recommend it to all suffering women."

Mrs. AMOS TROMBLEAY, Ellenburgh Ctr., N. Y., writes:

"I took cold at the time my baby was born, causing me to have milk legs, and was sick in bed for eight weeks. Doctors did me no good. I surely thought I would die. I was also troubled with falling of the womb. I could not eat, had faint spells as often as ten times a day. One day a lady came to see me and told me of the benefit she had derived from taking Lydia E. Pinkham's medicine, and advised me to try it. I did so, and had taken only half a bottle before I was able to sit in a chair. After taking three bottles I could do my own work. I am now in perfect health."

PATE DE FOIE GRAS.

The Fearful Cruelty That Makes This Dainty a Possibility.

To the ordinary man and woman no conception of the torture to which the poor, unfortunate goose is put could possibly be formed.

The geese when about 9 months old are taken from the pastures and placed in an underground cellar, where broad, slanting stone slabs stand in rows, and are bound fast to the tables. They are literally crucified.

Feet, wings and bodies are spread out and bound by bands, so that only the neck is left free. As may be imagined, the animal struggles with all its might against this stretching, till, after days of vain endeavor to free itself from the bands and its position, its powers of resistance are overcome, and a dull resignation, broken only by its low cries, takes possession of it. Two months must pass away before death brings relief.

The animals are meanwhile crammed with dumplings made of dough of buckwheat, chestnuts and stewed maize. Every two hours, six times a day, they receive from three to five dumpling pills, which in time become so sweet to the tortured creatures that they stretch their necks to be crammed.

The most difficult task is to determine the right moment for death. Those who die of their own accord are lost to the liver factory, therefore a kind of study is needed to see when the cup of agony is brimming full and the liver is ripe for taking. The bodies of such ripe ones are like pumpkins—where ordinarily fingers are buried in flesh and fat nothing but skin and bone are found. The livers have absorbed all the strength and juices.

A Painful Mistake.

A conductor got up early the other morning and got his own breakfast. He is not used to this, as his wife, who was sick on this occasion, is used to getting breakfast ready. He is fond of strong coffee for his early meal, and, filling the pot with water, heaped in four tablespoonfuls of what he took to be coffee.

After all was done, the coffeepot steaming and hash well browned, he sat by his own self to break his fast. The coffee did not seem very hot, so he drank off half the cup in three or four swallows. Then the roof started. He yelled like a maniac. His trembling little wife ran out to see her husband dancing about on one foot and screeching like a maniac.

He ran to the water pipe and drank off two quarts of cold water and then quieted down enough to ask: "What in thunder's the matter with the coffee?" She smelled of it and said: "Why, dear, you mistook the ground cloves for the coffee, that's all."—Lewiston Journal.

The Flag on the Wall.

The Troy Times tells of a visitor at a public school, who, being requested to address the pupils, spoke of the necessity of obeying their teacher and growing up to be useful, loyal and patriotic citizens.

To emphasize his remarks, he pointed to a large national flag that almost covered one end of the room, and said, "Now, boys, who can tell me what that flag is there for?"

One little fellow, who understood the condition of the room better than the speaker, replied:

"I know, sir. It's to hide the dirt."

CONSTIPATION

"I have gone **14 days at a time without a movement of the bowels,** not being able to move them except by using hot water injections. Chronic constipation for seven years placed me in this terrible condition; during that time I did everything I heard of but never found any relief; such was my case until I began using CASCARETS. I now have from one to three passages a day, and if I was rich I would give $100.00 for each movement; it is such a relief." AVERY L. HUNT, 1089 Russell St., Detroit, Mich.

25 CTS. PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS.

A Vivid Description.

A short sighted and deaf old gentleman who was at an entertainment where a professor performed on a big bass viol, thus described the scene: "The professor carried on to the platform a gigantic beetle attached to the end of a sort of lamppost. He leaned over and fondly embraced it, tickling its back violently with a long comb.

"The spectators seemed much delighted at this display of scientific affection. The beetle was apparently quite unmoved. Then the professor gave a capital imitation of the drunken man and the lamppost. He swayed rapidly up and down, clutching quickly at all points.

"Sometimes his fingers quivered passionately upon one spot, like an ill tempered man struggling with an obstinate pair of braces. Sometimes he rested momentarily, as one rests after a contest with a stiff white tie.

"Finally, he gave a last convulsive tickle to the huge beetle, picked himself up from the lamppost and carried off the unresisting insect. The audience applauded vigorously."

A Famous House and Lot.

An article entitled "Historic Homes In Washington," by Catherine Cavanagh, in Munsey's, gives an interesting narrative of the home once occupied by James G. Blaine. The lot on which it stood once belonged to Henry Clay, who won it at a game of cards, at which he was always very lucky. On his wife being asked if her husband's gambling did not make her anxious, she answered: "Why should I worry? Henry generally wins." After keeping the lot a short time he swapped it for a Maltese jackass that Commodore Rodgers brought home from a Mediterranean cruise. He built the house. In it once lived James K. Paulding, secretary of the navy under Van Buren. Secretary Seward bought it, and was living in it when his assassination on the night of Lincoln's murder was attempted. Secretary of War Belknap afterward resided there, and finally Mr. Blaine.

Bees and Their Baskets.

Every bee carries his market basket round his hind legs. Any one examining the body of a bee through a microscope will observe that on the hind legs of the creature there is a fringe of stiff hairs on the surface, the hairs approaching each other at the tips, so as to form a sort of cage. This is the bee's basket, and into it, after a successful journey, he will cram enough pollen to last him for two or three days.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

They Would Get There.

It was a lecture delivered by a learned purveyor of liver pills and illustrated by diagrams of the frame of man. "That," he explained, pointing out a totally different spot, "is where man's liver is."

"Excuse me," observed the man in spectacles, "but I am a surgeon, and that's not where the liver is."

"Never you mind where his liver is," retorted the lecturer. "If it was in his big toe or his left ear my pills would reach it and shake it for him. On that you can bet your gig lamps."

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

A Lock of His Hair.

A venerable, white haired clergyman recently preached in the parish of a friend. He had hardly got back to the vicarage from the church when the doorbell rang and a charming girl of 18 asked to see him. He received her. They talked about the sermon and other things until finally she asked diffidently:

"Oh, won't you please give me a lock of your hair?"

"Certainly, my child," said the old gentleman, flattered at the request. "I'll send it to you tomorrow," and he did.

On his return to his own home he had five more requests of the same kind, and he proudly boasted to his wife that he was glad to see that he had not yet lost his power to please. All went well until his wife received this note:

"Dear Mrs. ——, won't you please ask your husband to send me just a little lock of his hair? We have all been taking lessons in making hair flowers. So many of the other girls asked him—and he sent it to them—that I thought I would rather ask you to get it for me. Won't you please do this for me? It is so hard to get white hair for lilies of the valley."

This was a terrible blow, and the less now said about locks of hair in that old gentleman's presence the better.

Obedient Sadie.

Little Sadie (who has been told she must thank God for everything whether it seemed good or not)—"Thank God again, mamma! I've broken your rose jar!"

CATARRH OF THE PELVIC ORGANS.

The Reason Why So Many Women Are Sick.

Mrs. Eliza Wike, 120 Iron St., Akron, O.

Mrs. Eliza Wike says: "I would be in my grave now if it had not been for your God-sent remedy, Pe-ru-na. Everybody says I am looking so much better. No doctor could help me as Pe-ru-na did. I was a broken-down woman. It is now seven years past that I was cured."

Mrs. Sarah Gallitz, of Luton, Ia., also writes: "I was suffering with the change of life. I had spells of flowing every two or three weeks, which would leave me nearly dead. I had given up hope of being cured, when I heard of Dr. Hartman's remedies and began to use them. I am entirely cured, and give all the credit to Pe-ru-na and Man-a-lin."

A healthy woman is becoming more and more rare. But comparatively few women who are suffering with catarrh know that this is the case. Their trouble is called dyspepsia, heart trouble, female weakness, weak lungs, nervous debility; indeed, almost the whole category of medical terms has been applied to catarrh of some organ of the female anatomy. If these women would only realize that their trouble is probably catarrh of the organs peculiar to women or pelvic organs, and cure themselves with Pe-ru-na, how much unnecessary suffering would be saved.

Mrs. G. C. Worstell, Clarksburg, W. Va., writes the following letter to Dr. Hartman. This is only one of hundreds of similar letters which the Doctor receives from thankful women. Mrs. Worstell says: "I trust that no one will think from this that I want my name in public for any cause only to let sufferers know where they may find relief from many ailments. I can truly say I have been much benefited by the use of Pe-ru-na. I feel better than I have for two years. It is the best medicine that I know for female troubles. I have taken medicine from the doctors and found no relief; but when I began taking Pe-ru-na I could see that before I had taken the first bottle that it was doing me good. I recommend it to all suffering women. I think that it is the best medicine in the world. I can't say enough in its favor. You can publish this if you like."

Dr. Hartman has written a book entitled "Health and Beauty" especially for women. It treats of female catarrh in all its different phases and stages. It is profusely illustrated and contains common sense talks on subjects which should interest every woman. This book will be sent free to any woman who addresses Dr. Hartman, Columbus, Ohio.

The Elder Got the Best One.

An account of the life of Judge James B. Bradwell of Chicago by his daughter tells a story of the deeply religious training of his childhood. He had the old fashioned faith in the efficacy of prayer before he was of sufficient age to understand the reasonable limits of such petitions.

Once, when James was only 8 years old, the wagon was sent to Chicago for provisions. Five days elapsed. The wagon was detained, and the Bradwell family was without food and without a man to provide it. Little James, as usual with even small boys of the time and place, was a good shot. His mother loaded the gun for him, and he started out to see what he could shoot to supply the table.

In due time he saw two prairie chickens not far away. He got his gun ready and then took long enough to pray thus:

"O Father, if you will just let me bring down those two chickens I'll give your minister the choice of the pair!"

The trigger was pulled and down came the two prairie chickens. James believed the shot to be a direct answer to his prayer. He took the two birds to Elder Snow, the minister, and told him of the circumstances.

The good elder took a long time to examine the two chickens, in order to be quite sure that he got the better of the two, because, he said, he thought it best that the boy's compact should be faithfully carried out.

LIFE.

Silently, swiftly, one by one,
We march down the aisles of time;
Musical murmur and mournful moan,
Plaintive pleading and tender tone,
Blend in a living rhyme.

Hope and happiness, faith and fame
All are swept along
Into a future misty and gray,
Peopled with phantoms grim and gay,
Some with a curse and some with a song.

Lives that were full of happiness,
Others that teemed with sin;
Shadowy phantoms of bygone days
On a suffering soul turn full their gaze,
And we long for the "Might have been."

But the longing is vain, for the past is dead,
And a passing present is all we know.
Futurity's riddle we may not read,
But the pains of the past with its lust and greed
Should tell us the way to go.

Prince and pauper are peers in death,
Their ashes are blown where their feet once trod,
Out of the past with its weal and woe
Into the future of doubt we go,
Christian and pagan to face one God!
—Denver News.

Bashful Mr. Gay.

THERE was a decided sensation when the Sterlings moved into our humdrum little town. The "Charles Dickens Club," which several of the ambitious ladies of the Baptist church had organized for the mental elevation of the community, and which every woman in town had joined, not for any desire to be "elevated," but because it was a novelty and "Mrs. So-and-so," belonged to it, forgot to read a single chapter in "David Copperfield," but devoted its entire attention to the discussion of the "new family."

As the Sterling grounds adjoin mine I was enabled at an early date to form an opinion concerning the newcomers, and I became convinced at once that they would prove desirable neighbors, and surely it would be pleasant to have at least one interesting family in the town with whom I might exchange a few words now and then upon some subject other than the well-worn weather affliction, which seemed to be the only topic with which my village acquaintances appeared at all familiar.

Mrs. Sterling brought with her two charming daughters, Phyllis and Genevieve. They had been in town only a few hours when Jane said (I shall be obliged to quote Jane in spite of my scruples) that Mrs. Peabody came to see her under the pretense of making a call, but in reality to enjoy the view of the Sterling house obtainable from our kitchen windows, and on seeing the two young ladies had exclaimed:

"You see if them two don't set their caps for poor, dear Mr. Gay!"

Jane repeats a legend that long ago I incurred Mrs. Peabody's everlasting wrath by not marrying her daughter, Jennie, after raising her hopes to a dizzy height by offering her the protection of my commodious umbrella one day when the amiable Jennie had been caught in a sudden shower far from home, and I had accompanied her to her mother's door, which upon an urgent invitation I had entered, for the first and last time, staying exactly nine minutes by the grandfather's clock in the corner.

I was in my study, overlooking the Sterling piazza, on the afternoon Mrs. Peabody made her first call on the Sterling ladies, and the conversation floated innocently to my ears on the gentle breeze.

Mrs. Peabody, delighted to pay up a few back scores, began a lengthy account of my failings, and dwelt with particular emphasis on one I had never had any reason to believe I possessed—namely: conviction.

"He is the laughing stock of the place," calmly asserted the caller, "and is altogether the biggest stick you ever saw. Why, he was in love with a certain young lady in this town—I shouldn't like to mention any names—but he acted like a fool tagging 'round after her on rainy days with the excuse of lendin' his umbrel', when he was too shy to come to the house."

My hair arose on end, and I grasped the arms of my chair to steady my nerves, or my temper, lest I should throw my inkstand at the offending lady. That my reserve and dignified reticence should be thus interpreted to these strangers drove me frantic; but after all it was foolish to care, when I could so easily disprove all she had said.

But as the days passed I found it anything but easy, for every time I met any of the Sterling ladies I always felt the blood leap to my face, and experienced a wild desire to fly, as I thought what they were doubtless thinking of me; but I never failed to raise my hat with studied politeness.

One day while I was looking over my roses I once more became an unintentional eavesdropper. Hearing voices in the adjoining garden, I was about to beat a hasty retreat when I became aware that it would be too late, as the following conversation was well under way:

"Genevieve, dearest, isn't it a pity Mr. Gay suffers so from shyness? His books are charming."

I recognized the gentle voice of Phyllis.

"Yes," laughed Genevieve, "he nearly has a fit whenever we meet; he grows purple in the face, really! Socially he is impossible. No doubt he stammers."

The following day I picked a tremendous bunch of great, blushing jacks (they considered me one, beyond a doubt), and walked boldly over and rang the Sterlings' bell. The white-capped maid who answered my ring showed me by her wide-open eyes that my reputed failing was well known even in that quarter. I left a message that my rose gardens were at the ladies' disposal, and fled.

That morning I had put the finishing touches on my new work, "Roses and Their Cultivation," and for want of something better to do I began a novel. Before I had proceeded far I knew it would never see publication, for it was a partly imaginative account of my own affairs, and as I progressed I began to weave a little romance about Phyllis and myself, a foolish thing for an old bachelor to do, of course. Then I decided to wait, at a certain point, and let the situation develop itself.

It developed rapidly the next day; in the morning I received a daintily written note from Mrs. Sterling, expressing thanks for the roses, and inviting me to tea for that evening. I accepted the invitation, it is needless to relate, and it may be of interest to add that I did myself credit. They discovered I was quite equal to such a social function, and I trembled not, neither did I grow "purple in the face and stammer."

Things went merrily for several weeks. I saw my neighbors frequently, and Phyllis and I often talked across the dividing wall from our respective gardens.

Then, when I had rescued my reputation from the clutches of Mrs. Peabody by my own courage and perseverance, that courage failed me at the critical moment.

How was I going to inform Phyllis that I didn't want to be a bachelor any longer? I was sure that it was a matter of no consequence to her; I dreaded to appear in the role of an ancient adorer. I'm not so old, after all. I could see Genevieve's mirth ready to break out at any unguarded moment. Mrs. Sterling was evidently sympathetic, but Phyllis she was indifferent. As my only consolation I finished up that novel with a happy ending, placed it in one of my little blue covers, and buried it away, with many sighs, in a drawer of my desk, with several others similarly bound, and straightway forgot all about its existence.

One day Phyllis begged me to allow her to read the original manuscript of "Roses and Their Cultivation," before it was sent off to the publisher. Delighted to fulfill her wish, I went to my study and seized the desired volume, which I gave to her. Then I hurried to catch the afternoon train to the city, as I had some urgent business to transact there.

The next day, perceiving Phyllis in the summer house, I went over to see her. Before I had been there six minutes I knew something was amiss. She seemed embarrassed, and although she kept her face turned away I could see that even her little ears were a deep pink. Her voice, usually so frank and clear, responded to my commonplace remarks in low, hesitating tones.

"Well, Miss Phyllis, did you enjoy the manuscript?"

"Very much," came in scarcely audible tones.

"If you care for it you may have that copy, as I have another I can send to the publisher," I continued, cheerfully.

A pair of startled eyes met mine and a dazed voice repeated:

"The publisher? Surely, O, surely, Mr. Gay, you never intended to publish this!"

She held out my supposed treatise on "Roses," and, shades of my ancestors, on close inspection I recognized that novel! In my haste I had given her the wrong manuscript!

Phyllis was evidently angry. If ever a bashful man was in a tight fix, I was.

I first calmed her anger by explaining the mistake; I told her I had only written the novel for my own amusement, for which imprudence I now humbly apologized; then, blind as I was, I did not notice how sad her face became as I continued:

"I never intended you to see it; of course it is all fiction, pure and simple, especially simple. Every word of it fiction."

"O! only fiction, Mr. Gay?" she said, a little stiffly.

Then my good angel turned a ray of light into my darkened mind, for I answered promptly, with the courage of my conviction:

"It is in your power to make it truth, Phyllis. Will you, dear?"

And she murmured "Yes."—Exchange.

SLEEPING BAG LIKE A HOUSE.

Portable Shelter that Shields Hunters from Storms and Cold.

Hunters, prospectors, and persons compelled to move from day to day have found the sleeping bag the most convenient form of bed and these are now in general use among this class of people. They are extremely comfortable and at the same time offer absolute protection from the elements, as they are generally lined with some soft material and have an outer covering of leather or rubber to keep out the wet. Their form is generally well known, but what seems to be a great improvement in these has been recently patented in this country by Abelard Lapierre of Montreal. His invention consists of a rigid frame, collapsible when not in use, and covered with some material adapted to withstand the weather. The whole top is removable on a hinge to admit of entrance, while at the upper end of this lid is a smaller opening, also covered with a similar hinged lid. This latter may be closed entirely in cold weather, while in milder temperatures it may be fastened at any desired point. When the top is closed a means of ventilation is provided through holes under the protecting edge of the larger flap.

Cupid should erect a danger sign whenever he breaks the ice between two lovers.

FOR LITTLE FOLKS.

A COLUMN OF PARTICULAR INTEREST TO THEM.

Something that Will Interest the Juvenile Members of Every Household—Quaint Actions and Bright Sayings of Many Cute and Cunning Children.

"I know what makes the rain," said Bess
To little brother Will.
"I'll tell you all about it, if
Y'll ist keep awful still.

"Y' see, 'way up above us—oh,
So awful far 'n' high,
The Funder-Man 'n' Rain-Man lives,
They lives up in the sky.

"They's got their houses in the clouds—
Ist hid away somewheres.
Y' can't go up to see 'em, 'cause
They ain't got any stairs.

"The Rain-Man thinks he owns the clouds,
'N' fusses every day
With Funder-Man because he can't
Have everything his way.

"But Funder-Man ist points at 'im
'N' shames 'im awful hard;
Then Rain-Man sorry—'vites 'im to
Play over in his yard.

"Although they's friends, 'n' gets along
Like all good neighbors should
Sometimes the Funder-Man gets mad
'N' whips the Rain-Man good;

"Growls at 'im—'Rumble-humble!' (you
Can hear it ist as plain),
Then the Rain-Man cries, 'n' cries, 'n' cries!
'N' that's what makes the rain!"
—Chicago Record.

Kite Modeled Upon a Fly.

G. A. Frismuth, of Philadelphia, has designed and tested an entirely new form of kite. Recently while on shipboard his attention was attracted to the balloon fly, or "telltale," as it is sometimes called, and, after observing its action for several hours, he concluded that the idea could be utilized in kite building. Accordingly he set to work and constructed one on the lines of the balloon fly, and, thinking to increase the lifting capacity of the kite to carry such instruments as it is desired to send aloft for scientific observation, he built three, each within the other. The

THE NEW CONE KITE.

mouth of each cone consists of a frame of bamboo circle, to which the silk bag is fastened. These circles in the experimental kite constructed by him are twelve, eighteen and twenty-four inches in diameter and the cones are twenty-four, thirty-six and forty-two inches in length each, with a two-inch outlet at the end. The weight of the entire construction is seven ounces.

For the test 1,000 feet of cord were unrolled, and at this height the pull registered sixteen pounds. It was found that in a moderate wind the three cones were most effective, for at a subsequent time in a very strong wind it was noted that any one of the cones alone would exert a greater pull singly than when placed as originally, one within the other.

Johnny's Marble.

Seven little marbles lay huddled together in Johnny's pocket. They rattled merrily against one another, and when Johnny went hop, skip and jump, they went hop, skip and jump, too, for they were so glad that marble-time had come again. Only the big green marble that Johnny called a "real" did not stir at all, and was not glad a bit.

"Oh, dear, I wish it was winter again!" said the big marble. "Then I could sleep all day in Johnny's playroom, instead of rolling about on the pavement."

"I think that is fun," said the little brown marble.

"What fun is there in bumping together and knocking each other about?" asked the big marble. "And as soon as one game is done, another begins. It is so tiresome!"

In fact, he began to feel so cross that he made up his mind to run away. So the next time that Johnny sent him flying against a row of the other marbles, he contrived to slip down under the fence; the green grass covered him over, and as it was just the same color as the "real," Johnny's sharp eyes failed to find him.

At first the lazy marble thought it was fine fun to lie still and do nothing, but soon he was tired of that. He could hear the boys on the sidewalk shouting their funny jargon, while his brother marbles rattled to and fro, and had such jolly games! How he wished that he was with them!

One day Johnny was digging a flower-bed by the fence, when his spade struck something hard.

"Why, here is my 'real!'" he cried. "What made you run away, you naughty fellow?"

Then Johnny took his other marbles from his pocket, and they had a fine play all together again; and the big, lazy marble was now as lively and jolly as the others, and clicked merrily against his neighbors as if he quite enjoyed the game.—Youth's Companion.

Not with the Little Boys.

Tommy (aged 4)—Mamma, why don't papa take me out nights with the other little boys?

Mamma—Why, dear, your papa doesn't take any other little boys with him. What put that idea into your head?

Tommy—I heard him tell Mr. Blank this morning that he was out with the boys last night.

Would Take Off a Little.

It's a pretty careful speaker who is never compelled to discount his first assertion more than 10 per cent.

"Oh, mamma," exclaimed little 4-year-old Harry, "there's a hole in my stocking as big as a silver dollar." "Are you sure it's that large, Harry?" asked his mother. "Well," was the reply, "it's as big as 90 cents, anyway."

Thinks He's Like Chauncey.

Teacher—You should be very careful what you say, Johnny. Do you know what will become of you if you keep on telling stories?

Johnny (who reads the papers)—Yes'm; I'll get invitations to all the big dinners when I grow up and become a United States Senator from New York.

Didn't Start the Mule.

"Why, Willie," said his mother one day when they were out walking, "what do you mean by offering a penny to that mule?" "Because," replied the young investigator, "I heard papa say that money makes the mare go, and I want to see if it has the same effect on a mule."

Might Brush Him Away.

"Papa," asked a 4-year-old youngster, "are all little boys made of dust?" "Yes, my son," was the reply. "Well, then," continued the little fellow, "I wish you would make nurse stop using the whiskbroom on me. I'm afraid she'll brush me all away."

UNCLE MART AND THE INJUN.

An Adirondack Guide's Tale of Aboriginal Unreliability.

"Never heard tell of my uncle, Mart Moody?" said the grizzled Adirondack guide from Long Lake. "Well, Uncle Mart was about the biggest drunkard and liar in the county, but he was one of the best hunters in the State—a regular Ramrod as you say. One time he goes up to my Aunt Minerva, that's his wife, and says:

"'Minerva, me and the Injun, Capt. Sybell, are going out to get some meat.' 'All right,' says my aunt, 'but be careful, Martin, and don't let that heathen steal your clothes off your back.' Uncle Mart just laughed and said he'd be back soon, they was only goin' down the lake a bit, and he could take care of the Injun. So off he goes, and the Injun, who was waitin' for him in his canoe, sez, 'Hurry up, Mart; I tank thar was big deer in the water.' So they paddled down the lake slowly and never spoke a word till they got down by the ledge near the alders. Then the Injun looked at Uncle Mart and said, 'I tired,' and taking his paddle out of the water he knocked Uncle Mart's powder horn overboard accidental like.

"Uncle Mart was mad as a hornet, and says, 'You pesky Injun skunk, take care what you do.' But Capt. Sybell said, soft like, 'Don't ye car', Mart; I go down and get it.' With that he jumped overboard, and Uncle Mart laid back and thought of home and Aunt Minerva, who was a mighty fine woman. Bimeby it struck him that the Injun had been in the water a powerful long time. He calkilated it was nigh onto ten minutes or more, so he just looked over to see what he was doing, thinkin' he might be drowned. What do ye think he saw down in the water? That there water was as clear as rum, and what do ye think he saw? Why, that there pesky Injun was a settin' on the bottom smiling and pourin' the powder out of Uncle Mart's powderhorn into his own. You can't trust Injuns."—New York Commercial Advertiser.

Ants Not So Smart After All.

Professor Bethe of Strasburg doesn't believe the ant is so intelligent as he seems. He cleansed the ants taken from one hill in a solution of alcohol, dipped them in a decoction made of ants from another hill, and placed them in the strange hill. They were not attacked as strangers, even when of different color and conformation. On the other hand, ants treated in this manner when put back in their own hills were not recognized by their tribe, but at once attacked and killed. Professor Bethe infers from this that ants must give out some liquid whose odor guides them, and that each colony must have its own peculiar smell.

Noise and Sleep.

Experiments now show that during profound sleep a noise not sufficient to awaken the sleeper produces a perceptible rise in the temperature of the brain.

When a man wakes up with a dark-brown taste in his mouth after painting the town red the night before, he is apt to feel rather blue

POLYGAMY IN UTAH

RECENT events of national interest have awakened great public attention to the Mormons of Utah and the polygamous faith. The fight made against Congressman Roberts, the known possessor of three wives, has led to investigations that are likely to develop some sensational disclosures in the very near future, nd authenticated details already ade public indicate that the practice

PROGRESS OF MORMON CHURCH IN TEMPLE BUILDING.

of plural marriage is still in vogue. Since the decree of 1890 this is considered bigamy, pure and simple. The wholesale promiscuous taking of wives, therefore, has been broken up, but many secret ways have been devised for evading the Federal prohibitory statute. The cupidity of leaders has operated to make easy the accomplishment of plural wife-getting, and Mormonism is dying a hard death.

The essence of the Mormon dogmas is contained in an avowed "spiritual revelation" given to Joseph Smith, leader of the Latter Day Saints, in 1843. The official Mormon ritual on the patriarchal order of marriage declares that a man may espouse a woman, and if she consents espouse another, and so on indefinitely. Since 1890 this doctrine has been advocated under difficulties. The Government has prosecuted all illegal marriage participants. However, a common way of having the civil rite performed is to elope to Mexico or Canada, or to sail out into the neutral waters of the high

LEADERS AMONG MORMONS.

seas, where the marriage is performed. Then the couple will return to their Mormon homes, and in their temple of worship will be "sealed" in wedlock according to ritualistic customs of the church. It is in evidence that within the past year a number of the most prominent Mormons in Utah have violated the Federal statute, and have taken unto themselves additional wives. This seems to show that apparent submission to the law when first enacted was only a temporary public cessation in the traffic of wives, and the Government is making an active move to compel Utah to maintain her Statehood on constitutional lines.

In Chicago and other large cities, and in many rural communities, unusual activity of the Mormon missionaries has been noticed during the past year. As a result of this work there has recently been a decided influx of converts into the sequestered valleys of Utah, Wyoming and New Mexico, the headquarters of orthodox Mormonism. It is a heterogeneous mixture of humanity that the missionaries send back to the "fold," and a noticeable fact about the whole thing is that women predominate among the converts. Many reports from sections where Mormon missionaries have been at work show that the Latter Day Saints' emissaries have been driven out of the community, where the marriage is performed. Then the couple will return to their Mormon homes, and in their temple of worship will be "sealed" in wedlock according to ritualistic customs of the church. It is in evidence that within the past year a number of the most prominent Mormons in Utah have violated the Federal statute, and have taken unto themselves additional wives. This seems to show that apparent submission to the law when first enacted was only a temporary public cessation in the traffic of wives, and the Government is making an active move to compel Utah to maintain her Statehood on constitutional lines.

In Chicago and other large cities, and in many rural communities, unusual activity of the Mormon missionaries has been noticed during the past year. As a result of this work there has recently been a decided influx of converts into the sequestered valleys of Utah, Wyoming and New Mexico, the headquarters of orthodox Mormonism. It is a heterogeneous mixture of humanity that the missionaries send back to the "fold," and a noticeable fact about the whole thing is that women predominate among the converts. Many reports from sections where Mormon missionaries have been at work show that the Latter Day Saints' emissaries have been driven out of the community, but in other instances they have gathered in converts, innocent and ignorant, beguiled by fatuous promises and deluded by specious representations regarding the religious aspect of the matter.

One hotbed of primitive Mormonism is still in existence. In the southern part of Utah the polygamous practices of the Latter Day Saints are still carried out. Here Mormons can take a new wife every month, if so minded, and nobody molests them. The settlements are very seldom visited, except by Mormons. The nearest railroad point is 200 miles distant, and no stage line traverses the 100 miles of territory over which the orthodox settlements are scattered. The only regular connection this community has with the outer world is an old Indian who brings the few letters that are written and takes them out. It is without exception the most heaven-forsaken country the eye of man ever rested upon. In some sections the alkali element prevails to such an extent as to clean the ground of the scantiest vegetation. Wide, smooth plains stretch out before the eye, white in the distance like snow-banks. In other places the alkali is so strong that the earth when wet rises like bread under yeast.

St. George is the mecca of this district, where the seal of the Mormon church is kept. Here, too, is a temple. Elders preside, who keep strangers at a distance and compel hard-working wives to uncomplainingly accept their wretched fate. These elders usurp the functions of law and order, and their word is final. Church matters govern everything. Stock raising and alfalfa farming are the industries pursued.

It is in the temple of this law-defying community that real Mormonism is still rampant. When a woman convert is accepted she is taken to the temple, washed in a tub repeatedly, arrayed in white linen and a veil of muslin, and given a new name, which she must never breathe except to her husband, in the endowment house. She goes through ceremonies like degrees in a lodge. A pantomime of fire and the devil is enacted, and a startling and impressive oath never to reveal the secrets of the order is administered.

At Salt Lake City, the old center of Mormonism, the wives have not been abandoned, but they have been scattered. Formerly a number of low dwelling houses, grouped together,

ROBERTS AND HIS WIVES.

would hold the different wives of some Mormon bishop, each in separate apartments. At every addition in matrimony a new house was built. When the Government began earnest war on polygamy these structures were abandoned. But the wives were not. They were distributed here and there about the city. Each husband has his favorite wife, but secretly provides for the maintenance of all the others as well.

It is authoritatively proven that the big Mormon colonies in Mexico and Canada are being used to foster polygamy. At Salt Lake City the Mecca of Mormonism, one can learn of dozens of instances where leading Mormons during the past year have gone on journeys to these points, accompanied by young women, and have returned to live apparently in the relation of husband and wife. New cases of this kind are being constantly solemnized under the secret forms of the Mormon church in one of the four temples in Ut where "sealing" is done. The rec death of President Abraham C revealed the fact that he had ta fourth wife even after Statehood accomplished. Persons less note have also been accused of violation the law. In most instances, however, no complaints have been made, no demands for explanation, and no ecclesiastical trials. The men continue to hold their high positions in the church, and to preach. Every effort is made to shield the bigamists from the searching eyes of Gentiles outside of the fold. The Mormon officials unite in strenuously denying that there are any polygamous new marriages, but they pay no attention to the secret ways of continuing the practice.

The most ardent supporters of polygamy seem to be the Mormon women—wives of leaders, whose voices in council receive considerable weight. No woman of the days of Brigham Young could have preached a more empha sermon in favor of polygamy than of Congressman Roberts' thin during a recent address before ing of the Young Women's ment Association. She told ence that she was grieved many young women of ma age living single lives, and that the laws of the land w prevent her from taking the loved, and they should feel She said that for each of the

MAP SHOWING SPREAD OF MORMONISM.

banks. In other places the alkali is so strong that the earth when wet rises like bread under yeast.

St. George is the mecca of this district, where the seal of the Mormon church is kept. Here, too, is a temple. Elders preside, who keep strangers at a distance and compel hard-working wives to uncomplainingly accept their wretched fate. These elders usurp the functions of law and order, and their word is final. Church matters govern everything. Stock raising and alfalfa farming are the industries pursued.

It is in the temple of this law-defying community that real Mormonism is still rampant. When a woman convert is accepted she is taken to the temple, washed in a tub repeatedly, arrayed in white linen and a veil of muslin, and given a new name, which she must never breathe except to her husband, in the endowment house. ROBERTS AND HIS WIVES.

would hold the different wives of some Mormon bishop, each in separate apartments. At every addition in matrimony a new house was built. When the Government began earnest war on polygamy these structures were abandoned. But the wives were not. They

was an affinity, and if the affinity had sixteen wives she said it should make no difference when he was found.

Except in the isolated Southern Utah settlements, cases generally of new polygamy involve women of the highest character. They enter into such relations under the belief that they are obeying their religion. Young women in the Mormon church know that only a marriage in one of the temples is recognized as being divinely binding, as promised by their leaders. Marriage is comparatively easy, too, in Utah in a general way, although it is now compulsory to obtain a license from the county clerk. Ten years ago no license was required, and church officials alone performed marriage ceremonies and granted divorces. The authority to perform marriages is not confined to the high priesthood now. At least one-half of the male adult members of the Mormon church have authority to perform the ceremony.

With two sharp, clear aspects of the Mormon question the law and the public have to deal to-day—the strict observance of the law in Utah, the prevention of missionary work among the other States. This latter affair is one that is attracting general comment. All through the West Mormons are establishing missions, recruiting converts. They make religion the prominent feature of their doctrine, and, being "something new," many are attracted, and join. No matter how earnest and sincere many of these missionaries may appear plural marriages will always be condemned by true advocates of law and order.

Silkworm in Europe.

The silk worm was first introduced into Europe by two monks engaged as missionaries in China, who obtained a quantity of silkworms' eggs, which they concealed in a hollow cane, and conveyed in safety to Constantinople in 452.

Power of Cold Water.

Cold water is the greatest stimulant known to the medical profession, possessing more lasting power than the strongest brandy. It has been known to bring the pulse up to 100 from 76 in a few minutes' time.

Costly Ram.

A ram has just changed hands in Australia at 1,000 guineas.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JULY 7.....1899

It is estimated that 75,000 drummers have been thrown out of employment by reason of the industrial combinations known as trusts. Hotel proprietors in every part of the country are complaining of the loss of business consequent upon the recall of these traveling men. The railroads also feel the subtraction from their earnings. It would be interesting, if possible, to follow the results of this business change. If 75,000 drummers have been taken off the road how many other employes have been discharged by the business houses represented by these commercial travelers? How many such establishments have been closed altogether? How many persons are consequently straitened in means and what loss does that mean to dealers of various kinds? How many advertisements of various kinds have been taken out of newspapers? The recall of this army of employes is felt in all branches of business. This is aside from the question of the good or evil effect of the trusts upon production and distribution. It may be argued with some speciousness that the calling in of the drummers, the closing of stores, discharge of employes, cutting down of advertising bills, etc., enables the trusts to cheapen production. That is one of the favorite general theories of book economists, but it fails to take notice of several phases of the matter.

The school authorities of Berkely have decided to add a thorough business course to the school work of that city, and an experienced man has been employed to take charge of the matter. This is a step in the right direction, and the movement will be watched with some interest. There is nothing to prevent a municipality from extending funds in this direction, and there can be little question as to the advisability of so doing. Under existing conditions, the high schools of the State are but feeders for the University, and not one student in ten expects to take up work beyond the high school. Somewhere then, in the school life an opportunity should be given to boys and girls to take a business course, and in cities there is no good reason why it may not be made a part of the grammar school work. The high schools also offer opportunities along the same line. It is a travesty on the public school system that students are graduated after twelve or thirteen years' attendance without having acquired specific knowledge of any given subject to prove of any after value to them. They leave the grammar or high school work absolutely without preparation for any practical purpose. The Berkely experiment is in the line of progress and will some time be universally followed.

That is a strange situation in Boer land in which General Joubert, the commanding military chieftain of the Transvaal, is out in the open as a sympathizer with the Uitlanders. The General says he loves his country deeply as any other and will fight for her as patriotically as any other. Nevertheless, he holds that many of the complaints of the aliens are well taken and the course of his Government toward the Uitlanders has not in all respects been that of justice and wisdom. He insists that the franchise laws are too severe, that taxation is too heavy, that special hard-bearing regulations are unjust, and that many of the reforms demanded should be inaugurated. He winds up by declaring that but for his position he would willingly sign the reform petition calling for the repeal of the renunciation and revocation clauses, and for the lowering of the probational period for naturalization to seven years, at least. This opinion from so distinguished a man as the hero of Majuba Hill, will have a powerful influence in preventing war with England, as it may be the reason for the recent declaration of President Kreuger, that he is ready to grant further concessions, and to again confer with English representatives with a view to adjusting the present difficulties.

Gen. Merriam's action in treating the Idaho miners to a foretaste of military repression, has alarmed the Administration. As the time of the next national campaign is drawing near, this out-cropping of the spirit of exotic militarism is unfortunate from the standpoint of partisan politics. It appears that the army officers who have assumed supreme authority in the affected district, are exercising their usurped power in the most arbitrary and autocratic manner. They have set for themselves the task of destroying labor unionism by a course of persecution that is simply subversive of constitutional liberty and rights. The proceedings are being watched with grave apprehension by Americans of all classes, and the developments of this initial experiment in military rule, unless something is done at once to end it, are sure to react to the detriment of Mr. McKinley's political hopes.

Before the war we were told that the Cubans were a band of "patriots" perfectly capable of self government and that it was our duty to go to war to see that they had it; now they are not capable of being permitted to bear arms! Dewey told us when he dickered with the rebels against Spain in the Philippines that they were more capable of governing themselves than the Cubans. Now comes General King, just from the Philippines, and a dispatch of June 26th says: "Brigadier-General King, who returned from the Philippines a short time ago, in a letter to the Milwaukee *Journal* states that the capability of the Filipinos for self-government cannot be doubted, and if given a fair start they could look out for themselves infinitely better than our people imagine. He says they rank far higher than the Cubans or the uneducated negroes, to whom the United States has given the right of suffrage".

His Handy Valise.

An old friend of the late ex-Governor Oglesby tells a reminiscence of a valise. He was traveling through the state and met the governor on the train.

When they were seated, the governor drew out a valise that had a peculiar and handy way of being opened from the top. It was made of strong leather and had tags pasted all over it.

"I carried this valise through the Holy Land," said the governor. "I think a great deal of it."

"I suppose it brings up some pleasant memories," suggested the other traveler.

"More than that," was the reply, and the keen eyes of the governor twinkled as he reached down and touched a button and the valise opened immediately, but cautiously, at the top. It opened wide enough to admit a hand and to permit it to withdraw with a black bottle in its clutch.

"This is a great valise. I can get a bottle out of it, and nobody ever sees me."

When the residence of ex-Governor Oglesby burned, all of his private papers of every sort and all of his war trophies were destroyed. A short time after he met this same peripatetic friend.

"It was a great loss you sustained, governor," he said.

"Yes, all my papers are gone. Sorry to lose them, too, and then my swords are gone too. I was sorry to lose them, and I know you'll be grieved to hear it—that valise was burned up. Yes, it's gone. Bob Ingersoll gave me that valise, and I did hate to lose it, it was so handy."—Chicago Tribune.

Clever Enough to Vote.

A keen witted fellow, despite his general ignorance, was brought down to the courthouse to receive the rights of citizenship.

"Name the capital of the nation," said the judge.

The applicant scratched his head.

"I can't just place it, judge," he said, "but you name over a few of the towns and I'll tell you when you strike it."

"Is it Chicago?" queried the judge.

"No."

"Is it St. Louis?"

"No."

"Is it Arizona?"

"No."

"Is it Washington?"

The candidate looked puzzled. He hesitated

"Say, judge," he slowly replied, "if that ain't the place it's a close shot!"

He got his papers.

Another candidate was brought in by a well known local politician.

"Let me see what you know about geography," said the judge. "Supposing you and Mr. Blank walked straight down to the lake and started across it, going due north, where would you land?"

"On the bottom," said the candidate promptly.

He got his papers too.—Cleveland Plain Dealer.

Where Soldiers Must Swim.

In the Dutch army a man must be able to swim as well as to fight. Moreover, if he is in the cavalry he must have a horse which will take a river as easily as a hunter takes a fence.

Swimming maneuvers are part of the regular drill there. Collapsible canvas boats, manned by a few oarsmen, lead the horses, so that they do not attempt to land on stone quays and other difficult points. The men swim across with their horses and on them. They do it in swimming costume and in all the accouterments of war.

There are few nautical emergencies for which the Dutch army is not prepared. Some of the officers have even reached a degree of proficiency that not only their horses and kit cross the river with them, but their pet dogs sit upon their shoulders and are borne over almost without getting wet.—Stray Stories.

Trying It on a Dog.

The sultan of Turkey is most inquisitive as to what is said and written about him abroad. Every day translations are laid before him from the newspapers of the world, and these are all closely perused. His majesty, by the way, is a bad hand at suffering.

At one time he wanted to have an aching tooth removed and dared not. Eight slaves had molars drawn out in his presence that he might have an opportunity of judging the extent of suffering entailed, and finally the sultan decided that he would rather bear the pain than undergo such an ordeal.

Cleaning the Chimney.

An easy way to clean a chimney of soot has been discovered by a Maine man. Instead of going to the top of the chimney and probing with rods, he begins at the bottom. There an opening is made, and he fires upward a revolver charged with a blank cartridge. The concussion, it is said, will clean out the soot. He also claims that the burning of a piece of zinc in a stove will clear the stove and its funnel of soot.

The Paste Didn't Hold.

"I have shown this to a jeweler," said the young woman, flinging the engagement ring scornfully at his feet. "Did you think," she asked, with crushing sarcasm, "you could cement our affection with paste?"

"So!" hissed the young man, folding his arms and gazing at her with equal scorn. "It's paste, is it? And yet you are not stuck on it!"—Chicago Tribune.

Verdict as Rendered.

"Gentlemen of the jury," asked the clerk of the court, "have you agreed upon a verdict?"

"We have," replied the foreman. "The verdict of the jury is that the lawyers have mixed this case up so that we don't know anything at all about it."—Philadelphia North American.

When He Was Fond of It.

Quinn—Are you fond of Welsh rabbit?

Topliff—Before eating, while I am eating and for a very short time after.—Boston Transcript.

A man always rises in his own estimation when he gets on familiar terms with a person of whom he once stood in awe.—Atchison Globe.

The goldfish is a great coward, and a tiny fish with the courage to attack it can frighten it almost to death.

The Mystery of Warts.

When a youngster of 10 years, I was visited by a plague of warts. From my earliest recollection I had had on my middle finger an old daddy wart, but at the age stated this had multiplied to 40 or more, one being on my lip and one on my chin. I was considerably worried over my growing family of excrescences, and one day a woodchopper in my father's employ, who acted queerly, never wearing a hat, for instance, said that he could take the warts away with him. I was quite willing to have him try, and he took me off to a quiet spot under a willow tree, from which he cut a number of small branches, and these he cut again into little bits of an inch in length, making a notch in each one, and this notch he set down over each wart, having at last a collection of 40 or more of these little notched sticks. These he put into his pocket, saying that the warts would go away.

I could never say just when the prophecy was fulfilled, but within six weeks there wasn't a wart on my face or hands, and there has not been one since that time. What I want to know now, as I did then—and the conjurer would not tell me—is what did it. I have spoken to many doctors about it, but they merely laugh, as though I was giving them a "pipe talk," and yet the warts went away, and all the medicine I had ever tried on them had no effect whatever.—New York Sun.

His Opinion.

The woman who speaks her mind freely on all occasions had been telling the sad eyed stranger to whom she had been introduced what she thought of Mormonism. Her remarks were eloquent and acrimonious. She had a flow of language which never failed and was fortified with facts which could not be refuted. He listened patiently till she had finished and then said meekly, "Yes, madam; I'm a Mormon myself."

"I don't care," she exclaimed, though her face reddened a little. "A man ought to be satisfied with marrying one woman to wait on him and be browbeaten by him."

"I don't browbeat anybody," he responded reproachfully.

"It doesn't make any difference whether you do or not. No man has any business to marry two wives."

"I agree with you perfectly, madam."

"Ha! You admit it."

"Yes'm; no man ought to have two wives. If he takes more than one, he ought to stick to odd numbers and have three, five or seven. It obviates the necessity of a man's mixing in. In case of a family dispute it provides for a deciding vote and prevents a deadlock."—Washington Star.

Fresh Laid.

A lady who did not appear to be in a very good temper bounced into a certain grocer's shop the other afternoon.

"Is your father at home?" she asked of the small boy behind the counter.

"No'm," was the reply. "Anything I can do for you?"

The lady hesitated before remarking.

"I've called to complain about the eggs I obtained from your father this morning. He told me they were fresh laid, and"—

"Did he get 'em from the window?" asked the youthful salesman.

"Yes."

"Then it's all right, 'm—they're fresh laid."

"But I say they are not."

"You'll excuse me, 'm," said the youngster, endeavoring to be polite. "But I ought to know. They came in a crate yesterday. I unpacked every one on 'em an laid 'em there in the window only this morning. So I knows they're fresh laid, and that settles it."—London Answers.

List of Delinquent Purchasers of School Land in Inyo County, Showing the Amount Due January 1, 1899.

NOTICE is hereby given that I shall commence suit to foreclose the interest of the following-named purchasers in the lands herein described, unless the amounts due thereon are paid in fifty days after the date hereof.

Dated June 29th, 1899.

WM. D. DERY, District Attorney of Inyo County.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of Section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said Section 2324 of the Revised Statutes of the United States, and under Section One of an Act entitled "An Act relating to the working, rights of way easements and drainage of mines in the State of California," approved March 31, 1891.

FRANK HARRIS.

Dated January 13, 1899.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Jedediah S. Collins, deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said decedent, for the purposes therein set forth,

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated June 15th, 1899.

P. H. MACK, Attorney for Administrator.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

ARCHIE E. FITZGERALD, *Plaintiff*,
vs.
ROSE FITZGERALD, Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. Robert O'Neal and P. W. Forbes, Attorney for Plaintiff.

THE People of the State of California send Greeting to Rose Fitzgerald, Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 20th day of April, A. D. 1898.

D. J. HESSION,
[SEAL] Clerk.
By C. N. ROSE, Deputy Clerk.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this Fourth day of May, A.D. 1899.

Methodist Church.

Services for Sunday, July 9th, 1899.

Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m.

The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

MONDAY, July 3, 1899.

People vs. Hung Yung—Defendant appeared for arraignment and plead not guilty. Trial set for July 25th and a venire of twenty-five jurors ordered drawn returnable on that day.

Almost everybody from Big Pine joined in the Bishop celebration.

George Wood made his first visit to Bishop on the Fourth and was considerably interested in the metropolis of his native county.

Mr. and Mrs. J. J. Gunn and Miss Helen Gunn left on last Tuesday's train for San Francisco, where they will spend the summer.

Dr. J. S. McQueen expects to arrive here this evening and will remain for a couple of weeks. Bring along your superfluous achers and he will get an extraction that will beat sugar hollow.

Ottiwell Hampton, accompanied by his daughter, Miss Lesta Hampton, came down from Bishop Wednesday. Miss Hampton will visit here a week or more the guest of Mrs. George Willis.

We are indebted to Mrs. P. W. Forbes, for a choice lot of raspberries and blackberries and a beautiful bouquet of sweet-peas. These are the result of only a few years cultivation of their town property and prove again the fertility of our soil.

Miss Wilkins, the teacher of the Indian-school, Miss Lilian Travis and J. D. Lewis, Esq., started last Sunday for the meeting of the N. E. A. at Los Angeles. They went by Kearsarge pass and Sequoia Mills to Visalia, where they will take the train.

All visitors from Inyo to Los Angeles should bear in mind that Mrs. Mary Fitzgerald, widow of Frank Fitzgerald, has rooms to rent at 119 A. North Olive street. The situation is a pleasant one and the furnished flat has every modern convenience and improvement.

George Montgomery and L. F. J. Wrinkle returned Wednesday from a trip to Ballarat. Mr. Montgomery says that in the Radcliffe mine, owned by Godsmark & Harrison there are 60,000 tons of ore in sight between the 200-level and the surface of an assay value of twenty dollars per ton.

The Board of Supervisors completed their examination of the Assessment roll at noon to-day. There will be no raises in the various assessments by the Board and Assessor Yandell was highly complimented on his efficiency. The roll will be held open for a few days longer to give anyone who may desire it an opportunity to appear and ask for a reduction.

A stray horse was rescued among the rocky cliffs of Mt. Kearsarge last Sunday. The animal had been turned loose from the top of the mountain the preceding Sunday, and instead of following the trail around, he had attempted to make a short cut down the mountain side to water. His feet became wedged in the rocks, and he was a pitiful looking object when finally extricated and led down to the creek.

On Monday a band of 1700 goats belonging to the Carey brothers of Omaha, Nebraska, were driven through our town en route for Reno, Nevada, from which point they will be shipped to Omaha. The Carey brothers, who were with them purchased them in Inyo county.—*Chronicle-Union.* The same parties bought 75 head of mules from N. B. Hunewell and eight head from G. B. Day for shipment to Omaha.

Among those from our end of the Valley who were seen in Bishop Tuesday were the following: Misses Ida Kispert, Birdie Levy, Maud Cook, Mrs. Anna Mate, Mr. and Mrs. Irv H. Mulholland, Messrs. Ben Yandell, D. J. Hessian, W. Dehy, W. Bunney, John Kispert, Paul Mairs, Joe Levy, Charles Mulholland, George Wood, George Willis, L. Porter, Louis Schabbell and Fred Schabbell, Mr. and Mrs. P. M. Laberge.

THE FOURTH.

The Day is Fittingly Obesrved Throughout the County.

The people of Bishop proved as good as their word when they promised a great and glorious celebration of the Fourth of July at their town. One and all, big and little, contributed their share toward making the day a memorable one. The National colors decorated the business houses and adorned all the residences, and the streets had been well cleaned and sprinkled. The literary exercises, which were kindly delayed until the arrival of the passengers on the north bound train, were held in Munzinger's grove. They conristed of our national songs, a stirring address by Rev. Mr. Hazlett in which the deepest reverence and devotion was paid our country's flag and all it represents. James G. Dehy read that masterpiece of the English language and landmark of English and American history, the Declaration of Independence. Miss Minnie Allen rendered a vivid description of the signing of the same. With the singing of America the audience dispersed to refresh the inner man and prepare for the afternoon's sports. This matter of dining was by no means easy as there were about a thousand people to be fed at the three hotels. The Bonifaces were equal to the occasion however and while it took time to wait on such a crowd they were all bountifully supplied. The sports began at 1:30 p. m. and continued until 5. The first event was a bycicle parade drill, participated in by eight young ladies and as many young gentlemen, with J. B. Collett as commander. The Bishop brass band played all the afternoon and made good music, too. Among the athletic contests the following were some of the winners:

Relay race, W. Trickey, Allie Shelly and —Stewart.

Three-legged race, Les. Horton and Allie McNally.

High jump, W. Hanby.

Sack race, 50 yards, Jas. Dehy.

Putting the shot, W. Hanby.

Bycicle race ⅛ mile, 2 in 3, Ezra Buckman 1st, J. B. Collett 2nd.

100 yard dash, W. Hanby 1st, Bert Ober 2nd.

Pole vault, Otto Bradshaw.

120 yard hurdle race, W. Hanby.

Bycicle race for girls, Ethel Powers 1st Mrs. Munzinger 2nd.

Running broad jump, W. Hanby 1st, Allie McNally 2nd.

In the evening a grand ball was given and a display of fire-works. Music was furnished in two halls to secure comfortable dancing. Socially, financially and morally the result of the Bishop celebration was a good one.

On the eve of the Fourth the citizens of Independence hustled together $60 and an impromptu program. The result was quite a gathering from the neighborhood, a gladdening of the hearts of the children and a twinkling of heels to the strains of Matlack's Orchestra in the evening. Following are the winners at the afternoon's sports:

Barrel race, 100 yards,—A. E. Sutherland.

Foot race, 100 yards,—Norm Mairs.

Running broad jump—Ivan Bunney.

Standing broad jump—Ivan Bunney.

Foot race, girls under 15, 50 yards—Edith Gorman.

Foot race, boys, 50 yards,—Howard Mairs.

Standing high jump—Lester Laird.

Indian pony race, 400 yards,—John Symmes.

Vaulting—Dave Holland.

Lifting heavy weight—Lester Laird.

Long throw, base ball— Julian Eibeshutz.

Foot race, small boys—Dave Willis.

Horse race, 400 yards—Norm Mairs.

Foot race, little girls under 8,—Nellie Mairs.

Putting the shot—Lester Laird.

If our people can get up such a lively Fourth on but twelve hours notice, what could they not have done in as many days?

At Lone Pine and Ballarat barbacues, horse races, grand balls etc., were a part of the day's proceedings.

Real Estate Transfers.

The following deeds have been recorded since June 30, 1899.

No transfers recorded.

LEGAL.

Executor's Sale.

Administrator'c Sale.

Notice is hereby given, that in pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the tenth day of June, A. D. 1899, in the matter of the estate of Luther Clark, deceased, the undersigned the Administrator of the said estate, will sell at public auction to the highest bidder for cash, lawful money of the United States, and subject to confirmation by said Superior Court on Monday the twenty fourth day of July, A. D. 1899, at two o'clock p. m., at the Court House door and in front thereof, in the town of Independence, County of Inyo, State of California, all the right, title, interest and estate of the said Luther Clarke at the time of his death, and all the right, title and interest that the said estate has, by operation of law or otherwise, acquired other than, or in addition to that of the said Luther Clark at the time of his death, in and to those certain mines, mining claims and mining interests, to wit:

An undivided one third interest of, in and to that certain mining claim, situate, lying and being in the County of Inyo, State of California known and designated as the "Tip Top" Mine and Mining Claim.

Also, an undivided one-third interest in and to that certain mine and mining claim situate, lying and being in the County of Inyo, State of California known and designated as the "Three Formation" Mine and Mining Claim.

The said mines and mining claims are situated in the Sierra Nevada mountains, about seven miles from Round Valley, in a Westerly direction.

Terms and conditions of sale: Cash, lawful money of the United States; ten per cent of bid payable at the time of sale, and the balance upon confirmation of sale by said Superior Court. Deed at the expense of purchaser.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

COMMISSIONER'S SALE.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

William Ritchey, Plaintiff, vs. James Prewitt, Clinton Johnson and A. M. Cates, Defendants.

UNDER AND BY VIRTUE OF AN ORDER of sale and decree of foreclosure issued out of the Superior Court of the County of Inyo, State of California, on the 17th day of May, 1899, in the above-entitled action, wherein William Ritchey, the above-named plaintiff, obtained a judgment and decree against defendant, James Prewitt, on the 17th day of May 1899, which said decree was on the 20th day of May, 1899, recorded in Judgment Book No. 2 of said Court at page 112, I am commanded to sell, and by said decree the same is directed to be sold, all those certain premises situate, lying and being in the County of Inyo, State of California and bounded and particularly described as follows, to wit: The Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 1, in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description.

Also the Bonanza quartz mining claim or mine, recorded as the Bonanza Mine No. 2 in the mining records of Inyo County, State of California, to which records reference is hereby made for more particular description, together with the engine, boiler, and all improvements upon aforesaid Bonanza No. 1 and Bonanza No. 2. Together with all and singular the tenements, hereditaments and appurtenances there unto belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents issues and profits thereof.

NOTICE IS HEREBY GIVEN that on Saturday, the 8th day of July, 1899, at the hour of 10 o'clock a. m. of that day, in front of the Court House of said County of Inyo, at Independence in said County, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to satisfy plaintiff's judgment, with interest thereon and costs, to the highest and best bidder, for cash, in gold coin of the United States.

Notice of Forfeiture.

To CHARLES McKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st. 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

SIXTY MILES AN HOUR.

A steam motor car, for use on the railroads, recently made a trial trip, going at the rate of sixty miles an hour. This will probably be as much of a record beater as Hostetter's Stomach Bitters. It cures indigestion, constipation, nervousness, liver and kidney trouble.

People's front porch indicate a good deal about what kind of folks they are.

SHAKE INTO YOUR SHOES.

Allen,s Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, callous and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

It is some consolation to know that no one has real good friends without some enemies.

Don't Accept a Substitute

When you ask for Cascarets, be sure you get the genuine Cascarets Candy Cathartic. Don't accept fraudulent substitutes, imitations or counterfeits.

It never gets over seeming remarkable what a big circulation a vast amount of bad literature has.

Your Grocer sells Kleeno Washing Powder.

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Ask for Kleeno Washing Powder.

Blowing a Cork Into a Bottle.

Ask some of the company if they can blow a small bit of cork which you have placed in the mouth of a bottle so that it will go into the body of the bottle.

Lay the bottle on the table upon its side and place the bit of cork about an inch or less inside the open end. The uninitiated will blow until they get red in the face, and the cork will invariably come out of the bottle instead of going into it. There is a simple reason for it too. The direction of the air forced by the one blowing brings it against the bottom of the bottle. The air compresses within the bottle's walls and must find an outlet; therefore it is turned and forced out at the only vent the bottle has, necessarily blowing the cork with it. But take a common lemonade straw, place the end of it near the cork in the bottle neck, blow very gently—and the cork rolls in.

Ordering Breakfast in India.

Shortly after her arrival in India a young woman missionary was allowed to order breakfast for the household in order to test her progress in the language. She intended to ask for fresh eggs, but used the wrong words, saying to the astonished cook, "You may bring us, this morning, an old blind man, nicely boiled!"

Face to Face.

"I've got the money to back my offer," said the ponderous citizen, "and I'd give a fortune to anybody who could show me how the reduce my weight."

"And I'd do the same for anybody who would stop my hair from falling out. By the way, how did you make your money?"—Washington Star.

Bombay is one of the chief gates to India, and a lovely view of it is obtained from the sea as the vessel gradually draws near to the harbor, which puts inland, and is surrounded by the town.

"Pride Goeth Before a Fall."

Some proud people think they are strong, ridicule the idea of disease, neglect health, let the blood run down, and stomach, kidneys and liver become deranged. Take Hood's Sarsaparilla and you will prevent the fall and save your pride.

BACK TO LIGHT AND LOVE.

I.

THE silent stars looked down through a clear, still night upon a host of sleeping men. The brigade had advanced by forced marches, and now lay within two miles of the dervish camp. To-morrow's dawn would see the assault. Two officers stood together, talking in low whispers, for it was of the utmost importance that the enemy should be taken by surprise, and the orders as to silence were strict.

"Buck up, old chap; you'll come through all right. And if not, what does it amount to? You've got no women folk to bother about."

"No, thank heaven! It is in times like this that one is glad never to have married—like poor old Harcourt."

"Why poor?"

"I was thinking of his wife. I shouldn't care to be tied to an ugly woman myself."

"That's all rot, Hamilton," retorted the other, "I don't believe it matters a row of pins, so long, of course, as she isn't repulsive or underbred?"

"Think so?"

"Yes. The most unlikely women sometimes attract most."

"Well, old chap, I'm precious thankful I've no thoughts of woman to bother me to-night. I shall try for a lead to-morrow, even if I have got the route; we've a good chance of being first into the zareba."

"We will give you a race for it, anyhow. But we'd better try and get a sleep, for this awful heat takes it out of a fellow."

The two went to their separate posts. And as he lay, sleepless, the thought came to Hamilton that it was somewhat lonesome to think that no woman's eyes would fill at the news of his death, and he looked upward at the stars above him, wondering where his soul would be to-morrow.

The shadow of death lay upon him, as, at times, it does upon the bravest soldier; he would fight none the worse for it in the morning.

* * * * * * *

The sun had risen.

In the previous short half-hour of dawn the assault had been delivered; the dervish forces had been driven from their intrenchments, and now the black, grinning "Gippys" were fraternizing and triumphing with their laughing and chaffing white comrades.

Backward, across the half-mile of plain, the surgeons were busy. Away to the southward could be heard the sounds of pursuit, as the British Lancers chased the flying Ragara.

* * * * * * *

A field hospital at the front is not a pleasant place, neither can it be described in cold black and white. War correspondents, as readers of the dailies have no doubt noticed, judiciously avoid more than the merest mention of such places.

There were some ghastly cases, and both surgeons and assistants had been worked hard. But the pressure was over, and at last there was time to attend to the wounds which were not deadly.

"Now, Hamilton, let's see!" said Surgeon Major Murphy, aproaching an officer who lay motionless on a stretcher—who had so lain half an hour at least. The doctor looked his patient over, gave a low whistle, and beckoned to one of the orderlies, who at that moment turned his head.

"Look, see, Dawkins, here's a bad case! He must go back to hospital!"

"Bad as that, doctor?" asked the motionless man, faintly.

"'Tis so! Now you keep quiet."

Lieut. Hamilton had been totally blinded by the explosion of a shell in an earthwork as, well in front, he was

HER VOICE WAS SOFT AND MUSICAL.

leading his company. He was sent to the rear to the hospital—and Sister May was given charge of him.

He had not much pain, only he was blind. Treatment appeared to have no effect on this; it seemed likely to be a long business. The days began to hang heavily. Then came the old story: "Love in idleness."

II.

Hospital sister do not cease to be women when they take up their work. Sister May was just as susceptible to love as though she had been a silly young thing of 18, though, in fact, she was 10 years older. And he? Pity being akin to love, the recipient of pity runs a double risk. Her voice was soft and musical, her touch was soothing, her care of him seemed first motherly, then sisterly, and then——

So it was that by easy stages they drifted into that strange attraction which the world calls "love."

And her one fear was that some day he might see again. The surgeon said it was just possible, and was advising a consultation with the world-famed Prof. Augenwirte of Graefrath. She prayed against the possibility, for in her own eyes she was plain—nay, ugly past redemption. Yet, though she could not realize it, her too large mouth and prominent teeth, her irregular nose, and all the fancied imperfections of her face mattered little; for her large gray eyes were soft and full of animation, her skin was like velvet, her figure and carriage perfect. But, woman-like, she could only dwell upon her facial defects, and was full of apprehension lest some day his sight should be restored, and, seeing her features, he should loathe her.

Her cousin Kate, a sister nurse, seeing how things tended, chaffed her unmercifully.

"Now, May, I thought you had long ago sacrificed your life to nursing; and yet the first good-looking young lieutenant——"

"He will always want nursing, Kate," she faltered, in excuse.

"Ah! but suppose Dr. Haggerty is right, and his sight comes back; he won't want any nursing then."

Sister May did not answer.

A week later Hamilton left the hospital for Graefrath, full of hope. The night previous to his departure they came to an indefinite understanding and though she would not give an unqualified answer to his pleadings, she had not the courage to stop him altogether. In recklessness she allowed

"MY DARLING, I HAVE COME FOR YOU."

herself to drink in the sweets of his passionate words; they would at any rate be a life-long remembrance, even though on his return he should cast her off.

The operation was successful beyond his hopes, and in a few weeks he was rushing back to his love—eyes shaded, it is true, but with the certainty that in a short time his sight would be fully restored.

"I want to see Miss Johnstone," he said to the orderly at the hospital entrance.

"Miss Johnstone, sir? Which?"

"Why, the nurse."

"Yes, sir; but there's two of them."

"Well—er—she's very good-looking. I did not know there were two.

"Oh, yes, sir, there's two. But I know the one you mean now."

And he was shown into the waiting room.

"Gentleman wants me? Who can it——" Then the door opened. He started forward.

"My love!" he whispered. "I knew you were beautiful. I have come back to claim you."

Sister Kate drew back, startled. For the moment she could not imagine who this man was with the shade over his eyes could be. In that moment he had drawn her to him, and was wildly pouring out his love.

In that moment also the door again opened, and Sister May, looking in, saw all.

She faltered, and stepped back, the beating of her heart choking her for the minute.

"Stop, sir!" said Kate, regaining her senses. "You must be Mr. Hamilton?"

"Yes," he answered, amazed, releasing her.

This frivolous little voice was not that of his love. This over-frizzed hair, these shallow eyes were not beautiful at the second glance. What had he done?

"Are you not Miss Johnstone?"

"Yes, Kate Johnstone."

"Kate? And is your sister——"

"Cousin."

"Is she not here?"

"Yes," said Kate, with a smile, "Stay here. I will fetch her."

"Why, May, you there?" she whispered, on finding her at the threshold, and wondering if she had seen or heard. "Here is Mr. Hamilton. Come."

"No, never! I will never see him!" she panted, between her heart beats.

"Nonsense! He has come back on purpose for you, and his eyes are all right."

"Yes, and he expects to see a pretty girl like you!" retorted May, bitterly.

"Look here, May, don't you be a fool! Go in; he is waiting."

But Hamilton had already grown impatient. The door opened and he saw them both.

"Here she is," said Kate.

"Ah!" he said.

Sister May looked down, trembling.

"Are you May Johnstone, my dear nurse?" he asked, his voice full of tenderness and love.

"Yes," she whispered.

Kate had disappeared; they were alone.

"My darling, I have come for you," he said.

"But—you can see now?"

She looked up recklessly and their eyes met.

"Yes, thank God; I can see my love!"

Then she surrendered herself.—Chicago Journal.

There are some men who never show a willingness to help a man in trouble unless his house gets on fire.

Time seldom adds to the value of pictures painted by Hoyo.

RAN ON THE ROCKET.

Edward Entwhistle, the First Passenger Engineer, Is 84 Years of Age.

Edward Entwhistle, who has recently celebrated his 84th birthday at the home of Mrs. Thomas O'Dea, his grand daughter, in East Des Moines, Iowa, has seen the great railroad systems of the world develop from their very beginning. He was the first railroad passenger engineer. Despite his age he is hale and hearty and looks confidently forward to several years of life.

ENTWHISTLE AND THE ROCKET.

Mr. Entwhistle as a boy of 14 held the throttle on the first trip of the Rocket, Stevenson's pioneer engine.

Edward Entwhistle was born March 24, 1815, at Tilsey's Banks, Lancashire, England, and while a mere boy was apprenticed to learn the machinist's, or, as it is known in England, the engineers' trade. The Rocket was built in the shops in which he was employed and the interest which he took in the machine attracted the attention of Stevenson, who recommended that he be permitted to ride on the engine on its first trip over the Liverpool and Manchester line, for which it was constructed. Young Entwhistle made the trip and on the return journey he held the throttle. This was the beginning of his career as a locomotive engineer. He ran the Rocket for two years, making two round trips between Liverpool and Manchester, a distance of thirty-one miles each way. The work wore on him and he was obliged, because of nervousness, to resign. Stevenson then secured for him a place as second engineer on one of the duke of Bridgewater's coasting steamers. He came to America in 1837 and became engineer on the Troy, a Hudson river steamer. Soon after the engineer of the famous John Bull locomotive was injured and Entwhistle took his run. In 1844 he came to Chicago and at different times held positions as stationary engineer, lake steamer engineer and locomotive engineer. He came to Des Moines in 1856 and became engineer of Shepherd & Perrier's flouring mill. Later he became engineer of the Ankeny mills, a position he held for twenty-two years.

When Mr. Entwhistle visited the World's Fair in Chicago he spent nearly all his time for three days standing beside the Rocket, which was on exhibition. He is a remarkably modest man and did not make his identity or his early connection with the engine known. He even pledged the members of his family not to "give him away," but he derived great pleasure from gazing at the pioneer locomotive and comparing it with the modern machines which were on exhibition in the same building. The picture which accompanies this sketch is from a photograph taken about the time of Mr. Entwhistle's visit to the World's Fair.

A RED HENRY WARD BEECHER.

Chief Half-Moon Bore a Striking Resemblance to the Noted Preacher.

Chief Half-Moon of the Sin-Ka-Use or Columbia Indians, is dead. Half-Moon, better known as Moses to the white people in the State of Washington, had three claims on fame. One, and to him the most important, was that he bore close resemblance to Henry Ward Beecher, the facial likeness being startlingly similiar. Another was that he was a first cousin to the redoubtable Chief Joseph of Nez Perce reputation, and masqueraded a great deal in the guise of a good Indian. Half-Moon's third claim to fame rested on the assertion of his kinsmen that he was between 100 and 200 years old. This latter claim, however, seems to be merely a bit of Indian hyperbole. Pioneer residents of Washington put Half-Moon's age at 75 years.

CHIEF HALF-MOON.

Half-Moon came of bad parentage. His father was a bloodthirsty, murderous savage, and Half-Moon inherited all of his worst traits. Previous to the subjugation of his tribe he was continually at war with the whites, and participated in many murders and brutal massacres.

Personally, Moses was a commanding figure, standing nearly six feet in hight, and weighing about 250 pounds. He was by far the biggest Indian in the bunch and strong as an ox. His strength had, however, become merely a tradition, for, since he became the petted ward of the government, with its $1,000 annuity, he had no ambition or excuse to do aught but live in idleness and splendor, preferring only to take up the white man's burden in the shape of bearing a load of Kentucky rye under his belt. These occasions, however, were only periodical with the aged chief in his later years, as he had long been a sufferer from Bright's disease, which finally carried him off.

Russia has seventy platinum mines.

TWO GRATEFUL WOMEN

Restored to Health by Lydia E. Pinkham's Vegetable Compound.

"Can Do My Own Work."

MRS. PATRICK DANEHY, West Winsted, Conn., writes:

"DEAR MRS. PINKHAM:—It is with pleasure that I write to you of the benefit I have derived from using your wonderful Vegetable Compound. I was very ill, suffered with female weakness and displacement of the womb.

"I could not sleep at night, had to walk the floor, I suffered so with pain in my side and small of my back. Was troubled with bloating, and at times would faint away; had a terrible pain in my heart, a bad taste in my mouth all the time and would vomit; but now, thanks to Mrs. Pinkham and her Vegetable Compound, I feel well and sleep well, can do my work without feeling tired; do not bloat or have any trouble whatever.

"I sincerely thank you for the good advice you gave me and for what your medicine has done for me."

"Cannot Praise It Enough."

MISS GERTIE DUNKIN, Franklin, Neb., writes:

"I suffered for some time with painful and irregular menstruation, falling of the womb and pain in the back. I tried physicians, but found no relief.

"I was at last persuaded to try Lydia E. Pinkham's Vegetable Compound, and cannot praise it enough for what it has done for me. I feel like a new person, and would not part with my medicine. I have recommended it to several of my friends."

"CARTHAGINIAN OF MAINE."

How Hannibal Hamlin Won the Title in the Maine Legislature.

Among the many stories of Hamlin's early experiences in the Maine legislature none is more animated than his tilt with John Holmes, interesting, besides, because it gives the origin of "the Carthaginian of Maine," a name that stuck to Hamlin through life. Holmes had been in the United States senate, and at this particular time, writes General Hamlin, a member of the state house of representatives, was endeavoring to domineer over it.

Hamlin disputed the leadership with him, and Holmes attempted to crush his young opponent by coarsely ridiculing his swarthy complexion. Instantly Hamlin jumped to his feet and, pointing his finger at Holmes, retorted: "If the gentleman chooses to find fault with me for my complexion, what has he to say about himself? I take my complexion from nature. He gets his from the brandy bottle. Which is more honorable?" This retort was greeted with great applause and cries of "Go on!"

Hamlin then continued, pointing his finger at Holmes: "I will also tell the member from Alfred that he is more conspicuous for trying to run dryshod over young men than for trying to encourage them. But as long as they are true to themselves and to nature and as long as the member from Alfred sticks to the brandy bottle they need not fear him." As soon as the cheers of the house could be sufficiently silenced Holmes retracted his words and made a manly apology. "The young Carthaginian routed the old Roman" was one humorous comment on the incident, and from that time Hamlin was thus frequently characterized.—Lewiston Journal.

The Trials of a Writer.

Why should the young, aspiring author be discouraged or become weary in well doing? We have a letter from one of them in which he says:

"Five years ago I submitted a short story to a certain magazine. It was returned immediately. I sent it to another. It came back. All told, I have sent that same story to 27 magazines, great and small. It has been five years on the road, going and coming. But recently I sent it to the magazine that first declined it, and it was accepted, with thanks and a satisfactory check! Of course in that time the old editors of this certain magazine either died or resigned, and it must have fallen into the hands of some new man, who had not seen it before. But in five years' time the postage on that manuscript amounted to $17.50! I got thrice that figure for it at last, so I am not grumbling!"

One will gather from the above that the "literary business" means this, if it means anything: "Patience and shuffle the cards!"—Atlanta Constitution.

Saying His Prayers.

The following story of the old king of Hanover is told in "Foreign Courts and Foreign Homes" by A. M. F.:

"My father went to the door of the royal apartments (with some dispatches from London), knocked loudly once, twice. No answer. He knocked louded and louder. The door was opened, and a page came out, and inside the king's voice was heard, using oath after oath, winding up by asking: 'What the blank blank blank did you want?'

"The page, with a frightened look on his face, took the dispatches, saying, 'His majesty was not to be disturbed, as he was saying his prayers.'"

Generous Young Man!

"It is only right that I should tell you," she said, "that father has lost all."

"Not all!" he exclaimed.

"Yes, all," she asserted.

"No," he said, firmly, "not all. You are still left to him. I could not be so cruel as to add to his misfortunes. Tell him, tell him from me, that my generosity impels me to leave him what little lies in my power."—Chicago Post.

The First Silk Hat.

An old journal, dated Jan. 16, 1797, gives the following amusing account of the wearing of the first silk hat in London: "John Hetherington, haberdasher, of the Strand, was arraigned before the lord mayor yesterday on a charge of breach of the peace and inciting to riot, and was required to give bonds in the sum of £500. It was in evidence that Mr. Hetherington, who is well connected, appeared on the public highway wearing upon his head what he called a silk hat (which was offered in evidence), a tall structure having a shiny luster and calculated to frighten timid people.

"As a matter of fact the officers of the crown stated that several women fainted at the unusual sight, while children screamed, dogs yelped, and a younger son of Cordwainer Thomas, who was returning from a chandler's shop, was thrown down by the crowd which had collected and had his right arm broken. For these reasons the defendant was seized by the guards and taken before the lord mayor. In extenuation of his crime the defendant claimed that he had not violated any law of the kingdom, but was merely exercising a right to appear in a headdress of his own design—a right not denied to any Englishman."

The Vanishing Weasel.

As I lay stretched on the bank at the foot of a great maple I saw a weasel run along in the brush fence some distance away. A few seconds later he was standing on the exposed root of the tree kindly a yard from my eyes. I lay motionless and examined the beautiful creature minutely, till suddenly I found myself staring at the smooth, greenish gray root of the maple, with no weasel in sight.

Judging from my own experience, I should say that this is the usual termination of any chance observations of either weasels or minks. Occasionally they may be seen to dart into the bushes or behind some log or projecting bank, but much more frequently they vanish with a suddenness that defies the keenest eyesight. In all probability this vanishing is accompanied by extreme rapidity of motion, but if this is the case then the creature succeeds in doing something utterly impossible to any other warm blooded animal of its size.

Mice, squirrels and some of the smaller birds are all of them swift enough at times, but except in the case of the humming bird none of them, I believe, succeeds in accomplishing the result achieved by the weasels.—Popular Science Monthly.

It Proved a Boomerang.

There can be no doubt that the war indemnity paid by France to Germany after the six weeks' war, was a boomerang to score up against Bismarck. The good it did to France is inestimable. Prior to the war there was an enormous amount of money locked up in the form of small savings. The appeal of the government to the people set this sum into profitable motion, and, to the amazement of the world, France paid off her creditor in less than half the stipulated time. This gave a vast impulse to business enterprise of all kinds, and since then France has steadily become more wealthy. In Germany the effects were less beneficial. The huge influx of gold sent up prices with a rush. A mania for speculation set in, followed by the inevitable crisis. Most serious of all, however, was the unexpected discovery of France's strength. Bismarck intended to cripple her forever, but he only revealed her immense power, and this, of course, necessitated the gigantic military burdens which year by year weigh more heavily upon Germany.—Cincinnati Enquirer.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

Easy Plan.

"That young man," said the citizen, pointing to a sharp featured youth across the street, "has made fame both for himself and this his native village."

"As to how?" asked the stranger.

"Simply by sending telegrams of congratulation or condolence, as the occasion called for, to prominent persons."—Indianapolis Journal.

A writer in The Electrical Review inclines to the opinion that as the electric motor superseded the horse car so the perfection of paving will ultimately do away with rails and current altogether and automobile vehicles rule supreme.

DYSPEPSIA

"For six years I was a victim of dyspepsia in its worst form. I could eat nothing but milk toast, and at times my stomach would not retain and digest even that. Last March I began taking CASCARETS and since then I have steadily improved, until I am as well as I ever was in my life."
DAVID H. MURPHY, Newark, O.

THE WOMEN SAY

There is No Remedy the Equal of Pe-ru-na in All Their Peculiar Ills.

MISS SUSAN WYMAR.

Miss Susan Wymar, teacher in the Richmond school, Chicago, Ill., writes the following letter to Dr. Hartman regarding Pe-ru-na. She says: "Only those who have suffered with sleeplessness from over-work in the schoolroom, such as I have, can know what a blessing it is to be able to find relief by spending a couple of dollars for some Pe-ru-na. This has been my experience. A friend in need is a friend indeed, and every bottle of Pe-ru-na I ever bought proved a good friend to me."—Susan Wymar.

Mrs. Margaretha Dauben, 1214 North Superior St., Racine City, Wis., writes: "I feel so well and good and happy now that pen cannot describe it. Pe-ru-na is everything to me. I feel healthy and well, but if I should be sick I will know what to take. I have taken several bottles of Pe-ru-na for female complaint. I am in the change of life and it does me good."

AN OLD TALE RETRIMMED.

At sweet sixteen the maiden fair,
With many lovers busy
Will tilt her nose up in the air
And ask with quite a haughty stare,
"Who is he? Oh, who is he?"

At twenty-five she's more subdued—
With sweethearts not so busy—
Still doubtful men must not intrude.
She asks—with no wish to be rude—
"What is he? Oh, what is he?"

But at the age of thirty-five,
With hope deferred quite dizzy,
She works on quite a different plan
And cries when hearing of a man—
"Where is he? Oh, where is he?"
—New York Herald.

Barnaby's Escape.

NEVER had a nephew better reasons for striving to keep on good terms with his uncle. There was the profitable business in the city which John Goldby had promised should be his when he retired, and there was Bessie. Barnaby Morton thought a good deal more of his pretty cousin than of the business—naturally, for the business had no mind to change, and Bessie had.

They were not engaged. John Goldby, perhaps, for reasons of his own, possibly in Bessie's interest, had forbidden him to ask the momentous question until she had seen a little more of the world.

"There's plenty of time for that," he said, and refused to listen to argument. Had his answer been favorable, most likely Bessie would have laughed in her lover's face—they had so long been as brother and sister. But she liked him better than any one else, she had told him so.

Such was the situation when Barnaby was requested to look after his uncle's house during the absence of the family at Brighton.

"I don't want you to neglect the business, you know," John Goldby exclaimed. "You can leave an hour sooner, then you'll get here at 6. Don't be absent at night on any account; and if you go out for a walk, mind you come in early. The parlor maid goes with us, but the cook will be here to attend to you."

His concluding words were:

"Now don't let there be another burglary."

Barnaby promised to obey every injunction faithfully. But he wouldn't have believed that Bessie's absence could make such a difference—he found those evenings at Mayhorn Villa deadly dull. Seven of them he bore, then tempered his solitude with friends, to whom he gave little dinners in return for their companionship.

One afternoon the most obliging of these young gentlemen, a doctor whose practice had scarcely begun to sprout, called at Mr. Goldby's office in the city.

"I want you to do me a favor, Morton," said he. "You know Miss Trevor. I've persuaded her to let me take her to the theater to-night. Her aunt goes, of course. I should be eternally obliged if you would contrive to meet us—quite by accident, you know—and take charge of the old lady. She's spoiled every opportunity I've had so far, and I want to bring the affair to a head.

"I'm very sorry, Selby," Barnaby rejoined. "You know I promised the governor I would spend every evening at his house."

"Yes; but you're the only fellow I'm acquainted with who knows Miss Trevor and her aunt. I'm afraid a stranger to them wouldn't be able to help me much. When is the governor expected back?"

"To-morrow."

"And he has been away three weeks. Burglars don't work haphazard. If a robbery had been planned, your presence every night would have spoiled it. Besides, you get home before 12. Come, I make a personal matter of it."

Barnaby hesitated, and of course was lost. But he did not abandon the position all at once.

"I know I ought not to go, Dick. It's only two years since the house was burgled. If anything were to happen, uncle would never forgive me. Still, if I were in your place, you would help me out if you could."

"Yes, I would. But why not set a few burglar traps? You'll be all right then, if this very improbable event should take place."

"What sort of traps?"

"Some of my own invention. You've heard of McCloskey's whisky that killed at forty rods—dropped the drinker at any rate?"

Barnaby nodded.

"Well, my traps are like that. I'll run back to the surgery and get the stuff. Meet me at Waterloo at 4 o'clock."

They met at the appointed hour. Selby had the burglar traps in a medicine bottle. Thirty-five minutes later they were at Maythorn Villa, preparing to set them.

"Three will be sufficient," said the inventor. "One for the pantry, where the plate is kept; one for your aunt's dressing room where you say she keeps her jewels; the other for the drawing room, which is littered with valuable nick-knacks. Half fill three decanters with mixed port and brandy—plenty of brandy, you know, for the burglar may taste the stuff—and get three wine glasses."

Barnaby procured these adjuncts. Selby divided the contents of the medicine bottle between the decanters.

"It's a strong preparation of opiates," he explained. "All you have to do is to put a decanter and glass in each of the safes and another in the drawing room. If a burglar enters any of these rooms the first thing he will see will be the wine. He'll pour out a glassful, gulp it down—they're thirsty souls, are burglars—smack his lips and drop in about a minute and a half. It won't hurt him, but you will find him here to-morrow."

"It's a good idea," said Barnaby, "but suppose the cook discovers the stuff?"

"You must warn her."

When the traps had been set so that the most purblind burglar could not fail to see them, Barnaby went to the kitchen.

"Look here, Mary," said he, "I'm going out. I've put three decanters of wine about the house. Don't touch them."

The cook fired up in an instant.

"What do you take me for?" she demanded.

"A woman, Mary. Remember what happened in Eden, and don't be tempted."

He retreated in a hurry, dressed, and left the house with Selby, perfectly easy in his mind. At the theater he met his friend and the ladies, by the merest chance, most carefully arranged, of course, but despite his earnest endeavor to be of service, he could not procure Selby the desired opportunity. However, when they reached the street after the play it was raining fast, the doctor had an inspiration. Instead of calling a growler he hailed two hansoms, bustled the younger lady into one, jumped in himself, and was driven off, leaving the astonished and angry chaperon with his friend. The trick succeeded admirably, but Barnaby missed the last train to Twickenham in consequence.

Meanwhile the Goldbys had been enjoying their annual holiday, especially Bessie. She had formed the acquaintance of a certain Captain Dashbury, and, alas! for woman's constancy, had almost made up her mind that she could never be more than a sister to Barnaby now. And John Goldby was equally well disposed toward the gallant officer; indeed, he told Mrs. G. that with the money Bessie would have, he had always expected her to marry into one of the professions.

Just about the time that Barnaby and his chum were setting the burglar traps, Mr. Goldby and his new acquaintance were saunteringalong the King's Road.

"By the way," said the captain, "I think of running up to town to-morrow. If you don't mind, Goldby, I'll travel with you."

John Goldby expressed the pleasure he felt.

"You must come to Twickenham and dine with us," he added. "I won't take a refusal."

"I sha'n't give you the chance," laughed the captain.

When they separated John Goldby hurried to the nearest office and sent a long telegram of instructions to the cook, reply prepaid. He also wired to Barnaby at the office—there was just time to catch him before 5—and the cook would need money to get some of the things he had ordered for the dinner on the morrow. He then returned home to await the answers. None were forthcoming. He waited an hour, then thinking the telegrams might have miscarried, he repeated them, sending Barnaby's to Maythorn Villa. Still there was no answer. By this time he was thoroughly alarmed.

"There must be something wrong," he told his wife and daughter. "Who knows? The house may have been robbed and Barnaby and the cook both murdered in their beds! I shall go home at once. You had better follow on the first train in to-morrow. Mind you bring Captain Dashbury," and he rushed away.

Shortly after 11 o'clock next morning Mrs. Goldby and Bessie, escorted by the captain and accompanied by their maid, arrived at Twickenham station, and leaving the luggage to follow, proceeded home in a hired landau. Fifteen minutes later they reached Maythorn Villa. Captain Dashbury rang. No one came to the door. He rang again and knocked. No result. The house seemed deserted, strangely silent. Mrs. Goldby noticed that all the blinds were drawn.

"What can have happened?" she cried, and ran to the back. The door was wide open. Passing swiftly through the hall, she admitted the others, and went straight to the drawing room. Next instant, a shriek, such as only a terrified woman can utter, startled all within hearing. Bessie followed quickly, and found her mother staring with frightened eyes at the body of a man lying flat on his back on the hearthstone.

It was John Goldby, not dead, indeed, but snoring almost loud enough to wake the dead.

"He's been murdered!" cried Bessie, and she burst into tears.

But Captain Dashbury knew better.

"No, no! It isn't so bad as that. Don't distress yourself. He's only in a fit," he said, and stooping, he unfastened the insensible gentleman's collar, and tried to lift him into a chair. But John Goldby was no light weight, and the captain had to let him fall; indeed, he fell with him, rising deadly pale.

"Oh, I'm so sorry," murmured poor, terrified Mrs. Goldby, glancing hastily round for a cordial. A decanter and wine glass stood on a gypsy table. Seizing both she poured out a draught of the liquor, though her fingers trembled so that she quite spoiled the carpet. "Drink this!" she cried.

He took the glass and gulped down the wine. As he did so, the maid burst into the room wringing her hands.

"Oh, if you please, ma'am, I've been to the kitchen. Cook's fast asleep in her chair, and I can't wake her."

"What shall we do?" cried Bessie. "Captain Dashbury, what are we to do?" But the captain was staggering about the room.

"That wine's drugged," he muttered, and fell on an ottoman insensible.

The maid rushed from the house shouting for the police. At the garden gate she ran against Barnaby in evening dress. He had been to the office to see the letters and had now come to assure himself that all was right at Maythorn Villa, change his clothes, and give the cook a sum of money, as instructed by the telegram.

"Back already?" he cried. "Why, what's the matter?"

"Go in, go in," she answered, and shouted "Police!" louder than before.

Instinctively he guessed something of what had happened, but he was quite unprepared for the reality. Hurrying into the house he saw his uncle and a stranger lying insensible, his aunt and cousin in hysterics, and ran at his best speed for a doctor and stomach pump.

"This has ruined me!" he muttered as he ran. "Uncle will never let me have Bessie now. Dick Selby, you will have something to answer for."

Luckily, Dr. Maddock was at home. Bringing antidotes and the necessary instrument, he returned with the remorseful Barnaby. A police sergeant and a constable were in the room. They had lifted John Goldby into a chair. Having tasted the drugged wine, Dr. Maddock examined the master of the house.

"He'll soon be all right," he said cheerfully. "He'll wake up of his own acord shortly. Better let him sleep it off where he is." He turned to Captain Dashbury, whom the officers were steadfastly regarding. "I understand this gentleman has only just taken the opiate. He'll come round sooner if we use the stomach-pump. Perhaps you will carry him out of the room, officers?"

"Before we move him," said the sergeant, glancing toward Mrs. Goldby, who, assured of her husband's safety, was almost herself again. "I should like to know what he calls himself and what he is doing in Mr. Goldby's house?"

"He is Captain Dashbury," she answered. "He is here by Mr. Goldby's invitation."

"He may call himself Captain Dashbury," rejoined the sergeant, with a grim smile. "He went by the name of Robert Hawkins the last time I saw him. It was at the old Bailey, where he got five years for swindling. I should say he's out on ticket-of-leave now and I should get him out of this double quick, Jones," turning to his companion, "fetch another officer and a stretcher. He'll go very quietly, I don't doubt, and the police surgeon will bring him round. I'm curious to know where he reported last."

The constable left the house.

Pale enough Bessie had been until the sergeant uttered the damning statement. Her face as she stole from the room was crimson.

Barnaby was saved, though he was quite unaware of it.

Mr. Goldby awoke dazed, unable at first to comprehend what had happened to him. But when all was made clear he wrung Barnaby's hand.

"Don't worry about dosing me, my boy," he said, "I owe you more than you think. I was in a pretty state when I found the cook asleep and was unable to arouse her, and I drank a glass of wine to steady my nerves. I must have dropped almost instantly. But we'll say no more about it."

The cook also recovered speedily. She had slept since 5 o'clock the previous evening. Of course, she declared that she never would have thought of touching the wine if Barnaby had not aroused her curiosity.

John Goldby never told Barnaby what had passed between the bogus captain and Bessie at Brighton, nor has Mrs. Barnaby Morton yet found courage to confess. Of Robert Hawkins nothing more was heard, except that he was handed over to the authorities of another town and sent back to prison for failing to report himself.—Waverley Magazine.

RECENT INVENTIONS.

Nuts are securely locked in place by a new device, having the nut cut on one side to receive a lever, which is pivoted in such a position that when its long end is depressed the short end bites into the threads and prevents revolution of the nut.

To prevent the overflow of water in automatically filled reservoirs the lever which carries the float to cut off the supply when the tank is full is provided with an arm at the end to start a motor device and ring a bell when the water lifts the float too high.

Two New Yorkers have designed a kneading machine for mixing dough, a pan being mounted at the end of a vertical shaft, with fluted rollers inside the pan carried by loose spindles to revolve with the pan, the corrugations entering the mass of dough to mix it.

Gloves are made to go on the hand easier by the use of a new stretcher, which is of a similar shape to those now in use, with the exception that one finger is hollow and contains a powder which is discharged inside the glove when the stretcher is in operation.

In a newly patented door check an elastic roll is seated in concaved pockets in the door and casing, one end being attached to the door and the other to the jamb to twist with the movement of the door, forming a cushion which resists the closing of the door suddenly.

Photographic plates of any size can be washed in an improved box, vertical guideways being arranged on three sides, with a movable partition fitted across the box and having similar guideways on one face, the partition being adjusted to the size of plate to be washed.

Great Britain's Doctors.

The Lancet, in a statement of the number of doctors in Great Britain holding British degrees, gives the total number of practitioners at 34,994.

STANDING ROOM ONLY

THAT WILL BE THE COUNTRY'S CONDITION IN YEAR 2000.

Increase in Population Will Soon Absorb All Territory in the United States, Giving Only an Average of an Acre to One Person.

If the population of the United States continues to increase at the rate that has prevailed during the last twenty years in the year 2000 it will reach so great a density there will be room for an average of only one person to an acre in the vast area. If the rate of increase shall advance as the rate has advanced during the last fifty years, that alarming density will have been reached many decades earlier.

It seems impossible to believe that a territory which a century ago seemed so immense that no prophet could have foreseen that it could be filled up within many centuries by any ordinary migratory phenomenon, has already come to the point where "standing room only" is only a question of years. Yet the pregnant totals of the census department for the last century impose that inevitable conclusion.

These figures (in round numbers) are as follows:

1790	4,000,000	1830	31,000,000
1800	5,000,000	1880	50,000,000
1830	13,000,000	1890	75,000,000
1850	23,000,000		

In the time of Washington, with a population of only 4,000,000, and with a total area less than at the present time, there was yet only one person to the square mile. In Jefferson's administration in 1800 the density had grown to an average of two to the square mile. Thirty years later, in the Jacksonian period, it had doubled again to four persons to the square mile. Two decades later, in the time of Fillmore, it had advanced to seven. When Lincoln was President his people were scattered at the rate of nine to the square mile. In Garfield's time it had advanced to fourteen, while at the present time it is computed that the population averages about twenty-one persons to the square mile.

When the first census was taken, on the first Monday in August, 1790, the population was confined entirely to the Atlantic seaboard. Not more than 5 per cent. of the population was west of the Appalachian system. The greatest density was in eastern Massachusetts, Rhode Island and Connecticut and about New York City. Twenty years later, at the census of 1810, the population had begun to spread westward. The central portions of New York State were filling up, the Ohio River was lined with settlements, and St. Louis had grown into an important center from a mere fur trading post, which had been its previous status. In this decade, however, in 1803, the population had taken a stride forward by the transfer to the jurisdiction of the United States of the section now known as Louisiana. The territory included in this transfer was immense, comprising close to 1,200,000 square miles. In the same time the nation had acquired from Georgia the territory comprising the larger part of the State of Alabama and Mississippi, and the Territory of Illinois had been formed, including all of the present State and that of Wisconsin and a part of Michigan. At this time the accepted western frontier line of the country was about 3,000 miles long and embraced an area of about 400,000 square miles.

In the period between 1810 and 1820 there were many territorial changes, causing a marked alteration in the frontier line, the surest index to the giant strides in the population. A statistician thus describes it at the end of this period: "The frontier line in 1820 extended from southeastern Michigan on Lake St. Clair, southward into what is now Missouri; thence making a great semi-circle to the eastward, it

sweeps west again around a body of population in Louisiana, and ends on the gulf coast in that State. The area included by it has immensely increased, but much of this increase is balanced by the great extent of unsettled land included within it." Outside of this frontier line there was yet practically no settlement excepting small settlements on the Arkansas, White and Washita Rivers in Arkansas.

After the lapse of another decade, reaching now into the historic Jacksonian period, Florida had become a part of the Union and the tide of empire had pushed on resistlessly. Missouri had been carved out of the southeastern

corner of the old Missouri Territory and admitted as a State. Settlement in other quarters has continued to spread, yet it is proper to state that as the decade from 1810 to 1820 was one for blocking out work, so the succeeding ten years was a period for filling in and completing that work. The point furthest west at this time was the present site of Kansas City, Mo., and its surrounding territory, where quite a dense body of population appeared.

Meanwhile the unsettled parts of such Eastern States as New York, Pennsylvania and Virginia were narrowing. The total settled area was now 600,000 square miles.

Michigan and Arkansas had made their bow to the union ten years later—by 1840—and the Indians, who had delayed civilization in Georgia, Alabama and Mississippi, were pushed onward to the Indian Territory, leaving those States open to settlement. Similarly the Sacs, and Foxes, and the Pottawatomies had been urged by Uncle Sam's iron hand to seek camping grounds further to the west. This left northern Illinois and the territory tributary to Chicago free to the agriculturist. Florida was invaded by a new army of settlers. The settled area of the nation had increased in the decade 200,000 square miles.

Texas and the region involved in the Guadeloupe-Hidalgo treaty were acquired by the expansive government before 1850 came around. More States were admitted to the Union and new Territories were organized. Along the northern Mississippi River settlements sprung up rapidly. The discovery of gold in California made it necessary to draw the population circles around that far western part of the nation. The inhabited portion of the country now comprised approximately a million square miles. In 1860 the territorial changes included the acquisition of that strip of Arizona and New Mexico south of the Gila River. New Territories continued to be formed, now being molded out of the unsettled parts of the Cordilleran region into Utah and Washington. This period witnessed for the first time in the settlement of Kansas and Nebraska a considerable movement of population beyond the Missouri River. Even in northern Maine, with its uninviting rocks, there is a noticeable progress of civilization. Along the gulf coast there is no change.

In spite of the war the succeeding decade—ending in 1870—was one of growth. Kansas, Nevada and Nebraska were admitted as States, and half a dozen Territories were organized. West Virginia took on its separate identity. The State of Michigan took a notable "boom." The total area of population had reached 1,200,000 square miles. This was advanced to 1,500,000 by 1880, in the lapse of another decade. In this later period that part of the country which made greatest strides in population was the Kansas-Nebraska region.

In tracing this growth of population it is curious to note that within the settled portions of the country there are several sections which have remained practically virgin. About 12,000 square miles of territory in the northern part of Maine are almost without habitation. The Adirondack region in northern New York is another section which offers serious obstacles to settlement. In northern Michigan and Wisconsin, also sparsely settled, the situation is about the same. Densely wooded lands and severe climate have scared off the settler and invited only the logger, who enjoys practically a monopoly of the territory. In all these sections where within territory that is thickly populated there lie distinct regions passed by the immigrant the same condition of slow and rapidly accelerating absorption prevails. The encroachments year by year are growing in pace, and with the taking up of the prairie land of the West these cold and wooded sections will come within the range of the explorer's vision.

AUTHENTIC PICTURES OF AGUINALDO'S CHIEF ADVISERS.

CONSUMPTION OF LIQUOR.

In France There Is One Saloon to Every Thirty Adults.

Statistics presented at the recent anti-alcoholic congress in Paris showed that in France there is one saloon for every thirty adults. Every man, woman and child in France consumes, on the average, the equivalent of sixteen quarts of alcohol each year. The inhabitants of Belgium and Germany come next with a consumption of twelve quarts. In England the consumption per inhabitant is 10.5 quarts; in Switzerland, 10 quarts; in Italy, 7.4; in Holland, 7.1; in the United States, 7; in Sweden, 5; in Norway, 3.4; and in

CHART SHOWING AVERAGE CONSUMPTION OF ALCOHOL.

Canada, 2.25. In France and Belgium the amount of alcohol consumed yearly is increasing; in Holland, England and Italy it is stationary; in all the other countries it is gradually diminishing.

NOVEL BICYCLE PATH.

Elevated Structure Nine Miles Long to Connect Two Cities.

In the mountainous region about Los Angeles and Pasadena, in Southern California, the lot of the wheelmen is not an altogether happy one, for cycle paths are unknown there, and beyond city limits the way for riders is so rough and rolling that the pleasures of cycling scarcely compensate for the pains. A change is about to come over the face of these conditions, however, by the construction of the most novel and elaborate wheelway in this country and probably the world. An elevated cycle path of framework nine miles long has been designed to connect the two places. The path will be supported by two pillars of different heights, to equalize the grade, and the floor will be of boards. The width will be about ten feet, and each side will be inclosed by lattice work rising to a height of

HOW THE PATH WILL LOOK.

about four feet. The path will be lighted by a double row of lights, placed so high as to alternate, and half way between the cities a park and casino will be established by the company that has undertaken to build the structure.

Tunnel by Ants.

The ants of South America have been known to construct a tunnel three miles in length.

All things come to him who waits—bad luck included.

Theories are impracticable plans for doing things that are impossible.

RUSKIN IN HIS OLD AGE.

Declining Years and Powers of the Seer Who Wrote "Modern Paintings."

A correspondent who has recently visited Brantwood says that Mr. Ruskin now is able to take but little recreation. Most of his time is spent in his study, from which there is a fine view of Coniston Lake, and the great falls at the southern end of it, falls which were painted by Turner, and which figure so prominently in the descriptions in the "Idyls of the King." For some years past visitors have been forbidden an audience except in very rare cases. Brantwood, as the many know, is quite a temple of art. Turners have been crowded into the place to the overshadowing of all other artists, even men like old Crome and William Hunt. Mr. Ruskin's tiny bed-room is hung all round with specimens of the great master. There are two studios at Brantwood, and at the time of the correspondent's visit there stood on the easel of one of them Mr. Ruskin's last study, an enlarged peacock's feather. On being ushered into the professor's presence the visitor was received very kindly. There was an inquiring look in the deep-set gray eyes, with their evidences of faded fires. Warning had been given that a long conversation could not be allowed, but the talk drifted round to a subject in which Mr. Ruskin had been interested nearly forty years ago. He remembered a cer-

JOHN RUSKIN.

tain picture and contrasted it with a modern work by the same artist. His memory had not failed him nor his critical acumen. The portrait is from the latest photograph, taken by Mr. McClelland, Liscard, and has not previously been published. It was taken in Mr. Ruskin's study at Brantwood, and shows him with all his recent wealth of hair and silvery beard.

ELECTRIC FIRE BALL.

If the Operator Had Touched It He Would Have Been Electrocuted.

"Electricity is like a mule in one respect," said a veteran operator. "You can never tell just when it's going to get up on its front legs and kick you into the middle of next week. I remember, years ago, when I was night chief operator at the office in Richmond, Va., a very strange thing happened. I was sitting at my table one night at about 11 o'clock, waiting for it to stop raining, when I could go home. There was a big storm up the line, and while we didn't feel it to any great extent in the city, the lightning had been playing the mischief with the wires in the office, and several of the connections had turnt out. All of a sudden I heard a strange snapping sound at my instrument, and the next thing I knew a flash of bluish white fire lit up the whole room. Then a globe of flame about the size of an orange seemed to spring from the armature and began to roll slowly from over the top of the table. As nearly as I can describe the thing, it was like a globule of molten metal, glowing through and through with incandescent fire and shimmering with every color of the rainbow. It was beautiful to look at and fascinated me like a snake. Moreover, it seemed as fragile as a bubble—as if a touch would shiver it to atoms—and without thinking I reached for it with a wooden ruler. Luckily my assistant had more sense, and he yelled at me so frantically that I stopped before I touched it. Just then the fiery ball reached the edge and rolled off. As it struck the floor it shattered like a drop of quicksilver and suddenly disappeared. When I recovered my senses and looked at the table I was shocked. The instrument was a wreck, and the track of the electric apparition was charred into the wood half an inch deep. If I had prodded it I wouldn't be telling the story, for the ruler had a metal edge, and I certainly would have been electrocuted then and there. I have heard of such balls of fire from a few old operators, but that's the only one I ever saw, and I'm not yearning to see another. Nobody has ever been able to explain them. Of course the time I speak of was before the introduction of improved current arresters, and nowadays such visitors are pretty effectively barred out."—Kansas City Star.

Unfortunate Simile.

There are times when a lawyer regrets the use of an illustration which a moment before has appeared especially felicitous.

"The argument of my learned and brilliant brother," said the counsel for the plaintiff in a suit for damages from a street-car corporation, "is like the snow now falling outside—it is scattered here, there and everywhere."

"All I can say," remarked the opposing counsel when his opportunity came, "is that I think the gentleman who likened my argument to the snow now falling outside may have neglected to observe one little point to which I flatter myself the similarity extends; it has covered all the ground in a very short time."

If delays are dangerous lawyers must be a brave lot.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JULY 14.....1899

Sugar beets, it was thought for a long time, could not be grown profitably on soils containing much alkali. The great interest awakened, however, in the sugar beet question, and particularly in the West, where irrigation has proven such a success with this crop, has led to experiments with growing beets in soils containing more or less alkali. Although the sugar beet industry is just beginning to be established in this country, and we have millions of acres of land whose adaptability to the growth of the beet is unquestioned, it is nevertheless important to ascertain the possibilities of successful sugar beet culture on alkali soils, inasmuch as the proximity of such soils to beet sugar factories may make them especially desirable as beet fields. The existence of these conditions in southern California, near the large sugar beet factory at Chino, and the fact that the beet fields there have been rapidly extended with but little regard to the presence of alkali, without seriously injuring the quality of the beet, induced the California Experiment Station to make a study of the effect of different kinds and amounts of alkali in the soil on the growth and quality of sugar beets. The investigation was made on a 10-acre field located on the border of a tract of alkali land. The tract contained occasional small alkali spots, which, however, did not seem to interfere with its natural growth of grasses and sunflowers. This soil was first planted to various grasses and legumes, but as none of these gave promise of a crop, the greater part of the tract was again plowed and planted to sugar beets. These came up quickly though with a somewhat thin stand, right among the alkali efflorescences, and continued to grow without let or hindrance. The alkali salts did not seem to affect the beets, although they had proved injurious to the grasses and legumes. Different portions of the tract had different amounts and qualities of alkali salts, and to deduce different conclusions regarding the tolerance of the plants for the several mixtures of salts the tract was divided into plats fifty feet square, which were investigated separately. It is concluded from the results obtained that without question sugar beets of a good quality can be grown on soil containing as much as 12,000 pounds of alkali salts per acre to the depth of 3 feet, provided the average percentage of common salt is not over 0.04 per cent, or 1,500 pounds per acre.

To find out whether the sugar beet can be profitably grown on alkali lands, it is recommended to those interested in such lands to ascertain the total amount of salt in the upper three or four feet of soil. This may be accomplished by taking an average sample of the soil to that depth by means of a post-hole auger, and having the amount of soluble salts contained in it determined. A considerable portion of the salts present in the first 3 or 4 feet of the soil may come to the surface under cultivation and irrigation, and may give the soil the appearance of being too heavily impregnated with alkali to grow beets; but as these experiments indicate, the feasibility of successfully growing sugar beets depends on the total amount of alkali salts present in this upper stratum, and soil with marked alkali efflorescence at the surface may be perfectly capable of profitable sugar beet culture.

California has already set the pace of progress and the other arid States will not be slow to follow. With an annual consumption of 2,000,000 tons, and with a certainty of rapid increase the demand for sugar promises to be the salvation of American agriculture. In a dry soil the beet can endure without damage a low temperature, which would prove quite disastrous in a wet climate. More complete maturity may be thus obtained and a more leisurely harvest. In fact, it is stated there is no staple crop which can compete with the sugar beet in demanding the favorable attention of those interested in irrigation. It is estimated that nearly 100,000,000 acres of land in the arid regions of the United States may eventually be irrigated, being one-fifth the total area of the country. O this same nearly 10 per cent is capable easy and speedy irrigation. One million acres planted to beets would yield under intensive culture, a quantity of sugar sufficient, with the Louisiana products, for domestic consumption. With this great sugar production and the possibilities of stimulous to dairying and feeding opened up through the use of the by products of the beet after the sugar has been extracted, there is nowhere in sight a more promising prospect for agricultural development than in the production of the sugar beet on irrigated lands.

There are but two courses open to the administration now. Either it must admit the wrong that has been attempted in the Philippines and get out of the mess in the most graceful manner possible, or it must ask for one hundred thousand troops and a hundred million dollars to suojugate those Islands. The situation has at last become known to the American people and McKinley must take one or the other horn of the dilemma.

William Davis, the negro expressman, who betrayed Osca Welborn into the hands of the Federal authorities, must have the heart of a Judas under his black hide. He is a thief who is not wearing convict stripes because of the magnanimity of Welburn. When the time came for the thief to show his gratitude his greedy eyes showed the glitter of a mythical reward and he pointed out his benefactor to the arresting officers.

He Ended the Feud.

When the Republicans were about to nominate somebody to run for governor in 1844, there were candidates in all parts of the woods. The day of the convention, however, "Uncle Dick" went down and, without having present any semblance of candidacy other than his own personality, he was nominated by acclamation.

His brother-in-law, David T. Littler, was a candidate for state treasurer. He had been to some pains to make his candidacy an organized feature of the days preceding the convention. When Oglesby was named for governor, Littler was put out of the calculations by reason of coming from the next county and was side tracked in consequence. Although Mrs. Oglesby and Mrs. Littler were sisters, the houses of Oglesby and Littler were far apart from that time. The heads were so completely estranged that one did not speak to the other. For ten years they remained strangers.

Littler lived in a great old fashioned mansion in Springfield. Oglesby lived on his farm near Elkhart. One day, to the surprise of the Littler family, ex-Governor Oglesby walked in.

"How are you, Dave?" said the ex-governor.

"How are you, governor?" said Littler, as he struggled against his astonishment. Then the extended hand of the unexpected visitor was cordially grasped.

"I came to take dinner with you, Dave."

"Well, I'm glad of it," answered Littler, as he took the hat and coat of his caller.

"Is the whisky bottle in the same old place, Dave?"

"It is, and there's whisky in it."

And that was how the family feud ended forever.—Chicago Tribune.

Ammonia as a Fire Extinguisher.

Probably the best fire extinguishing liquid is aqua ammonia, without any addition whatever. We have personally had experience with the almost marvelous power of this substance in this direction. In one instance, where fire had originated probably from spontaneous combustion, in a pile containing several tons of cotton seed, and the interior of which was almost a solid body of live coal, a half gallon of ammonia completely smothered the fire.

In another, which occurred at Savenay, France, the vapors of a tank containing 50 gallons of gasoline caught fire in the linen room of a laundry. The room was instantly a mass of living flames, but a gallon and a half of ammonia water thrown into it completely and almost immediately extinguished the fire. The ammonia was in a glass demijohn in an apothecary shop next door to the laundry and was thrown into the room by the druggist as an experiment. So completely was the fire extinguished that workmen were enabled to enter the room almost immediately, where they found the iron tank of gasoline intact.—National Druggist.

A Cheap Luncheon.

A good story is told in connection with the last Ascot meeting. An American, who was used to going into racing booths in his own country, ordering luncheon and paying $1, found himself hungry at the royal meeting, so he walked into the first tent handy and told the attendant to give him something to eat. The man put a sumptuous luncheon before him, to which, as well as the champagne, the visitor did ample justice. He then handed the attendant 5 shillings, received his thanks and was bowed out of the tent, inwardly congratulating himself on the moderateness of the charge. An English friend whom he met outside said:

"I did not know you were acquainted with Lord H."

"Neither am I," replied the Bostonian.

"Oh, I beg your pardon," said the interrogator. "I thought you were, as you came out of his tent."—London Tit-Bits.

Bradlaugh's B's.

Mrs. Godfrey Clerk told me today at dinner that when she was in London last year some one said in her presence, "It is strange that Bradlaugh, although he speaks well, should never be able to manage the letter h." Sir F. Halliday, who was sitting by, remarked, "The reason is obvious; we know that

"'Twas whispered in heaven,
'Twas muttered in hell,

and Bradlaugh will have nothing to say to either."—Sir M. E. Grant Duff's Diary.

Has Any One Seen Her?

Supposing your wife should run off with a handsomer man and you were called upon to give her description to the police—do you think you could do it any better than was done by a Coffeyville man who communicated as follows with the officers at Wichita:

My wife left here last night at 10:30 on the Missouri Pacific railroad, and she wore a white straw hat and a black dress, but she has got a lot of other dresses with her. They are green, plush, striped and two silk waists, one is red and the other is pink. She is with a fellow named A. M. W., a traveling man for some binder company, and if you find them I wish you would hold them and put them both under arrest and wire me at once and I will come on first train. Do all you can and you will be paid for it. I am yours, E. S.

P. S.—Excuse poor writing. She is a small like woman, weighing about 120 pounds and a fair looker.

—Kansas City Journal.

Helping a Tartar.

A singular custom prevails among the Tartars or Kurds. If a man gets into difficulties—i. e., loses his cattle or other movable property—he pours a little brown sugar into a piece of colored cloth, ties it up and carries one such parcel to each of his friends and acquaintances. In return he is presented, according to circumstances, with a cow, or sheep, or a sum of money. He is thus at once set on his legs again.

An Unsuccessful Operation.

"You told me you expected to perform an operation for appendicitis on old Beasley. How did you come out?"

"Badly."

"Is Beasley dead?"

"No. As soon as I suggested the operation he sent for another doctor."—Cleveland Plain Dealer.

The British income tax was first imposed by Sir Robert Peel in 1841, when it was fixed at fivepence in the pound.

Four thousand pounds of dates have been gathered from a single palm.

Not Raised In Florida.

Among the interior decorations of a restaurant not many squares from city hall are a number of artificial palms. The palms are as natural in appearance as if they had been grown instead of manufactured and probably not one person in a dozen among the restaurant's patrons is aware of their artificial character.

An afternoon or two ago an elderly couple, evidently from the rural districts, came into the restaurant and took a seat. They gave their order and then began to look around.

"That's a handsome palm, Henry!" exclaimed the woman, pointing to the largest specimen. "I wonder if it grew that big in here?"

"Of course it didn't," replied the man, with a look of superior wisdom. "It was raised down in Floridy. That's where they all grow, and then they are shipped up here."

Just then one of the restaurant's attaches approached the palm with a dampcloth in his hand. Taking hold of one of the leaves he yanked it from the stem and began to rub it vigorously with the cloth. When he had cleaned the leaf to his satisfaction, he replaced it and pulled another. By this time "Henry's" face was a study, as was also that of his companion.

"I guess that plant didn't grow in Floridy, after all," the woman managed to whisper. "What do you guess, Henry?"

And "Henry" allowed that he guessed the same thing.—Philadelphia Inquirer.

Queer Origin of a Hotel.

They say that the best hotel in Texas is to be found at Belton, a town on the Santa Fe road and is kept by "seven sanctified sisters," as the proprietors are popularly called. Several years ago a woman in the place and her husband quarreled over the best way of expounding the Scriptures to a Sunday school class and were so stubborn that they separated and were finally divorced.

This family controversy was taken up by the town, which was soon distinctly divided between the adherents of the husband and the adherents of the wife. The result was a large crop of divorces, and seven husbandless women, including the original cause of the commotion, joined together and rented the town hotel. One of them did the cooking, another was parlor maid, a third made up the beds, and so they divided the work among them and ran the establishment on the co-operative plan.—Chicago Record.

Other Dangers.

"What are you reading about?" asked the man with the wise manner.

"The stock market," replied the youth.

"Don't do it."

"But I never put up any money. Therefore I can't lose."

"It makes no difference. You're likely to become one of these people who tell how much money they would have made if they had only done what they came pretty near doing, because they didn't see how things could go otherwise. And then even your best friends will wish sometimes that you would bet your money and lose it and keep still about it."—Washington Star.

A Tiny Bale of Hay.

Alfred C. Webber of Lisbon Center, Me., has in his possession a small bale of hay, about 8 inches long and 4 inches deep and wide, and one of the reasons why Mr. Webber keeps this hay in his best room is because it is nicely wired and put between thin pieces of boards so that no chaff can escape, but chiefly because the hay was cut as far back as 1749, on the John Rogers farm in Kittery. It was baled up by Mr. T. Trafton, who was a native of Kittery, and who is now a dealer in Massachusetts.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is for the best interests of said estate that said mining property should be sold;

It is therefore ordered by the Court that all persons interested appear before this Court at the hour of 10 o'clock a. m. of said day, at the court room of said Court, at the Court House, in the town of Independence, County of Inyo, State of California to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

Notice of Forfeiture.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO, }

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, called and recorded in the mining records of said county, as the "Fiesta Mine," as will appear from certificate filed in the office of the County Recorder of said Inyo County. In order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under Section One of an Act entitled "An Act relating to the working, rights of way, easements and drainage of mines in the State of California," approved March 3, 1891.

FRANK HARRIS.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of Jedediah S. Collins deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said decedent, for the purposes therein set forth.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time Table above Round Trip Tickets for sale at Ticket Office Reno. aug3-tf

JOHN J. MCLEAN,
Observer.

*Record beginning March 6th 1898.

Methodist Church.

Services for Sunday, July 16th, 1899.

Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7 30 p. m.

The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

A. Cohn of Bishop was a visitor in town last Tuesday.

Sheriff Given left for Ballarat yesterday morning on official business.

R. J. Laws and Herbert Wrinkle were visiting town last Friday evening.

Lester Laird has gone to Beveridge to pick ore for Pat Keyes. George Thorpe will run the arastra.

Julian Eibeshutz and Leon Marx left Wednesday morning for a trip to Yosemite. They are well equipped and expect to be gone about a month.

Lee Woodworth is making a trip through the southern end of the Valley in the interest of the Bishop Flouring Mills. He is meeting with good success.

James Rose left for Monache this morning. His health has greatly improved during the past month and he hopes that a mountain trip will further benefit him.

James Wall came in from Panamint last week and is enjoying a vacation here. He says he sees a few more people here than at Panamint, where he has spent the past ten years.

Fred Burckhardt has opened the Mt. Whitney House at Lone Pine and will furnish good accommodation for man and beast. A live, wideawake man like Fred is sure to make a success.

George Montgomery and L. D. Porter left for Los Angeles on Wednesday on business connected with the sale of the Oh Be Joyful mine at Tuber Canyon. Mr. Montgomery expects to be back next Tuesday.

Miss Kate F. Kinney of Reno, Nevada, a popular young member of Nevada's corps of education, is spending her summer vacation in Owens Valley, and visited a couple of days in town this week.

John C. Quinn of the P. D. Q. cyanide company arrived here last Monday from Los Angeles. The material for two plants is now on the road, one to be erected at the Reward and the other at Beveridge.

Hill & Coe recently made a shipment of lead ore from the Montezuma mine which netted $12 a ton. The shipment was made as a test and it is said that a concentrating plant will now be put in by the owners.

There will be a public meeting at the Court House at 7:30 sharp this evening, for the purpose of organizing a Section of the Social Labor Party. The principal object of this Section is to study the Industrial Questions of the day. All citizens are invited to be present.

A. Cohn of Bishop and Mrs. F. Rhine of Independence applied to the Board of Equalization for a reduction in the amount of the assessment on their stocks of merchandise. Both requests were denied as the Board was determined to uphold the assessor in all of his valuations.

Real Estate Transfers.

The following deeds have been recorded since July 7, 1899.

A. E. Regensberger to Edward Brown—July 3, 1899, 320 acres at Big Pine, $4,000.

Philip Cartier to J. C. Irwin—April 29, 1899, Und ½ int in Last Chance mine, Mazourka, $10.

E. E. Huston to Truman A. Warren—June 16, 1899, Truman Group, Argus range, $100.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United states, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

VICTORIA GETTING YOUNG.

In view of the Queen's approaching visit to the continent, Englishmen are especially interested in her health. It is announced that her hearing has growm acute and her eyesight keener. Youthful faculties in old age depends upon the health. Hostetter's Stomach Bitters cures indigestion, constipation, biliousness, nervousness, as well as malaria, fever and ague.

Profanity in a play makes folks laugh who would disapprove of it on the streets.

Chronic Constipation Cured.

The most important discovery of recent years is the positive remedy for constipation. Cascarets Candy Cathartic. Cure guaranteed. Druggists, 10c, 25c, 50c.

Modern Surgery.

"The average man would be greatly surprised to know how far the surgical world has moved in the last quarter of a century," said a prominent New Orleans practitioner. "It's hard to realize, even for one in the profession. We do things as a matter of course at present that only a few years ago would have been looked upon as downright murder.

"I remember back in the seventies I was called to attend a man who was shot through the intestines with buckshot, making a number of perforations. I promptly opened the abdominal cavity and sewed up the wounds, which at that time was regarded as a wildly daring operation. The man died from unavoidable complications, and his friends were determined to prosecute me for killing him. In fact, I had a close squeak from unpleasant consequences, for a great many other surgeons condemned my procedure in the severest terms.

"Just think of it! Today things are exactly reversed, and a surgeon who failed to open the abdomen in such a case would undoubtedly be punished for malpractice. This is one instance out of many. It is no exaggeration to say that the modern surgeon saves thousands of lives that his earlier brothers would have abandoned without an effort. 'Necessarily fatal' would have been the verdict and the sufferer assisted into the valley of the shadow by a merciful opiate."—New Orleans Times-Democrat.

The Effort to Create Life.

The news that Wohler had obtained, in 1828, out of inorganic stuffs a certain substance, urea, which occurs in nature as a distinct product of vital activity in animals, upset current ideas. Then, later on, Liebig in Germany and Frankland in this country made several important syntheses, and in 1860 Berthelot published his epoch making work, "Organic Chemistry Based Upon Synthesis," in which he proved that the synthesis of organic bodies must be pursued and may be achieved in a quite systematic way, going step by step over the whole series of organic compounds.

At the present time about 180 different acids, aromatic oils, fats, coloring matters, and so on, which are only found in nature as products of vital activity, have already been prepared in our laboratories out of inorganic matter. Some of them are already fabricated in this way for trade. Every year brings some new achievement in the same direction; so that the main interest now lies, not so much in adding a new product to the already long list of chemically prepared organic substances, as in catching the secrets of the tiny living laboratories in the vegetable and animal cells.—Prince Krapotkin in Nineteenth Century.

An Honest Admission.

She—You are hypercritical. The fact is, you don't like German opera.

He—Oh, I don't know. It isn't so bad—that is, you know, to a man who is very hard of hearing.—Boston Transcript.

A Pleasant Pose.

"Emeline, you are not happy. What makes you pretend that you are?"

"Because artificial happiness is lots better than none at all."—San Francisco Examiner.

The Last Man Wins.

"They say the secret of success is tenacity of purpose."

"Of course; if you hold on long enough, competitors die off."—Chicago Record.

"Evil Dispositions Are Early Shown."

Just so evil in the blood comes out in shape of scrofula, pimples, etc., in children and young people. Taken in time it can be eradicated by using Hood's Sarsaparilla, America's Greatest Medicine. It vitalizes and enriches the blood.

The Anonymous Letter.

"BY Jove! What a beauty! Who is this, old man?" The speaker stood in an admiring attitude before the picture of a young girl, while the one questioned answered briefly: "My sister."

"O, I say, Paul, that won't do. We don't put our sisters' pictures in frames like that."

"Don't we? Well, I do. O, hang it, Burt, don't you see that I'm busy. I can't work while your tongue is wagging. Get out of here now, and if you won't show your face here again today you shall spend the month of July with me at my home, and then you shall judge for yourself whether that frame is too good for my sister's picture," and Paul Reynolds gave his chum a good-natured push toward the door.

"Do you mean that? Hurrah! Why, that would be worth a lifetime banishment—no offense to you, old fellow," and Burton Smith mildly expressed his delight by turning somersaults across the room, walking back on his hands, then, bringing his feet to the floor, he shot upwards and, catching hold of a bar above his head, he drew himself up and whirled around the bar with the proficiency of an acrobat, dropping to the floor with a shout of overflowing mirth.

"Get out of this, you rattlehead!" And, having him outside, Paul shut the door in his face, and heard him go downstairs at a breakneck pace which brought the good old landlady to the door in alarm, expecting to find somebody at the bottom with a broken neck.

"Sakes alive! That Mr. Smith again!" she exclaimed.

Burton's walk home had a tendency to quiet his hilarity, but that face was still before him, and after sitting in deep thought for an hour he sprang up with alacrity.

"I'll do it, by Jove! She can't feel deeply offended, anyway, and I'll sign only a part of my name. Better for the future's sake to be on the safe side. There, that'll do, I think."

* * * * * * *

Belle Reynolds stood with an open letter in her hand, and her eyes flashed angrily as she spoke her thoughts aloud. "Soft-headed idiot! Heard of me through a friend, indeed! This stranger——"

Then something like the truth swept through her mind and her fun-loving mind reasserted itself, and, going to her desk, she wrote:

"Mr. Charles Burt—Your most extraordinary letter savors strongly of the Wedding Bells class, but you forgot to state whether your motive was for 'pleasure, pastime, or with a view to matrimony.' Whatever your object may be, permit me to say that you are guilty of gross impertinence. My friend, Matilda Brindle, would call you 'sassy.'

"Are you aware, sir, of the risk you incur by asking to correspond with a spinster of the tender age of 37? Let me enlighten you. I will honestly describe the picture which my mirror reflects, and then, perhaps, you will congratulate yourself on having found a person so frank as myself. My reddish yellow hair, already thin on top, hangs in ringlets about my full-sized ears, my freckled nose is elevated by nature to a high degree, my teeth are conspicuous by the absence of not a few, and my greenish gray eyes would be my one redeeming feature if I were not cross-eyed. I am tall and commanding—most emphatically commanding. My joints are too large to allow my wearing rings, so don't send any. I am a strong-minded woman, sir, so think well before you further commit yourself. B. R."

When Burton Smith received this mocking epistle he dove both hands into his trousers pockets and stood gazing at his feet with a most dejected air. No acrobatic performances now. O, no. No occasion for them. But as the humor of the whole affair struck him, he threw back his head and laughed—he roared.

"The little minx! Serves me right, though. But how foolish she could make a fellow feel. Smith, you're an ass!"

* * * * * * *

The June days passed, the eagerly anticipated vacation drew near, and at last Paul Reynolds and Burton Smith found themselves in the quaint old town of Castone, where they were happily welcomed.

At first Burton rather stood in awe of beautiful Belle Reynolds. Her lovely face and graceful figure won universal admiration, and her sweet disposition endeared her to all. Burton Smith proved to be no exception. Their mutual love for all kinds of outdoor sports threw them together constantly, and they became firm friends. Then as the time for his departure drew near he began to realize that in leaving Belle Reynolds behind he was leaving all that had made life so bright for him during the last few weeks. Yet he felt that there was no reason why he, a comparative stranger, should claim more than the friendship accorded him.

He would undoubtedly have gone back to business with his love untold had he not unexpectedly come upon Belle in the little vine-covered summer-house one morning with a woe-begone expression and traces of tears upon her fair face. She hastily explained that she had been indulging in a fit of loneliness at the thought of her brother's return, but the look and blush which accompanied her words gave him new courage, and, taking both her hands in his, he asked:

"May I hope, Belle, that you will miss me a little, too, when I am gone? Forgive me for speaking so soon, but you have become dear to me, and I am conceited enough to believe that you like me. Tell me, darling, that you can, in time, care for me, and I will try to be worthy of your dear love."

Whatever her answer may have been, suffice it to say that when they emerged from their secluded nook an hour later their faces bore evidences of their new-found happiness.

"By the way, Belle, I have not yet met your friend, Matilda Brindle. Does she not live in Castone?"

Belle stopped short in her walk and looked at him. "Then you are——"

"Charles Burton Smith, at your service." And he made a profound bow just in time to receive a sound box on the ear, administered by the little beauty beside him. Then she fled precipitately.

Soon after their return to the city Paul went to Burton's room, and seeing one of Belle's latest pictures in a costly frame, he slyly remarked:

"Eh, old fellow, changed your mind?"

"O, well, you know, she is not my sister." But the look which he gave the sweet face spoke volumes.—Boston Post.

QUEER STORIES

The most wonderful astronomical photograph in the world is that which has recently been prepared by London, Berlin and Parisian astronomers. It shows at least sixty-eight million stars.

When a Philippine woman of better class gets married, she sometimes wears as her wedding dress a costume of native manufacture that reaches in value up into four figures. It takes months to make a handkerchief or a sleeve, so microscopic and delicate is the fabric.

Travelers in Australia complain that almost the only trees in the continent are eucalyptus, and they afford little shade, as they have learned to turn their leaves edgewise to the sun. The botanical gardens in the cities are, however, declared to be dreams of beauty.

Recent investigations have shown that the principal source of the Gulf stream is not the Florida channel, but the region between and beside the islands of the West Indies. At Biniomi the volume of this warm water is sixty times as great as the combined volume of all the rivers in the world at their mouths.

Of the 19,410,554 cotton spindles in the country, Massachusetts has 7,907,388, Rhode Island follows with 2,132,250, while New England as a whole has 13,431,951. Of cotton looms the State has 182,183; wool cards, 1,898 sets; worsted combs 412, woolen looms, 20,518, and silk looms 843. It will be seen that Massachusetts has over 40 per cent. of the entire cotton spindleage of the country. It has 22 per cent. of all the wool cards, and shows an increase of sixty-one sets within two years. Of the 1,373 worsted combs in the country, Massachusetts has 412, or about 33 per cent., while New England has nearly 60 per cent. of the total. The number of silk looms in Massachusetts has increased about two hundred within the last two years, but the increase in the number of looms which are working on cotton and silk or wool and silk must be much larger.

Ridiculed C. L. Davis.

About the best true story—I suppose the stories are true, as he swore they all were—told me by my friend the clerk was about Charles L. Davis, the actor, otherwise known as "Alvin Joslin." He was in the lobby of the St. Charles in New Orleans when a man from Chicago stepped in front of him and looked over his head in search of an acquaintance who he supposed was in the hotel lobby. Davis, mistaking the Chicago man's purpose, remarked: "Ah, I see you admire my diamonds. This one"—indicating the stone on his shirt bosom—"cost me $3,000. These"—showing his cuff buttons—"cost me $2,500 each, and my wife has a trunkful up in our room."

The Chicago man did not say much, but that evening, by arrangement with the head waiter, Davis was placed at supper alone at a table where were several vacant chairs. Presently seven men, all commercial travelers, entered the dining-room, and each one had a large cut-glass fruit dish fastened on his breast, while glass prisms hung pendant from each coat and vest button.

Soberly marching to Davis' table, the seven men took the vacant seats and the Chicago man entertained the actor with: "Ah, I see you admire our diamonds. This one"—pointing to the fruit dish—"cost me $3,000,000. These"—indicating the prisms—"cost $250,000 each, and we have three carloads like them at the depot waiting to be sidetracked." Davis not only changed his table, but went to another hotel.—Courier-Journal.

Death for Corn Microbes.

That little bit of tough skin on the business side of the little toe, that unfailing barometer and inducer of pedal agony, the corn, is not simply the result of wearing boots too tight or too loose, as we have been taught to believe. It has a far more important pedigree than that, and actually boasts a bacillus—the corn bacillus. His identity has long been hidden, but a Trappist monk discovered the rascal and his complete destruction may be looked for in the near future.

The pesky organism has been dignified with a name. Bacillus diabolicus it is called. Physicians will abbreviate that to Di. The monk of La Trappe who found him out gives detailed instructions for the capture and punishment of the vicious mite for the benefit of suffering humanity. The prescription is composed of thirty grains of perchloride of mercury in solution and thirty drops laudanum de Sydenham. Place this on the affected spot and the career of the bacillus diabolicus comes to an ignoble end.—New York Press.

Kipling's Clever Sister.

Rudyard Kipling has but one sister, now married to an English army officer in the staff corps stationed somewhere in India. She is a great beauty and familiarly known as "Tricksey." She is a very accomplished woman and has written several clever stories.

About the only difference between marbles and billiards is in the age of the players.

PIONEER IN OIL DISCOVERY.

Edward L. Drake, Who Made Rockefeller's Fortune Possible.

Recent publication of statistics purporting to set forth in orderly array estimates of the wealth already accumulated by John D. Rockefeller give reason to believe that should Rockefeller live another quarter of a century he will have become easily the richest man the world has ever known. The upbuilding of his fortune by mere natural accretion would, it appears, accomplish such a result, for no longer does he reckon his annual income by millions, but by tens of millions, and so vast are his holdings that it is doubtful if he could himself compute within $50,000,000 of his actual possessions.

E. L. DRAKE.

And yet the man to whose patient sagacity, unresting energies and perfect faith in himself and nature this tremendous massing of capital was due—the man whose genius was the cornerstone upon which rose the imperial fabric of Standard Oil and its associated tenets—that man died obscurely, in poverty, stricken with palsy and rent by a broken heart. This was Edward L. Drake, who after years of struggle, of discouragement in his endeavor to interest capital in his theories of subterranean reservoirs of oil in the rugged creek country of northwestern Pennsylvania, at last triumphed over doubts, indifference and sneers and forty years ago sunk upon an island in Oil creek, a mile below the present city of Titusville, the first producing oil well, the pioneer in an industry now encircling the globe.

The drawing illustrating the appearance of this quaint derrick and engine-house is a reproduction from a photograph taken upon the spot in 1863, when already "the Drake well" was hastening to decay. The bearded and beaver-hatted figure in the foreground is that of Colonel Drake himself.

It has been deemed remarkable that this first producing well should have "struck oil" at a less depth than it has since been found by any other well of whose drilling there is a record. At

THE DRAKE WELL.

sixty-nine feet the well began to flow and the pumps thereafter yielded their oleaginous treasure at the rate of 1,000 gallons a day until the old Drake well went dry, after giving up through its crude appliances 7,000 barrels of oil, worth in the neighborhood of $5 a barrel. Nowadays the drill seeks and finds petroleum hundreds and hundreds of feet beneath the surface of the earth. With his imperfect tools it is doubtful if Drake could have reached such depths as are now considered usual in the Pennsylvania region. He himself always clasped to his heart an abiding belief that the hand of Providence had led him to the precise spot which he selected as the one upon which to prosecute his derided enterprise.

Drake was a New Yorker, born in Greenville, Green County, in 1819, and he was 40 years old when as the Columbus of the petroleum industry he made his great discovery. Within the forty years which have followed the trade in petroleum has attained proportions of which not even the sanguine fancy of this pioneer dared to dream. The fortune—a modest one—he reaped from his success was swept from him in his age by the dishonesty and rapacity of keener-minded men, and he died, as has ben said already, a victim of ill health and poverty. Indeed, his very name is now almost forgotten, except in that region his sagacious mind enriched, but none the less is it true that upon the foundation of his foresight and earnestness of purpose has been erected that extraordinary fortune which promises to become the wonder of our times.

NOVEL BICYCLE PATH.

Elevated Structure Nine Miles Long to Connect Two Cities.

In the mountainous region about Los Angeles and Pasadena, in Southern California, the lot of the wheelmen is not an altogether happy one, for cycle paths are unknown there, and beyond city limits the way for riders is so rough and rolling that the pleasures of cycling scarcely compensate for the

HOW THE PATH WILL LOOK.

pains. A change is about to come over the face of these conditions, however, by the construction of the most novel and elaborate wheelway in this country and probably the world. An elevated cycle path of framework nine miles long has been designed to connect the two places. The path will be supported by two pillars of different heights, to equalize the grade, and the floor will be of boards. The width will be about ten feet, and each side will be inclosed by lattice work rising to a height of about four feet. The path will be lighted by a double row of lights, placed so high as to alternate, and half way between the cities a park and casino will be established by the company that has undertaken to build the structure.

Must Wear Bloomers.

Women bicyclists in St. Petersburg are ordered by the police to wear bloomers or "rational dress," as the wind blows too capriciously in Russia's capital for skirts to be worn with decency.

NERVOUS DEPRESSION.

[A TALK WITH MRS. PINKHAM.]

A woman with the blues is a very uncomfortable person. She is illogical, unhappy and frequently hysterical.

The condition of the mind known as "the blues," nearly always, with women, results from diseased organs of generation.

It is a source of wonder that in this age of advanced medical science, any person should still believe that mere force of will and determination will overcome depressed spirits and nervousness in women. These troubles are indications of disease.

Every woman who doesn't understand her condition should write to Lynn, Mass., to Mrs. Pinkham for her advice. Her advice is thorough common sense, and is the counsel of a learned woman of great experience. Read the story of Mrs. F. S. BENNETT, Westphalia, Kansas, as told in the following letter:

"DEAR MRS. PINKHAM:—I have suffered for over two years with falling, enlargement and ulceration of the womb, and this spring, being in such a weakened condition, caused me to flow for nearly six months. Some time ago, urged by friends, I wrote to you for advice. After using the treatment which you advised for a short time, that terrible flow stopped.

"I am now gaining strength and flesh, and have better health than I have had for the past ten years. I wish to say to all distressed, suffering women, do not suffer longer, when there is one so kind and willing to aid you."

Lydia E. Pinkham's Vegetable Compound is a woman's remedy for woman's ills. More than a million women have been benefited by it.

MONKEY AND BOY.

They Were Equally Concerned In the Jail Delivery.

In the picturesque little town of Lawrenceburg, Ind., there used to be an old stone building that was used as a jail. It could tell many a strange story of the persons it deprived of liberty, but would, if it were wise, be silent concerning one incident that proved to be a joke on itself.

Among the boys of the town was a half witted lad who was particularly incorrigible, and whose constant companion was a little monkey, who attended him as faithfully as Mary's little lamb. One of his mental weaknesses was known to be a confusion of the ideas of mine and thine, and after one very considerable theft the local Sherlock Holmes found footprints of Jocko, the monk, in regions from which the missing articles had disappeared, and so the boy was arrested. There was no law for imprisoning the monkey, so he was not "pinched." The boy was a model prisoner for several days, but was suddenly seized with a desire to have his monkey with him. So earnestly did he beg for this that the good-natured jailer had Jocko brought to the cell. That night the lad, who was supposed to be without intelligence, began chawing out the mortar around one of the largest stones in the outer wall. He could not do much with his blunt fingers and weak nails, but the monkey immediately began imitating him. The long claws of the animal soon loosened up enough mortar to enable the boy to pull the stone out of the wall, and before morning both boy and monkey had disappeared.—Cincinnati Enquirer.

Costly Health.

Blivens—My dear, I'm really alarmed about Tommy's health.

Mrs. Blivens—I suppose you mean you are alarmed about his ill health and future doctors' bills.

Blivens—I said health, and I meant it. I was thinking of butchers' bills.—Boston Transcript.

One of the Main Requisites.

"I thought he had all the elements of a successful artist for the humorous weeklies, and yet he failed."

"Yes, he failed to make the feet and the mouths large enough to be considered real humor."—Chicago Post.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

Taking the Cowboy's Picture.

"Now," said the border photographer, pulling his gun and leveling it across the camera at the man in the chair, "will you have the kindness to look pleasant?"

Much amused by the check and the cool nerve of the request thus conveyed, the bold cowboy smiled broadly, and at that instant the border photographer pressed the button.—Chicago Inter Ocean.

We exaggerate misfortune and happiness alike. We are never either so wretched or so happy as we say we are.—Balzac.

Theatrical companies in Mexico have to pay a fine if they do not produce the pieces announced.

Yellow New York.

We know of no city in all this land, not excepting Hoboken or Jersey City, which is less national in its feelings, its ideas and its aspirations than New York. It has never yet done anything really national. There was not public spirit enough in the well to do classes of the town to even build the pedestal of the Liberty statue. The same classes waited years and went begging all over the country to raise a fund for the Grant monument—a duty which, in 1885, they claimed as their peculiar privilege. But New York is New York. There is none like it, nor shall be till our summers have deceased. It is yellow and it continually doth bark.—Washington Post.

We are glad when some men have jobs, because then they are too busy to loaf.

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures pain'ful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. A man who prides himself on having no one but himself to look after, usually does a mighty poor job.

NERVES OUT OF TUNE.

Just as the strings of a musical instrument get out of tune through lack of care and break out into ear-torturing discords when touched so the human nerves get out of tune, and make everybody miserable that comes in contact with them. Every tobacco-user's nerves are out of tune more or less, and the real tobacco slave's nerves are relaxed to the utmost. No-To-Bac is the tuning key which tightens the nerves, makes them respond quickly to the emotions, resulting in the happiness of all. No-To-Bac guaranteed tobacco habit cure makes weak men strong. We advise all tobacco-users to take No-To-Bac. 5 4.

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

THE DANCING LIGHTS.

From out the country spaces cool and clear
We flash into the maze of city streets,
What pageant this that straightway doth appear?
What land of faery that our vision greets?

A feast of lights! And as we roll along,
As if each one some lovely dancer held,
They interweave as to some choric song
Which from the dark mysteriously welled;

To whose soft tune the dancers round and round
Move in a rapture tremulous and intense,
With languorous paces that make faintest sound
And ever duller and more drowsy sense.

The dancing lights! Too lingeringly I gazed
On their warm motions till, as one who reels
When by some beauteous, blinding vision dazed,
And then, back to himself returning, feels

Right glad of heart; so, then, it was with me
As, looking up, I saw the heaven's calm
Shedding the light of stars so silently
That on my heart that stillness fell like balm.

Far off and cool, each, in his perfect sphere,
Held, as if motionless, his awful way;
Star unto star discoursing crystal clear
As when they sang creation's primal lay.

Ah me! I would that when the dancing lights
Of wayward passion seek my soul to sway
With their wild motion, from those meaner sights
I might be strong to turn my eyes away.

*

To where th' eternal stars so purely shine—
Truth, Beauty, Good—and by that vision blest
Lifting my heart to make its clearness mine,
Taste then, earth-bound, the everlasting rest.

—Harper's Magazine.

A Dead Man's Eyes.

VIRGINIA CITY, Nev., in the flush of the great Comstock lode. A man strolled down C street one June evening, and then struck into a trail which led upward along the slant of Mount Davidson. He was a large, broad-shouldered, full-bearded man. At a point where the trail diverged he stopped as if for a short rest, and, with his hat in his hand, turned to view the scene below him.

The sun was approaching the horizon. Everywhere the sky was a cobalt blue, save in the far distance, where it changed to a delicate purple and gradually melted into long, low streaks of red, gold and shimmering crimson. Looking down the canyon, Sugar Loaf stood darkly silhouetted against the brilliant background, and past it miles further down and away—the plains lay sleeping in the evening haze. In the middle distance, the big red buildings of the shafts and mills, with their tall, steamboat smokestacks, were sharply outlined; on every side the white dumps seemed to flow out of the sage-brush hills, and beneath him clustered the motley and jumbled mass of houses tacked to the steep mountain side—Nevada's chief city.

Another man trudged up the trail and paused when he descried the figure ahead of him. He was not cast in the heroic mold of the first. His face betrayed the Latin blood. There was a look of vindictive envy in his small, bead-like eyes as he watched the contented man above him. He wondered if all the things they said about Jim Sanders were true. Why was it he had no partner and worked his claim alone? Was there any truth in the rumor that Jim's claim was paying well and that he was keeping his money hid instead of banking it? As to his own claim—well, Gus was a good and uncomplaining worker, and the cabin was all right to sleep in. Mining was a gamble anyway, and so was faro. Still one knew there was money in faro, if the cards came rightly. But this evening Jose Casadra was broke. A week before he had won a thousand dollars at a single sitting.

After a little while the object of his gaze moved on and Casadra followed, keeping well in the rear. When he arrived at the Sanders cabin, Jim stood in the doorway.

"Hello, Joe!"

"Hello, Jim!"

"How they comin'?"

"Damned bad," savagely.

"Better leave the chips alone. Joe—there's nothing in it," said Jim, philosophically. "Why don't you help the poor Dutchman out? More money in that, Joe."

"Advice is cheap," replied Casadra, ill-naturedly. "D'ye think ye'd be willin' to give me anything else?"

"I might," said Jim, calmly knocking the ashes out of his pipe against his boot-heel.

"Then lend me a hundred dollars."

"No, Joe, I won't; it wouldn't do ye any good."

"To hell with your advice!" exclaimed Casadra, angrily, striding swiftly away and up the trail to the cabin he shared with Gus.

The next morning, on his way to town, he stopped at Jim's cabin. In his mind was a half-formed resolution to say some commonplace thing to Jim which the latter might accept as an apology for his rudeness of the previous evening. There was no sense in making an enemy of him. He threw away his cigarette and hesitatingly approached the door, which stood ajar, and looked in. What he saw startled him. Jim was lying on his side on the bed, with one arm thrown over his head. His big gray eyes were wide open and seemed to be looking Casadra full in the face.

"Mornin', Jim."

There was no response—not even the quiver of an eyelid. Casadra watched him uneasily for a moment, and then turned and went on his way to the town. He wondered if Jim always slept in such a queer fashion, and if such a sleep was a sound one? It was late in the night when he passed the cabin again. The door was still ajar, and all was dark within.

The following day, shortly after sunrise, found him before the partly opened door. He had a premonition of what he would see as he suddenly pushed it wide open. Jim was still lying on his side with his arm over his head, the open eyes fixed on the doorway. In two steps Casadra was beside him. He put out his hand, involuntarily withdrew it for a second, and then, with an effort, placed it on the forehead of the man in bed. The touch was icily cold. Down over the heart went the hand; there was no response from that fountain head. Then Jose knew he was not looking upon sleep. Murder or suicide? He threw off the bedclothes, expecting to see blood, but there was none. Just then he saw a sheet of writing paper lying on a table by the bedside. Picking it up eagerly, he read:

"Dear Brother: I have been taken suddenly ill to-night. If the worst should happen, when you come on, go at once into the shaft. In the second drift, exactly twenty-four feet from the shaft, dig——"

In an instant the paper was crushed in his hand and thrust into his shirt-bosom. Furtively he looked around, as if in fear of being detected. He never thought of the body in the bed until his wandering gaze fell upon the pallid face and the distended eyes staring fixedly at him. Nervously he moved to the door; the eyes followed him. He stepped almost behind the bed and yet felt himself within the range of the awful vision. Many dead men he had seen before, but some one had always closed their eyes for them. These eyes seemed to move like those of some old portrait.

It was late in the afternoon when he notified the coroner of his discovery. The body was taken down to the undertaker and the coroner decided an inquest unnecessary. Sanders belonged to a Masonic order that took charge of the funeral arrangements. The fact that Casadra left Virginia City the night of the day the body was discovered was noted by some, but no especial significance was attached to his departure.

Two months later in a gambling house at El Paso:

A crowd of men sitting and standing three deep about the faro table; the dealer pushed the cards out of the nickel-plated box, unconcernedly paying the lucky bets and sweeping away the others; every one oppressively silent; all eyes on the different stacks of chips and the fateful box before the dealer; the money-drawer of the table pulled far out, disclosing the shining twenties; and Jose Casadra "keeping cases," betting heavily, and losing.

But he was too old a gambler to betray by an expression which way the weather vane of fortune pointed, and when he had lost three heavy bets in succession, not a muscle of his face changed as he calmly put a large stake on the ace to win and "coppered" the king for an equal amount. A hand reached over the fringe of the crowd and placed a modest number of chips on the same cards. The ace won; the king lost. Like all of his superstitious fraternity, he was quick to notice the slightest incident connected with a change of luck, and now waited for the hand before making his next venture. Again it came over the heads of the crowd, and this time played a combination of the five, six, seven, eight and nine to win, and the queen and jack to lose. Instantly Jose had $200 on the same bets. Once more he was successful. When it came to call "the turn," the party behind him bet "tray-dence." Jose did the same. The tray and deuce came out in the order named. Then he cashed in his chips a winner, and getting up from the table, pushed through the crowd to see who it was he had so luckily followed.

The man was in a distant corner of the room by himself. Jose's dark face became suddenly livid, for he found himself looking into the eyes of Jim Sanders. The eyes were in the head of a tall, heavily built, and smooth-faced man.

"Who—are—you?" weakly gasped Jose, backing away.

"Who am I?" replied the other in a jocular way, although his eyes belied it. "Who am I? Why, don't ye know me?"

"Not—not Jim?" came Jose's hoarse whisper, as he gazed in incredulous fright. But the blood was slowly coming back into his face. The voice was different, if the eyes were not.

"No, I'm Tom—Jim's brother. Jim's dead, ye know."

"Yes, I—I know, but your eyes? Damn you! Where'd you get those eyes?" The other advanced a step. "My God! It is Jim!" he almost screamed, as he cringed in abject terror against the wall.

"Say, what kind of a feller are ye anyhow, to be so skeart about a feller's brother? S'pose I hev got Jim's eyes? Ain't they good enough? Jim hed a little the best o' me—he was a half-hour older. I jest kem from Virginny. Everybody thought Jim left a stake, but he didn't, pore feller—leastways, none that I could find. How long since you been thar?"

Some of Jose's confidence was returning. He muttered an unintelligible reply.

"How much money you got?"

The colossal impudence of the question would have astounded any stranger. Jose looked angrily amazed. He started to reply with an oath, when suddenly his face changed.

"Don't look at me like that!" he whined.

"How much money you got?" repeated the big man, calmly but remorselessly.

Jose struggled with himself to keep silent; but the cold, deliberate and judging eyes compelled him to speak and tell the truth.

"Four—thousand—dollars," he faltered, barely above a whisper.

"So you've got $4,000 now?" echoed the other, in tones of great satisfaction.

Abject fright again swept into Jose's face. Four thousand? Why, that was exactly the amount he——

The thought was not even finished in his mind. He saw that the eyes read guilt in his own. By an almost superhuman effort he broke the hypnotic spell of the dreaded gaze and looked hurriedly about him for help. He tried to cry out, but his throat was dry. Then his hand shifted nervously behind him for his revolver.

"None o' that! None o' that!" cried his captor, warningly. "I've got my eyes on ye, and I've got his eyes in my head, and I kin see with 'em, too. I kin see you're guilty—guilty o' stealing your thousand o' Jim's good money. I want that four thousand ye got."

Jose, blanched and terror-stricken, made a gesture of denial.

"No use o' denyin' it," resumed his Nemesis, coldly and sternly, "for I warn't in Virginny for nothin'. I yeard o' you thar. I was in that drift as well as yourself. Ye left a wide-open trail. Ye don't think I been follerin' ye for nothin', do ye? Ye don't think I've been keepin' my eyes—Jim's eyes—on ye to let ye git away from me now? Come outside and give me that money. Come on, now!"

With his face toward Jose he opened the door and stalked out. And Jose, powerless to resist, followed him into the night.

* * * * * * *

Richardson, the mine superintendent, and Thompson, the San Francisco stockbroker, sat talking over their coffee and cigars in Virginia's best restaurant.

"You say he saw the whole thing?"

"Yes."

"Well, it certainly is a remarkable story. When did he return?"

"Yesterday, I believe."

"Of whom are you speaking, Richardson?" some one asked from an adjoining table.

"Why, Jim Sanders, that fellow who went into a trance three or four months ago, and so narrowly escaped being buried alive."—Argonaut.

Natural History

The California woodpecker will carry an acorn thirty miles to store it.

The land crabs of Cuba run with great speed, even outstripping a horse.

The dragon fly can fly backward and sidelong, and can alter its course on the instant without turning.

Nothing, perhaps, is so bitter as olives freshly picked, yet after they turn purple and black, hogs soon learn to devour them.

One of the longest-lived birds on record died recently in London. It was a parrot named Ducky, the property of the Prince of Wales, and was a century and a quarter old. Up to 80 years of age elephants are useful members of society.

The sweet and luscious grapes are eaten with great relish by horses, cows and sheep. Deer are fond of grapes, and often do much damage in California vineyards. Hogs fatten upon grapes, rabbits love them, and a number of the wild animals, as the elephant and camel, will eat them.

The squirting cucumber of the Mediterranean alarm goats and cattle by discharging its ripe fruits explosively in their faces the moment the stem is touched. The cucumbers contain a pungent juice, which discharges itself into the eyes of its opponent and the smarting sensation which results is hard to bear.

How Europe's Law-Makers Are Paid

The lawmakers of Austria and France are paid $5 a day; in Greece the senators get $100 a month and the deputies $50; in Germany members of both houses receive about $2.50 a day; in Denmark the members of the "landsthing" each receive about $3 a day; in Belgium each member of the chamber of representatives gets $85 a month; in Portugal the peers and commons are paid the same sum, which is about $355 a year; in Spain the members of the cortes are not paid for their services, but enjoy many advantages and immunities; in Switzerland the members of the national council get $2.50 a day, and the council of states, the lower house, $1.50; in Italy the senators and deputies are not paid at all, but are allowed traveling expenses.

The Phoenix.

The Phoenix was the name of the first fire company in England, and it was established in 1682. At that time, in the towns, squirts or syringes were used for extinguishing fire, and their length did not exceed two or three feet, with pipes of leather. Watertight seamless hose was first made in Bethnal Green in 1720.

The words of the silent man are never repeated in court.

WAS A FAMOUS FRAUD

REMARKABLE AND MONUMENTAL SWINDLING SCHEME.

The Principal Tells How He Forged Records that Deceived Eminent Lawyers, Enlisted Millionaires, and Cost Uncle Sam the Sum of $250,000.

One of the most remarkable land cases in the history of the country and possibly of the world was that of James Reavis, who laid claim to 12,500,000 acres of land in Arizona and New Mexico under what is called the "Peralta grant" and who recently confessed himself a fraud and his title a myth. It cost the United States $250,000 to defeat Reavis and secure his imprisonment in a New Mexican penitentiary for two years. In the meantime the influential friends of Reavis had spent $750,000 in his behalf, and honestly insisted that his claim was just.

The Peralta land claim story reads like a romance. It was founded solely on the mythical lineage of a Mexican girl whom Reavis married. In a word, he forged so skillfully that this woman from Mexican mountains was herself convinced that she was an heiress—she believed the story he told her. She swore that she was the granddaughter of Baron Miguel Peralta de la Cordova, of Spain, who went to Mexico in 1730 as a crown commissioner, and in recognition of his services King Philip V. in 1742 gave him the grant of this great tract of 12,500,000 acres, which to-day lies in Arizona and New Mexico and contains some flourishing towns and is worth $100,000,000.

JAMES ADDISON REAVIS.

Suit was formally entered in the United States Court of Claims. Eminent counsel offered their services to Reavis on a contingent fee. The government sent searchers to Spain. Crocker, Mackay, Huntington, all lent Reavis money to fight what they regarded as a just claim. Conkling, Cockran and Ingersoll agreed to serve as counsel. Ed Stokes let the man and his wife run up a $10,000 board bill at the Hoffman House. Confiding merchants added clothes, horses and carriages, jewels. Strangest of all, there arose all over the country 160 other claimants, all Peraltas and all descendants of the original baron. Yet the baron's descendants were only the creatures of Reavis' brain.

It was after the civil war that Reavis conceived his conspiracy. He was 35 years old. He had forged a little—a pass in the army, a title deed to some land, a note—and hadn't been found out. So when a Dr. George M. Willing told him of a great tract of land in Arizona and New Mexico to which he bore a clouded title he decided to look into it. Dr. Willing had claimed the title, and at his death his wife wanted to look it up. She asked Reavis, who had been dabbling in real estate in St. Louis, to take charge of it. But it was worthless. Reavis then made up his mind to find someone else to whom the title could be ascribed. He found her in an unknown Mexican girl. No one knew the history of her birth. From a baby she had Indian children for playmates. A ranchero's family raised her and sold her into bondage.

Reavis took this beautiful child to San Francisco, and John W. Mackay was so impressed with his story that he allowed him $500 a month with which to go to Spain to prosecute his search for evidence. So Reavis went, posing as a newspaper correspondent, eager to write accounts of Spanish curiosities, so dear to the American people, then friendly to Spain. Reavis found that the Peralta family was extinct—just the thing to further his schemes!

In a curio shop Reavis got a valuable link in the chain of evidence—two old ivory miniatures of a husband and wife. His practiced eye told him that they had been painted in the eighteenth century. They were just what he needed.

"On these as a foundation," says this strange man, "I built the mythical structure which all but stood against the efforts of the government and the vast expenditures of money to tear it down."

Reavis came back and married the beautiful Mexican and told her that the miniatures were those of her great-grandmother. Then pushing aside all the forgeries prepared to back up the Willing claim, Reavis started in anew. He traced the lineage of the Peraltas. He found it to be an old family. The name meant a "high pear," from the Spanish "pera," pear, and "alta," high. The family became a titled one when a dukedom was conferred upon Enrique Carrillo several hundred years ago. The last one was Baron Miguel.

Now for a mythical hero, the grandfather of the Mexican girl! This was easy. Reavis selected another extinct Spanish family named Silva, married it by forged archives to the last of the genuine Peraltas, who in reality had never married, and the mythical Silva Peralta was born to the genuine Baron Miguel Peralta de la Cordova, who never had a son.

"I made the records show," says Reavis, "that the second Baron had to abandon Sonora, Mexico, because of the French invasion, and set out for Spain, the home of his ancestors, in 1858, by way of Los Angeles and San Francisco. In 1822 he had married. I doctored the records all right—and to him a daughter had been born who married Don Jose Ramon Carmen Masol y Castillo, Sept. 20, 1858. With his daughter and her husband he set out for Spain."

It was perfectly planned. The records told enough of the story to give it foundation. He was too wise to tell too much, as it might have been more easily disproved. Floods overtook the family at a crossing of the Santa Anna River, near San Bernardino, Cal., where twins were born to the young mother, a boy and a girl. Mother and boy died, and were buried there in one coffin. The father proceeded, taking the girl with him.

This was the mythical lineage Reavis built for his beautiful bride. She was to be the girl who survived. And it had a wonderful verisimilitude to the truth. There had been the floods, there had been the Spanish nobleman with his family, there had been twins born, there had been the deaths, and the father had gone on with his little girl. A settler had told Reavis a true tale of years gone by. It was easy to convince the settler that they were the Peraltas, which they were not.

There were the church records, too. Mexican scribes did the work for him. Reavis did the ageing of the records. It was easy to slip them between the original archives from which they could not be distinguished. It was easy to change ancient church records.

The Spanish archives bore out everything that Reavis claimed. His wife now took the title of Baroness of Arizena, and called the tract "La Baronia de Arizonia." Certified copies came over from Spain, true transcriptions of the archives. But the archives were forgeries.

"They were literally glued together with age," wrote the searchers, in their simple Castilian way.

So they were. Reavis had glued them months before. So the case was docketed on the calendar of the United States Court of Claims, and the learned judges took up consideration of what came to be known as the "great Peralta claim."

And only a bit of chance brought the whole cunningly devised structure to the ground. A United States official was searching in Madrid on an entirely different matter. By chance he came across one of the documents—the original deed to Don Miguel. It was a forgery. Other discoveries bearing on the bogus claim came fast and in a twinkling all was changed. The eminent counsel withdrew. The California millionaires abandoned Reavis and he was arrested. The government spent $45,000 more to convict him of misdemeanor. He was sentenced to two years in the prison of New Mexico, and has just been released. And now he has made a full confession of the attempted fraud.

Quick Photography.

A Sheridan (Mo.) photographer says he has discovered a process by means of which a proof of a photograph may be taken within a few moments after the sitting.

The more worthless the man, the better his health.

BOSTON'S WONDERFUL ROLL LIFT BRIDGE.

This bridge will be the largest of its kind in the world. In the picture the three sections of the draw are shown lifted to admit the passage of vessels. These draws weigh 3,160,000 pounds. Electricity will be the power used.

HAS A PRIVATE BALL PARK.

Base-Ball "Fan" Has a Novel Way of Entertaining Friends.

Julius Fleischmann, of Cincinnati New York, Europe and several other places, has clinched his claim of being the greatest base-ball "fan" in the world by maintaining a team and park of his own, in which games are played for the amusement of himself and friends. Mr. Fleischmann has a great racing stable, crack yachts and other means of enjoyment, but it is in his baseball outfit that he takes the most pleasure and pride.

Mr. Fleischmann owns a summer home in the Catskill Mountains, near Griffin's Corners, and it is there he has made his private base-ball park. The ground had to be virtually cut out of the side of the mountain. People acquainted with the topography of the district don't need to be told that the finding of a level spot large enough for a ball park is a rather serious undertaking in the Catskill country. Mr. Fleischmann looked about, and finally found a four-acre tract that did not have more than a dozen hills and valleys on it, and purchased it. Many thousands of dollars were spent in leveling this ground and blasting the bowlders, so that in the summer of 1895 the team had a real ball ground to play upon. Further improvements have been made, and now the dirt diamond is as smooth as a billiard table, and the rest of the field is covered with a lawn level and perfect for the game. This ground is inclosed by a high wire fence, with thousands of loopholes for the village youth to peep through, and the grand stand, with comfortable seats, accommodates 500 persons. And when a game is on this grand stand is crowed with men and smiling summer girls all in the gayest of summer gowns.

Players who come to try their skill against the Mountain Athletic Base-ball Club, as Fleischmann's team is known, find luxury awaiting them under the grand stand, for Mr. Fleischmann has fitted the three dressing rooms with plunge and shower baths, and a man in attendance looks after the comfort of the men. Do not doubt that the members of the Mountain Athletic Base-ball Club get plenty of enjoyment out of their season's work, in addition to the salaries they draw and the comfortable living Mr. Fleischmann purchases for them at a summer hotel.

FLEISCHMAN'S PRIVATE BASEBALL PARK.

Conversing at Long Range.

An inquiry made some time ago as to the greatest distance at which a man's voice could be heard, leaving, of course, the telephone out of consideration, brought out some rather curious facts. It was ascertained, for instance, that eighteen miles is the longest distance on record at which a man's voice has been heard. This occurred in the Grand Canon of the Colorado, where one man shouting the name "Bob" at one end, his voice was plainly heard at the other end, which is eighteen miles away. Lieutenant Foster, on Parry's third Arctic expedition, found that he could converse with a man across the harbor of Port Bowen, a distance of 6,696 feet, or about a mile and a quarter; and Sir John Franklin said that he conversed with ease at a distance of ten miles.

What has become of the old-fashioned woman who laid aside the cakes and fruit she received at a party to take home to her children?

The less a man knows about options on wheat or stocks the greater are his chances of getting on the right side.

KING DANCED THE HULA-HULA.

How Kalakaua Put Aside Dignity and Entertained Americans.

"I witnessed a most extraordinary thing in 1889, and one that I never expect to see again should I live 100 years—a crowned head, a king, dancing on a billiard table," remarked Paul Trommlitz, of San Francisco, to the Enquirer man, "and there were several Americans present who will testify to the truthfulness of my statement. There was a party of us from the Pacific coast stopping at the hotel in Honolulu in the year I mentioned. King Kalakaua was then on the throne, little dreaming that his dynasty was fading away forever to be merged into the American government. The old man, for he then appeared to be nearing 60, was wont to come down to the hotel every evening from the royal palace and mingle with the guests. He was attired in ordinary citizen's garb, with no insignia of royalty about him.

"On the evening I refer to Kalakaua came to the hotel attended by several of his best musicians and most accomplished dancers. We all went to the wineroom below, which was also the billiard-room, where we were entertained at length. Later, along about midnight or after, when the wine, song and dance had warmed his blood to the boiling point King Kalakaua leaped upon the billiard table with the agility of a cat and commenced to give us the 'hula-hula,' or native muscle dance, in great shape, while we applauded him to his most effective efforts. When he had run the gamut of the exciting dance someone bet him that he could not kick the chandelier. He attempted it several times, but failed, owing, perhaps, to his exhaustion from the dance. Then one of our party jumped upon the table and kicked the chandelier from its fastening to the gas jet. The flow of gas was quickly shut off with a bottle stopper. All damages were promptly settled by cash on the spot, and the King and his retinue retired from the scene. King Kalakaua died in San Francisco during the Knights Templar conclave a few years ago. He was a Knight Templar, and after attending the banquet returned to the hotel and died."—Cincinnati Enquirer.

The Cuban Major General.

I am the very model of a Cuban major general;
My sole idea is money, made of paper or of mineral.
My love of Cuba libre is not such as makes me livin' end,
And I scorn all sorts of warfare that do not produce a dividend.

We gather in assembly and shoot off our mouths ferociously,
And all agree that Uncle Sam has treated us atrociously.
The proper course for him, we think, would be to roundly pension us,
Although the war dispatches did not prominently mention us.

All such affairs as sorties and surprises we were wary at,
And yet we stuck quite closely to the Yankee commissariat.
We're very well acquainted, too, with matters mathematical,
And when prospective pay's in sight our instincts are piratical.

When Cadmus sowed the dragon's teeth, armed men sprang up in brave array,
But nothing like the troops we raised by commonplace chicanery.
The jingle of the dollars far more power hath to raise a force
Than all the patriotic blood that in our dusky veins doth course.

We garrison the restaurants, and with consummate strategy
Pick out the best positions, and pose with mighty hat a-gee.
Of battles that were never fought we prate most sanguinaceously,
And when some one suggests a drink, we accept the same quite graciously.

—Washington Post.

A Costly Drought.

The drought of the last few years has cost New South Wales an enormous amount of money. The flocks of the colony have shrunk from 66,000,000 to 36,000,000, representing a loss of 20,000,000 sheep. If to this is added the loss of the natural increase, the shrinkage amounts to 50,000,000 sheep; enough, that is, to equip a considerable-sized colony. In addition, there has been a loss of learly 300,000 horses and 150,000 cattle. That the colony has been able to survive these terrific losses is a striking proof of energy and resource. Translated into money, the colony has suffered a loss, due to mere inadequate rainfall, of from £12,000,000 to £20,000,000 sterling.

How Sea Lions Capture Gulls.

In capturing gulls the sea lion displays no little skill and cunning. When in pursuit of a gull it dives deeply under water and swims some distance from where it disappeared, then, rising cautiously, it exposes the tip of its nose along the surface, at the same time giving it a rotary motion. The unwary bird on the wing, seeing the object near by, alights to catch it, while the sea lion at the same moment settles beneath the waves, and at one bound with extended jaws seizes its screaming prey and instantly devours it.—Scientific American.

An Attraction at the Paris Exposition

One of the new things to be shown at Paris next year is a model Vesuvius, 250 feet high and 495 feet in diameter, built of iron, steel, cement and turf. A spiral path bordered with cafes will wind up the volcano. Inside is to be represented Dante's heaven and hell.

One of the first persons to call on a newly married man is a piano agent. When love is still young, all sorts of agents fasten upon a man, believing that he will be soft and pliable as putty in their hands.

Your friends give you everything but money, and money is what you need.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JULY 21.....1899

The Young Men's Democratic League of Atlanta, Georgia, had for its guest at the Kimball House, Hon. W. J. Bryan. About 200 partook of the banquet. Mr. Bryan said:

In my opinion the time has come when it is life and death for the Democratic party, and when we should take a determined stand on all the principles which have long been a part of the platform of the people. There has been much talk about the side-tracking of free silver. But I say that no such fatality shall develop. Free silver will be as dominant an issue in the coming campaign as it was in the last. The cause of bimetalism is daily growing in strength and as the people begin to realize fully its importance, they are rallying heartily to its support. Another cardinal principle of the next campaign will be that of anti-imperialism. The dominant party is on the side of a policy, the success of which will place in jeopardy many of our institutions. The effect of that policy is already manifest. It is useless to enter into any extended argument against its folly, for the reason that those who support it in the Republican party are thoroughly grounded in their belief, and we, of the opposition, have the work before us of making proselytes of the people who depend on the faithfulness and discernment of their friends to point out the proper pathway. There has been some effort to establish the belief that anti-imperialism will be the leading plank in the party platform, and it is the only one on which the party can hope to achieve success. Speaking from a standpoint of unofficial observation, I could not see the advisability of separating this from other equally important issues, and I no not believe that such a course will be attempted. Another principle which will prove a winning card for the Democracy is that of opposition to the trusts. Under the careful nurture of the Republican party these evils have developed and flourished, until to-day they practically dominate the labor of the country, making slaves of the men who are called free-born citizens, and setting at defiance the laws and constitution of the United States. The iniquities of this great national blot have been vividly impressed upon the minds of the people through bitter personal experience, and it will require no extensive literature or wordy campaign to array the masses against it. I have often been asked if I consider myself the candidate for the next Democratic presidential nomination. I would much prefer lending my assistance in a vigorous campaign to another man, but mark you, he who is the choice of our party in 1900 must be one who will not falter or hesitate, but who will boldly press the issues which our party create, and who will as fearlessly combat those whom the opposition has already established and are now maintaining. The selection of the individual is immaterial. A name is nothing, but the man must be everything. Not a plodder, nor a timid leader, but one who recognizes the needs of the hour, and who is not backward in performing the duties which his position will thrust upon him.

One of the funniest incidents which the Associated Press special cable line has been burdened with for some time is the controversy between Count Castellane and the Prince of Monaco, over the Dreyfus incident, which for some months past has been disturbing our mercurial brethern across the water. The only interest in the matter that Americans have is that the Count whether bogus or otherwise, married the younger daughter of the late Jay Gould of "Black Friday" fame, and having rehabilitated his fortunes with the American millions, presumes to pose as a factor in European politics. It appears that Castellane wants to fight a duel with this Prince of Monaco, because of the latter's sympathy for Dreyfus the Semitic martyr of the French nation; but the latter will not fight because Castellane, he says, is a bogus count, and therefore his challenge is an "impertinence." So there does not appear to be any danger of the spilling of some more or less "blue blood." We would simply recommend to the beligerents that they go to some secluded place and if they can find any excuse for blood-letting to go ahead, and if, by the grace of Providence, Castellane should be "removed", let his widow come home and pattern after that highest type of American womanhood, Helen Gould, her sister, who by her kindly acts has endeared herself to the American people, and put herself in the front rank of American humanitarians. Do this, and all will be forgiven on both sides of the fence.

The kissing bug is the latest fad of the press. Bugs have been stinging people, with an occasional death, since Adam was rewarded for his knowledge by a suit of fig leaf and a free pass to the outer limits of the garden; but because a bug of one peculiar kind happened to cause the death of a boy in illinois by stinging him on the mouth the "kissing bug" has come into prominence. It is probable that Mother Eve was in much trouble lest this same bug should sting her boy Cain, and that Noah put it in among the spiders and scorpions when it applied for passage on the ark.—*Sun.*

Mrs. Lillie Devereux Blake in her zeal for the uplifting of her sisters says that when a woman finds a man for whom she thinks she would make a good wife she should have the privilege of proposing marriage to him. Under her scheme there would be no escape for a man who declined to accept such a proposal save in flight. It won't do, Lilian.

Treasurer's Report.

TREASURER'S QUARTERLY REPORT—FOR THE QUARTER ENDING JULY 1ST, 1899.

To the Hon. Board of Supervisors, Inyo County, State of California:

GENTLEMEN—

I herewith submit my report of the receipts and disbursements of this office for the quarter ending July 1st, 1899.

Respectfully submitted,

W. T. BUNNEY, County Treasurer.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899. D. J. HESSION,

(SEAL) Clerk.
By C. N. ROSE, Deputy Clerk.

P. H. MACK, Independence, Cal.
Attorney for Plaintiff.

Administrator'c Sale.

Notice is hereby given, that in pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the tenth day of June, A. D. 1899, in the matter of the estate of Luther Clark, deceased, the undersigned the Administrator of the said estate, will sell at public auction to the highest bidder for cash, lawful money of the United States, and subject to confirmation by said Superior Court on Monday the twenty fourth day of July, A. D. 1899, at two o'clock p. m., at the Court House door and in front thereof, in the town of Independence, County of Inyo, State of California, all the right, title, interest and estate of the said Luther Clarke at the time of his death, and all the right, title and interest that the said estate has, by operation of law or otherwise, acquired other than, or in addition to that of the said Luther Clark at the time of his death, in and to those certain mines, mining claims and mining interests, to wit:

An undivided one-third interest of, in and to that certain mining claim, situate, lying and being in the County of Inyo, State of California known and designated as the "Tip Top" Mine and Mining Claim.

Also, an undivided one-third interest in and to that certain mine and mining claim situate, lying and being in the County of Inyo, State of California known and designated as the "Three Formation" Mine and Mining Claim.

The said mines and mining claims are situated in the Sierra Nevada mountains, about seven miles from Round Valley, in a Westerly direction.

Terms and conditions of sale: Cash, lawful money of the United States; ten per cent of bid payable at the time of sale, and the balance upon confirmation of sale by said Superior Court. Deed at the expense of purchaser.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

NOTICE IS HEREBY GIVEN by the undersigned, Executors of the last Will and Testament of

EDOUARD CHENOT,

deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice to the said Executors, at the residence of P. W. Forbes, in the town of Independence County of Inyo, State of California, the same being the place for the transaction of the business of the said estate in the County of Inyo State of California.

J. E. SHEPHERD and
W. L. HUNTER,
Executors of the estate of Edouard Chenot deceased.

Dated at Independence, Cal., November 30th 1898.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

Notice is hereby given by the undersigned, administrator of the estate of Luther Clarke deceased, to the Creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Ten Months after the first publication of this notice to the said administrator at his place of business on Edwards Street in the town of Independence, County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, state of California.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

OFFICIAL.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

COUNTY OF INYO.

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, state of California, called and recorded in the mining records of said county, as the "Fiesta Mine," as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under Section one of an Act entitled "An Act relating to the working, rights of way, easements and drainage of mines in the State of California, approved March 31st

FRANK HARRIS.

Dated January 13, 1899.

DESERT LAND, FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL.,
June 5, 1899.

Notice is hereby given that Laura Mitchell of Independence, Inyo Co. Cal., has filed notice of intention to make proof on her desert land claim No. 800, for the N ½ SE ¼ Sec. 23, Tp 13 S, R 35 E, M D M, before the Register and Receiver at Independence Cal., on Saturday, the 15th day of July, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: John C. Willett of Citrus, Cal., Joseph Vaughn of Citrus, Cal., Michael McSweeney and William H. Mitchell, both of Independence, Cal.

S. W. AUSTIN, Register.

OFFICIAL.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO.

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States, and under Section One of an Act entitled "An Act relating to the working, rights of way easements and drainage of mines in the State of California," approved March 31st, 1891.

FRANK HARRIS.

Dated January 13, 1899.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Jedediah S. Collins, deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said decedent, for the purposes therein set forth.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated June 15th, 1899.

P. H. MACK, Attorney for Administrator.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

THURSDAY, July 13, 1899.

Elvira Smith vs. Geo. Smith—Filed complaint. Issued summons.

TUESDAY, July 18, 1899.

N. C. Palmer vs. Mary A. Palmer—Filed complaint. Issued summons.

Mrs. Alice Morton of Keeler is visiting town.

Tom Webb came down from Long Valley Wednesday.

A slight thunder shower cleared the atmosphere on Tuesday.

Regular meeting Inyo Lodge No. 221, F. & A. M. to-morrow evening.

Mr. Gibbs, the piano tuner, will be here after tuning the pianos in Mono.

A sharp shock of earthquake was felt in town last Monday morning about 1:30 o'clock.

The Taboose school house is being moved to the grove of trees west of the Tibbetts place.

George and Frank Clarke each brought a four-horse load of drummer from Bishop yesterday.

S. A. Densmore left for Los Angeles last Monday. He is in poor health and has gone for medical treatment.

Parke Barnes came down from the mine Tuesday. He says there is now six feet of ore in the north drift and the mine looks better every day.

E. R. Dodge Esq., a Reno attorney, came to Independence on Wednesday's train. Mr. Dodge is interested in some copper properties in Saline Valley.

Southern Inyo is getting a lively move on. Mining sales are reported every day and plants are being erected everywhere. Whoop! What's the matter with we 'uns?

Supt. Hoskins was in from the Reward one day this week. He reports matters progressing satisfactorily at the mine. Seven men are at work and five stamps are dropping.

H. Giles and George Thorpe left for Mazourka on Wednesday morning with a supply of grub and will resume work on the long tunnel with renewed vigor after enjoying a short vacation.

The P. D. Q. Cyanide company started a force of men to work Tuesday in getting their machinery in place at Beverlide. Work will be commenced in a few days on a fifty ton plant at the Reward mine.

Mrs. Leora B. Rhine has been engaged to teach the Independence school for the coming term. Fred Stewart will teach the school at Camp Independence, Miss Harper at Taboose and E. L. Dehy at Georges Creek.

Mr. and Mrs. G. Sanger and Will Sanger were in town yesterday. They own extensive copper properties in Saline Valley on which a sale is now pending with Salt Lake people, the agents of whom have been here all the week.

Tuber Mines Sold.

George Montgomery returned last Tuesday from his trip to Los Angeles. He reports that the Oh Be Joyful mine at Tuber Canyon has been sold and that a forty-ton plant consisting of a set of rolls and a five-foot Bryan mill are on the way to the mine. With the sale of this property and its being placed in the list of bullion producers, a great stimulus will be given to all mining affairs in the Ballarat country. The Bryan mill belonging to the World Beater mine in Pleasant canyon, has been removed from its old location and set up at the mine. It is expected to be in complete running order by the end of this month. A cyanide plant will be added and the World Beater will then be on a good paying basis. The sale of the Tuber property means more for southern Inyo than anything that has transpired for a long time. It is sure to be a great bullion producer, and when bars of bullion commence to be shipped it will awaken great interest in other valuable properties there.

BIG COPPER DEAL.

Saline Mines Sold to Boston Capitalists.

What promises to be the biggest mining deal ever consummated in this county is well under way. For more than thirty years past extensive bodies of copper ore have been known to exist in Saline Valley, east of the Inyo range of mountains. On one of these copper deposits, the Ubehebe, more or less work has been performed in a desultory manner for upwards of thirty years. On the Sanger group John Kelly did some work, but the showing was not satisfactory to him and he did not take the property. W. L. Hunter and R. C. Spear own a third extensive group in the same district. Early last Spring a man named Stewart in the employ of Salt Lake parties, spent considerable time in Saline Valley and became convinced that these copper deposits were of immense value and so reported to his principals. On June 1st one of them, C. H. Scheu, arrived here and personally inspected the properties. Mr. Scheu has the reputation of being a very conservative man and one of the world's greatest copper experts. He says that these mines have the greatest surface showing of copper of any in the world. Many of the veins are two hundred feet wide and the ores are high grade. While here Mr. Scheu took options on all of the locations in the district, besides a large number of locations being made by Mr. Stewart. On Monday last Mr. Scheu accompanied by S. H. Mackay, another member of the combine, arrived here. All the parties who had given options were summoned here and the time of the parties has been fully occupied in getting abstracts of title and in making the necessary transfers. Mr. and Mrs. G. Sanger and W. Sanger came down from Alvord Wednesday and Messrs. Hunter and Spear arrived this morning. The syndicate making the purchases represent a capital of seventy-five million dollars. A packtrain has been secured, miners are being hired, supplies procured and the work of development will begin at once on an extensive scale. To make the working of the mines a success a railroad will be necessary, and a combination is sought to be perfected with the Johannesburg people, with the expectation of having them extend their road to Ballarat and into Saline by way of Lee district. What would be of far greater benefit to Owens Valley would be the extension of the C. & C. to a point on the A. P. by way of Lee and Panamint Valley, throwing a spur about twenty miles in length to the Saline mines. We earnestly hope to see this brought about. Mr. Mackay stated that they would guarantee five hundred tons of freight per day. If enough water can be found available a plant of one thousand tons of ore per day capacity will be erected at the mines and the values shipped in the form of matte. Otherwise the crude ore will be shipped to tide water for reduction. There is only one thing which can prevent the consummation of this deal, which is that the ore bodies may prove to be merely surface deposits, and that matter will be quickly determined. A large force of men who will work continuously in eight hour shifts, will be put to work sinking. We venture the prediction that before 1900 expires there will be a town of 3,000 inhabitants in Saline Valley. This will mean the consumption of large amounts of supplies which this valley should furnish; and the town which gets in the closest and most convenient reach will be the supply point. This will be our golden opportunity. The shortest and most practicable route to Saline Valley is by way of Mazourka and Lead Canyons. Men who are good judges and who are familiar with the route claim that a wagon road can be built for $3,000. We should get to work at once and see that this is done.

Bitten By a Snake.

Word was brought to town last Monday that a man had been bitten by a rattle-snake at Blackrock, and Doctor Woodin sent a team out after him. For several years past an old man known as "Scotty" has been farming a vegetable garden on a little spot of ground up on Division creek. Rattle-snakes are numerous in that country, and Scotty has killed hundreds of them. He was at work in the garden, and while stooping over some vegetables he felt a sharp sting in the calf of his left leg, and on turning saw a rattler poised for a second blow. He promptly killed the snake and then began a fight for his life. Luckily, he had a sharp razor in his cabin, and with this he cut out as liberal a chunk around the bite as his spare frame would permit, covered the wound with tobacco, and started for the eight-mile house several miles distant. Here he obtained some ammonia, which materially lessened the swelling. On arriving in town he was cared for by Dr. Woodin for several days until completely out of danger, and he has now returned to his vegetable and rattle-snake patch This is the second time he has been bitten.

Powder Throwing.

Sheriff Given and District Attorney Dehy returned Tuesday from a trip to Ballarat. On the night of July 3rd there was a general celebration in Ballarat and a great deal of giant powder was burned. Some person threw a piece of giant into the room where one of the Porter brothers was sleeping. It exploded, tearing a hole in the floor but fortunately doing no further damage. In the same room was a bucket containing sixteen pieces of powder all primed in readiness for firing salutes in the morning. That they were not exploded is nothing short of a miracle, and had they been, three lives would have been sacrificed, as a lady and little child were sleeping near by. A man named Burns was arrested and examined before Judge Decker, but as there was not sufficient evidence against him, he was discharged.

A Surprise Party.

On Wednesday evening the young friends of Miss Nettie Irwin joined in tendering her a surprise party. The young lady, who is one of the jolliest and brightest girls of Independence, leaves on Tuesday for Santa Rosa where she will attend school during the coming year; and the young people took this means of showing their regard and bidding her farewell. Promptly at eight o'clock they marched to the Irwin residence, laden with cakes and confectionery, and the expression on Miss Nettie's face as she opened the front door and viewed with wide eyes the merry crowd, proved beyond a doubt that their party was indeed a surprise. Then they all repaired to the garden where the big lawn was soon lighted with bright colored lanterns, and made an ideal playground. Here young and old joined in the games and pranks of childhood, and sundry squeals and peals of laughter gave proof that they were enjoyed to the utmost. At eleven o'clock all sat down to a repast of sandwiches, ice-cream and cake, apples, nuts and candy. Shortly after twelve the merry-makers bade their popular young hostess good-night, and a jolly evening was brought to a close. The following were the surprisers: Mamie Hession, Blanche Bunney, Maggie Bunney, Lizzie Matlack, Minnie Levy, Joe Levy, Jeanette Wood, Jennie Roughney, Louella Robinson, Paul Mairs, Arthur Mairs, Frank Willis, Lesta Hampton, Val Gorman, Freddie Samuels, Carrie Schabbell, Irma Webb, Chas. Mulholland, Kate Walters and Lester Shepherd.

Equality and Fraternity.

All citizens are invited to be present at our house, the County Court rooms, on Friday evening, July 21st. Under the auspices of the Economic Club of Independence the following program will be offered to the public; 1st, an oration entitled "The Ship of State", by E. T. Fleming of New York. 2nd, select readings from modern political economy, by John J. McLean, U. S. Weather Bureau. All questions presented in oration and readings are open for discussion on the part of those present in five minute speeches.

Real Estate Transfers.

The following deeds have been recorded since July 14, 1899.

Fred Sykes to A. L. Adams.—April 5, 1899, mining claims, $35.

A. L. Adams to H. M. Schultheiss—April 8, 1899, Bunco and other claims, Panamint dist., $35.

A. E. Sutherland to Geo. Montgomery, April 14, 1899, und ¼ int in McMahon claims Tuber canyon, $1.

Al Williams to E. A. Montgomery—April 29, 1899, und ½ int in Worthless claim, Tuber canyon, $5.

John C. Carroll to C. B. Rawson—Aug 19, 1898, 40 acres at Blackrock, $10

He Sent the Pork.

Professor Comstock of Cornell in speaking to his class on the trials of scientists told this authentic tale of the experience of a professor of invertebrate zoology in a sister institution, which had better be left nameless.

Trichinæ in pork, the cause of the frightful disease trichinosis in human consumers, give a peculiar appearance to meat, which is studded with little cysts. It is then known to the trade as "measly pork." The learned scientist, wishing some for study, went to the butcher and asked if he ever got any measly pork.

"Sometimes," said the butcher cautiously, "but I always throw it away."

"Well," said the professor, "the next time you have any I wish you'd send me up some," meaning, of course, to his laboratory.

The butcher stared at him, but said he would. Three weeks passed, when the professor, growing impatient, again dropped in.

"Haven't you found any measly pork yet?"

"Why, yes," said the butcher. "I sent up two pounds a week ago."

A sickly grin broke over the professor's face.

"Where did you send it?" said he.

"Why, to your house, of course," said the butcher.—Kansas City Times.

Jerry's Version of It.

A prominent Detroit woman with a great interest in juvenile mission work has this excellent anecdote to tell:

One of her classes in a certain mission is composed of little street children to the number of 20 or more whose ages range from 3 to 6. Most of the scholars are boys, though now and then one notices the pinched face of a little daughter of poverty in the ranks.

The other day the lesson was on the peculiarities of English. Words that are pronounced alike and spelled differently and words that are pronounced differently but spelled alike were discussed at length. She explained the difference between lead the metal and lead the verb, and the children grasped the point instantly. Then she took the two words "week" and "weak." She explained the difference in the meaning and use to the tots, and then called up a little fellow, aged 5, to use the word "weak" in a phrase. The little fellow thought a moment, then answered, "A weak old woman." The teacher nodded her approval, and smiled into the eyes upturned to hers.

"Now, Jerry Ryan," she said, turning to another little boy, "you take the word 'week' and use it in a phrase."

Jerry thought a minute, and then, he, too, replied, "A week old baby."—Detroit Free Press.

Lodge 221, F. & A. M.

Regular meetings of Lodge No. 221, F. & A. M., for the year 1898, will be held at the Lodge room at Independence as follows:

Saturday.....January 21, 1899
" .....February 25, 1899

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner; your interest in said claim will become the property of the subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley

THE UNITED STATES A POWER FOR GOOD.

A distinguished historian writes, while referring to our advent as a colonizing power, that our influence for good over European spheres will be immense. This result was just as inevitable as is the cure which follows the use of Hostetter's Stomach Bitters. It cures indigestion, constipation, and tones up the whole system.

Lots of folks would avoid many mistakes in grammar if they talked just a little less.

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight or new shoes feel easy. It is a certain cure for Ingrowing Nails, sweating, callous and hot, tired, aching feet. We have over 30,000 testimonials. Try it *today*. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

How few of us there are who can do anything real well!

Life to a Lazy Liver!

Lazy, leaden livers cause nine-tenths of all deaths. Give your liver life with Cascarets Candy Cathartic and save your own life! All druggists, 10c., 25c., 50c.

A fellow never feels as foolish as when mixing in conversation he knows nothing about.

Your Grocer sells Kleeno Washing Powder.

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
Address, F. J. CHENEY & CO., Toledo, O.

The Montana Brand of Poker.

A Montana man, speaking of how poker was played in the state in the old days, said: "Senator Clark used to sit in a little game in the Silver Bow club, in Butte. He generally played with Marcus Daly, Haggin, Hearst or some one of those big fellows, and they enjoyed themselves. On one occasion a New York drummer dropped into the club while the game was on. He had a card with a two weeks' run on the club. Well, he see Daly, Haggin, Clark and another fellow sitting in the game, and he sashays up, perlite, and says:

"'Well, gentlemen, any objection to my taking a hand?'

"'No,' says the players, cheerful, like, and then this drummer he pulls out a thick roll and peels off a $100 bill and chucks it on the table. 'Gimme chips for that,' says he, and looks around, puffed up like. He goes and hangs up his coat, and when he comes back and sits down there lays that bill.

"'What's the matter, gentlemen?' he says, huffy like. 'Ain't my money good?'

"'Why, yes, to be sure,' says Marcus Daly. 'Clark, give the gentleman one white chip.'

"Well, that gentleman from the effete east he nearly drops dead, he does, and he goes out to get some of the mountain air."

Wood Compressed by Water.

"Have you ever seen a bit of wood that you couldn't burn?" said an old sea captain to me the other day.

"Why, lots," I replied, "the brier root, for instance—at least, if it's good—ironwood, too, and one or two others."

"I don't mean those," he said. "But have you ever seen a lot of common deal that fire had no effect on?" He pulled from his pocket a morsel of what looked like white Norwegian deal and handed it to me. I was surprised at the weight. "Put it in the gas flame," he said.

I did so, but beyond a blackening of the surface there was no effect.

"That bit of wood," went on the skipper, "was part of the gunwale of one of my boats. We were whaling in the South seas and harpooned a big right whale off the Cape of Good Hope. The creature sounded, the rope fouled and the boat was carried down. Probably it was taken half a mile or more below the surface. The whale rose again and was killed, and a portion of the boat was recovered from the line which still hung to it. It was the pressure of the water hardened it like that."

"Better Be Wise Than Rich."

Wise people are also rich when they know a perfect remedy for all annoying diseases of the blood, kidneys, liver and bowels. It is Hood's Sarsaparilla, which is perfect in its action—so regulates the entire system as to bring vigorous health.

Hood's Sarsaparilla
Never Disappoints

IS YOUR HEALTH BROKEN?

Thousands of people are suffering untold miseries because of the poor condition of their blood—are in almost continuous agony.

Moore's Revealed Remedy

will cure them—will do it quickly and pleasantly as it has cured thousands of others. $1.00 per bottle at your druggist's.

Agents wanted in every town to sell patented articles. Further information furnished on request. Room 48 CHAMBER OF COMMERCE BUILDING, Portland, Oregon.

A MODEL STEP-DAUGHTER.

THE meadow was all pearled over with dew; the August sun was distilling sweetness from Abigail Wray's clove-pinks and sweet williams, and the girl sang gayly at her work, as she put the coffee and hot graham gems on the table, and nodded to her father coming in from the fields, with his black ribboned straw hat in his hand.

"Well, puss," said the farmer, with a smile, "how did you enjoy yourself last night, listening to this fine new lecturer?"

"Oh, so much, father!" cried Abigail. "The hall was crowded, and I don't know whether we all cried or laughed oftenest. Oh, father," she added, "what a grand thing it must be to be able to move people's hearts like that!"

"Humph!" said Elihu Wray. "In my time women used to stay at home and mind the house and look after their children, instead of going tramping around the country giving lectures."

"But Miss Perceval has neither husband nor children, father," urged Abigail. "And I don't suppose she has any home to look after."

"Miss Perceval? That's her name, is it?"

"Father, I wish you'd go to hear her!" cried eager Abigail. "I'm sure she'd make you laugh and cry, too! You couldn't help it. She isn't pretty, you see, but she has such an expressive face, with bright, sparkling eyes like a bird's!"

"I knew a woman once," slowly uttered Wray, "who took to speechifying in public. Nobody would have thought it of her, either—the quietest, shyest little thing in the world. But there is no accounting for women. I never heard her, but I'm told she made a success of it. Her name was Daggett."

"Father, you'll go with me to-night, won't you?" coaxed Abigail. "Do! Just to please me. I do so want you to hear Miss Perceval. John Tracy—he's on the committee, you know—he says they pay her fifty dollars a night. She must have a deal of money laid up. Oh, I wish I had a talent like that!"

"Tut, tut, my little girl!" said the farmer as he sprinkled sugar over his heaping saucer of blueberries. "I don't wish it at all. What should I do if you went lecturing half over the continent and left me here alone?"

"But, father, I must leave you some time," reasoned Abigail. "Every girl does."

"Then you're not going to become a little old maid for my sake, eh, puss?"

Abigail laughed, shot a roguish glance at him from beneath the dark curtain of her eyebrows, and shook her head.

"All girls marry, father," she said. "Your Miss Perceval hasn't got married, it seems."

"No, father. She can do better."

"Don't you believe that, my girl," said Mr. Wray. "There is no better fortune in all the world than to marry. If you can marry the person you love."

"Getting sentimental?" Abigail asked, clapping her plump hands.

"It ain't sentiment, child. It's common sense," sturdily maintained Wray.

"Father," abruptly spoke Abigail, "I've often wondered why you did not marry again."

"I?" He looked up in amazement.

"Because," added the girl, "mother never was much of a companion for you. She was always sick and complaining, and she didn't care for books, as you did, and she fretted at every little thing, until I used to wonder at your patience with her. Oh, you see, I noticed all these things, child though you thought I was. And she told me once——"

She checked herself abruptly. Wray looked at her with grave surprise.

"Told you what, Abigail?"

"I don't know whether I ought to repeat it, father," said Abigail, coming around to his side and resting her clasped hands lightly on his shoulder. "It was the day before she died; and she told me lots of things, besides, that I did not know. She said she never had any real right to your heart; that you never had cared for her, and that she didn't deserve that you should, and that there was another girl——"

"There, puss, there," said the farmer, with a strange quiver in his stern eyelid. "Mother was flighty toward the last. We'll forget these things."

"But, father, it is Lucia Lee—as I mistrust it is—and if you'd be any happier married to her, I won't make any trouble," pleaded Abigail. "I'll be the best stepdaughter in the world. I only want you to be happy, father."

"Well, it isn't Lucia Lee," said Mr. Wray, laughing. "And if it was, why you'd be crazy, child, to think of getting me into such a scrape at fifty-odd years old."

"But you're young-looking, father, and handsome," urged Abigail.

"Nonsense! There, give me some more coffee. Those lazy fellows in the tenacre lot will be sure to dawdle away the time until I get back to them. Let's hear something more about this lecturing old maid of yours," he added.

"Father, hush!"

Abigail had gone back to her seat behind the tray, where she faced the wide, open door. She could see a tall form standing hesitatingly on the threshold; her father was quite oblivious to its presence.

"It's Miss Perceval herself!" cried Abigail, jumping up. "Please walk in, Miss Perceval. I'm so glad to see you. You don't know it, perhaps, but I was one of your listeners last night, and I kept thinking how proud I should be if ever I had a chance to speak to you! Our name is Wray, and I am Abigail. Father, this is Miss Perceval."

Mr. Wray, who had risen from his seat and now stood facing the unexpected guest, bowed courteously. Few city votaries of fashion could have displayed more exquisite courtesy and hospitality than this country lass. In the blue cambric frock with the simple white ruffling at her neck, as she welcomed the stranger.

"Will you have some of our fresh blueberries?" said Abigail. "I picked them myself, while the dew was on them. And the coffee is quite hot!"

Miss Perceval was a tall, middle-aged woman, with brown hair, slightly threaded with silver; bright, dark eyes and color that varied in her cheek, as she looked from Abigail to her father.

"I—I have lost my way," she hesitated. "I oughtn't to have attempted to ramble about alone; but I used to know something about this part of the country, and——"

Once more her eyes fell beneath Elihu Wray's searching glance; she laughed uneasily.

"So you are the lecturing woman?" said he, quietly.

"The lecturing old maid," you called me, Elihu," retorted Miss Perceval, recovering her composure with marvelous quickness. "Have I grown so very old?"

"But—Miss Perceval?"

"That's my nom de publique," said she. "One must shelter one's self behind something. How do you suppose 'Huldah Daggett' would look on the bulletin boards? Can't a woman change her name except by matrimony?"

"Father," cried Abigail, "are you acquainted with Miss Perceval? Why didn't you tell me so before?"

"Because I didn't know it myself, child. How was I to know that Miss Perceval, the famous lecturer, who makes people laugh or cry, according to her will, was little Huldah Daggett, who used to hunt hazelnuts with me and build snow forts beyond the schoolhouse forty years ago?"

"I feel exactly like a ghost come back to this earth," said Miss Perceval, shivering. "Everything is so changed, and yet the same. And I have dreamed so many, many times about returning to dear old Millville. And so Janet is dead, and this tall girl leaning on your shoulder is her daughter! But you are not changed, Elihu; at least, not outwardly."

"I'LL BE THE BEST STEP-DAUGHTER IN THE WORLD."

"I am changed in nothing, Huldah," said he. "Nor have I ever changed in any respect."

"Not when you married Janet? Oh Elihu, it was then that I felt forced to plunge into some all-absorbing occupation, to keep myself from heart-break. I never should have had a career if it had not been for that."

"Janet told me you had confided to her that you were engaged to a rich banker in New York."

"It was not true!" exclaimed Miss Perceval. "She told me that you were in love with her; that you were heartily sick of your old bargain with me. And I wrote you a last appeal, which you never noticed by word or line—an appeal that I sent you by Janet. After that what could I think?"

Abigail had flown upstairs, and now returned with a time-yellowed note in her hand.

"Father, I believe I can explain this," said she. "Poor mother yielded to temptation and kept back the letter. Here it is. I found it between the leaves of one of her books, and, until now, I never understood what it meant. I see it all, father! Miss Perceval! Father! Father! Remember what I said ten minutes ago. Dear Miss Perceval, he is so good, so true, and I'm ready to make such a model stepdaughter!"

And then she ran out of the room to rescue her pet terrier from the fangs of the butcher's big dog, coming down the road, and when she returned Miss Perceval sat smiling in the deep window-seat, a daisy in her hand, a blush on her cheek.

"Would you really like a stepmother, child?" said she.

"I would like father to be happy!" eagerly answered Abigail.

"Then," said Miss Perceval, "I suppose you must have your way!"

And the world at large wondered a this brilliant lecturer marrying a quiet country farmer, and secluding herself in the wilderness. But the world at large did not know how happy she was. New York Ledger.

Straw Horseshoes.

In Japan most of the horses are shod with straw. Even the clumsies of cart horses wear straw shoes, which in their cases, are tied round the ankle with straw rope, and are made of the ordinary rice straw, braided so as to form a sole for the foot about half an inch thick. These soles cost about one cent a pair.

Eating thirty quail in thirty days can't be much of a feat; many a man has eaten beefsteak every day for fifty days.

If a girl is really fond of music, her own piano playing will make her sick.

NAMING OF MEDICINE HAT.

Queer Appellation of the Champion Cold Weather Town.

"Yes, sir, I can tell you how our town came to get its queer name," said George W. North, of Medicine Hat, a guest at the Palmer. "Poor Lo is responsible for the name. Now, the Indian is the most superstitious chap alive. Nobody believes in luck half so much as he does. 'Good medicine' with him is anything that brings him good luck, and 'bad medicine' is just the reverse. Every Injun that amounts to anything has his 'medicine.' It's 'his lucky penny,' so to speak, and he depends upon it largely for good luck. Often he carries it in a little buckskin bag around his neck, and just as like as not he won't tell you for love or money what it is. Again he will make a fuss over it and insist on letting everybody know all about it. I knew one buck whose 'good medicine' was the top of a tomato can which he wore on his breast.

"Well, to get back to Medicine Hat, there was a famous Blackfoot chief who lived somewhere around in that part of the country. He divided his time between hunting and making war on the Crees. This chief's 'good medicine' was a most gorgeous headdress of feathers. He called it his medicine hat, and it was the luckiest 'good medicine' in all the region around. Well, one day he fell upon the Crees just about where our town now is, and he smote them hip and thigh. He was in a fair way to wipe the Crees out of existence when along came a gust of wind and lifted the magic hat off his head. That was bad enough, but worse was to follow. The wind whirled it up on high, carried it faster than he could chase it on his pony, and finally dropped it in the Saskatchewan River. That was too much for Mr. Blackfoot. He lost all confidence in his luck. Instead of returning to the fight and pressing home his victory he turned tail and ran for dear life, followed by all his tribe.

"That's how our town on the south fork of the Saskatchewan got its name. Personally, I hope it will never be changed. It's a hundred times more desirable than the one thousand and one inane names that one runs across all over the continent."—Chicago Inter Ocean.

EYES LIKE TELESCOPES.

The South African Bushmen Are Gifted with Marvelous Sight.

It has often been remarked that civilized people tend to become short-sighted. This is because in towns and cities their vision is mostly confined to short distances. Savage races, on the other hand, are generally gifted with remarkably keen sight, and few tribes are more noteworthy in this respect than the African Bushmen, whose eyes are veritable telescopes. This power is no doubt a wise provision of nature, for bushmen are a small race, and if they were not able to see danger a long way off they would be exterminated by their various enemies, whether savages of other tribes or wild beasts.

A traveler in South Africa relates that while walking one day in company with a friendly bushman the savage suddenly stopped, and gazing across the plain cried out there was a lion ahead. The traveler gazed long and earnestly in the direction indicated by the bushman, but could see nothing. "Nonsense," he said. "There's nothing there." And he went forward again, with the bushman following at his heels, trembling and unwilling and still asserting that he could see a lion.

Presently the native came to a dead stop and refused to budge another inch, for this time, he declared, he could see a lioness with a number of cubs, a fact which made the animal more dangerous than ever. But the European, who could see no lioness, much less its cubs, pushed ahead. After walking a quarter of a mile, however, he could dimly make out an object moving across the horizon. Still doubting that it could be the object which the bushman said he had seen, he continued to advance, and at last was able to distinguish a lioness, with her cubs around her, walking leisurely toward the woods.—Chums.

Women of Ancient Egypt.

Women always stood on a level with men in ancient Egypt, unlike the custom of other Eastern countries. They were allowed to rule as queens as early as the second dynasty. Their palaces were of brick, adorned with gorgeously painted walls, rich carpets, rugs of fur, ivory and ebony chairs and couches. Till the end of the eighteenth dynasty, there was little change in feminine attire, which consisted of a fine and often transparent linen garment extending from shoulder to ankle, supported by straps over the shoulders. Colored robes were not frequently worn—gay plumage was left to the men. Women contented themselves with blackening their eyebrows, letting their hair down and decking themselves with innumerable rings, chains and bracelets.

A Wonderful New Violet.

Signor Emilio Borgiotti, an enthusiastic lover of flowers near Pistoja, Italy, has succeeded in producing a new species of violet six centimeters in diameter and having from seventy to 100 petals. He has presented some of his precious violets to Queen Margherita and to the Duchess of Aosta, as well as to many women of the aristocracy, but in spite of the entreaties of many florists he still refuses to place them on the market or to reveal the cross by which he has obtained this marvelously beautiful flower.

Next Thing to It.

He—Oh, by the way, the doctor advised me to eat a water cracker before going to bed; said it would prevent my insomnia. Are there any in the house?

She—The only thing in the house approaching a water cracker is the lecpick.—Indianapolis Journal.

Pipe for Oom Paul.

A great pipe has been made for President Krueger by a Dublin firm. The bowl is of the finest brier root, the stem of cut vulcanite, and the case of leather, lined with chamois. On the front of the bowl the Transvaal arms are carved.

A Variation.

"Did you say I lied deliberately?"

"Well, not exactly. My remark was that you couldn't tell a deliberate truth."—Philadelphia North American.

CLEVER MILITARY TRICK.

The Stratagem by Which Sir Francis Vere Defeated the Spanish.

When Philip II debated the question of coercing with fire and sword the Dutchman, who did not like the taxes which they themselves did not vote, the Duke of Alva counseled violent measures, for in his eyes the rebels were only "men of butter." Nevertheless he found that these men, so fond of cows and hens, could hold his veterans at bay, finally overcome them in the field, and after 80 years leave poor Spain "a broken backed tiger."

Indeed in time of war country folk with baskets of eggs and butter excited no suspicion even to alert sentinels. Taking advantage of this fact, Sir Francis Vere determined to recapture from the Spaniards the Zutphen sconces, or forts, by a stratagem. In 1591 he picked out some lusty and handsome young soldiers and dressed most of them like the Gelderland egg women and the rest as Boers. With bundles of vegetables, baskets of eggs and butter, but also with daggers and pistols inside their clothes, they were ferried across the river by twos and threes. They sat near the gate of the fort, being already, at the break of day, chatting and gesticulating, as if in some tremendous argument about the rise or fall of market prices.

Then, according to arrangement, Vere sent some cavalry forward, as if approaching, and the pretended country people ran in feigned terror toward the fort. The gates were at once thrown open to receive them. They all streamed in, threw off their disguises, and in a few minutes were in possession of the forts of the town, where the gallant Sir Philip Sidney afterward lost his life by being more rash and less shrewd than the veteran Vere.—Harper's Bazar.

A Mark Twain Story.

Apropos of the Portuguese reis (pronounced rays), when Mark Twain visited Fayal some years ago one of his companions invited him to dine, with eight others, at the principal hotel in that happy island. As soon as the cloth was removed and the wine placed on the table the host called for the bill, which amounted to 21,700 reis.

"Go, leave me to my misery, boys!" ejaculated the unhappy man. "There isn't money enough in the ship to pay that bill. I am a ruined community. Landlord, this is a mean swindle. Here's $150, and it's all you'll get. I'll swim in blood before I'll pay a cent more."

The landlord looked surprised, but immediately had his little account translated "into a language that a Christian could understand," when it was found that, at the rate of 1,000 reis to a dollar, the demand actually amounted to $21.70. More refreshments were ordered forthwith.

Washington and General Howe's Dog.

While the British occupied Philadelphia and the American force lay in winter quarters at Valley Forge, one day as Washington and his staff were dining, a fine hunting dog, which was evidently lost, came to seek something to eat. On its collar was the name, "General Howe."

Washington ordered that the dog should be fed, and then he sent it to Philadelphia under a flag of truce, with a letter reading: "General Washington's compliments to General Howe. He does himself the pleasure to return to him a dog which accidentally fell into his hands and by the inscription on the collar appears to belong to General Howe."

The British commander, in reply, sent a cordial letter conveying his warm thanks for this act of courtesy of his enemy.—Paul Leicester Ford in Ladies' Home Journal.

A Famous Milestone.

One of the oldest milestones is to be seen in the museum at Leicester, England. It is a cylindrical block of sandstone, roughly inscribed with an abbreviated statement to the effect that it was erected during the emperorship of Cæsar Hadrian, son of Trajan, conqueror of Parthia. It also says, "To Leicester, Two Miles." The Hadrian milestone was discovered over a century ago beside the ancient Fosse way and narrowly escaped being converted into a lawn roller by the unromantic and practical finder.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

A Sinking Sensation.

"I understand that you were in that elevator which fell ten stories the other day. How did you feel as it was going down?"

"Just as I feel when I get within sight of my home at night ten minutes late and suddenly remember that my wife wanted me to hustle out early as she had arranged for a dinner party."—Chicago News.

A Satisfactory Result.

They met at the crossroads and pulled up their teams for a talk.

"Well, Josh," said the first farmer, as he took a wisp of straw from between his teeth, "I hear some eastern chaps have been diggin' fer gold on your place. What do you git out of it?"

"I git," said the second farmer, "a darn good well."—Wall Street Topics.

Puzzling.

Wickwire—I wish some philosopher would explain how water shrinks woolens.

Lushforth—I'd rather have an explanation of how alcohol will shrink a man's hat.—Indianapolis Journal.

The Sagacious Rat.

One day a well fed and sagacious rat came across an object made of wire, whose sole occupation seemed to be to take care of a liberal piece of cheese. Having had several years' experience with men and their machinations, the rat looked the ground over with great care, and he was still engaged in this occupation when a mouse appeared and wanted to know what was up.

"Why, the fact is," replied the rat, "I have more cheese here than I can possibly eat at one meal, and as cheese quickly spoils in this climate I was waiting for some one to come along and accept a portion."

"You are generous," said the mouse.

"Don't mention it. Just step inside and pass the cheese out, will you?"

The mouse had no sooner nibbled at the bait than there was a crash, and he found himself trapped.

"Ah, that's the way it works, is it?" queried the rat. "I couldn't just make it out. Um! I see. Spring there somewhere. Good idea."

"But I'm caught," exclaimed the mouse in great agitation.

"So I observe."

"And what's to be done?"

"Well, I leave that for you to decide. I let you in on the ground floor, and my responsibility ceased there. Fine day. Hope we shall have a good harvest."

Moral.—Experience acquired at the expense of others is soothing as well as valuable.—Boston Journal.

A Fortune In a Kiss.

It was a kiss which made the fame and fortune of one of the leading artists in France today.

When he was a young student in the Quartier Latin, Paris, he came to the end of the slight resources left by his parents and was almost on the verge of starving.

In a moment of hilarity he stole a kiss from a pretty pair of lips he met in the street and was quickly called to account by the offended girl.

When he made his appearance in court, the presiding judge asked if he was a relative of Maître C——, a famous French advocate of the sixties.

"I am his son," the culprit answered. After inflicting a small fine the judge asked the young man to call on him in the evening.

It transpired that the young artist's father had been the judge's dearest friend and adviser many years earlier, and the judge, who was a bachelor, was delighted to be in a position to assist his son. He bought many of the artist's pictures and introduced him to several wealthy art patrons, so that fame and fortune came quickly.—St. Louis Post-Dispatch.

One of Millions.

Once upon a time there lived a man who wanted only a few things that everybody wants. He wanted plenty to eat and drink, leisure and the woman he loved. But he found that to have time to himself to make it possible to live pleasantly with his sweetheart and give her all he wanted and to take care of the children that they might have—to do all this he must have a great deal of money. So he went to work and built up a great business, a very complicated machinery. To this money producing machinery he was forced to give most of his energy. It gave him no time for leisure, no energy for enjoying the sunshine, his wife and children. But he began to enjoy the machinery of his business.

When he had made a large fortune, the only thing he enjoyed was the machinery by which he could make more money. He had lost his interest in the things for which he began his business. Perhaps he still had interest in food, his wife and all the naive physical and sentimental pleasures, but it was a blunted, dull interest. The only live interest he had was his business.—New York Commercial Advertiser.

A Penalty of Knowledge.

"It seems to me," remarked the high browed theorist, "that people positively resent education. A man who is more than ordinarily wise is usually left to himself as much as possible."

"Perhaps you are right," answered Miss Cayenne. "When a man knows such a very great deal, he makes one apprehensive. There is no telling when he may be going to sit down and try to tell it all."—Washington Star.

TAPE WORMS

"A tape worm eighteen feet long at least came on the scene after my taking two CASCARETS. This I am sure has caused my bad health for the past three years. I am still taking Cascarets, the only cathartic worthy of notice by sensible people."
GEO. W. BOWLES, Baird, Miss.

CANDY CATHARTIC Cascarets TRADE MARK REGISTERED REGULATE THE LIVER

A LIVING WITNESS.

Mrs. Hoffman Describes How She Wrote to Mrs. Pinkham for Advice, and Is Now Well.

DEAR MRS. PINKHAM:—Before using your Vegetable Compound I was a great sufferer. I have been sick for months, was troubled with severe pain in both sides of abdomen, sore feeling in lower part of bowels, also suffered with dizziness, headache, and could not sleep. I wrote you a letter describing my case and asking your advice. You replied telling me just what to do. I followed your directions, and cannot praise your medicine enough for what it has done for me. Many thanks to you for your advice. Lydia E. Pinkham's Vegetable Compound has cured me, and I will recommend it to my friends.—Mrs. FLORENCE R. HOFFMAN, 512 Roland St., Canton, O.

The condition described by Mrs. Hoffman will appeal to many women, yet lots of sick women struggle on with their daily tasks disregarding the urgent warnings until overtaken by actual collapse.

The present Mrs. Pinkham's experience in treating female ills is unparalleled, for years she worked side by side with Mrs. Lydia E. Pinkham, and for sometimes past has had sole charge of the correspondence department of her great business, treating by letter as many as a hundred thousand ailing women during a single year.

THE DREADED HOUR.

There comes a day—God grant 'tis far away!
When one of us must go and one must stay.

When, face to face, to me no face appears,
One with eyes closed, the other's blind with tears.

When one, the other's form forever hid,
Must hear the earth fall on the coffin-lid;

When one must turn away, with anguish mute,
And wander through the rest of life alone,

And feel, in agony of dumb despair,
Where'er it be, the loved one is not there;

While yet each joy and sorrow and regret
That once we knew we never can forget.

We know not whether 'twill be you or I
That shall be called to be the first to die;

We only know, whiche'er it be, dear wife,
Must from the living take the best of life.
—Montreal Herald.

A Man's Destiny.

"I HAVE something to tell you," said Richard Thorne, when the departure of her other callers had left him alone with his hostess.

"I thought there was something funny about," said Mrs. Vavasour shading the firelight from her face with a screen of barbaric grandeur, while Thorne stared straight into the glow and bit at his straw-colored mustache.

"Out with it," encouraged Mrs. Vavasour, with a gleam of kindly amusement in her eyes.

"Well," said Richard Thorne, plainly pulling himself together, "it's come at last. I'm first officer no longer —"

"You've got a ship?"

"Yes, I've got a ship," he repeated after her slowly.

"My dear boy, I'm so glad," leaning forward a little in her armchair.

"I knew you would be," he said, smiling slightly, without raising his eyes.

"Of course I am. It is one of Donaldson's."

"Yes. Same line."

She watched him curiously in the silence that followed. They had been staunch friends, these two, as boy and girl, twenty years ago, and though he went to sea, and she married Tom Vavasour, they were still the same.

"You don't seem extravagantly elated, yourself," she hazarded presently.

"Don't I?" he answered aimlessly, giving his big shoulders a hitch in a second endeavor to recall his thoughts.

"No, you don't," sharply. "What is it?" kindly.

"Well, fact is, the new berth's on the Sydney and Vancouver trip. The other side of the world, you know," he explained.

"Of course I know. I need not be a sailor man with gold embroidery on my hat to know that."

Thorne laughed at the characteristic onslaught, and her face brightened in sympathy with his.

"But we won't lose you altogether?" she queried briskly. "Of course it would be much nicer if it were on the home trip, but we'll see you sometimes, won't we?"

"Oh, yes!" listlessly.

She shot a searching glance at him from behind her firescreen, and leaned her chin against its edge to gaze with puzzled eyes into the fire.

"Of course, you're awfully glad of the step?" she said, after a pause, and listened intently for his answer.

"Yes. Awfully. I suppose."

The response seemed satisfactory, and required a little cogitation before the next remark.

"Ah, well!" she went on, leaning far back in her chair, and turning her head in the shadow to watch him. "I shall lose a friend! You are sure to marry some one now you are in a position to do it."

"I shall marry nobody," said Thorne decidedly, laying his cap on a table beside him; and Mrs. Vavasour smiled triumphantly to herself as she heard, and watched the stubborn lines come about his mouth.

"Dear old simpleton," she thought, "he thinks he's betraying nothing."

Then came a silence, while Thorne began to bite moodily at his mustache once more, and while Mrs. Vavasour looked on with troubled sympathy in her bright eyes.

"Dick," she said suddenly, "tell me all about it. Who is she?"

"About what?" he asked, looking up quickly. "There isn't any—how on earth did you know?"

"You goose, you've been telling me for the last ten minutes."

"I? I never said— "

"I didn't say you said anything; all the same, you have been telling me. Go on now, I want to help you."

Her voice trembled as she spoke, and she stretched out a hand to him. He clasped it for a moment, while a look of perfect trust passed between them.

"Well, you see," he began awkwardly, looking into the fire once more, "I happen to know it was all her doing."

"What was?"

"This Vancouver business."

"Do explain a little."

"It was old Donaldson who told me—he had no right to, of course—when he offered me the ship, that she had suggested it to him."

"She? Who?"

"His daughter—Cicely, you know."

"Of course I know—he hasn't another. But what," in astonishment, "is that to mope about?"

"Don't you see? She has got me sent out of the country altogether."

"Nice, gracious spirit to take things in, upon my word!" commented his friend, with a suspicion of a sniff. "Might I ask what put that idea into your head?"

"Oh, there's another chap—chap with a title and money and things," vaguely. "Handsome chap, too," lugubriously.

"Did you make love to her?"

"No."

"Then what makes you— "

"She saw it coming, I suppose. I suppose I looked it."

There was a pause, during which they both looked into the glowing coals.

"Did you even make love—really—to a woman?" Mrs. Vavasour asked curiously.

"No," answered Thorne, with a shake of his head; and Mrs. Vavasour gave a little nod that said plainly, "I thought so."

"And don't you think you are jumping to conclusions rather?" she asked.

"No," Thorne answered, shaking his head again, "he's a much more likely fellow to please her than I am, and 'twould avoid complications to keep me out of the way," he added bitterly, "for her father would quite possibly take my part."

"I think you are making her out as acting in an abominable manner," said Mrs. Vavasour, with spirit.

"Not at all," he rejoined quickly. "I dare say she's a little sorry for me, and besides she's procured me my captainship—hang it! All the pleasure's taken out of it!"

There was a long silence after this that was only broken at length by Mrs. Vavasour's rising suddenly and saying:

"Away with you, now; I must go and dress. Come and see me to-morrow at half-past 5—no, a quarter to 6. Now, don't forget."

"I won't forget," said Thorne, shaking hands, and going to the door.

"By the way, what's the other man's name?" she asked, as the friend's big figure was disappearing.

"Toler," he answered, turning round; "he's a very decent fellow. I perfectly understand her—a—anyone preferring—"

"Yes. Good-by. But that's more than I do," she said aloud to herself as the door shut. "Dear old Dick's worth ten of him any day. Wait a while, my dear, I think I'll manage it."

As she went upstairs she met her husband.

"What, not dressed yet?" he asked, as he kissed her. "What have you been at now?"

"Thinking how I can make two people happy as we are," she answered.

"That's a big undertaking," said Tom Vavasour gravely.

The next day Thorne presented himself at 5:45 and asked for Mrs. Vavasour. He was shown upstairs immediately and greeted by the lady he sought, who crossed the room to meet him in a marvelous tea gown.

"You may shake my little finger," she said, holding it out to him, "the others have been eating buttered toast—at least, not exactly, but—you know what I mean."

"Perfectly," Thorne laughed, shaking the dainty finger between his strong finger and thumb.

"There are chairs to be had if you look hard enough for them," Mrs. Vavasour went on, peering round in the firelit autumn dusk that filled the room.

"Lots, thanks," said Thorne, seizing the nearest.

"Not that! It won't bear your big weight. Stir that fire up, Cicely, until I look for something made of iron."

A girl's figure bent forward at the far end of the room and stirred the coals into a bright blaze, and Thorne, who had jumped at the name, made a movement toward the door with a muttered excuse.

"Don't be absurd; it's too late now," said his hostess in a whisper that brought him to his senses. "Ah, that's just the thing," she went on aloud, pointing to a deep-backed armchair immediately opposite to the fire and leading the way toward it. "That's the worst of the modern drawing room," she continued, while Thorne bowed to Miss Donaldson and sat down; "if you have anything really comfortable it's sure not to be decent enough to put in it, and one never seriously thinks of buying anything for it but old-fashioned curly-legged things of stiff-necked generations long passed."

"I'm very comfortable," volunteered Thorne.

"So am I," put in Cicely, with a laugh.

"I'm delighted to hear it," said Mrs. Vavasour seriously, as if she had not been running on merely to guard against an awkward pause that had loomed ahead; "but I really think we have the only three sensible chairs in the room. Sugar and cream? Of course I remember."

Thorne drank his tea between the two women, wishing he were anywhere else, yet knowing he would rather be where he was while they talked across him. Presently Mrs. Vavasour turned to him and said, in her sweetest manner:

"What a good opportunity of thanking Miss Donaldson for putting that kindly spoke in your wheel! By the way, we must call you 'Captain' Thorne now, I suppose?"

Down went Thorne's teaspoon with a clatter, and one foot shot out in an instinctive impulse to kick his hostess' chair, to stand on her dainty toe, or anything that would stop her; and at the same time a suppressed little "Oh!" came from the other side of the fire. Mrs. Vavasour, however, apparently saw or heard nothing, and her next move sent Thorne's heart into his boots; for, standing up with a remark on the shortening evenings, she lit the gas bracket at her end of the chimney piece, and then, crossing in front of him, lit the other. Thorne felt his face was crimson, and with his eyes on his boots, cast about for words in which to couch an apology or an explanation; but before he could think of anything at all, the same voice had said more sweetly than ever:

"A thousand pardons, Cicely; you must let Dick entertain you for a minute. I heard Tom's voice downstairs, and I positively must see him about something!"

There was a frou-frou of silk, and she was gone, without even looking back to see the two appealing glances that followed in her wake.

The two left alone, examined the interior of the fire with an intensity worthier of a loftier devotion. It began to dawn upon the man that the whole thing was planned and he gained something of oblivion to the position for a moment by forthwith giving his whole energy to the silent apostrophizing of meddling women—especially Mrs. Vavasour. But the present asserted itself again directly, and he cleared his throat to begin: "Of course, I'll say I adore the Pacific trip," he said to himself.

"Mrs. Vavasour's—a—remark just now," he began, "requires perhaps a little—a—explanation. What I had mentioned to her—about you—I mentioned her only—I hope you will understand that—and did so—a—" the wished she'd say something—anything—"—a—under peculiar circumstances."

"Very, I should think," the girl remarked, coldly; "though, indeed," correcting herself quickly, "I have no objection to all the world knowing one of my many suggestions to papa."

"Quite so. So I thought," agreed Thorne, losing his head.

"Then why apologize?"

"Why, indeed? But you will let me thank you, since I owe to—a—chance suggestion of yours my position."

"Quite a chance suggestion," heartily.

"Well, I ought to congratulate myself."

A silence while he leaned forward to trace an imaginary pattern with the toe of his boot, and she tied a ridiculous little handkerchief into a knot. Thorne wished that Mrs. Vavasour would return.

"The transpacific trip will be quite a pleasant change," he said with a barren enthusiasm, because he felt the strain of silence growing too great to be borne.

"Pacific? Are you— "

"Yes. My boat is one of the Sydney and Vancouvers, you know."

"I—I didn't know that."

A great wave of resentment swept over him. She either intended to deceive him, he thought, or else had not cared to what fever-stricken seas he was sent, so long as he was out of the way.

"You thought it was the China route?" he said, steadying his voice with an effort.

"No, I thought it was the home trip," the girl answered quietly.

"You did?" was all Thorne could say in a strange voice. For in a moment self-reproach and shame, in that he had taken an act of pure good nature as done to gain selfish ends alone, took the place of his resentment and filled his heart. Starting to his feet, he stood resting his elbow on the mantelpiece, looking down at the pretty brown head and long lashes that swept the flushed cheek, and his voice was deep and trembling when he spoke.

"Miss Donaldson, I must ask your forgiveness," said he, "for thinking—what I did."

Two beautiful, tearful eyes were raised in question to his, but only for an instant.

"I thought—I believed," he went on, determined to spare himself nothing, "that you had procured this foreign command for me—merely to free yourself from my attentions."

"But—how could you, when you had never—never paid me any attentions?" the girl faltered, with crimson cheeks.

"I know; but you must have seen it—seen that I love you more than all the world! I always felt I was unworthy of—of such a precious thing as your love—that I was not the sort of man—all my life has been at sea—that could make you happy. Now I am more unworthy than ever; I can never forgive myself for the injustice I have done you. Do not think too hardly of me. Good-by!"

She held out her hand to him, and pressing it passionately to his lips he hurried out from the room, and out of the house. And at the sound of the shutting of the door below, the girl waking as from a trance, buried her white face in her hands and sobbed aloud.

There was only one letter for Dick Thorne when he brought his vessel into Sydney harbor for the first time two months afterward, and that was only a few lines; but almost every word was underlined twice. And this was what it said:

"You great stupid—if you choose to throw away your own happiness and some one else's, in spite of all I can do, I can't help it. Come straight home by the next mail, and don't make a fool of yourself again. Yours, perfectly disgusted, MARY VAVASOUR."

And the next mail steamer carried a big, bronzed man, with a straw-colored mustache, who stood in the bows all day, and a part of the night, only coming aft to eat and sleep; "for," he told himself, "I'm a whole ship's length nearer to her than if I stayed on the poop."—Household Words.

Big Violets.

Apparently it will soon be out of place to refer to

A violet by a mossy stone
Half hidden from the eye.

Emilio Borgiotti, an Italian horticulturist, has succeeded in making violets two and one-half inches across, with 100 petals. So from symbolizing shrinking retirement, the violet will, at this rate, soon express much the same qualities as the peony.—Springfield Republican.

If a girl says she is to be married "in a year or two," it means there is nothing definite; she has not yet landed him.

Every one is reckless in his thoughts and words, but as cautious as a cat in his actions.

HENRY CLAY FRICK.

NEW HEAD OF THE CARNEGIE STEEL COMPANY.

A Poor Bookkeeper in 1870, He Is Now a Multimillionaire and Controls Enterprises Involving Hundreds of Millions of Dollars.

As the head of the new Carnegie Steel Company, the greatest of all the recently consolidated industrial concerns, Henry Clay Frick has become a man of world-wide interest. He is a man of uncommon mould. At 21 he was a poorly paid bookkeeper in a distillery. To-day, at 50, he is the owner of the greatest coke-making plants in the world, has a private fortune amounting to $15,000,000 or more, and is the active head of enterprises involving the use of hundreds of millions of dollars in capital. A man who can make this kind of a record for himself can be truthfully described as "uncommon." Mr. Frick is the builder of his own fortune. He secured what he has without the aid of family influence or wealth—and it is the creation of his own brain and industry.

Henry Clay Frick was born in Fayette County, Ohio, in 1849. His father was a farmer in moderate circumstances, who had lived in West Overton, Pa. With nothing but a common school education young Frick went to work as a dry goods clerk, but soon gave up that to become a bookkeeper in the distillery owned by his grandfather at Bradford, Pa.

This took young Frick into the very heart of the coke region. Although he was only 21 years of age then, he had developed the habit of accumulating money, and saved most of his earnings. He took a great interest in the manufacture of coke, studied the process, and made up his mind that he would some day go into the business. At this time, too, he was a close student of the labor situation in the coal and coke regions.

A short time after passing his majority Frick and two other young men scraped up enough money between them to buy 300 acres of land and 50 coke ovens. They began to manufacture coke under the firm name of Frick & Co. Frick succeeded so well in the coke business that within four years he increased his ovens from fifty to

HENRY CLAY FRICK.

one hundred. The coke business kept on booming at a great rate until 3,673 ovens had been built in the region.

Then came the panic of 1873. The price of pig iron declined enormously, the price of coke fell in sympathy, and everybody wanted to get out of the coke business. Not so with Mr. Frick. He invested every dollar that he had or could raise in purchasing the coke properties and ovens which others were so ready to sell at low prices. All through the panic he kept his ovens going. In 1876 he separated from his old partners and took E. M. Ferguson as a new partner. Real success came to this new firm in 1879, when there came an unprecedented demand for coke, and prices went up from $1 to $5 a ton.

Under the impetus of this boom Mr. Frick continued to buy coke ovens and coke lands until in 1882 his firm had 3,000 acres of coal land and 1,026 coke ovens. It was that year that Carnegie Bros. & Co. (limited) became partners in the firm of H. C. Frick & Co.

The success of the firm from 1882 to 1890 was phenomenal, and it is generally acknowledged that it was in the greatest degree due to the energy and push of Mr. Frick himself. In 1890 the corporation owned and controlled 25,000 acres of coal lands, 42 of the 80 coke plants in the region, with an aggregate of 10,06 ovens, three water plants and a pumping capacity of 5,000,000 gallons daily, 35 miles of railroad and 1,200 cars. Eleven thousand men were on the pay rolls of the company then. On the death of David A. Stewart, in December, 1888, Andrew Carnegie offered Mr. Frick an interest in the firm of Carnegie Bros. & Co., which Mr. Frick accepted and paid for. He was at once made chairman of the directors of Carnegie Bros. & Co.

As an employer of labor Mr. Frick earned the everlasting hatred of the Amalgamated Association. When he was put at the head of all of the Carnegie steel interests, the Amalgamated Association felt that the fight for its life had come, and in June, 1892, came the bloody Homestead riots.

It was a time of great political excitement and party managers brought the greatest influence to bear on Mr. Frick to get him to agree to the terms demanded by the men. But he was deaf to all entreaty. The only question he would consider was how to defeat the strikers. He thought of nothing else, even after the Anarchist Berkman had shot him and he was upon a bed from which it was feared he would never rise. The bloody battle of Homestead, when the Pennsylvania State troops were called out to protect the Carnegie Works, and in which so many lives were lost, did not swerve Mr. Frick in his purpose. He fought the strike out and won it.

Mr. Frick and others were indicted for manslaughter as a result of the Homestead riots, but the indictments were afterward dismissed on the motion of the prosecuting officers. Since that time other anarchists have threatened to kill Mr. Frick. It is a fact that he has been nervous on that score. He is always very careful whom he receives, either at his home, his office, or his hotel. Up to the time the Anarchist Berkman made an attempt to kill him, and succeeded in wounding him seriously, Mr. Frick gave little heed to the threats made against him, but since then he has shown more concern for his personal safety. Personally Mr. Frick is a very pleasant man. He spends very little time in social pleasures and is wrapped up completely in his business.

What a Trillion Is.

People often speak of a trillion as a possible number. The fact is, not a trillion of seconds has elapsed since the creation of Adam; nor will that number have elapsed until Feb. 1, in the year of our Lord 25825; for in a trillion of seconds there are 31,687 years 32 days 1 hour 46 minutes and 40 seconds.

An Inebriated Eagle.

An eagle got drunk on moonshine whisky near Lebanon, Ky., and was captured easily.

TWO STRIKING COSTUMES.

FROM a hygienic standpoint, to become overheated is as great an error as for an infielder to muss a ground hit. Equatorial climes with their dazzling heat do not destroy their peoples. Down close to the equator, where the sun gets a full fill at the earth, sunstrokes are comparatively rare. Up here, where a temperature of 100 degrees Fahrenheit is rare, sunstrokes or their twin afflictions, heat prostrations, are very common. Why it should be so is a topic of interest. When it is known that in neither case, the health being good, should a person be in any grave danger, the frequency of death in summer from such causes is a marvel. It all depends on the man. Some persons will walk smoothly and placidly along the street without an umbrella, with the sun making ridges of heat across the avenue. Collar and cuffs will not wilt and the man seems unconscious that the weather is playing any unusual pranks. He may carry pounds too much weight, yet suffer but little, if at all. Another man of thin figure will pant and moan and mop his fevered brow in an agony of heat. Why this is thus is what a correspondent would term a mystery. But there is no mystery about it. One knows he is not hot, the other thinks he is. Keeping cool is not a matter of clothes or their lack. There are men on earth who wear nothing but a brow clothed in thought, whose sunburned pelts indicate the advantage of garments, even if the garden of Eden had not prematurely discovered the same thing.

Some positive directions apply to the art of keeping cool. The first is the most important and if well observed robs the weather of nine-tenths of its terrors. That rule is a simple one and is merely to give the sun a chance. Let him get a good square whack at you early in the season. To avoid the sun with an umbrella when he first burns savagely is to invite the heat prostration habit. Therefore get out and mingle with the rays as soon as the season opens. This will do three things—give you a beautiful tinting, fill your lungs with fresh air and adjust your hide to the incoming heat. Custom rules in this as in other things. If you accustom yourself to the sun he will be your friend. The baseball man plays when the thermometer speaks of 104 and does not abate his exertions a trifle. Any man or woman who so wishes may do the same thing in a smaller degree without the hard training of athletes. Having thus prepared your system for sunlight and lots of it see that your health is kept up properly. Let the vascular system—the circulation, arterial, venous and capillary—and the alimentary system be in proper running order and you will suffer little from heat.

Having thus laid the foundation for a successful season do not spoil it all by insanely rushing about your undertakings under the apparent belief that to-day is the last on earth. If you do it may be the last. Hurry never accomplishes anything but the discomfiture of him who rushes unduly. A sunstroke usually comes from exposure directly due to the rays of the sun. Heat prostration may overtake a man who has been in the shade all day. Do not overeat, do not overdrink, do not overdress. Take exercise in moderation. Do not fear the sun, for unless sick or reduced in vitality by overindulgence it is your friend rather than your enemy. Carry out the foregoing indefinite rules and you will finish winner in a summer of scorching heat.

OLD NEWGATE PRISON.

This Thousand-Year-Old Building to Give Way to a New Structure.

Newgate prison, the cable dispatches say, is to be torn down. On its site a new court building is to be erected. Newgate is a place of bloody memories. Standing in the heart of London, it has been for a thousand years the scene of tortures and executions. English men will probably be glad to see its ancient walls give way to a new structure which will stand for more civilized and merciful methods of punishment.

Newgate has not been used since 1881, except for the detention of prisoners awaiting trial or execution. It is one of the oldest buildings in London—how old no one knows. It was used as a prison as far back as 1188, as the records of those times show. It was probably built several hundred years before. Hundreds of thousands of prisoners have been executed within its walls. In 1556 it was almost altogether destroyed by fire and again in 1630, but was rebuilt, and has always

NEWGATE PRISON.

served the same grim purpose. The names of the distinguished men who have been imprisoned in Newgate would fill a volume. Among them are William Penn, founder of Pennsylvania; Defoe, author of "Robinson Crusoe;" and Sir Robert Wright, Lord Chief Justice of England.

Inside Newgate Prison many prisoners have been tortured. In fact, as late as 1723 torture was used, and until 1868 the executions were public and were made the occasion of a holiday. In 1807, when 40,000 people had gathered to see one Hollway, a murderer, executed, a panic ensued, and 100 men, women, and children were trampled to death. As late as 1788 women were burned to death in front of Newgate prison for counterfeiting, and the stocks and pillories were always full of unfortunates. Dickens thundered against the abomination of the public executions at Newgate, and it is largely due to his great influence that the reform was accomplished in 1868.

Stop That Cough.

For troublesome hacking coughs with which many people are constantly afflicted, especially tobacco smokers, for inflammation of the mucus membrane of the throat and larynx, there is no remedy superior to the following:

Take the juice of three fresh lemons, add an equal quantity of hot water, one-quarter of a level teaspoonful of powdered alum, enough granulated white sugar to make a syrup; put the solution in a clean vessel, put it on the fire and bring it to a boil. When cool it will be ready for use. Dose, one teaspoonful every hour until relieved.

Caution: This is a very powerful solution and should be taken exactly according to directions. It should be measured in a teaspoon and not taken by guess.

If bottled and corked tightly it can be kept any length of time.

New Arc Lamp.

An electric arc lamp for use under water—a consummation that has baffled electricians for years—has been produced by a German firm.

The man who drinks to stimulate his appetite, stimulates his appetite for drinks.

Every man is either praised or abused too much.

A cynical old bachelor says marriage is an institution for the blind.

BECOMING TOOTHLESS.

What the Consumption of Sweets Is Doing for Americans.

There is a disagreeable suggestiveness in a declaration made by a prominent dentist of this city last night in a "people's lecture" delivered in a public school building under the auspices of the board of education. The doctor's subject was "The Care of the Teeth and Mouth," and in the course of his remarks he announced that we are fast becoming a toothless people because of the absence of intelligent care. He pointed out that many children at the age of 2 years have decayed teeth, while it is very common to find girls of 14 and 16 well supplied with artificial teeth. These evils, he said, can be avoided if parents will insist upon proper care and will impress upon their children its great importance.

With only this published summary at hand it may be easy to do the lecturer injustice. But if he went no farther than is here indicated it cannot be said that he struck at the root of the evil which constituted his subject. This root is found in our inordinate consumption of sweets. It is pitiful to contemplate the complacency with which unthinking or ignorant parents, rich as well as poor, consent to cater criminally to the infantile demand for candy. The effect is less disastrous, perhaps, among the well to do, for the reason that the stuff consumed is manufactured from superior materials. But certain it is that with American children of every class the confectioner is patronized more generously than is the butcher or the baker. To this fact is due most of the destruction of teeth in youth, as well as many of the troubles having their rise in the stomach.

Care of the teeth and mouth is essential, of course, and will go far to minimize the evil results complained of. But no amount of care will "avoid the evil" so long as parents continue to destroy their infants feeding them upon candy and consent to inordinate consumption by their children of larger growth. It is the prevalence of the "sweet tooth" that threatens to make of us a toothless people.—New York Mail and Express.

Rosa Nouchette Carey, author of many good stories for girls, has issued another novel, "Lover or Friend."

A new mystery story by Anna K. Rohlfs, "Agatha Webb," will be issued this summer by G. P. Putnam's Sons.

Frederick Greenwood and the widow of Coventry Patmore are arranging materials for the biography of the late poet.

"A Duet with an Occasional Chorus" is the rather cumbrous title of A. Conan Doyle's new novel, a story of domestic life.

The Autobiography and Letters of Mrs. Oliphant will soon appear, having been edited by Mrs. Oliphant's cousin, Mrs. Coghill.

"The Professor's Daughter" is the title of a novel by Anna Farquhar, lately issued by the Doubleday & McClure Company.

Tennyson's son is writing additional notes to the poems of his famous father; and expects to finish the work in about two years.

A new book by Margaret Sidney is announced: "The Stories Polly Pepper Told," said to be written for old as well as young people.

At Stratford-on-Avon, the poet's birthplace, is a desk said to have been used by Shakspeare. The desk looks authentic. It shows marks where generations of schoolboys have whittled it. It was presented to the Trustees of the house many years ago, but now the Governors of King Edward's School at Stratford-on-Avon want it back, insisting that, as it was originally the property of the school, English law makes the desk forever theirs. The matter looks as if it were to be settled in this way: The museum keeps the desk, and the King Edward's School is to have a tablet, which is to mark the spot where, according to tradition, the little boy Shakspeare sat.—New York Times.

When asked for his impression of Rudyard Kipling, James Whitcomb Riley said: "He is a man who could have no successor, standing as he does, absolutely individual and unique, simply an intellectual phenomenon. It would be difficult for me, a lover of all his product, to select anything. I think, however, that he is greater as a poet than as a writer of prose, but I fancy the man himself is possibly of different opinion, the modesty of Mr. Kipling being as great as his genius. We must not forget that Mr. Kipling, with the greatness already attained, is yet but little beyond 30 years of age, and unlike that masterly story of his, 'The Ship that Found Herself,' he is just hardly coming into recognition of his own greatness."

Origin of "Pall Mall."

"Pall Mall" (pronounced pel mell) comes from Palle Maile, an ancient game, supposed to have been played on the present site of Pall Mall by Norman monks, by whom it was introduced into England.

The observant Pepys, in his famous diary, makes mention of it thus: "April 2, 1661.—Into St. James' park, where I saw the Duke of York playing at Pelemele, the first time that ever I saw the sport."—London Pall Mall Bulletin.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, JULY 28.....1899

An intimate friend of Secretary Alger is reported by the Baltimore *American* as having said:

"If Secretary Alger goes out he will be free to talk, and when he commences to talk he will make it interesting for the administration. He will reveal the influence that compelled the letting of some of the army contracts. Proof of these things are locked up in the Secretary's safe. He holds a full hand."

Whether this is an accurate explanation of the case or not, it derives abundant color of probability from recent facts. Some other motives besides personal friendship and gratitude for campaign aid must be at the bottom of McKinley's extraordinary tolerance and forbearance in retaining Alger in the cabinet in the face of notorious performances. Mr. McKinley is too accomplished and experienced a politician not to see and feel the vast injury Alger has done and is doing the administration. He is too sensitive to public opinion, too alive to his own success, not to desire to rid himself of this old man of Michigan. Yet in spite of the adjuration of his friends to dismiss Alger, in spite of the heavy handicap Algerism has laid upon the administration's war record, in spite of Alger's open alliance with McKinley's declared enemies and the fight against the administration wing of the Michigan Republicans, the President still retains the Secretary, and perceiving his ingratitude and treachery. Mr. McKinley's behavior under the circumstances does not justify the belief that he is actuated by a desire to conserve the best interest of the country or to strengthen the prestige of his party. He behaves as if he were afraid to turn Alger out, and his fear appears to spring from a personal source.

Edward Hamilton's letters from Wardner, Idaho, are quite interesting. He is too clever a journalist not too invest any imporiant subject with interest. Mr. Hamilton finds out that there are two sides to the question he has been sent to investigate. His conclusions are less logical than his descriptions are vivid. For instance, he commends the building of mills with armored towers, wherein a small force with machine guns can cope successfully with rioting miners. "It is businesslike and sensible," he declares. Mr. Hamilton adds that "with a machine gun and a company of sharpshooters there will be no reason to call on Uncle Sam's troops to settle business troubles." This view of the matter will not commend itself to thinking people. Employers should not be exected to protect their property with sharpshooters and machine guns. The State should preserve the peace. If the State cannot perform its duty to its citizens, the Federal power should intervene. Under no circumstances should employer and employee be empowered to fight it out with gatling guns, rifles or even with clubs.

His Final Request.

A Scotch farmer, celebrated in his neighborhood for his immense strength and skill in athletic exercises, very frequently had the pleasure of contending with people who came to try their strength against him. Lord D., a great pugilistic amateur, went from London on purpose to fight the athletic Scot. The latter was working in an inclosure at a little distance from his house when the noble lord arrived. His lordship tied his horse to a tree and addressed the farmer. "Friend, I have heard marvelous reports of your skill and have come a long way to see which of us two is the better wrestler."

The Scotchman, without answering, seized the nobleman, pitched him over the hedge and then set about working again. When Lord D. got up, "Well," said the farmer, "have you anything to say to me?"

"No," replied his lordship, "but perhaps you'd be good enough to throw me my horse."—Public Opinion.

Fooled the Passengers.

A man sitting in an electric car the other day pulled out of his pocket his handkerchief, when out sprang what seemed to be a snake. It wriggled and jumped around on the floor at a great rate. The ladies screamed and huddled together, the men made for it, and one stamped his foot on it, but upon examination it proved to be a copper wound bass piano wire, which the man with the handkerchief had coiled up in his pocket and, having become uncoiled, jumped to the floor. How the women looked daggers at him after they became quieted down was a caution. He soon got off, we presume to put it in the piano that needed it, not because of the looks of the women.—Salem Gazette.

Once Was Enough.

This is one of General Miles' stories. In the Confederate army, Longstreet's corps was making a night march. About 4 o'clock in the morning, when every one was worn out, a Georgia regiment stopped. A Georgia soldier put his rifle up against the tents on the other side of where Longstreet was.

"Well," he said, "this is pretty hard—to fight all day and march all night. But I suppose I can do it for love of my country." He continued: "I can go hungry, I can fight, if need be, I can die for my country, because I love my country. But when this war is over I'll be blowed if I'll ever love another country!"—Woman's Journal.

A Little Sermon.

To be honest; to be kind; to earn a little and spend a little less; to make, upon the whole, a family happier for his presence; to renounce, when that shall be necessary, and not be imbittered; to keep a few friends, but these without capitulation; above all, on the same grim condition, to keep friends with himself—here is a task for all that a man has of fortitude and delicacy.—Robert Louis Stevenson.

KIDNAPED BY INDIANS

THRILLING STORY OF A WOMAN'S CAPTURE AND ESCAPE.

Plucky Mrs. Larimer Was the Heroine of an Exciting Adventure With the Bloodthirsty Sioux In Wyoming Territory In 1864.

While in Washington one day I saw come out of the department of justice a woman of attractive appearance. As she paused a moment on the step and looked with bright, observant eyes over at the White House and along Pennsylvania avenue, she presented a picture of comfortable, placid middle age. One of the attorneys from the Indian depredation claims department accompanied her to the door, and after she bade him goodby he said:

"That woman is Mrs. Sarah L. Larimer of Nebraska, and she is making her yearly visit to Washington. When at the capital, she always calls on her friends in the department of justice. The files of Indian depredation claims contain no more romantic and thrilling incidents than those which relate the early life of Mrs. Larimer. Those who meet her now as a woman of the present day, quite abreast of the times in which she lives, interested in all public questions and full of kindly sympathies, can scarcely realize that in her youth she was the heroine of a regular 'dime novel' story of the plains.

"In 1864 Lieutenant Larimer, who had just been honorably discharged from the Union army, left his home in Kansas, accompanied by his young wife and little child, to cross the plains for the restoration of his health, which had given out through hard service in the war. They were in company with several other travelers and had with them valuable personal belongings, consisting of several wagons and horses, expensive clothing, family jewels, a complete photographic outfit and nearly $4,000 in money. When in Wyoming territory, they were surprised by a band of Sioux Indians, who murdered three of the party, wounded two, Lieutenant Larimer being one of the wounded, and captured Mrs. Larimer and her child. The Indians took the woman and child to their camp, about 70 miles from the spot where they had attacked the travelers.

"A day or two after the attack news came to the Eleventh cavalry, stationed at Fort Laramie, Wy., that the Sioux had attacked travelers on the emigrant road and had carried Mrs. Larimer and her child into captivity. Lieutenant Larimer had been found, nearly dead from arrow wounds and distracted at the fate which had befallen his wife and baby. The officers of the Eleventh immediately moved part of their command up the Platte river and obtained further information as to where the raid had taken place. They were about to move against the Indians with a force of two companies when Mrs. Larimer came crawling into camp, carrying her child in her arms. Their condition was deplorable. She and the child were nearly famished. As soon as Mrs. Larimer was able she gave a detailed account of the position of the Indians, their plans and movements, their designs against the command which they knew would be moving against them, their numbers and the ambuscades which they had prepared. Her information was so valuable that the officers were able to thwart the designs of the Indians, not only against the pursuing troops, but against exposed points and trains that were on the emigrant road.

"The officers found the information Mrs. Larimer gave as to the position and movements of the Indians to be exactly as she had said and marveled at the powers of observation and clearness of memory which had endured through the hours of torture she had gone through. The accuracy of her statements was particularly verified by the fact that one of the lieutenants and a few of his men, who had disobeyed orders and followed a trail apart from the command, fell into an ambuscade described by Mrs. Larimer and were killed.

"Mrs. Larimer was never quite clear as to how many hours she had passed with the Indians. From the moment of captivity, when they had started off with her child and herself in their train, she had concentrated every faculty on watching for an opportunity of escape. She had seen her husband struck down by arrows, killed, as she supposed; had seen the wagons fired and her friends killed and wounded. She had read of the tortures inflicted by Indians upon women captives, never imagining that one day she would be their wretched victim. She was determined, if possible, to get herself and child away from their clutches and die in some other way than by their tortures. She had always been a girl of fearless disposition, quick in her movements and very observant. She pretended to be bodily in a languid and almost immovable state. After hours of waiting and watching their dances and listening to their plans for further depredations, when they had ceased to observe her, she found a chance to slip away beyond the fires into the dark bush. For hours and hours, through two days and nights, she struggled on, faint, nearly dead, until she fell exhausted in the camp of the cavalry.

"It was a happy time, of course, when she found her young husband alive. All they had in the world was gone, but after the horrors of their experience had passed away a little and health was in a measure restored they started out afresh. Mrs. Larimer has always been the business manager of the firm. Her husband never had his health completely restored."—Philadelphia Times.

Put Out as a Feeler.

Mr. Willingham—What would you do, Mr. Rockington, if I were to ask you for your daughter in marriage?

Mr. Rockington—Well, that is something that I hardly want to answer offhand.

Mr. Willingham—I'm glad of that. Now, if I could be sure that you would not answer with your foot I would feel free to go ahead.—Chicago News.

In the year 1306 a party of crusaders brought a number of rose bushes home to England with them from Damascus, and these flourished so well that in a short time the beautiful flowers were to be found everywhere throughout the country.

THE HORSE IN BATTLE.

Even When Mortally Wounded He Will Try to Remain Standing.

A veteran cavalry horse partakes of the hopes and fears of battle just the same as his rider. As the column swings into line and waits the horse grows nervous over the waiting. If the wait is spun out, he will tremble and sweat and grow apprehensive. If he has been six months in service, he knows every bugle call. As the call comes to advance, the rider can feel him working at the bit with his tongue to get it between his teeth. As he moves out, he will either seek to get on faster than he should or bolt. He cannot bolt, however. The lines will carry him forward, and after a minute he will grip, lay back his ears, and one can feel his sudden resolve to brave the worst and have done with it as soon as possible.

A man seldom cries out when hit in the turmoil of battle. It is the same with a horse. Five troopers out of six, when struck with a bullet, are out of their saddles within a minute. If hit in the breast or shoulder, up go their hands, and they get a heavy fall; if in the leg or foot or arm, they fall forward and roll off.

Even with a foot cut off by a jagged piece of shell a horse will not drop. It is only when shot through the head or heart that he comes down. He may be fatally wounded, but hobbles out of the fight to right or left and stands, with drooping head, until the loss of blood brings him down.

The horse that loses his rider and is unwounded himself will continue to run with his set of fours until some movement throws him out. Then he goes galloping here and there, neighing with fear and alarm, but he will not leave the field. In his racing about he may get among the dead and wounded, but he will dodge them, if possible, and in any case leap over them. When he has come upon three or four other riderless steeds, they fall in and keep together as if for mutual protection, and the "rally" of the bugle may bring the whole of them into ranks in a body.—Public Opinion.

PLAINT OF A MILLIONAIRE.

No Fun In Life For a Man Who Has Acquired Enormous Wealth.

What is the smallest income on which a man may live in New York? was the question I asked today of a noted banker, whose income cannot be less than $100,000 a year. "Well," he replied, "my household expenses alone amount to $25,000 a year, and I do not see how I possibly could live on less than that." Then a reminiscent smile began to cross his countenance, and, heaving a little sigh, he said: "But the happiest time of my life was when my wife and I and two children lived here on $2,500 a year. After all, happiness doesn't depend on the amount of a man's income.

"I was quite intimate with William H. Vanderbilt when he was considered the richest man in the country. I met him one day in Fifth avenue and said to him that he ought to be the happiest man in the world. 'I am not,' the great millionaire replied. 'My health is shattered, and all the money I possess cannot restore it. I cannot even drive one of my fine horses. It is painful for me to sit down. My only possible exercise is for me to walk down the avenue. I receive threatening letters daily, and my nerves are so unstrung that I am constantly afraid that some assassin will waylay me. I am overrun with people who want to get money. I am the most wretched man in New York, and I tell you that after a person has accumulated enough to secure him against poverty and gratify his reasonable wants every dollar in addition is a burden and weighs him down.'"—Philadelphia Ledger.

Romance of Siam's Great Peaks.

Siam's greatest mountain range is the Sam Roi Yawt, or the 300 peaks. A quaint legend which explains their origin is set forth by the Siamese geologists as follows:

"It appears that one Meng Lai and his wife once inhabited the neighborhood (they were giants), and each promised their daughter in marriage, unknown to the other, to a different suitor. At last the day of the nuptials arrived, and Chao Lai and the Lord of Mleang Chin (China) both arrived to claim the bride. When the horrified father found how matters stood—having a regard for the value of a promise, which is not too common in the east—he cut his daugher in half so that neither suitor should be disappointed.

"Chao Lai in the meantime, on finding that he had a rival, committed suicide, and the peak of Chao Lai is the remains of his body. The unfortunate bride is to be found in the islands off Sam Roi Yawt, the peaks of which are the remains of the gifts which were to be made to the holy man who was to solemnize the wedding, while Kaw Chang and Kaw King, on the east side of the gulf, are the elephant and buffalo cart in which the presents were brought."

He Was Acquitted.

Here the voice of counsel for the defense thrilled with emotion.

"Gentlemen of the jury," he cried, "you cannot believe the prisoner to be the cool, calculating villain the prosecution would make him out to be! Were he cool and calculating would he have murdered his wife, as he is accused of doing? Would he not rather have spared her in order that she might be here at this trial to weep for him and influence your verdict with her tears?"

Only the thoughtless think lawyers do not assist the ends of justice.—Detroit Journal.

Bicycle Admonition.

"Bredren," said the bicycle parson, "guide youah spiritual bikes in dis yere wo'ld so dat you all won't scorch in de nex'."—Baltimore American.

Selwyn's Curious Taste.

George Selwyn had a strange but not uncommon passion for seeing strange bodies, especially those of his friends. He would go any distance to gratify this pursuit. Lord Holland was laid up very ill at Holland House shortly before his death. George Selwyn sent to ask how he was, and whether he would like to see him. Lord Holland answered "Oh, by all means! If I'm alive tomorrow I shall be delighted to see George, and I know that if I am dead he will be delighted to see me!"—Letter of General Fox.

It Was the Right Letter.

John was a bashful lover and had been calling on Mary for three years, but that was as far as he got until, visiting St. Louis on business, he found himself detained beyond the expected time.

He had to write to Mary, explaining his absence on the usual evening, and, while writing, the courage he had so long lacked came to him and he made a point blank proposal of marriage. He mailed the letter, and for two hours was one of the happiest men in Missouri.

Then he began to believe he had been precipitate and was assailed with doubt as to how his letter would be received. That night he didn't sleep. He thought all sorts of things, and vainly wished he could intercept the letter before it reached her. But that was manifestly impossible.

It was not until noon the next day that he received an inspiration as he was passing a telegraph office. Rushing in, he seized a blank and nervously penned the following:

Miss Mary ——, Chicago:

Mailed you wrong letter yesterday. Please do not open, and deliver to me on my return.

After that he breathed freer, at the same time wondering if he hadn't played the fool in not letting the matter stand. That evening a telegram was awaiting him at the hotel. It read:

John ——, St. Louis:

No; you mailed right letter. It was about time.

And John didn't allow business to interfere with his return to Chicago.—Chicago Inter Ocean.

A Trick of the Camera.

One of the many camera fiends of this city has recently been showing his friends a very unusual photograph of himself, caught in the act of falling from a ladder, and seeming to be a winning candidate for a broken neck. In spite of the fact that the injury seems so certain the tumbler's face wears a cheery smile, and on close inspection may be seen to be winking his eye mischievously at you as well as the force of gravity. In reply to questions he explained that that was an accomplishment acquired only after long practice.

"I could pose for that picture all day long with no serious injury to myself, except waste of time and a little physical fatigue," he insisted. But the less credulous of his friends refused to believe that he took pleasure in such acrobatic performances, and finally he had to tell the whole story.

"It's all very simple. First you place your camera in some way about 10 or 12 feet from the floor, with the lens pointing downward. A picture taken with it in this position will make the floor appear to be a side wall. Lay a sheet of white cloth on the floor and then arrange your ladder and yourself upon this sheet, and the posing is done. A strip of carpet tacked to the wall and a couple of chairs deftly arranged adds to the illusion, but the whole thing is so simple that I am ashamed of myself for explaining it to you instead of making you think it out for yourself."—Cincinnati Enquirer.

About an Even Thing.

A well known member of the Detroit bar tells this story: "Some years ago I attended a session of the circuit court up in the state. A pro confesso divorce case was called and it so happened that the judge was very much opposed to divorces, especially those which were unopposed. After the attorney for the complainant in this case had announced himself as ready to proceed, the judge asked if any one appeared for the defendant. There was silence for a moment, and the judge repeated the question. At one end of the lawyers' table sat an attorney who had acquired the liquor habit and who was at the time considerably under the influence of stimulants. He was noticed struggling to get on his feet, and, on observing him, the judge seized the opportunity to ask:

"'Do you appear for the defendant, Mr. Blank?'

"'No, your honor. I merely rose to remark, as "friend of the court," that with Brother Doubleblank as attorney for the complainant and no one on the other side it was about an even thing.'

"Then Blank resumed his seat while the whole court roared with laughter."—Detroit Free Press.

The Foot of a Horse.

The foot of a horse is one of the most ingenious and unexampled pieces of mechanism in animal structure. The hoof contains a series of vertical and thin laminæ of horn, amounting to about 500 and forming a complete lining to it. In this are fitted as many laminæ belonging to the coffin bone, while both sets are elastic and adherent. The edge of a quire of paper, inserted leaf by leaf into another, will convey a sufficient idea of the arrangement. Thus the weight of the animal is supported by as many elastic springs as there are laminæ in all the feet, amounting to about 4,000, distributed in the most secure manner, since every spring is acted on in an oblique direction.

Billville's Postmaster.

Our new postmaster ran so fast for office that he didn't have time to get educated. The following sign is posted on the postoffice window:

"Thar is 2 Lettairs inside for Molly Gibbens. They look like they're from her son, Bill, who is Bin Mustard Out. Allsore 2 Lettairs for Hise Holman (I mean, One-legged Hise) which looks like they're From the Widder Stevens, as Her Ritin is knowed by Everybody. Call an git 'em—Hise an Molly."—Atlanta Constitution.

Martyrdom.

Mrs. Feeley—Mrs. Love must have been devotedly attached to her husband.

Mrs. Steele—Her grief amounts to insanity. She has a small fortune in diamonds, and she has been in mourning nearly two years.—Jewelers' Weekly.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo, P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this Fourth day of May, A. D. 1899.

D. J. HESSION, Clerk.
[SEAL]
P. H. Mack Independence Cal. Attorney for plaintiff.

W. Forbes, in the town of Independence County of Inyo, State of California, the same being the place for the transaction of the business of the said estate in the County of Inyo State of California.

J. E. SHEPHERD and
W. L. HUNTER,
Executors of the estate of Edouard Chenot deceased.

Dated at Independence, Cal., November 30th 1898.

NOTICE TO CREDITORS.

Estate of Luther Clarke, deceased.

Notice is hereby given by the undersigned, administrator of the estate of Luther Clarke deceased, to the Creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within Ten Months after the first publication of this notice to the said administrator at his place of business on Edwards Street in the town of Independence County of Inyo, State of California, the same being the place for the transaction of the business of said estate in the said County of Inyo, State of California.

J. C. IRWIN.
Administrator of the estate of Luther Clarke, deceased.

OFFICIAL.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

In the matter of the estate of Luther Clarke deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interest of said estate, that it is to the best interest of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 10th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the Court-house, in the town of Independence, County of Inyo, State of California to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

Notice of Forfeiture.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO, }

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, called and recorded in the mining records of said county, as the "Fleas Mine," and will appear from certificate filed in the office of the County Recorder of said Inyo County, for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interest in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under Section One of an Act entitled "An Act relating to the working rights of way, easements and drainage of mines in the State of California, approved March 31st

FRANK HARRIS

Dated January 13, 1899.

DESERT LAND, FINAL PROOF

LAND OFFICE AT INDEPENDENCE, CAL.
June 5, 1899.

Notice is hereby given that Laura Mitchell of Independence, Inyo Co. Cal., has filed notice of intention to make proof on her desert land claim No. 800, for the N½ SE¼ Sec. 23, Tp 13 S. R 35 E. M D M, before the Register and Receiver at Independence Cal., on Saturday, the 12th day of July, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: John C. Willett of Citrus, Cal., Joseph Vaughn of Citrus, Cal., Michael McSweeney and William H. Mitchell, both of Independence, Cal.

S. W. AUSTIN, Register.

OFFICIAL.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO, }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty-three dollars and thirty-three cents each, your interest in said claim will become the property of the subscriber under said Section 2324 of the Revised Statutes of the United States, and under Section One of an Act entitled "An Act relating to the working rights of way easements and drainage of mines in the State of California," approved March 31, 1897.

FRANK HARRIS.

Dated January 13, 1899.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

In the Matter of the Estate of Jedediah S. Collins, deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins, deceased, having filed his petition herein, only verified, praying for an order of sale of all the real estate of said decedent, for the purposes therein set forth.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 15th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR,
Judge of said Superior Court

Dated June 17th, 1899.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains on Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:10 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $6 00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,10 feet) with their massive hoisting and pumping machinery. Returning, see Time-Table above Round Trip Tickets for sale at Ticket Office Reno. aug5-tf

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

TUESDAY, July 25, 1899.

People vs. Hung Yung, charged with selling intoxicating liquor to an Indian—Case called and tried before the following jury: J. S. Gorman, A. Stecker, J. E. Shepherd, W. H. Vaughn, John Baxter, J. R. Moffett, H. Levy, A. V. Lewis, Wm. Mitchell, H. P. Cartier, W. R. Deans and Alexander Clark. Verdict: Guilty; defendant recommended to the mercy of the Court. Day of sentence, Tuesday, August 1, 1899.

County Clerk Hession went to Big Pine yesterday, returning to-day.

Miss Maud Cook arrived home last Monday evening from a visit with friends at Bishop.

Miss Nettie Irwin left last Tuesday morning for Santa Rosa where she will attend school.

Tom Key came in this morning from Bishop. He is on his way to Saline on a prospecting trip.

Fred Burckhardt has the Whitney House at Lone Pine in good running order. Fred makes a capital host.

Mrs. James McDonald, accompanied by her little daughter, came in from Darwin last Saturday, returning Wednesday.

Freddie Samuels left yesterday morning for his home at San Francisco. He will meet his mother and sister at Reno.

L. F. J. Wrinkle has been at Panamint for the past two weeks surveying a group of mines for patent. He got back yesterday.

Meteorological resorts from all parts of the State indicate that this is the coolest summer experienced in California for many years.

Track-Superintendent McBride of the C. & C. R. R. came over to Independence Wednesday evening and is spending a few days in town.

Julian Eibeshutz writes from the headwaters of the Merced river that they are having a glorious time. Quite a party of Bishop people are there.

Charles Doty, wife and little boy, arrived here from Ballarat last Monday and left next morning for Onion Valley for a few weeks' camping out.

The Board of Supervisors of Mono county have repealed the "Drummers' license" ordinance and the fraternity are greatly rejoiced thereat.

Nearly all of Lone Pine has gone to the fishing grounds at Kern river, and every saddle and pack animal in the country has been pressed into service.

Mr. and Mrs. A. Church have returned from a visit to San Francisco where Mr. Church went for medical treatment. He has improved in health very much.

Dr. J. S. McQueen finished up his work here on Wednesday and left for home yesterday morning. During his three weeks stay here he was kept very busy.

A big steam engine, to be used for pumping, was shipped to the Soda Works at Keeler last Monday. A new canal will be built and the works considerably extended.

Edward S. Reddy died at San Francisco last Friday and was buried Sunday. The young man was well known here and was a member of Inyo Lodge No. 221 F. & A. M.

Helen, the little daughter of Mr. and Mrs. J. J. Gunn, has been very ill with appendicitis. A letter received Wednesday evening states that she is out of all present danger.

Mr. and Mrs. O. C. Harper arrived home last Monday evening from their wedding trip. Their honeymoon was pleasantly spent at the former home of the groom at Virginia City.

Phil. Diedesheimer arrived here from San Francisco last Monday evening, for the purpose of examining and reporting upon the Sacramento and Reward gold mines. He went to Beveridge last Tuesday to look at the Hunter & Spear group of mining property.

Speed Program.

The Directors of the Eighteenth District Agricultural Association have adopted the following speed program for the coming fair to begin September 19th and continue four days:

FIRST DAY.

Running—Indian pony race, 1 mile and repeat, $15.

Running—Untried horses, ½ mile and repeat, $50.

Running—Free for all, ¼ mile and repeat, $50.

SECOND DAY.

Trotting—2:40 class, mile and repeat, $75.

Running—Free for all, mile dash, $75.

Gentlemen's bycicle race, mile and repeat, $15.

THIRD DAY.

Trotting—Free for all, mile and repeat, $100.

Trotting—Two year olds, mile and repeat, $50.

Ladies' bycicle race, ½ mile dash, $15.

FOURTH DAY.

Baseball game, $75.

Real Estate Transfers.

The following deeds have been recorded since July 21, 1899.

S. S. Allen to W. A. Chalfant Sept. 13, 1898—W½ lots 6 and 7, Academy Addition, Bishop, $75.

Weaver & Porter Bros. to L. P. Lambert, April 10, 1899—Concord and Avena mines, South Park District, $159 47.

Gustave Sanger and William A. Sanger to Charles H. Scheu, July 21, 1899—Group known as the Sanger copper mines, Ubehebe District, $5.

Mono county is registering a big kick at the time fixed for holding the Eighteenth District Fair this fall. It will occur just at the time of the Carson fair, and the claim is made that quite a number of Mono and Alpine people want to attend the Nevada State fair at Reno and the district fair at Carson and then come here. They are making quite a roar, anyway.

A party consisting of five prominent business men of Fresno arrived here last Saturday on their return trip. They had then been in the mountains three weeks, coming in by way of Kern river, and returning by way of Kearsarge pass and Kings river. This is a favorite route of tourists and a constantly increasing number come this way every year.

J. Sub Johnson of Visalia accompanied by Frank Carson and S. C. C. Lunt of San Francisco arrived here Wednesday by way of Kern river. They expect to spend some time examining properties in the old Kearsarge mining district and when the weather becomes cooler go to the desert country.

We are informed that numerous bands of sheep are now being admitted to the Sierra Forest Reserve. The matter seems to have been adjusted between the sheepowners and the rangers. The same company have several large bands on Breckenridge mountain and several large bands are ranging between Greenhorn and Piute.—*Bakersfield Independent.*

Quite a nice bar of ballion was brought in from the Reward mill this week. Superintendent Hoskins is pushing the work of development on the mine and expects soon to make a connection with a good body of ore known to exist in the south drift in such a manner as to greatly facilitate its working.

W. T. Bunney and Nap. Baker left this morning on a deer hunting expedition. They took two pack animals and will try to cross the Sierra summit from the head of Shepherd's canyon to the headwaters of Bubbs' creek. If they succeed it will be the first time that animals have ever crossed there.

D. C. Lane, former owner of the Lane mine at Darwin, was in town this week. It is reported that he has gone to Darwin to see what can be done about resuming operations at the mine.

Jas. N. Rose has been very ill all the week, and his daughter, Mrs. J. J. Morton, came up from Keeler to assist in caring for him. He was a little better this morning.

Clare Tyler came in from Ballarat today with L. F. J. Wrinkle. He expects to leave here Monday for a visit with his people at Delano, where he has not been for three years.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899. D. J. HESSION, Clerk.

SEAL] By C. N. ROSE, Deputy Clerk.

Notice of Forfeiture.

To CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co owner; your interest in said claim will become the property of the Subscriber, under Sec. 2324.

P. J. GINSER.

Dated March 3, 1899.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

EXHIBITS AT PARIS.

There will be a large exhibit from this country at the Paris exposition in 1900, which will prove very interesting to all, but no more so than the news that the famous American remedy, Hostetter's Stomach Bitters, will cure dyspepsia, indigestion and constipation. To all sufferers a trial is recommended.

When a woman runs out of anything else to do she can study catalogues.

$100 REWARD $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address, F. J. CHENEY & CO., Toledo, O.
Sold by Druggists, 75c.
Hall's Family Pills are the best.

It is not the men who pay for the telephones who use them most.

Piso's Cure for Consumption has saved me large doctor bills.—C. L. Baker, 4228 Regent Sq., Philadelphia, Pa., Dec. 8, 1895.

The Expert Met His Match.

At a North Side boarding house one of the newly arrived boarders, named Burton, is an expert accountant. The first evening after his arrival he began boring the other boarders by talking "shop" and relating the great feats of mathematics that he had accomplished in his time. Smith, one of the star boarders, made up his mind to rid the parlor of shop talk, at least for that night.

"I have a little piece of addition work that I think you would have a hard time in doing. If you can add it without the aid of a pencil and paper, you are a good one."

"Name each item, and I will add,' said Burton.

"Five barrels of cider at $4.56 a barrel. Have you got that down?"

"Yes."

"Four bushels of bran at 90 cents a bushel. Have you got that down?"

"Yes."

"Fifteen kegs of horseshoe nails at $2.35 and two strings of garlic at 50 cents a string. Have you got that down?"

"Yes; go on."

"Six gallons of castor oil at $4.25. Have you got that down?"

"Yes."

"Sure you've got it all down?"

"Sure, I have," said Burton.

"H—m! How does it all taste?"

"Durability is Better Than Show."

The wealth of the multi-millionaires is not equal to good health. Riches without health are a curse, and yet the rich, the middle classes and the poor alike have, in Hood's Sarsaparilla, a valuable assistant in getting and maintaining perfect health.

THE SCALING LADDER.

How It Is Used at Fires In Very High Buildings.

The most promising pupils among those admitted to the school of instruction at the New York fire headquarters are said to be those who have served an apprenticeship in professions that have called them aloft. Sailors, painters, roofers and steeple climbers have the advantage of their preliminary training. The first thing that a neophyte is called upon to learn is how to handle the scaling ladder.

This bit of apparatus is a long, well reasoned tongue of timber with short crosspieces passing through it. It terminates at the top with a long hook, which has three or four ratchetlike projections on its undersurface and weighs from 20 to 45 pounds. There is a special knack in handling it dexterously, and many a time a man who is slight and small of stature can manage a ladder which a Goliath would find difficulty in handling.

"There is no piece of apparatus in the fire department," says one who has made a study of its methods, "which, skillfully handled, can be made to serve more purposes than this scaling ladder. The longest extension ladder in the department measures 90 feet, but the man with the scaling ladder can go up 14 or 15 stories without becoming exhausted. At fires before an extension ladder can be put in position one fireman can push a scaling ladder into a second story window, scramble up and go from story to story to the very roof. He is followed by a second fireman, who takes his ladder with him story by story, and this fireman by a third, until by the time the first man has reached the top there is a completed chain behind him, down which the rescued may be carried and the fireman himself escape."—New York Tribune.

SMITHERS' RETORT.

His Sarcastic Reply to the Private Boarding House Landlady.

Mr. Smithers is a somewhat fastidious young man who is looking for a new boarding place. Smithers can't abide the regulation boarding house, and always tries to live with a private family. He is now convinced that an "ad." which solicits boarders for a "nice private family" is often a snare for a stuffy double flat, inhabited by one small family and 24 boarders.

Smithers called one day last week at a place with a glowing description just on the flank of Michigan avenue's aristocracy.

"Hum! Suspiciously like a boarding house," thought Smithers as he took in the dimensions. A collarless negro servant who opened the door confirmed his suspicions, but he had gone too far then to back out. A sharp nosed, snippy landlady came in with a top lofty air.

"Er—ah, I believe I am mistaken," he began. "I supposed I should find a private family. By the advertisement—hu-m"—

The laughter and the familiar boarding house hum of 14 clerks and ten lady stenographers came up from the dining room in the basement. The mistress of the conglomerate "private family" drew herself up proudly. "You are entirely mistaken, sir," she asserted in a grasping, $7 a week voice. "This is not a boarding house, although we have a few friends living with us."

Smithers sniffed the air. There was a distinct odor of prunes and corned beef.

"Well, I must say," he remarked as he turned up his coat collar and fled down the steps, "that it smells like a boarding house, madam."—Chicago Inter Ocean.

Tempted by Fishes.

The Koran gives a story of some very naughty fishes in David's time. Knowing that the Israelites were forbidden to catch fish on the Sabbath, the wicked creatures came out of the Red sea in unusual numbers and kept in sight of the people all throughout the day in order to tempt them. On the approach of night they returned into the sea again.

In a fatal moment some of the Israelites yielded to the piscine blandishments, caught several of them and had them for dinner, whereupon David cursed the Sabbath breakers, and God, to show his displeasure, changed them into apes and pigs. For three days they remained in this unpleasant condition, when a violent storm arose and swept them into the sea.—Pittsburg Dispatch.

Human Eye Faster Than the Pen.

"You read 1,000 miles," is the calculation of a clever individual fond of details. The eyes of the average busy man, in reading alone, travel 1,000 miles, which is equivalent to an "ocular trip" a third of the distance across our continent. Even the busiest man probably travels with his eyes 19 miles of type yearly, and there are doubtless many readers who travel six times the distance. If you read a yellow backed novel, your eyes have traversed from a mile to a mile and a half of type. The busiest pen cannot keep up with this pace. With ordinary use, your pen has not traveled as far as from New York to Albany.—Philadelphia Inquirer.

Speech and Hands.

A professor who has made a study of children says he has discovered why the majority of the people are right handed. Infants use both hands until they begin to speak. The motor speech function controls the right side of the body, and the first right handed motions are expressive motions, tending to help out speech. As speech grows so does right handedness.

PIMPLES
"My wife had pimples on her face, but she has been taking CASCARETS and they have all disappeared. I had been troubled with constipation for some time but after taking the first Cascaret I have had no trouble with this ailment. We cannot speak too highly of Cascarets."—FRED WARDMAN, 5708 Germantown Ave., Philadelphia, Pa.

SERMONS OF THE WEEK

Immortality.—The best evidence of immortality is the revelation of immortality.—Rev. L. P. Mercer, Swedenborgian, Chicago, Ill.

Two Kinds of Religion.—There are two kinds of religion—the religion of the crowd and the religion of the consecrated heart.—Rev. George Hodges, Episcopalian, Cambridge, Mass.

Self-Help.—The truest benefactors of the poor are those who teach self-help. Not alms, but a friend, is a wise motto for philanthropists.—Rev. T. J. Villers, Baptist, Indianapolis, Ind.

Mental and Spiritual Recreancy.—To suppress any known truth or any part thereof is mental and spiritual recreancy.—Rev. J. L. Barton, Congregationalist, Bangor, Me.

Emphasized Promises.—Many promises of immortality are emprasized and illumined by Christ's personal ascension to the heavens.—Rev. R. S. Storrs, Congregationalist, Brooklyn, N. Y.

Inward Impulses.—The masses of men are as untouched by the breath of inward impulses as are the depths of the ocean by even the tornado's wrath.—Dr. E. G. Hirsch, Hebrew, Chicago, Ill.

A Wise and Benevolent Power.—Every argument for the existence of a wise and benevolent power in the universe is an argument for the immortality of man.—Rev. M. D. Shutter, Universalist, Minneapolis, Minn.

The Idea of God.—Those engaged in metaphysical speculations or scientific investigations must have the idea of God back of them in order to accomplish anything.—Rev. E. L. Patton, Presbyterian, Princeton, N. J.

Storms.—The Lord God has written it plain in his word that he often calls the best people to suffer most. Storms are meant just as much for good people as for wicked people.—Rev. S. A. Northrop, Baptist, Kansas City, Mo.

Bible Contrasts.—The Bible always revels in contrasts; it is the sledge-hammer blows of genius; once you admit its promises you are obliged to admit its conclusions.—Rev. F. De Witt Talmage, Presbyterian, Milwaukee, Wis.

Spiritual Progress.—In the realm of spiritual progress there is yet very much land to be possessed, and this coming year should enlarge and deepen and broaden Christian life as never before.—Rev. W. J. Chichester, Presbyterian, Chicago, Ill.

God's Love.—God's love should not be measured by comforts, possessions and powers given to man, nor by the wealth, but by the fact that he gave his Son to redeem it.—Rev. A. H. Evans, Presbyterian, New York City.

The Inquisition.—The church would be false to its trust if it did not punish all heretics; but in the method of this punishment it may be fallible. The apparent cruelty of the mode of punishment is due to the times and method of life.—Rev. Dr. Breen, R. C., Rochester, N. Y.

When Christ Was on Earth.—You think what you would have done in the times when Christ was on earth, when the apostles had the whole heathen world before them. But if you fail now, you would also have done so then.—Rev. Dr. H. C. Stanton, Presbyterian, Kansas City, Mo.

Christ's Forgiveness.—Every man who has sinned and suffered and then gone to the foot of the cross and asked Christ's forgiveness knows something about the atonement that others do not know, because he knows something of his own sin.—Rev. Dr. Van Dyke, Presbyterian, Brooklyn, N. Y.

Social Reconstruction.—Social reconstruction can come only when social justice ceases to be the dream of idealists, and becomes the normal standard of social conduct, and social righteousness attains to the mightiness of economic law.—Rabbi Charles Fleischer, Hebrew, Boston, Mass.

GOLD IN THE FAR NORTH.

Not Surprising that More Has Been Discovered in Kamchatka.

The news that gold has been discovered in Kamchatka is not surprising, when one considers its proximity to the Alaskan gold fields. As shown by the map the Aleutian Islands, which stretch westward from Alaska, form almost a continuation of the Kamchatkan peninsula, so that the journey from these possessions of the United States to the new gold strikes is only a

RUSSIAN AND AMERICAN GOLD FIELDS.

few hundred miles. A range of high volcanic mountains runs through the center of Kamchatka, separating at the lower part into two distinct chains. Between the two lies the fertile valley of the Kamchatka River. Here the summers are warm and vegetation grows luxuriantly, grass growing to the height of five feet, and so rapidly that three crops can be cut in one season. In January the average temperature at the southern end of the peninsula is 20 degrees above zero. The population of Kamchatka is only about 4,500, most of the inhabitants being Indians closely resembling the Eskimos.

Hirsute Statistics.

Blonde hair is finer than that of any other color. By actual count it has been ascertained that 400 hairs to the square inch grow upon the head of a blonde beauty. The brown comes next with 350, then come the black with 325, and the red with 250 or 260. After counting the hairs growing on an inch square it has been estimated that on the head of a blonde there will be about 140,000 hairs, while a brown suit of tresses will have 109,000, a black 102,000, and a red 90,000.

A cynical old bachelor says marriage is an institution for the blind.

A DARK SHADOW.

I never saw my mother's face;
God drew a shadow o'er my baby eyes.
And there it lies,
Unchanged by time or place;

But I have felt her loving breast
Breathe heart sore sighing for the joys I miss
And felt her kiss
Upon my eyelids pressed.

I never saw God's lovely world,
But I have listened to the whispering trees
And felt the breeze
That spring's sweet leaves uncurled.

I never gazed upon a rose,
But I have laid the flower against my cheek
And heard God speak
And mysteries disclose.

And he has made me understand;
Though dark the shadow that now holds me blind,
God is behind.
Unseen I feel his hand.

And know that from my darkened eyes
The lifelong shadow will be rolled away
One solemn day.
Oh, rapturous surprise!

My happy lips e'en now must sing.
These eyes, unclosing in the streets of gold,
Will first behold
The face of Christ, my King.
—Teodora Bell in Good Words.

REPARATION.

A Strange Coincidence In the Life of a Fireman.

"Soon after I entered the fire department," remarked a hostler of the city fire department, "it was my hard luck in responding to an alarm to run over and terribly injure a small boy, who was playing in the street. It was an unavoidable accident, but just the same it had its effect upon me, and for a time it preyed heavily on my mind and probably would have done so until today had it not been for the sequel, which righted up matters somewhat.

"I kept myself pretty well informed as to the condition of the boy, and was extremely happy when I saw him on the streets again and to all appearances fully recovered from the injury which I had inflicted upon him. Well, time passed along, and, the boy's family having moved from the house where he resided and where we took him after the injury, for awhile I did not see him, though I occasionally heard from him.

"One rather rough night about a year afterward our company responded to an alarm in the northwestern part of the city. On arriving at the fire I was sent to one of the upper rooms of the burning building to rescue some children who were in the room and who were terribly frightened, as they had good reasons to be, for they were in considerable danger. There was a light burning in the room, and the moment I entered it I recognized the little fellow that I had driven over and injured. If there ever was a little fellow who was carefully wrapped up in bedclothes and with his little sister taken down stairs and to a place of safety, you can bet it was that boy and girl. The same look of fright was upon his face, which I had not forgotten, but I don't think my face looked as bad as when I had picked him up in my arms before. I was supremely happy in being able to return some good for the ill I had done him."—Washington Star.

Other Dangers.

"What are you reading about?" asked the man with the wise manner.

"The stock market," replied the youth.

"Don't do it."

"But I never put up any money. Therefore I can't lose."

"It makes no difference. You're likely to become one of these people who tell how much money they would have made if they had only done what they came pretty near doing, because they didn't see how things could go otherwise. And then even your best friends will wish sometimes that you would bet your money and lose it and keep still about it."—Washington Star.

HOITT'S SCHOOL.
Menlo Park, San Mateo Co. Cal., accredited at the Universities. Location, climate, and careful attention to Mental, Moral and Physical training, places Hoitt's among the foremost Schools for Boys on the Coast.—*S. F. Chronicle.* Will reopen in the new building August 15th, (9th year.) Ira G. Hoitt, Ph. D., Principal.

Verdict as Rendered.

"Gentlemen of the jury," asked the clerk of the court, "have you agreed upon a verdict?"

"We have," replied the foreman. "The verdict of the jury is that the lawyers have mixed this case up so that we don't know anything at all about it."—Philadelphia North American.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

RELIEF FROM PAIN.

Women Everywhere Express their Gratitude to Mrs. Pinkham.

Mrs. T. A. WALDEN, Gibson, Ga., writes:

"DEAR MRS. PINKHAM:—Before taking your medicine, life was a burden to me. I never saw a well day. At my monthly period I suffered untold misery, and a great deal of the time I was troubled with a severe pain in my side. Before finishing the first bottle of your Vegetable Compound I could tell it was doing me good. I continued its use, also used the Liver Pills and Sanative Wash, and have been greatly helped. I would like to have you use my letter for the benefit of others."

Mrs. FLORENCE A. WOLFE, 615 Mulberry St., Lancaster, Ohio, writes:

"DEAR MRS. PINKHAM:—For two years I was troubled with what the local physicians told me was inflammation of the womb. Every month I suffered terribly. I had taken enough medicine from the doctors to cure anyone, but obtained relief for a short time only. At last I concluded to write to you in regard to my case, and can say that by following your advice I am now pefectly well."

Mrs. W. R. BATES, Mansfield, La., writes:

"Before writing to you I suffered dreadfully from painful menstruation, leucorrhœa and sore feeling in the lower part of the bowels. Now my friends want to know what makes me look so well. I do not hesitate one minute in telling them what has brought about this great change. I cannot praise Lydia E. Pinkham's Vegetable Compound enough. It is the greatest remedy of the age."

The Mystery of Warts.

When a youngster of 10 years, I was visited by a plague of warts. From my earliest recollection I had had on my middle finger an old daddy wart, but at the age stated this had multiplied to 40 or more, one being on my lip and one on my chin. I was considerably worried over my growing family of excrescences, and one day a woodchopper in my father's employ, who acted queerly, never wearing a hat, for instance, said that he could take the warts away with him. I was quite willing to have him try, and he took me off to a quiet spot under a willow tree, from which he cut a number of small branches, and these he cut again into little bits of an inch in length, making a notch in each one, and this notch he set down over each wart, having at last a collection of 40 or more of these little notched sticks. These he put into his pocket, saying that the warts would go away.

I could never say just when the prophecy was fulfilled, but within six weeks there wasn't a wart on my face or hands, and there has not been one since that time. What I want to know now, as I did then—and the conjurer would not tell me—is what did it. I have spoken to many doctors about it, but they merely laugh, as though I was giving them a "pipe talk," and yet the warts went away, and all the medicine I had ever tried on them had no effect whatever.—New York Sun.

His Opinion.

The woman who speaks her mind freely on all occasions had been telling the sad eyed stranger to whom she had been introduced what she thought of Mormonism. Her remarks were eloquent and acrimonious. She had a flow of language which never failed and was fortified with facts which could not be refuted. He listened patiently till she had finished and then said meekly, "Yes, madam; I'm a Mormon myself."

"I don't care," she exclaimed, though her face reddened a little. "A man ought to be satisfied with marrying one woman to wait on him and be browbeaten by him."

"I don't browbeat anybody," he responded reproachfully.

"It doesn't make any difference whether you do or not. No man has any business to marry two wives."

"I agree with you perfectly, madam."

"Ha! You admit it."

"Yes'm; no man ought to have two wives. If he takes more than one, he ought to stick to odd numbers and have three, five or seven. It obviates the necessity of a man's mixing in. In case of a family dispute it provides for a deciding vote and prevents a deadlock."—Washington Star.

Uses of the Mouth.

A baby tries to put everything he finds in his mouth, but even at that he uses his mouth to better advantage than most men.—Detroit Journal.

The Japanese have three forms of salutation—one for saluting an inferior, one for saluting an equal and another for saluting a superior.

There are 48 different materials used in constructing a piano, from no fewer than 16 different countries, employing 45 different hands.

Fresh Laid.

A lady who did not appear to be in a very good temper bounced into a certain grocer's shop the other afternoon.

"Is your father at home?" she asked of the small boy behind the counter.

"No'm," was the reply. "Anything I can do for you?"

The lady hesitated before remarking.

"I've called to complain about the eggs I obtained from your father this morning. He told me they were fresh laid, and"—

"Did he get 'em from the window?" asked the youthful salesman.

"Yes."

"Then it's all right, 'm—they're fresh laid."

"But I say they are not."

"You'll excuse me, 'm," said the youngster, endeavoring to be polite. "But I ought to know. They came in a crate yesterday. I unpacked every one on 'em an laid 'em there in the window only this morning. So I knows they're fresh laid, and that settles it."—London Answers.

Queer Origin of a Hotel.

They say that the best hotel in Texas is to be found at Belton, a town on the Santa Fe road and is kept by "seven sanctified sisters," as the proprietors are popularly called. Several years ago a woman in the place and her husband quarreled over the best way of expounding the Scriptures to a Sunday school class and were so stubborn that they separated and were finally divorced.

This family controversy was taken up by the town, which was soon distinctly divided between the adherents of the husband and the adherents of the wife. The result was a large crop of divorces, and seven husbandless women, including the original cause of the commotion, joined together and rented the town hotel. One of them did the cooking, another was parlor maid, a third made up the beds, and so they divided the work among them and ran the establishment on the co-operative plan.—

No Company For Him.

Rich Old Party—What do you want a wife for when you can hardly support yourself? Why, sir, my daughter would starve!

Snookins (with great dignity)—Well, sir, if you are the kind of man to let your daughter and her husband starve I don't wish to enter the family.—Fun.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

When He Was Fond of It.

Quinn—Are you fond of Welsh rabbit?

A man always rises in his own estimation when he gets on familiar terms with a person of whom he once stood in awe.—Atchison Globe.

The goldfish is a great coward, and a tiny fish with the courage to attack it can frighten it almost to death.

GREAT TAMMANY LEADER
(The Catarrh of Summer.)

Congressman Amos J. Cummings.

New York, Oct. 11th, 1898.
Pe-ru-na Drug M'f'g Co., Columbus, O.:
Gentlemen—Pe-ru-na is good to catarrh. I have tried it and know it. It relieved me immensely on my trip to Cuba, and I always have a bottle in reserve. Since my return I have not suffered from catarrh, but if I do I shall use Pe-ru-na again. Meantime you might send me another bottle.
Yours, Amos J. Cummings, M. C.

Summer catarrh assumes various forms. It produces dyspepsia and bowel complaint. It causes biliousness and diseases of the liver. It deranges the kidneys and bladder. Summer catarrh may derange the whole nervous system, when it is known to the medical profession as systemic catarrh. Pe-ru-na is a specific for all these forms of catarrh. Pe-ru-na never disappoints. Address Dr. Hartman, Columbus, Ohio, for a free book on summer catarrh.

Epileptic
FITS
Can Be Cured.

If you suffer from Epilepsy, Fits, Spasms, Spells, Falling Sickness, St. Vitus's Dance, &c., have children, relatives, friends or neighbors that do so, or know people that are afflicted, my New Discovery, Epileptiticide, will give immediate relief and PERMANENTLY CURE them, and all you are asked to do is to send for a FREE Bottle and try it. It has cured thousands where everything else failed. My 90-page illustrated Book, "Epilepsy Permanently Cured," FREE.

When writing please mention reading in this paper and give name, AGE and full address.

All Correspondence professionally confidential.

S. F. N. U. No. 888. New Series No. 27

Best Prescription for Malaria, Chills and Fever,
Grove's Tasteless Chill Tonic

It is simply Iron and Quinine in a tasteless form.... Sold by every druggist in the malarial sections of the United States..... No cure, no pay.... Price, 50c.

First Tasteless Tonic ever manufactured. All other so-called "Tasteless" Tonics are imitations. Ask any druggist about this who is not PUSHING an imitation.

They All Recommend Grove's.

WHOLESALER.
St. Louis, Mo., Feb. 6, 1899.
PARIS MEDICINE CO., City.
Gentlemen:—We wish to congratulate you on the increased sales we are having on your Grove's Tasteless Chill Tonic. On examining our record of inventory under date of Jan. 1st, we find that we sold during the Chill season of 1898 2560 dozen Grove's Tonic. We also find that our sales on your Laxative Bromo-Quinine Tablets have been something enormous: having sold during the late Cold and Grip season 4,200 dozen.
Please rush down order enclosed herewith, and oblige. Yours truly,
MEYER BROS. DRUG CO
Per Schall.

RETAILER.
KEDRON, ILLS.
PARIS MEDICINE CO.,
Gentlemen:—I handle seven or eight different kinds of Chill Tonics but I sell ten bottles of Grove's to where I sell one of the others. I sold 36 bottles of Grove's Chill Tonic in one day and could have sold more if I had had it on hand. Mr. Dave Woods cured five cases of chills with one bottle.
Respectfully,
JOHN T. VINYARD.

CONSUMER.
WHITESBORO, Tex., Sep. 17, 1898.
PARIS MEDICINE CO., St. Louis, Mo.
Gentlemen:—I write you a few lines of gratitude. I think your Grove's Tasteless Chill Tonic is one of the best medicines in the world for Chills and Fever. I have three children that have been down with malarial fever for 18 months and have bought Chill medicines of all kinds and Doctor's bills coming in all the time until I sent to town and got three bottles of Grove's Tonic. My children are all well now and it was your Tasteless Chill Tonic that did it. I cannot say too much in its behalf.
Yours truly,
JAMES D. ROBERTS.

HELPING FATHER GET THE HAY.

It is summer in the city,
And the air is dry and hot;
I am thinking of the country,
And the scenes so long forgot.
Oh, I long to see the sunshine
On the meadows far away;
And to join again the children,
Helping father get the hay.

I was reared in country sunshine,
And have helped to get the hay,
With my brothers and sweet sisters,
On the old farm far away.
We would run, and jump, and scamper,
Evenly the hay to stow;
While the mild-eyed oxen plodded
Patiently from row to row.

When 'twas loaded off we started,
Through the field with off a lurch;
Now across the dusty highway;
Now beneath the shady birch.
We, the children, in the center,
Each so happy in his way;
Feeling all of great importance,
Helping father get the hay.

Then the men would store it quickly,
'Neath the eaves of the great barn;
And we'd welcome, O, how gladly,
Mother's old tin supper horn.
'Round the table in the kitchen,
We would sit, a hungry brood,
While our father asked the blessing
O'er our simple country food.

Now the dear old folks are sleeping;
Brothers, sisters, too, have gone;
Some homes of their own are making;
Others home to God have flown.
I have prospered in a city,
And am counted rich to-day;
Yet, I fain would be an urchin,
Helping father get the hay.
—Boston Globe.

The Peachblow Vase.

EIGHTEEN thousand dollars is quite a sum to pay for a piece of baked clay barely eight inches in height. Yet I paid it. Ten hours after it came into my possession I had the pleasure of casting the fragments into the Hudson. I say "pleasure" in all faith. I believe I was the happiest man in all New York when I consigned those twenty bits of the peachblow vase to oblivion off Fifty-ninth street, although each bit represented an outlay of $900.

It is my humble opinion that a woman without pride has as little grace in the eyes of the Lord as a woman with too much; therefore I glory in the fact that Inez, the beloved of my soul, demonstrated her independence of spirit in the effective manner which this confession will show. As for the expense, that was a mere bagatelle.

Inez was the daughter of a very peculiar old gentleman who had squandered a fortune by indulging a hobby for antiques.

I will call him Mr. Christopher, withholding his real name as well as my own for obvious reasons. I became acquainted with Mr. Christopher through an advertisement which carried me to his home in quest of an ancient and valuable meerschaum—for if I have a weakness it is for a carved pipe that somebody else has industriously colored. I bought the pipe and incidentally discovered Inez. After seeing the beautiful daughter I made it a point to visit Mr. Christopher again and again upon the pretext of looking for more pipes. Before obtaining permission to call upon Inez as a professed suitor I had purchased a collection of smokers' curios, ranging all the way from a Sioux sachem's pipe of peace to a wondrously contrived chibouque.

Mr. Christopher was poor, and it touched me to the heart to note to what shift Inez was put in the matter of dress. Her carefully mended gloves, her simple but tasteful gowns and an absence of ornament from her attire all bespoke the straitened circumstances of her father, who was literally starving in the midst of an art collection of priceless value. Mentally I berated the old man for his grasping selfishness, and while I pitied Inez from the bottom of my heart I could not but admit that simplicity of costume enhanced her lovelliness in my eyes, sated as they were with the sight of beauty profusely adorned with silks, laces and gems.

Had I declared to Inez my station in life she would certainly have misconstrued my attentions, which were honest as the day. She was poor; I was rich. Her rank, socially, was beneath my own. Although I have no patience with the arrogance of those who make a high caste of wealth, yet the Brahminical banner exists and none acknowledge it so freely as the poor. Therefore, I was obliged to cloak my honesty with a trifling deception. When asking permission to call I told Inez that I had recently been left a modest bequest sufficient to set me up in an honorable business. I dropped no hint of wealth beyond this fictitious legacy, and Inez, in the simplicity of her heart, believed and did not question how my slender competence might permit a heavy purchase of expensive pipes. As to her father, he had no thought beyond his art collection.

My wooing prospered. In due course there came the tender acknowledgment that I was beloved, and I went to Mr. Christopher to ask him for his daughter's hand. I found my prospective father-in-law gloating over a cabinet of valuable ceramics. It was with difficulty that I drew his attention from his collection of old china, stated my case and asked for Inez.

"Are you able to care for my daughter as I care for her?" he asked with commendable foresight and with an astonishing disregard of her present condition.

"An uncle of mine left me some $20,000," I remarked, clinging to the story I had told Inez. "That will give me a start in business, I think, and——"

"Twenty thousand dollars!" he exclaimed, rubbing his bony hands. "Inez never told me of this. Why, that amount, expended in antiques——" He paused suddenly.

"Do you love my daughter, Mr. Grosvenor?"

"With my whole heart."

There was a glitter in his humid eyes as he asked the next question.

"But would you make a sacrifice, a heavy sacrifice, for her?"

"I would give even my life!"

"That is well, that is well," he muttered, rubbing his hands once more. "You seem to be an honorable young man, and I have no objection to your marrying my daughter, providing you—you——" he hesitated, glancing at me furtively.

"Well, Mr. Christopher?"

"In a few days the 'Peachblow Vase' will be sold at auction. Mrs. Mary Jane Morgan, so I hear, paid $15,000 for it. It was found in China, belongs to the Kang-he period, and is unique. Do you hear me, Mr. Grosvenor? That vase is unique!"

The old gentleman was greatly agitated. Rising from his chair, he took several turns about the room, with quick, nervous strides. Finally he stopped before me and went on:

"I've lain awake every night for a month thinking of that vase. I must have it. If you will buy it at the auction, Mr. Grosvenor, and bring it to me, my daughter is yours."

I believe I succeeded admirably in suppressing the contempt I felt for that old man. He knew I had $20,000 with which to provide a home for his daughter, and he was willing to impoverish me for the sake of this insignificant piece of bric-a-brac, and then give his daughter's welfare into my hands.

"Very good," I said, rising. "The vase shall be yours."

In March, 1886, it was sold at auction. It was bidden in for me, as I have stated, for the sum of $18,000. Some thought it was purchased for William T. Walter, of Baltimore. Others averred that it was for the collection of Brayton Ives, of New York.

All this, despite the fact that Mr. Walters and Mr. Ives, I believe, disclaimed the purchase. The furore created over this matter by the press of the two cities may still live within the memory of a few of my readers. Some there were who believed neither Mr. Walters nor Mr. Ives. Upon the death of Mr. Walters, when general access was had to his magnificent art collection, it was ascertained that the vase was not in his possession.

As for Mr. Ives, he has a vase resembling the "Peachblow Vase," but Mr. Montague Marks, editor of the Art Amateur, is quoted by a prominent New York paper as saying:

"I have seen Mr. Ives' vase, and while it resembles the original 'Peachblow Vase' yet I can assert that it is not the same."

I carried the costly little object to Mr. Christopher as soon as it was placed in my hands. He hugged it to his heart, kissed it, wept over it and danced about the room like a schoolboy. He was in a perfect transport. Suddenly, however, he realized what was due me, and stopped short in a delirious pas seul to lay a hand on my shoulder and exclaim:

"My dear boy, take my daughter! She is yours!"

Simultaneously with the words came a patter of swiftly moving feet upon the floor, and an instant later the vase was snatched out of Mr. Christopher's hands. We turned quickly. Before us stood Inez, her form erect, her dark eyes flashing, and the passion of a deeply felt wrong expressed in her beautiful face. Above her head she held the vase.

"Inez!" exclaimed her father.

"And for this," she cried, "for this you would sell my happiness, you would barter me as you would a slave! Is this your affection for an only daughter? Who gave you the right to set a price upon my love? And, conceding that you have the right, is it not a mockery of everything a woman holds dear to make this pagan gew-gaw a full requisite for her love and life-long happiness?"

Before this impassioned outburst her father actually cringed. His meager frame contracted to its smallest dimension, he sunk on his knees and raised his trembling hands.

"Inez!" he implored; "Inez, my child!"

But Inez went on, relentlessly:

"And what of him who, out of love for me, has wrecked his fortune to buy for you this contemptible piece of pottery? Ah, father, father! You have wronged us both, and this is your punishment!"

Swift as a flash she cast the "Peachblow Vase" upon the floor with a force that broke it into a score of pieces, and then, like some avenging goddess, she stood above the wreck, spurning the fragments with her slippered foot. For a moment the old man was speechless and unable to move; then, with a shrill cry of sorrow, he dropped into a chair and covered his face with his hands.

Inez turned to me with tears trembling in her eyelashes.

"The punishment was terrible," she said in quivering tones, "and my hand and heart will requite you, perhaps, for the money you have lost. Though poor, we are rich in each other's love. We can work together; we will face the world side by side!"

My heart exulted. Inez was worthy a king's homage, and I had never known her better so well as I knew her at that moment. I was supremely happy, and there and then confessed my wealth and social position. She received the acknowledgment calmly.

"It is well," she said. "If I should punish you for the deceit, I should also reward you for your honesty of purpose. Where love is there is neither rank nor riches. It is neither to be bought with titles nor to be sold for gold."

With these words she gathered up the fragments of the vase and gave them into my hands.

"And now leave me," she added, gently. "I must be merciful, now that I have been just."

As I left the room she turned to minister to her father. Thus for the first time is revealed the mystery of the "Peachblow Vase."—New York News.

NEWS PHOTOGRAPHY

And Its Development as an Industry at the National Capital.

With the rise of the camera and the increasing desire of the people to see what they are reading about, a new and great industry has sprung up in the United States. The dimensions to which that part of the business which devotes itself to securing pictures of public men and events is marvelous. Ten years ago worse than poor wood cuts constituted the only means of placing before the reader an idea of the scene transpiring. As a faint motion of the change it may be remarked that at the White House, when the final ceremony of closing the war with Spain took place, no less than three leading photographers were present. More, to the scandal of Minister Cambon and his fellow officials, the whole matter was delayed some minutes because the men at the machines were unable to properly adjust their screens. It must not be understood that the President actually sat with a pen in his hand or that Cambon was held in the act of signing it to let the photographer catch up. But, nevertheless, the whole affair was delayed some time in order that the American people might see just what was happening.

It is a common thing nowadays for the big magazines and newspapers to send expert photographers to Washington for the express purpose of taking a series of snap shots of prominent United States Senators and Representatives and other celebrities of the National Capital. At the same time stand ard views of the public buildings, others of the President and the various Cabinet officers are taken to be kept in stock for use as future occasions may require. In fact, the library of a modern newspaper is supposed to contain a photograph of practically every man and woman of prominence in this country, Europe, Asia and Africa, as well as special pictures of foreign capitals and others representing special views of private life at home and abroad.

To a woman belonged the honor of being the pioneer in this work. Miss Frances Benjamin Johnson, of Washington, really began the business of developing photographs to such a state of perfection and completeness as to have them used in place of pen and ink sketches. Her pictures were first used in magazines as illustrations for descriptive stories about ten or twelve years ago, and since then she has steadily improved in her art until she is now recognized as probably the best amateur photographer of portraits and interior house views in Washington. Her skill is perfected to such a high degree that when but one photographer is to be present during an important government function she is usually selected.

RECENT INVENTIONS.

A carving knife sharpener and fork guard are combined in a Pennsylvanian's patent, the upper portion of the guard having two disks carried on spindles to rotate as the edge of the knife is drawn between them.

A folding step ladder has recently come into use in which the legs and step supports are hinged at the center to close up when not in use, allowing the ladder to be stored in about half the space of the old ladders.

In a new bicycle tire the resiliency is obtained by hollowing the face of the rim deeply and stretching a strip of fabric across the face, with a ring of rubber or other flexible material suspended in the center of the fabric.

A pneumatic axle bearing for vehicles has been patented to take the place of inflated tires on road wagons, being less liable to puncture, the weight being carried by pneumatic rings placed inside drums surrounding the axle.

The recoil of field cannon is decreased by a new German device, a horizontal rod being placed at the end of the trail, with a spur to be forced into the ground, a spiral spring surrounding the rod to break the force of the discharge.

Bewitches Lilian Bell.

Constantinople is enchanting. If I were a painter I would never leave off painting its delights and spreading its fascinations broadcast; and then I would take all the money I get for my pictures and spend it in the bazaars, and if I regretted my purchases I would barter them for others, because Constantinople is the beginning of the Orient, and if you remain long you become thoroughly metamorphosed, and you bargain, trade, exchange and haggle until you forget that you ever were a Christian. Yet the first effect of Constantinople upon me was to make me utterly despise it for its sickening dirt. We landed from the steamer at the dirtiest, smelliest quay, and the mud come up over our overshoes as we stood waiting for custom-house inspection. We were quite heated in temper when we found ourselves in an alley outside, filled with garbage which had been there forever, and learned that this alley was a street, and a very good one for Constantinople, too.—Woman's Home Companion.

A man doesn't truly and sincerely love his wife unless he will meet trains for three days when expecting her home, without complaining.

Playing amateur base ball before an audience of your acquaintances, causes you to be criticised as much as running for office.

PURE FOOD SCARCE.

NINETY PER CENT OF THE SUPPLY IS ADULTERATED.

Startling Revelations Brought Out by the Senate Investigating Committee—Enormous Amount of Fraudulent and Poisonous Products Produced.

If there is any pure food manufactured or sold in this country, the Senate Pure Food Investigating Committee, which took testimony in Chicago, did not come across it. The evidence in the hands of that committee tends to show that nearly all the commoner articles of food are adulterated by the manufacturers, and some of them with deleterious and dangerous substances. One of the witnesses, Dr. H. H. Wiley, chief chemist in the Department of Agriculture, went so far as to tell the committee that 90 per cent. of the liquid and solid foods consumed by the people of the United States are adulterated. And Dr. Wiley said this statement was based on his personal investigation. He had, so he told the committee, examined and tested almost every article of food and drink bought and sold in the country, and he explained to the investigators the results of his tests.

For instance, he found "pure" alcohol that had been made of menthol and wood sap; brandy that had been manufactured of burnt sugar and water; bread that had been made of potato flour, and even then adulterated with alum and sulphate of copper, substances dangerous to the health of the consumers of that sort of bread; cider made of tartaric acid and colored with caramel; candy made of glucose and artificial essences and colored with poisonous substances; canned goods which had been preserved with salts of copper; butter which had been manufactured from ordinary animal fats and starch, and in which there was an excess of salts; beer that had been made of burnt sugar, licorice, quassia and grains other than barley; cheese that had been made of oleomargarine, with salts of mercury in the rind; cocoa and chocolate that were compounded of sugar, animal fats, flour and starch and ferruginous earths; cayenne pepper that was made of ground rice and flour and salt and a sprinkling of red lead, flour that was made of alum and ground rice; cinnamon that was made of cassia and plain sawdust; ginger that was manufactured of mustard and tumeric; gin that was composed altogether of a mixture of water and sugar and alum and turpentine; honey in the comb that was made of glucose and cane sugar, with the comb molded of paraffin; lard that was made of starch and cottonseed oil and stearine, and containing alum and caustic lime; mustard that was compounded of flour and tumeric and chromate and sulphate of lead; artificial milk that was sold as "pure condensed milk" and made of burnt sugar, annotto and water; fruit jellies that were made of gelatine and apple parings and flavored with artificial essences; mace that was made of bread dust and venetian red; pickles put up in salts of copper and alum; fruit preserves that were made of the common pumpkin and colored with dangerous substances; sago made of potato starch; powdered sugar, the base of which was the dom, and which contained also salts of lead and tin, gypsum and marble dust; tea that was made of common leaves and treated with gypsum, china clay and soapstone; vinegar that was made of burnt sugar and sulphuric and hydrochloric acids; wines made of artificial alcohol and water and colored with aniline.

From the testimony of the witnesses before the committee it would seem that more time and ingenuity are expended in producing a counterfeit article than would be required to get nature to produce the real thing. The profit is in producing it in large quantity from waste substances. This is a sort of utilization of the by-product that the country cannot stand for any length of time without serious deterioration of the physical and mental strength of its people, and the status of these crimes and fit punishments for them will undoubtedly be fixed as a result of the report of this committee.

Many Adulterants Poisonous.

Many of the adulterations are of such a character as to injure the pocket of the consumer rather than the health. Commercial fraud, according to the testimony of the national and State government officials, is chiefly the result, but wholesale loss of life has occurred. In a report made by A. J. Wedderburn, a special agent of the Agricultural Department, he calls attention to many cases of death. The deleterious substances are usually used through ignorance, one case of record being that in which death resulted from the use of chrome yellow, not only to the customer, but also to the vender and the members of his family.

Coffee is perhaps the most extensively adulterated article. Consumers do not take the trouble to find out whether their coffee is genuine or not. Artificial coffee beans used to be manufactured with consummate care, but nowadays many producers do not attempt to imitate the beans except in color and size. Spurious coffee beans were formerly imported from Germany in large quantities and to some extent from France. But American manufacturers, realizing the profit to be made in the trade, entered the field and now make better imitations than any that are to be imported. Flour or almost any cereal is mixed with molasses and molded to resemble the bean and then roasted and colored. Sometimes chicory or burned sugar forms a part of the compound, which, although almost worthless, is not harmful when composed of such simple substances, but if mineral matter be added the product is often poisonous to some degree. A few years ago in France the Government seized a factory which employed sulphate of iron in its mixture.

Imitation coffee beans can be distinguished easily from the genuine by a careful examination. Molded as they are, the artificial beans present a uniformity of structure, which is entirely foreign to the real beans. Again, artificial coffee beans will nearly always sink when put in water, while genuine coffee floats. There are several simple and good tests for ground coffee. When a little of the coffee is taken and pressed between the fingers or squeezed in the paper in which it is bought, and it will not form a coherent mass, it is pretty sure to be genuine, but if the grains cake they are not coffee. Even chicory grains will stick to each other, for they are comparatively soft and open, and adhere without difficulty when squeezed. In water chicory and cereals will soften quickly like bread crumbs, while coffee will take a long time to soften; genuine coffee grains will float, as will the whole beans, but chicory or any other sweet root will soon sink. Chicory or caramel will cause a yellowish or brownish color to diffuse rapidly through the water, but pure coffee will not tint the water for a long time. Such tests are so simple that there appears little excuse for not trying them. Yet manufacturers sell to dealers tons of artificial coffee, which is accepted unquestioningly as the genuine article.

Spurious Stuff Is Possible.

Both manufacturers and retail grocers make enormous profits, for their fraudulent coffee can be made for as little as 3 or 4 cents a pound. Often the flour, crackers or cereals which enter into its composition are so badly damaged that they could be utilized in no other way. There is, besides, much huckstering in real coffees, and lower grades are frequently mixed with the higher. Thus Maracaibo and La Guayra coffees are mixed with Java and Mocha coffee and the mixture sold for pure Java or pure Mocha.

Cheap cream of tartar has been proved to be composed largely of tartaric acid and terra alba. This terra alba, or white earth, imported from the shores of the Mediterranean, has been used as a food adulterant to a fearful degree. It is, when pulverized, a white and almost impalpable powder, tasteless and looking like a fine starch. Its presence is frequently detected in powdered sugar, which may account for the fact that housekeepers do not find powdered sugar altogether satisfactory for cooking purposes. Pure cream of tartar will dissolve in hot water, but terra alba will not; therefore to test it put a teaspoonful into a tumbler of hot water, allow it to stand for a few moments, and then see whether there is any sediment. If the sediment is large, terra alba is probably present. If it does not dissolve, leaving the water clear, add a few drops of tincture of iodine to the water. If pure, the color will remain unchanged; but if starch is present the water will turn bright blue.

The usual adulterants of tea are "spent" or exhausted tea leaves, leaves of other plants like tea, sand and various materials used for coloring the leaves. Coloring is common and is called "facing." It generally consists in coating the leaves with powdered soapstone, with lead, or plumbago. If they are to be black, or with the powdered soapstone with indigo or Prussian blue if they are to be green. Often the facing adds materially to the weight of the tea. In England the use of exhausted leaves is much larger than it is in this country. Spent leaves are bought up from hotels and coffee-houses at merely nominal prices, and are dried and faced before being re-sold. They are easily detected by their frayed and irregular appearance and by the small proportion of soluble matter remaining in them.

The substitution of other leaves for those of the tea plant is also more common in England than in the United States. Yet even in this country it is well known that foreign leaves can easily be detected by spreading out a few of the leaves from the bottom of the teapot. The lanceolate, spear-head-like shape of the tea leaf, together with its serrated margin, distinguishes it from that of any plant used to counterfeit it. As a rule facings can be detected only by chemical tests. Green teas are oftener adulterated than black teas. Tea is often colored, and if the decoction made by the housekeeper becomes highly colored after being boiled a few minutes adulteration may be suspected.

List Practically Unlimited.

The list of articles adulterated and their adulterations is practically unlimited, as was stated by Prof. Wiley in his testimony before the Congressional Committee. The adulteration of coffee and tea will serve as types. It is stated that most of the spices sold are wholly fraudulent, as are most of the jellies. Perhaps half of the alcoholic liquors are prepared from neutral spirits doctored and colored to have the taste and appearance of the liquor demanded by the consumer. A type of this adulteration is the recipe given for "pure country cider." It is: To each gallon of water add one-half pound of granulated sugar, acidulate with tartaric acid, and flavor with oil of apple, previously put in alcohol, color with caramel, and to twenty gallons of the mixture add two gallons of genuine country cider.

Frequent cases have been reported of late years of sickness arising from the use of canned meats. The cause seems mainly to have been improper methods of canning, or the use of meat that was tainted before being canned. According to A. J. Wedderburn, of the United States Department of Agriculture, but little risk will be run by the purchaser who carefully examines the outside of the cans which he buys. The heads of the cans should be slightly concave, which shows that they were not when sealed. If the heads are convex it shows that decomposition has commenced in the can.

The total value of the food supply of the United States has been estimated at $5,000,000,000. According to Dr. Wiley's estimate, 90 per cent. of this is adulterated, or $4,500,000,000. According to the American Grocer's figures, which are the most favorable, not more than 10 per cent. of the adulteration is harmful or injurious to the health. Taking these statements, the result shows that there is $450,000,000 worth of poisonous food products put annually on the country and $4,050,000,000 of fraudulent products.

SOME EXAMPLES OF FOOD ADULTERATION.

Very Busy.

May and Edith are sisters, 4 and 5 years old respectively. May had been very naughty, and mamma had taken her over her knee to administer corporal punishment, when Edith suddenly pushed the door ajar and peeped in. Turning her chubby face as far round toward her sister as her peculiar position would admit, May said very gravely:

"Go out, Edie; don't you see I'm busy?"

It is needless to add that mamma granted a respite.

The great naval celebrity was on his way to the safe-deposit vaults with several installments of prize-money. "Hello!" exclaimed an intimate friend; "what have you there?" "These," replied the celebrity, "are the 'fortunes of war' that you read so much about."—Washington Star.

Practical people should quit referring to a woman's husband as her "choice." There are too many cases where he was not a choice, but a necessity.

PRACTICE READING ALOUD

Next to the Writer of a Great Thought Is He Who Reads It Well.

"It will surprise every girl who has not already grown to a realization of her shortcomings in this direction to hear how little of the author's thoughts she brings out when she reads aloud," writes Katherine Junkerman, giving instructions on "The Cultivation of the Speaking Voice" in the Woman's Home Companion. "The monotony of her voice will surprise her, too, and her throat will grow tired. She will stumble or hesitate at unfamiliar words even though she knows their meaning thoroughly, just as one who reads music readily will misplay it from lack of practice. Of course, you think you understand about what you are reading, but when you read aloud you must not only do this; you must make it clear to the listeners. The eye can travel more rapidly than the voice, so that it is easy to read a few words ahead and get the meaning before the voice needs to take up the words. By doing this, continuity of expression is insured, consequently continuity of thought on the part of the reader is possible.

"It is a very rare thing to hear a good conversationalist who does not read well, and they are the first to acknowledge the help their reading has afforded them. In reading aloud new words are brought to us, and we familiarize ourselves with them and also with the mechanism of pronouncing them, so that the risk in using them when we talk is small. In reading graces of expression and new arrangements of words come to our notice, and we can acquire them; depth and versatility of thought grow to be ours by assimilating the thought of others, and that most desirable thing of all, a large vocabulary, also becomes ours. What girl has not stumbled and blundered vocally seeking an apt word to express her thought? And who among us has not listened to the extravagant 'How perfectly lovely!' applied to all sorts of things, from the newest in shirt waists to a snow-capped peak of the Rockies? If girls read aloud more they would acquire a better idea of the value of words, and use them more appropriately."

BITS FOR BOOKWORMS

"Heroes of the Middle West," by Mary Hartwell Catherwood, is full of romance and power.

It is said that the sales of "David Harum," by the late Edward Noyes Westcott, are averaging nearly 1,500 a day.

Eden Phillpotts, author of "The Children of the Mist," has brought out a very successful comedietta called "A Golden Wedding."

"Each Life Unfulfilled" is the title of a novel by Anna Chapin Ray, a graduate of Smith College, and the author of "Teddy, Her Book."

Dean Farrar has written a book which he entitles "Texts Explained," and describes as helps to the understanding of the New Testament.

"The Rejuvenation of Miss Semaphore" is an absurdly funny story by a writer calling herself "Hal Godfrey." It deals with quack advertisements.

"A Double Thread" is the title of a new novel by Ellen Thorneycroft Fowler, author of "Concerning Isabel Carnaby," which is to be published shortly.

Lord Charles Beresford's book is to have the title "The Break-Up of China." This might seem, at the first glance, to make against Lord Charles' policy for keeping China intact. What he refers to, however, is the process of division which has been threatening China.

Miss Braddon is still, at the age of 62, as industrious as ever, and a new novel, "The Infidel," which has been promised for publication soon, makes it sure that 1899 will not go by without a novel from her pen. Since 1862, when she began to publish in book form, she has skipped only two years, and the total number of her novels since she wrote "The Trail of the Serpent," in 1860, comes to fifty-six, including the book almost finished.

A book of the musical memories of Sir Arthur Sullivan will be published during the early summer. It is being written by Arthur H. Lawrence under the authority of Sir Arthur Sullivan. Naturally, we may expect the volume to give us, more or less, a history of the Gilbert Sullivan operas. But it will also be a general picture of the English musical world of our own day. Sir Arthur Sullivan has known all the notable figures associated with modern English music.

Russia's Candle Consumption.

Russia uses more candles than any other country, 60,000,000 pounds a year being the estimate. A large part of these are made in houses instead of at large factories.

We will wager that an investigation will prove that the business men who have made a success in life were generously spanked when they were young. A mother's darling has the worst sort of a handicap to overcome.

The average poor man is not more firmly convinced of anything than that one has to be mean and dishonest in order to get rich. There never was a greater mistake.

An honest man is one who admits that his baldness is due to old age, and not to sickness.

INYO INDEPENDENT.

IRV. H. MULHOLLAND.

ISSUED EVERY FRIDAY.

INDEPENDENCE, CAL.,

FRIDAY, AUGUST 4 1899

When applying for a patent to a mining location, the application must contain a copy of the plat; certified copies of all location notices, original and amended, upon which the order of survey was based and under which claimant asserts title; proof of posting on the claim the notice of intention to apply for a patent, and copy of the plat; proof of citizenship of the claimant; agreement of the publisher of the newspaper published nearest to the claim, designated by the Register as the one in which publication is to be made; proof that annual labor has been performed, showing the location to be valid and subsisting at the time the application is made; abstract of title or proof of possessory rights where there is no record title; where the land is borne on the tract book as agricultural, proof of its mineral character. The application for patent and accompanying instruments are filed by the Register upon the payment of his fees ($10), if the land is clear on the tract books. If the land applied for appears on these books to be wholly or in part covered by a previous entry, a homestead filing, or a prior pending application for a mineral patent, or is included in some antecedent reservation or executive withdrawal, the Register will decline to receive and file the papers until the obstacle is removed. The proceedings to obtain patents in lode mining claims are generally applicable to placer locations.

The up-the-river oil fields while hardly yet even prospected show signs of being existent, if the now generally accepted theory that oil is the product of animal matter is correct. To begin with, there is oil there as a couple of auger holes show. Besides, lying to the west and north are great stretches of country the soil of which was once an ocean bed and apparently a favorite graveyard for the life that the ocean sustains. Shark teeth, whale bones, shells of mollusks and bivalves abound, to say nothing of the fossil remains of lamellibranchiata, branchiopoda, gasteropoda, cephalopoda, injusoria, and diatoms. Surely from whole townships in breadth and hundreds of feet in depth of such deposits much grease must have run out and collected in the lower porous and retentive strata.—*Bakersfield Californian.*

Managers of copper mines throughout America report that their product is absorbed as rapidly as it can be produced and that, indeed, a still larger production would be taken. London buyers have been withholding their orders, evidently believing that the copper market was being bolstered by the Amalgamated Copper Company, but finding that there is no surplus being created, have commenced to place orders for future delivery, which may result in sending the price up a notch or two. Tin is much higher than copper, though in the United States 12,000 tons of copper is consumed monthly as against 2000 tons of tin, which demonstrates that—as everyone knows—tin is scarcer.

Labor on railroad work and in harvesting crops, etc., is still reported very scarce in this State. The Southern Pacific Co. say that their construction work is delayed because of inability to get laborers. As long as corporations hunt alleged "cheap" labor this is what they might expect. Were the companies to make life endurable for them a better class of men and work could be had, to the ultimate benefit of the roads and all else. A railroad into a new country should bring in laborers who would stay there and develop it.

There seems to be an epidemic of mobs at the South, and when we come to look at the situation, what is to be expected? The North knows that the people there would not stand the work of the criminal classes of negroes, and that they would rise up and kill. In the face of all this experience we are taking in some millions more of the inferior races. The white race ought to stop and see if they are capable of self government before taking in too many million of such races.

Death Valley is in Inyo county and Salton Basin is in Riverside county, Cal. Both are below the level of the sea. The floors of each are occupied by salt marsh, and the thermometer frequently rises above 125° F. in the shade. At Salton men live all year round and collect the salt. The air is absolutely dry. In a humid atmosphere few human beings could endure such a temperature.—*S. F. Scientific Press.*

While great prosperity is being claimed as the result of Republican financial measures, there are more men on strikes in more places and for more causes than ever before known. Of course there have been good crops and the markets of the world bring us good prices, but there is dissatisfaction and strife.

Sir Thomas Lipton has chartered a 8,000-ton steamship and intends to invite 600 of his friends to see the Shamrock and Columbia sail for the cup. The little spree will cost the rollicking Irishman not less than $2,500 per day.

Dewey has begun suit in the District Court of the District of Columbia to recover the prize money due him and his crew for the capture of the Spanish fleet at Manila. The sum involved is $300,000.

The Supreme Court of Colorado has unanimously declared the eight-hour law unconstitutional.

A miner was recently killed in a Shasta county mine as a result of tamping a hole with an iron bar. The State of Colorado makes it a misdemeanor to use a metal bar for this purpose, and every mining State should enact a similar law. High explosives do not require hard tamping, and a wooden stick is much safer and fully as satisfactory for tamping holes. It is even unnecessary to strike it with a hammer. The tamping should be pressed in, not pounded in.

It is said that within the next three months United States postal money orders will be accompanied by a receipt to the sender, to be kept as proof of its sending in case of a dispute as to payment on its loss, etc. The giving of such receipts has heretofore caused Wells, Fargo & Co.'s money orders to be preferred to postal money orders in many cases, an advantage the new departure will do away with.

The California State Fair at Sacramento will be held from Sept. 4th to Sept. 16th, inclusive. The management is sparing no effort to make it a success. The various departments will be of interest to all visitors. In the two weeks' racing $40,000 will be competed for; the mechanical display will be of unusual merit, and the daily celebrations by the various organizations will be a feature that cannot fail to be of interest.

The Eldorado Oil Company has leased lands to two different operators, each of whom agrees to bore 36,000 feet the first year. At the end of that time the operators are at liberty to quit or do as much during each of the following two years. Here is the prospect of holes in the ground, the combined depth of which amount to nearly forty-one miles.—*Bakersfield Californian.*

John Hays Hammond expresses the opinion that mining can be done at a depth of ten thousand feet with our present appliances, and that this limit can be extended still further with probable improvements in machinery. The eminent engineer does not state whether, at that depth, there exists any metal worth mining out, but the omission may be excusable.

The Philipine business is costly, in addition to the $20,000,000 paid for the old brick. A transport has sailed with $1,300,000 on board. Besides the insensate sacrifice of life "expansion" has cost over $200,000,000 so far, with the bringing of the end nowhere near in sight. In the long run it may be seen that in a financial sense Spain is the victor.

The seventy-five miles of grading for the Wyoming Southern Railroad, from Orl Steele, Wyoming, to the copper districts in Northern Colorado, is expected to be supplemented by tracklaying in September, and later the road is to be continued through to Salt Lake, to connect there with the Short Line now being built to Los Angeles.

Eastern stock journals say that the raising of horses has become more profitable than the raising of cattle. It is difficult to see upon what data this statement is based, but certain it is that the price of good heavy horses has been advancing by leaps and bounds during the last few months.

The Hawaiian Islands are United States territory. The Philippine Islands are not. A sealed letter can be sent from the U. S. to the Philippine Islands for 2 cents; the same missive to the Hawaiian Islands costs 5 cents.

The new law says that woman who refuse to tell their age to the census marshals shall, on conviction, be fined $100, as shall all other persons who refuse to answer questions or make false statements.

The Government has reduced refining charges on gold bullion, and Selby has made a similar cut, the charge now being four cents per ounce instead of six, as formerly, on bullion 700 fine and over.

It is stated for a fact that it is the intention of the Cœur d'Alenes mining companies to stamp out unionism in that section. No man who affiliates with the union can get employment.

Lloyd Tevis, the multi-millionaire, died in San Francisco last week. He was identified with many heavy financial enterprises and deservedly escaped the clamor of envy.

The President is wisely clearing his political household of the Alger taint, to his credit. But the smell of army beef remains to be disseminated by Congress. Army whitewash won't apply there.

Robert G. Ingersoll, the great agnostic, now knows more about the Beyond than he did, or else knows nothing. His brilliant life-light has gone out.

THE POOR SALESMAN.

One of the Ways He Is Tortured by Exacting Shoppers.

On the shelves of nearly every dry goods store in the city are rolls of goods which have been hauled off the shelves from one to a dozen times a day to be exhibited to possible purchasers. The exacting shoppers have become firmly convinced that such exhibitions of the open ends of rolls cause them to become shopworn. The result is they ask the clerk to cut their order from the inside end. This means the unrolling of the entire bolt for a possible three-quarter yard purchase, but it has to be done.

A fashionably dressed woman stepped into one of the Nicollet avenue stores the other day and asked to be shown some ginghams. On the shelves was a brand new stock of ginghams which had just the night before been taken from the boxes in which they were shipped from the factory. They hadn't been shown to any one except possibly the buyers down east, and then these particular pieces had not been exhibited. Bolt after bolt was shown to the shopper, and finally she picked upon a particularly nice new piece of pink gingham at 20 cents a yard.

"It looks a little shopworn," she remarked as she began to fumble with her purse catch.

"It can't be," replied the obliging clerk. "It just last night came out of the box from which it came from the factory."

"Well, I'd prefer it if you would cut it from the other end."

The clerk groaned inwardly, but proceeded to unroll the 30 or 40 yards of gingham.

"How much?" he asked as he took his scissors from his vest pocket.

"Two yards."

His scissors snapped viciously as they clipped off the goods, and the tone in which he called the cashboy was not of the gentlest, but the shopper, at least, was satisfied.—Minneapolis Journal.

THEY ALL GOT IN.

How the Animals Managed to Get Admitted to the Show.

It appears that one idle day the frog, the duck, the lamb and the skunk started forth together to visit the show. Just what sort of show it was the chronicler doesn't state. Anyway, it was something that the queerly assorted quartet was anxious to attend, and they hopped and waddled and gamboled and trotted toward the big canvas inclosure with delightful throbs of anticipation.

Finally they reached the doortender, the frog leading the line.

Well, the frog had a greenback and passed right in.

The duck had a bill and followed the frog.

The lamb had four quarters and followed the frog and the duck.

But the unfortunate skunk was left on the outside. He had only a scent, and that was bad. Naturally he turned away, feeling pretty blue. As he was slowly going back over the hill he met a hoop snake rolling along at a lively rate toward the show. The skunk greeted him, but the snake did not stop.

"Don't interrupt me," he cried over his shoulder. "I've got to do a turn, and I'm a little late," and he rolled along.

At the top of the hill the skunk noticed another old friend approaching. It was the sardine.

"Hello!" cried the sardine. "What's the matter?"

So the skunk told him.

"I can guess how you feel about it," said the sardine sympathetically. "I belong to the smelt family myself. But, say, old fellow, you come right back and go in with me—I've got a box."

And the skunk and the sardine went back together.—Cleveland Plain Dealer.

A Queer Ohio River Fish.

Not many persons know what a spoonbill is, but all those who do know that every spring this fish is the especial prey of Shippingport fishermen, who catch them in great numbers below the falls.

The spoonbill is probably the largest fish that swims the Ohio river. He is anywhere from a foot long to six feet, but also half of him is bill. The bill is spoon shaped, but is a single one. The lower lip is short, the bill being used much like a spade. The spoonbill has no scales, but is covered with a tough hide. Altogether he is an uncanny object and far from a delicacy in appearance. He is also called by some "shovelnose cat."

Every spring spoonbills in schools visit the falls of the Ohio. It is a tradition that they come up all the way from the gulf of Mexico every spring to spawn at the falls, but more credit is given the theory that they live scattered in the river right along and only congregate in the spawning season.—Louisville Courier-Journal.

Too Honest to Ever Grow Rich.

Emerson keeps a grocery store on Grand avenue, opposite the limekilns, west of Western avenue. As all his customers are either Greeks or Italians, he keeps a stock on hand somewhat different from other grocers.

One day a drummer strayed into the store. Emerson was waiting on an Italian woman, while her 4-year-old son was stealing sugar out of a barrel.

Eggs were 18 cents a dozen. The woman wanted only one egg. The solitary prospective chicken was wrapped up.

"Two cents, please," said Emerson. She paid and received a small slip of yellow paper.

"What was that slip you gave her?" asked the drummer, after she left.

"H'm, you see, eggs are 18 cents a dozen. That makes 1½ cents for each egg. The woman would not pay a half cent too much, and, as I did not want to sell the egg for 1 cent, she paid 2 cents and I gave her the slip good for one-half cent. Thus she will get the next egg for 1 cent if she brings the slip."—Chicago Journal.

Vehicular Persiflage.

"Is your new clerk automobile or a perambulator?"

"I don't understand you."

"You're dull. An automobile is full of push and a perambulator has to be pushed."—Detroit Free Press.

Deafness is more common in cold countries than in warm climates, the ear being very sensitive to atmospheric changes.

The Bank of England will not take small sums. It requires private depositors to maintain a balance of £600.

OFFICIAL.

Notice of Forfeiture

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and JOHN SULLIVAN:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining District, County of Inyo, State of California, commonly known, called and recorded in the mining records of said County as the Black Rock mine, as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said Section 2324 of the Revised Statutes of the United States, and under section One of an Act entitled "An Act relating to the working, rights of way easements and drainage of mines in the State of California," approved March 21, 1891.

FRANK HARRIS.

Dated January 12, 1899.

Probate Notice.

ORDER TO SHOW CAUSE

Why Order of Sale of Real Estate Should not be Made.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

IN the Matter of the Estate of Jedediah S. Collins deceased.

A. O. Collins, the administrator of the estate of Jedediah S. Collins deceased, having filed his petition herein, duly verified, praying for an order of sale of all the real estate of said deceased, for the purposes therein set forth.

It is therefore ordered by the Judge of said Court, that all persons interested in the estate of said deceased appear before the said Superior Court on SATURDAY, the 19th day of July, 1899, at 10 o'clock a. m. of said day, at the court room of said Superior Court, at the town of Independence, in the said county of Inyo, State of California, to show cause why an order should not be granted to the said Administrator to sell so much of the real estate of the said deceased at private sale as shall be necessary.

And that a copy of this order be published at least once a week for four consecutive weeks in the INYO INDEPENDENT, a newspaper printed and published in said Inyo County.

WALTER A. LAMAR.
Judge of said Superior Court

Dated June 17th, 1899.
P. H. MACK, Attorney for Administrator.

Probate Notice.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA

In the matter of the estate of Luther Clarke, deceased.

It appearing to this Court, by the petition presented this day and filed by J. C. Irwin, the Administrator of the estate of Luther Clarke, deceased, praying for an order of sale of the mining property and interests of said estate, and that it is to the best interests of said estate that said mining property should be sold.

It is therefore ordered by the Court that all persons interested appear before this Court on the 19th day of June, A. D. 1899, at the hour of 10 o'clock a. m. of said day, at the Court-room of said Court, at the court house, in the town of Independence, County of Inyo, State of California, to show cause why an order should not be granted to said administrator to sell all of said mining property. It is further ordered that a copy of this order be published for four successive weeks in the Inyo Independent, a weekly newspaper printed and published in said Inyo County.

Dated May 12, 1899.

WALTER A. LAMAR,
Judge of said Superior Court.

Notice of Forfeiture.

STATE OF CALIFORNIA, } ss
COUNTY OF INYO. }

To FRANK COLE and GUS. LESSING:

You are hereby notified that I have expended One Hundred (100) Dollars in labor and improvements upon that certain quartz mine or mining claim situate, lying and being in the South Park Mining district, County of Inyo, State of California, called and recorded in the mining records of said county, as the "Green Mine," as will appear from certificate filed in the office of the County Recorder of said Inyo County, in order to hold said premises for the year 1898, under the provisions of section 2324 of the Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after the publication of this notice you fail or refuse to contribute your proportion of such expenditures as co-owners, to wit, the sum of thirty three dollars and thirty-three cents each, your interests in said claim will become the property of the subscriber under said section 2324 of the Revised Statutes of the United States and under section One of an Act entitled "An Act relating to the working rights of way, easements and drainage of mines in the State of California, approved March 21, 1891.

FRANK HARRIS

Dated January 12, 1899.

DESERT LAND, FINAL PROOF.

LAND OFFICE AT INDEPENDENCE, CAL.,
June 5, 1899.

Notice is hereby given that Laura Mitchell of Independence, Inyo Co. Cal., has filed notice of intention to make proof on her desert land claim No. 800, for the N ½ SE ¼ sec. 23, Tp 14 S., R 35 E. M D M, before the Register and Receiver at Independence Cal., on Saturday, the 15th day of July, 1899.

He names the following witnesses to prove the complete irrigation and reclamation of said land: John C. Willett of Citrus, Cal., Joseph Vaughn of Citrus Cal., Michael McSweeney and William H. Mitchell, both of Independence, Cal.

S. W. AUSTIN, Register.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

Anna M. Mates, Plaintiff, vs. Charles H. Mates Defendant.

ALIAS SUMMONS.

ACTION brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo, P. H. Mack, Independence, California, Attorney for Plaintiff.

You are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California, within ten days after the service on you of this Summons—if served within this county, or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or she will apply to the Court for any other relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California this Fourth day of May, A. D. 1899.

D. J. HESSION,
Clerk.

[SEAL] P. H. Mack Independence Cal. Attorney for plaintiff.

TO LAKE TAHOE

A TRIP OF RARE INTEREST.

Passengers on west-bound overland trains of Central Pacific Railroad are respectfully notified that during the excursion season, commencing May 1st and closing October 1st, a delightful trip to LAKE TAHOE can be enjoyed (losing but one day in their journey) by taking the Express train of the Virginia & Truckee Railroad, leaving Reno at 7:30 a m, arriving at Carson City at 8:25 a m, where well-equipped stages leave promptly for Glenbrook, Lake Tahoe, connecting with Lake Tahoe steamer for Tahoe City, there connecting with Moody & Co.'s stages for Truckee, arriving same evening, where connection is made with west-bound passenger train of Central Pacific Railroad. Through tickets, Reno to Truckee, by above route, for sale at Ticket Office, Reno, $5.00. East-bound passengers can leave Truckee early in the morning (Through Tickets for sale at Stage Office in Truckee) make the trip over the above described route, arriving at Reno same evening.

VIRGINIA CITY & THE COMSTOCK

Passengers may also take train mentioned at Reno for Virginia City, 52 miles, where an entire day may be pleasantly and profitably spent examining the famous Comstock Mines (now being worked to a perpendicular depth of 3,16 feet) with their massive hoisting and pumping machinery. Returning, see Time Table above Round Trip Tickets for sale at Ticket Office Reno.

SUPERIOR COURT PROCEEDINGS.

Hon. Walter A. Lamar, Judge.

WEDNESDAY, August 2, 1899.

People vs Hung Yung—Defendant sentenced to imprisonment in the County Jail for the term of five months.

Methodist Church.

Services for Sunday, July 23th, 1899. Sunday: Lone Pine—Sermon at 11 a. m. by the pastor.

Georges Creek—Sunday-school at 1:30 p. m.; preaching at 2:30 p. m.

Independence, preaching at 7:30 p. m.

The Sunday-schools will meet at the regular hours.

All are most cordially invited to attend these meetings.

JOHN J. PARDEE, Pastor.

Real Estate Transfers.

The following deeds have been recorded since July 28, 1899:

James Sinnamon to W. H. Wells, July 26, 1899—200 acres of land in Sections 5 and 32, Twp 6 S, Range 31 E.; $1000.

W. T. Grant and George McConnell to Charles H. Schen, July 22, 1899—Copper Prince mine and Navajo Springs, Ubehebe District; $5.

Anglers in the mountains have, it is gravely averred, exhausted the town's supply of canned fish.

Viewed from the valley the Sierra snow deposits are nearly out of sight, as it were, while water of the creeks is perceptibly diminishing.

The fence around the Independence school house stands in sore need of several coats of paint. Likewise, the front fence of the Court House yard.

Miss Laura B. Adams, a member of the Holiness Band which was in this section a couple of years or so ago, was married July 12th at Flagstaff, Arizona, to Mr. Claude C. Emmerton.

As a general thing the late fruit crop is better than for the past two or three years. An insect blight of some kind has appeared upon some of the grape vines in and around Lone Pine.

Returning "Outers" this year should remember that fish stories are not accepted unless accompanied by an illustration, taken by camera on the spot—not necessarily for publication, but as a guarantee of good faith.

Water in Owens River has recently been high, notwithstanding the volume borne by the irrigating canals and ditches. A feature of the bottom lands is a surprising growth of black willow trees, in places forming pleasant vistas where a very few years ago scenes were distressingly different.

As is noted in advertising columns this week the Twelfth Annual District Fair will be held at Big Pine, with a big "P." The managers are evidently sparing no effort tending to make it a complete success. Everybody should figure on attending, and make arrangements for the exhibition of the best products they have, from the shop, field and farm.

In locating a mining claim first make a discovery, then define the boundaries of the claim by setting a stake or building a monument of rocks at each corner and at the center of each end of the claim. Post a notice at the discovery, stating when discovered, by whom, the amount of ground claimed along the lode in either direction from the stake. The development of the claim may then be proceeded with, but not necessarily at the point of discovery.

Two members of the State Board of Equalization and the Secretary were in Independence last Sunday, but as the gentlemen left no cards we are unable to give their distinguished names with any very great exactitude. They took a casual glance at the county assessment roll without vouchsafing comment. The party was accompanied by Messrs. Laws and Mills of the Carson & Colorado, and their business was in connection with fixing upon the value of the railroad for purposes of taxation.

When the Inyo copper zone—extending from Eagle Valley on the north through the Ubehebe Mountains south and east to the Telescope Range—becomes known to the mining world, the new era will have reached this county. Copper is a prime factor of all electrical operations. With it the transmission of power is limited only by the natural energy of mountain streams. The waterfalls of the east side of the Sierras can be harnessed and utilized for mining purposes without the least detriment to future irrigation works.

Virgil A Gregg Dead.

The death of V. A. Gregg, ex-Superior Judge of San Luis Obispo, is announced as having occured at that place July 25th. He possessed large landed properties in San Luis Obispo and was President of the County Bank. He will be remembered by all Inyo residents of 1871 to '76, although we believe he was here before that time and taught school in Milton and Union Districts, his family having joined him here at independence later. During his law practice here he held several positions, but we think was not directly employed in the San Filipe-Union (Cerro Gordo) litigation mentioned in the following biographical sketch in the San Francisco *Chronicle*: "Judge V. A. Gregg of San Luis Obispo, who in 1894 was a candidate for Supreme Court Justice (short term) was born in Burlington, Iowa, March 29, 1844. He was educated in the public schools of his native city, but his school term was broken up by his enlistment in the Twenty-fifth Iowa Volunteer Infantry, in which regiment he served for three years in the campaigns around Vicksburg. He afterward took the law course in the University of Michigan in the class of 1867-68, and obtained the college degree of A. M. from the Iowa Wesleyan University. In 1871 Judge Gregg came to California. [He was in Inyo county before that, soon after close of the war.—ED.] He had been a resident of this State ever since, the last sixteen years being passed in San Luis Obispo. He was a member of the Constitutional Convention that formulated the present State Constitution. As an attorney Judge Gregg took part in the litigation involving the Cerro Gordo mines of Inyo county, and the water litigation of Kern county. He served as Superior Judge of San Luis Obispo for many years. During his term on the bench Judge Gregg was selected by the litigants to try the great water-case of the Laguna Ditache grant of 48,000 acres along Kings river against the Fresno Canal Company. Both sides of the case were conducted by leading attorneys of the State. The case involved nearly all the water appropriations of Fresno county against the Laguna Ditache grant as a riparian owner."

Death of A D Gilbert

Sunday morning last A. D. Gilbert was found dead in his bed, he having passed away some time during the preceding night alone and unbeknown to anyone. Although he has been in ill-health for several months he was around as usual all the day and evening before. At an inquest held by Justice A. V. Davidson acting as Coroner, the jury found that the deceased had come to his death through natural causes. He was a native of Kentucky, about seventy-three years of age. He leaves two brothers residing in Tulare county, we believe, who have been notified. The writer knew A. D. Gilbert over thirty years ago in Virginia and Gold Hill, Nevada, where he was an all-round business rustler. He was the defendant and appellant in the noted local water suit of Baxter et al vs Gilbert et al., now submitted and pending decision in the State Supreme Court.

Scientists find the name "Indian" unsatisfactory as a term to designate the aboriginal inhabitants of America. "Amarind" is proposed as a substitute. This word is intended to include all the original tribes of the continent and the adjacent islands, and also the Esquimaux. It is believed that "Amarind" will immediately be adopted by the scientific world, although it may be a long time before it becomes popular. Well, we'll have to see about that. When Jim Powers of Deep Springs, Cæsar of Saline Valley and Panamint Tom of the Telescope Range have been consulted it will be time enough to say that the matter is settled.

The rapid recession of Owens Lake from surrounding lands is most observable on the east side. The old Cartago wharf, which in the early '70s stood in eight to ten feet of water, is now about two miles from the present shore. As if in compensation the level stretches are turning into beautiful meadows wherever the streams or numerous fresh water springs flow over it. It seems that if, according to Prof. J. D. Whitney, the soil once under Tulare lake is unfit for agricultural purposes, the former bed of our great soda lake is different, at least as to the support of trees and yield of the best varieties of wild hay.

Miss Frieda Rhine entertained her many little girl friends on her birthday Thursday afternoon. A neat little card had been sent to them some time before and the little folks were all on the qui vive for a good time, and they seemed not to have been disappointed. Plenty of ice cream, cakes, candy, oranges and bananas, etc., and with the able assistance of some of the older girls the little ones enjoyed the treat. Dr. Blair, who never fails to make fun for the little folks, helped to make lots of sport. One and all pronounced it a splendid time and altogether the affair was a grand success.

A farmer tells an exchange that he has made a discovery that will be of vast importance to the farmers during a dry season. He has found that by planting onion and potatoes in the same field in alternate rows, the onions become so strong that they bring tears to the eyes of the potatoes in such vast volumes that the roots of the vine are kept moist and a big crop raised in spite of a drought. The same farmer has a scheme for raising custard pies by crossing the egg plant with the milk weed.

The effect of oil on sand has been demonstrated at Mojave, where not long ago a half carload of oil was accidentally spilled. Acting on the hint, the S. P. will oil the whole depot grounds there.

The war-correspondents at Manila, who are liable to raise Gen. Otis out of a job for his impolitic censorship of the press, should be tried for Treason.

LEGAL.

SUMMONS.

IN THE SUPERIOR COURT OF THE COUNTY OF INYO, STATE OF CALIFORNIA.

NEIL C. PALMER, - - - Plaintiff,
vs.
MARY A. PALMER, - - Defendant.

Action brought in the Superior Court of the County of Inyo, State of California, and the Complaint filed in the office of the Clerk of said County of Inyo. P. H. Mack, Attorney for Plaintiff.

THE People of the State of California send Greeting to Mary A. Palmer Defendant

You are hereby directed to appear, and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the County of Inyo, State of California within ten days after the service on you of this summons—if served within this County; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Inyo, State of California, this 18th day of July, A. D. 1899.

D. J. HESSION,
Clerk.

Notice of Forfeiture.

TO CHARLES MCKINNON and HARRY M. WISEMAN.

You are hereby notified that I have expended $100 in labor and improvements upon the Scotchman Lode situated in the South Park Mining District, Inyo County, California. As will appear by certificate filed January 2nd, 1899, in the office of the Recorder of the said County in order to hold said premises under the Provision of Sec. 2324 Revised Statutes of the United States, being the amount required to hold the same for the year ending December 31st, 1898. And if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as a co-owner, your interest in said claim will become the property of the subscriber, under Sec. 2324.

Dated March 3, 1899. F. J. GINSER.

PIONEER STABLES,

BISHOP, INYO COUNTY, CALIF.

JOHN B. CLARKE, PROPRIETOR.

THE PUBLIC WILL PLEASE TAKE NOTICE that I am established in the Feed and Livery Business at Bishop, and am fully prepared to furnish Teams and Rigs of any kind desired to and from all parts of Owens Valley.

CONFESSION OF A MILLIONAIRE.

A millionaire confessed the secret of his success in two words—hard work. He put in the best part of his life ga ning dollars and los ng health, and now he was putting in the other half spending dollars to get it back. Nothing equals Hostetter's Stomach Bitters for restoring health. It cures dyspepsia and indigestion.

It is not the men who pay for the tele phones who use them most.

SHAKE INTO YOUR SHOES

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, nervous feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight or new shoes feel easy. It is a certain cure for Ingrowing Nails, sweating, callous and hot, tired, aching feet. We have over 30,000 testimonials. Try it *to-day*. Sold by all druggists and shoe stores. By mail for 25c. in stamps. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

It never gets over seeming remarkable what a big circulation a vast amount of bad literature has.

Do Not Suffer!

Suffering is unnecessary. Cascarets Candy Cathartic kill disease germs, clean out the body, remove the first causes of suffering. All druggists, 10c, 25c, 50c.

It is some consolation to know that no one has real good friends without some enemies.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

She Was Too Mad to Speak.

The Washington woman came across some excellent tea in England—tea the like of which she had never known before. She knew there was none of it to be had in America, so she bought pounds and pounds of it to bring home with her. She didn't mean to pay duty on it, for she felt that no really patriotic American can consistently pay a tea tax after what our ancestors did in Boston harbor, so she made herself a petticoat, and into the lining thereof she quilted the tea. When the steamer drew into port, she put on the garment. To wear it was martyrdom. It seemed to weigh a ton. She could scarcely walk in it, and the hang of her new going ashore gown was utterly ruined by it, but the custom house officials let her pass without suspicion. She went directly to the railway station and started for Washington. The journey will live long in her memory for its discomfort. Her husband met her at the station. He marked her pale, worn look. As they stepped into the carriage she told him the story.

"I wasn't going to let them get ahead of me," she said proudly. "Wasn't it a lovely idea?"

Her husband fell back in the carriage and roared.

"Lovely!" he said. "Lovely! I should say it was. Why, my dear, there isn't any duty on tea."

And let me remark in passing that the child's sob in the silence isn't by any means the only thing that curseth deeper than the strong man in his wrath.—Washington Post.

A Smart Boy.

A good story is told of the crown prince of Germany. Soon after Bismarck's retirement the emperor and empress were at dinner with their elder children and some eminent statesmen when the prince suddenly broke out with:

"They say, father, that now Prince Bismarck has gone you will be able to tell the people to do just what you like all by yourself. You will enjoy that won't you?"

Cheering Him Up.

"It very seldom happens," said Mr Stormington Barnes, "that we are permitted to adopt the career for which we are ambitious in youth. I always wanted to be a comedian and make people laugh."

"Dear me," said the sympathetic young girl. "You ought not to be so disappointed. I'm sure You make people laugh very often as it is."—Washington Star.

"He That Stays Does the Business."

MAKING BIG ORGANS.

ST. LOUIS ONE OF THE CENTERS OF THIS INDUSTRY.

Factories Haunts of Magicians Whose Product Comes as Near to Having Nerves and Soul as It Is Possible to Bring Inanimate Matter.

That St. Louis, Mo., is an organ-building center is a statement which will surprise not a few of its citizens, but that it contributes a larger number of church organs to the religious denominations of the United States than any other city west of New York, will probably be regarded as intelligence even in well-informed musical circles. This, however, is the case, for St. Louis has three organ-building factories which have been in operation for many years, one of which has placed in position about 2,000 organs in the churches of the country, while the combined output of the others may bring up the number which St. Louis has built to 3,000.

The organ factory is the workshop of a magician. Great barn-like rooms, with lofts overhead, on which are mounted old, unused organs, dusty and spider-webbed skeletons or organs from which pipes have been removed; dislocated parts of organ frames bearing traces of their former employment. On the floor stand more organ frames, new and incomplete, in process of building. In the corners, against the walls, lying about on the floor, in piles, in long boxes, in baskets, are organ pipes. Queer, necromantic-looking instruments lie about, used in construction and repair. For the organ builder is a magician, and the thing he builds is a living creature. The work of his hands has a heart and lungs, arteries and veins, nerves and sinews, a skeleton and frame, a soul and myriad voices. The great windchest is its heart, the conductors are its arteries, the bellows its lungs, the beams and framework its skeleton, while the infinite network of rods and wires which confuses the imagination by their number and direction are its nerves and sinews. For that matter, every pipe has its own individuality, in the parlance of the profession, each has body, foot and toe; every pipe has a mouth, a tongue, teeth, lips, ears, a beard and a voice.

In this strangest of all factories, where wood and metal are taught to sing automatic praises, the materials are many. Of the woods, common white pine is the most important, and highly esteemed from the fact that in every climate, cold or hot, moist or dry, it remains almost unchanged, while many other woods shrink and

THE VOICER AT WORK.

warp until their original shape is almost entirely lost. It is the only material used to make wood pipes. Poplar, maple, oak, butternut, walnut, are used in various portions, while for ornamental cases the semi-precious woods are used in decoration. For the pedals butternut is used for the lower portion, maple for the footrest of the white keys and black walnut for the sharps and flats or upper keys.

The pipe is the object of the magician's attention, and on it the greater portion of his care is bestowed. The pipe is one, but the possibilities of its tone are many, for from one pipe many different varieties and qualities of the tone may be produced. All depends upon the "voicer," or man who attends to the voicing or toning of the pipes. On the skill of the voicer depends also very largely the reputation of the organ builder. Voicers, like poets, are born, not made; for voicing is a fine art, which consists in making such an adjustment of the teeth, lips, beard and ears around the mouth as to produce a particular quality of tone. The teeth are a set of little ridges placed just within the mouth of the pipe, the lips are the two sides of the opening cut to emit the wind and the ears are two projecting pieces of zinc or pipe metal on each side; the beard is a square projection of metal just below. Every variety of pipe is not provided with all these appendages, for some have teeth but no ears; some have ears but no beard, and so on. It all depends upon the quality of tone to be imparted to the pipe.

The voicer's talent, however important, is but one among the many called into play before the organ is finally looked upon by its maker and pronounced good, for the organ is a standing monument to the ingenuity of ages. The brains and laborious lives of many thousands of men are represented in its intricate frame. It is the embodiment of long centuries of civilization and prosperity, for only the highest culture could render possible its development; only leisure and wealth could bring it to perfection. To attempt to enumerate the thousand ingenious appliances by which difficulties have been overcome would be impossible, but by the application of every mechanical principle known enormous results are produced by apparently insignificant means. The organist draws a stop with thumb and finger, but that slight action puts into motion masses of wood and metal distant from him perhaps sixty or seventy feet.

ASSEMBLING AN ORGAN.

FOUR GREATEST LIVING WOMAN POLITICIANS.

SUSAN B. ANTHONY. MRS. ELIZABETH CADY STANTON. MRS. MARY ELLEN LEASE. MRS. J. ELLEN FOSTER.

The four greatest living women politicians are American. True, women in Europe often exercise political influence—the ladies of the Primrose League in England, for example—but they are not politicians in the sense that are Susan B. Anthony, J. Ellen Foster, Elizabeth Cady Stanton and Mary E. Lease. These women are actual influences on the live questions of the hour. Susan B. Anthony's motto is: "Equal rights for all," and for over seventy-five years she has lived up to it. She is the great leader—the indisputable champion of the women's rights movement in America. Though an enormously busy woman and notably strong-minded, Miss Anthony has never grown eccentric in dress or manner. She represents the best type of the public woman. The political partner of this gifted woman has been Mrs. Elizabeth Cady Stanton. Besides her specialty of woman suffrage, Mrs. Stanton has written on various scientific subjects. Nevertheless one of the best things she ever wrote was a chapter on "Babies" in her "Reminiscences." Mrs. Stanton has had seven children, and is another example of the fact that clever women make clever mothers. She is now in her eighty-third year. Mrs. J. Ellen Foster is a Republican politician, and the wife of one. She endeavored for years to get the W. C. T. U. to adopt a non-partisan plank in its platform with the result that she left that organization. Mrs. Foster has made many campaign speeches. She is a good speaker, has a fine stage presence, is well informed, and is altogether a strong woman. Mrs. Mary Lease of Kansas is a reformer, lawyer and Populist orator. She was born in Ireland, but is practically an American, having lived here since infancy. She is a graduate of two colleges and author of a volume of poems. In one campaign alone she made over two hundred speeches.

RICHEST NUN IN THE WORLD.

Miss Drexel Gives Herself and Her Millions to the Church.

Mother Katherine, formerly Miss Katherine Drexel, of Philadelphia, is the richest nun in the world. She is devoting her life and her fortune to the care and education of Indian children. Her wealth is said to exceed $7,000,000.

When it was announced that Miss Drexel was a postulate in the mother house of the Sisters of Mercy in Pittsburg, and that she proposed taking the

MISS KATE DREXEL.

black veil, it made a stir throughout the country. The name of Drexel for years has been a synonym for wealth. That one of the daughters of the great Philadelphia house would give herself to the church seemed hardly credible to those who had never met her and who knew nothing of her family. She took the step cheerfully, and so far as known has always rejoiced in her self-sacrifice. No one save herself and a few officers of the church know the whole extent of her benefaction or of her sacrifices. Of late years little has been written or heard of her by the world at large. No woman who depends upon her daily labor for food and shelter has worked more arduously than she in carrying out the great plan to which she has devoted her energies and resources.

Umbrella Diplomacy.

A man with an umbrella was walking in the rain; an umbrellaless friend joined him and shared the protection. The umbrella owner noticed that now he was getting only half protection, as the rain and the drippings from the umbrella as well fell on one shoulder. Seeing another friend without an umbrella he invited him in out of the wet, saying, "There is plenty of room for three." By this new arrangement he now had complete protection, as he had to move the umbrella to the position he carried it when he was using it alone, and a friend on either side protected him from the rain while receiving the drippings from the umbrella.—Woman's Home Companion.

"Whoop!" ejaculated the young man with the unsteady gait and generally disheveled appearance; "I'm loaded to the muzzle!" "Forbear, my friend, forbear," said the thin, tall man, with the long face and long coat, deprecatingly. "Nope!" retorted the young man, in tones of vigorous denial; "nope! Not for bear! for sosh'bility."—Puck.

"The dog wouldn't touch the meat you got for him." "I hope you didn't waste it." "No, indeed. I saved it for your breakfast."—Cleveland Plain Dealer.

HOW PADDY COMMITS SUICIDE.

An Old Police Sergeant's Observations on the Weather and Its Effects.

"Good suicide weather," the grizzled old sergeant behind the desk of one of the New York police stations observed, as he glanced out at the dull, overwhelming clouds from which the rain sifted down in a never-ending drizzle.

"A good day for suicides over here," he continued, musingly. "If a German is going to kill himself he waits for just such a day as this. Even if he don't intend to kill himself three or four days like this will soon drive him to it. We'll be apt to have three or four cases reported before roll-call.

"Now, it's different with a Frenchman. When a German feels blue it makes him all the bluer if the weather's bad. But a Frenchman, when he is crossed in love or has gone broke, thinks the weather is sympathizing with him if it rains when he is feeling badly. When he makes up his mind to commit suicide he'll invariably carry out his intention on a sunshiny day. The world's brightness seems only to mock him."

"And what about the Irishman, sergeant?" asked the new policeman.

"Look here, young man," said the sergeant, with just a suggestion of Limerick in his tone, "Irishmen don't commit suicide. When an Irishman gets broke and blue he don't kill himself. Not much! He goes and beats somebody, or gets beat himself, or failing in both instances goes home and beats his wife."

"What's worrying you, Harry, dear?" "I'm afraid I'm not worthy of you, sweetheart." "Oh, well—keep on worrying."—Harper's Bazar.

Tom—After all, what are kisses good for? Kitty (demurely)—Their face value.—Brooklyn Life.

HOITT'S SCHOOL.

Menlo Park, San Mateo Co. Cal., accredited at the Universities. Location, climate, and careful attention to Mental, Moral and Physical training, places Hoitt's among the foremost Schools for Boys on the Coast.—*S. F. Chronicle.* Will re-open in the new building August 15th, (9th year.) Ira G. Hoitt Ph. D., Principal.

It Was the Right Letter.

John was a bashful lover and had been calling on Mary for three years, but that was as far as he got until, visiting St. Louis on business, he found himself detained beyond the expected time.

He had to write to Mary, explaining his absence on the usual evening, and, while writing, the courage he had so long lacked came to him and he made a point blank proposal of marriage. He mailed the letter, and for two hours was one of the happiest men in Missouri.

Then he began to believe he had been precipitate and was assailed with doubt as to how his letter would be received. That night he didn't sleep. He thought all sorts of things, and vainly wished he could intercept the letter before it reached her. But that was manifestly impossible.

It was not until noon the next day that he received an inspiration as he was passing a telegraph office. Rushing in, he seized a blank and nervously penned the following:

Miss Mary ——, Chicago:
Mailed you wrong letter yesterday. Please do not open, and deliver to bar on my return.

After that he breathed freer, at the same time wondering if he hadn't played the fool in not letting the matter stand. That evening a telegram was awaiting him at the hotel. It read:

John ——, St. Louis:
Not you mailed right letter. It was about time.

And John didn't allow business to interfere with his return to Chicago.—Chicago Inter Ocean.

A Trick of the Camera.

One of the many camera fiends of this city has recently been showing his friends a very unusual photograph of himself, caught in the act of falling from a ladder, and seeming to be a winning candidate for a broken neck. In spite of the fact that the injury seems so certain the tumbler's face wears a cheery smile, and on close inspection may be seen to be winking his eye mischievously at you as well as the force of gravity. In reply to questions he explained that that was an accomplishment acquired only after long practice.

"I could pose for that picture all day long with no serious injury to myself, except waste of time and a little physical fatigue," he insisted. But the less credulous of his friends refused to believe that he took pleasure in such acrobatic performances, and finally he had to tell the whole story.

"It's all very simple. First you place your camera in some way about 10 or 12 feet from the floor, with the lens pointing downward. A picture taken with it in this position will make the floor appear to be a side wall. Lay a sheet of white cloth on the floor and then arrange your ladder and yourself upon this sheet, and the posing is done. A strip of carpet tacked to the wall and a couple of chairs deftly arranged adds to the illusion, but the whole thing is so simple that I am ashamed of myself for explaining it to you instead of making you think it out for yourself."—Cincinnati Enquirer.

About an Even Thing.

A well known member of the Detroit bar tells this story: "Some years ago I attended a session of the circuit court up in the state. A pro confesso divorce case was called and it so happened that the judge was very much opposed to divorces, especially those which were unopposed. After the attorney for the complainant in this case had announced himself as ready to proceed, the judge asked if any one appeared for the defendant. There was silence for a moment, and the judge repeated the question. At one end of the lawyers' table sat an attorney who had acquired the liquor habit and who was at the time considerably under the influence of stimulants. He was noticed struggling to get on his feet, and, on observing him, the judge seized the opportunity to ask:

"'Do you appear for the defendant, Mr. Blank?'

"'No, your honor. I merely rose to remark, as "friend of the court," that with Brother Doubleblank as attorney for the complainant and no one on the other side it was about an even thing.'

"Then Blank resumed his seat while the whole court roared with laughter."—Detroit Free Press.

More Diplomacy.

"I tell you my wife knows a thing or two. The people who inhabit the neighborhood into which we have just moved look at us with awe."

"How did she manage it?"

"Engaged two of the biggest vans in town to move us, when all our goods might have been transported in an express wagon without overloading it."—Chicago News.

There was a young man from Lenore,
Who boldly went off to the war;
The "beef" made him sick,
He recovered quite quick,
By the prompt use of old Jesse Moore.

The Sermon Not Long.

"Was my sermon long this morning?" asked a preacher who had been taken to task for running over time, and who had carefully kept within a half hour.

"No, dear doctor," was the reply of the parishioner. "It wasn't long; it only seemed so."—Boston Watchman.

BAD BREATH

"I have been using CASCARETS and as a mild and effective laxative they are simply wonderful. My daughter and I were bothered with sick stomach and our breath was very bad. After taking a few doses of Cascarets we have improved wonderfully. They are a great boon in the family."
WILHELMINA NAGEL,
193 Rittenhouse St., Cincinnati, Ohio.

THE POOR SALESMAN.

One of the Ways He Is Tortured by Exacting Shoppers.

On the shelves of nearly every dry goods store in the city are rolls of goods which have been hauled off the shelves from one to a dozen times a day to be exhibited to possible purchasers. The exacting shoppers have become firmly convinced that such exhibitions of the open ends of rolls cause them to become shopworn. The result is they ask the clerk to cut their order from the inside end. This means the unrolling of the entire bolt for a possible three-quarter yard purchase, but it has to be done.

A fashionably dressed woman stepped into one of the Nicollet avenue stores the other day and asked to be shown some ginghams. On the shelves was a brand new stock of ginghams which had just the night before been taken from the boxes in which they were shipped from the factory. They hadn't been shown to any one except possibly the buyers down east, and then these particular pieces had not been exhibited. Bolt after bolt was shown to the shopper, and finally she picked upon a particularly nice new piece of pink gingham at 20 cents a yard.

"It looks a little shopworn," she remarked as she began to fumble with her purse catch.

"It can't be," replied the obliging clerk. "It just last night came out of the box from which it came from the factory."

"Well, I'd prefer it if you would cut it from the other end."

The clerk groaned inwardly, but proceeded to unroll the 30 or 40 yards of gingham.

"How much?" he asked as he took his scissors from his vest pocket.

"Two yards."

His scissors snapped viciously as they clipped off the goods, and the tone in which he called the cashboy was not of the gentlest, but the shopper, at least, was satisfied.—Minneapolis Journal.

THEY ALL GOT IN.

How the Animals Managed to Get Admitted to the Show.

It appears that one idle day the frog, the duck, the lamb and the skunk started forth together to visit the show. Just what sort of show it was the chronicler doesn't state. Anyway, it was something that the queerly assorted quartet was anxious to attend, and they hopped and waddled and gamboled and trotted toward the big canvas inclosure with delightful throbs of anticipation.

Finally they reached the doortender, the frog leading the line.

Well, the frog had a greenback and passed right in.

The duck had a bill and followed the frog.

The lamb had four quarters and followed the frog and the duck.

But the unfortunate skunk was left on the outside. He had only a scent, and that was bad. Naturally he turned away, feeling pretty blue. As he was slowly going back over the hill he met a hoop snake rolling along at a lively rate toward the show. The skunk greeted him, but the snake did not stop.

"Don't interrupt me," he cried over his shoulder. "I've got to do a turn, and I'm a little late," and he rolled along.

At the top of the hill the skunk noticed another old friend approaching. It was the sardine.

"Hello!" cried the sardine. "What's the matter?"

So the skunk told him.

"I can guess how you feel about it," said the sardine sympathetically. "I belong to the smelt family myself. But, say, old fellow, you come right back and go in with me—I've got a box."

And the skunk and the sardine went back together.—Cleveland Plain Dealer.

A Queer Ohio River Fish.

Not many persons know what a spoonbill is, but all those who do know that every spring this fish is the especial prey of Shippingport fishermen, who catch them in great numbers below the falls.

The spoonbill is probably the largest fish that swims the Ohio river. He is anywhere from a foot long to six feet, but also half of him is bill. The bill is spoon shaped, but is a single one. The lower lip is short, the bill being used much like a spade. The spoonbill has no scales, but is covered with a tough hide. Altogether he is an uncanny object and far from a delicacy in appearance. He is also called by some "shovel-nose cat."

Every spring spoonbills in schools visit the falls of the Ohio. It is a tradition that they come up all the way from the gulf of Mexico every spring to spawn at the falls, but more credit is given the theory that they live scattered in the river right along and only congregate in the spawning season.

COULD NOT SLEEP.

Mrs. Pinkham Relieved Her of All Her Troubles.

Mrs. Madge Babcock, 176 Second St., Grand Rapids, Mich., had ovarian trouble with its attendant aches and pains, now she is well. Here are her own words: "Your Vegetable Compound has made me feel like a new person. Before I began taking it I was all run down, felt tired and sleepy most of the time, had pains in my back and side, and such terrible headaches all the time, and could not sleep well nights. I also had ovarian trouble. Through the advice of a friend I began the use of Lydia E. Pinkham's Vegetable Compound, and since taking it all troubles have gone. My monthly sickness used to be so painful, but have not had the slightest pain since taking your medicine. I cannot praise your Vegetable Compound too much. My husband and friends see such a change in me. I look so much better and have some color in my face."

Mrs. Pinkham invites women who are ill to write to her at Lynn, Mass., for advice, which is freely offered.

LETTERS.

The house was silent, and the light
Was fading from the western glow;
I read, till tears had dimmed my sight,
Some letters written long ago.

The voices that have passed away,
The faces that have turned to mold,
Were round me in the room to-day
And laughed and chatted as of old.

The thoughts that youth was wont to think,
The hopes now dead forevermore,
Came from the lines of faded ink
As sweet and earnest as of yore.

I laid the letters by and dreamed
The dear dead past to life again;
The present and its purpose seemed
A fading vision full of pain.

Then, with a sudden shout of glee,
The children burst into the room;
Their little faces were to me
As sunrise in the cloud of gloom.

The world was full of meaning still.
For love will live though loved ones die!
I turned upon life's darkened hill
And gloried in the morning sky.
—Boston Transcript.

Dudley's Lesson.

I.

MILLY BARRINGTON was only 18 when she came to live at Holly Lodge. Very young to be married, said the gossips of the neighborhood, still younger to assume all the cares and responsibilities of a household. And there were not lacking doleful prophets who declared, with eyes rolled up and mouths drawn down, that Mrs. Barrington never would "get on" with the old gentleman.

"He is so fastidious," said one.

"So difficult to suit," said another.

"His ideal is so impossibly high!" declared a third.

But to their surprise—perhaps a little to their disappointment—Milly and her father-in-law were the best of friends from the very first moment in which they looked upon each other's face.

Milly was anxious to learn, so eager to comprehend the ins and outs of the great, roomy old house, so ambitious to excel every housekeeper in the neighborhood, that the old gentleman said, with a smile, to his son:

"Don't let your little wife undertake too much, Dudley."

And Dudley Barrington answered, with a yawn:

"There's no danger of that, sir. The ladies of Holly Lodge have always been first-rate housekeepers, you know. And if a woman is at work she isn't spending money foolishly or gossiping."

Mr. Barrington's keen, blue eyes regarded his son sharply for a moment.

"Do you think Milly is addicted to either of those pernicious practices?" he asked.

"They come natural to all women, don't they?" said Dudley, shrugging his shoulders.

"Not to all!" said his father.

And in his secret soul he wondered if Dudley was really worthy of such a jewel as Millicent.

So the weeks went on, and Milly stood bravely to her helm, until one bright October day the old gentleman, chancing to pass the low kitchen window where the vines made a screen of moving shadow, looked smilingly into where his daughter-in-law was at work.

"Have you got a glass of cool milk for me, little girl?" said he.

Milly brought the milk promptly.

"See, papa," she said, triumphantly pointing to the table, "what a baking I have done to-day! Three apple pies, three loaves of bread, a pan of biscuits, a cake, and a dozen plum tarts!"

"Bravo!" said Mr. Barrington. "But, Milly, why are you baking? Where is Hannah?"

"Hannah wanted her wages raised," said Milly, rather soberly. "And Dudley said it was all nonsense keeping a girl when I was so fond of housework. So she has gone."

"But are you fond of housework?" he asked. "In itself, as an abstract thing, I mean?"

"Yes, papa," Milly answered, with some hesitation. "But I'm a little tired this morning. I rose early and swept the house through before breakfast, so as to have time for the baking."

"You are a good little girl," said the father-in-law. "But we mustn't let you work too hard."

"Papa," said Milly, with downcast lashes and a deep pink shadow creeping over her cheek, "I've been thinking for some time that—that——"

"Well?" said Mr. Barrington, encouragingly.

"That I should like to ask you for a little money," faltered Milly.

"Money!" he echoed in surprise. "Doesn't Dudley give you all you want?"

Once more Milly hesitated.

"He wants to know what everything is for," said she. "He thinks two shillings is too much for ribbon, and he says hats ought to be had cheaper than three shillings each, and he declares it's all nonsense to buy kid gloves when cotton will do as well. And I do need another hat since the rain spoiled my best one, but I don't like to ask him for it."

"Do you mean to say," said Mr. Barrington, leaning his elbows on the sill, "that you don't have a regular allowance every week?"

"No, papa," said Milly, lifting her prettily arched brows. "Dudley says women don't know how to use money, and that a wife should always receive every halfpenny she spends from her husband. And I can tell you, papa, because you are so kind to me—I am so ashamed to have him think me extravagant, and I really need so many little things that men haven't any idea of. It's a little hard sometimes."

Mr. Barrington took his purse out of his pocket and laid it on the window sill.

"Here, little girl," he said, "you have earned the contents of that a dozen times over."

Milly reached up to kiss him through the vine leaves.

"Oh, papa, you are such a darling," she said.

He only patted her cheek in reply.

"Dudley doesn't know what a treasure he has got," he pondered as he kept on his walk up to the front veranda, where a great chestnut tree was showering its blooms over the steps and the balmy sunshine slept on the painted floor. "He is making a Circassian slave out of that dear little woman."

And he took his book and stretched himself comfortably out in the hammock for his evening's reveries.

II.

It was the next day that his son came to him in the library, where a little fire of logs had been kindled, for a chilly, northeast rain had blown all the yellow maple leaves away, and the sunshine was obscured in driving clouds.

"Well, my boy," said his father kindly, "you are off to the city, I suppose?"

"Yes, sir," said Mr. Barrington, Jr.—a tall, straight, handsome young man, with a brown complexion and sparkling eyes. "And before I go perhaps you had better give me a check if it's convenient."

"A check?" said his father. "For what?"

"I'm about out of ready cash," said Dudley, carelessly, "and a little spending money would come very handy for current expenses."

"Ah! And what are you going to buy?"

Dudley looked at his father in amazement.

"I need a summer suit, sir," said he, "and——"

"Yes—yes," nodded the old gentleman. "And how much do you pay for a summer suit now?"

"Oh, six or seven pounds," answered Dudley.

"Six or seven pounds!" echoed Mr. Barrington. "Isn't that rather vague?"

"A fellow never knows exactly," explained Dudley.

"Ah, but you ought to know!" interrupted the old gentleman. "And, now I am one the subject, you buy your clothes of Poole, don't you? Aren't there cheaper places?"

Dudley ignored the question, and said:

"I've a little bill at the cigar shop to settle, and there are some new books I should like to read."

"Just send the bills to me," said the old gentleman; "I'll pay them."

"The bootmaker, sir——"

"You must try and not be too extravagant with your boots. Young men have so many fictitious wants nowadays. But, as I said before, let all the bills be sent to me. And as for spending money, here is enough for the present."

He drew out half a sovereign and handed it to his son. Dudley stared at it in amazement.

"I expected a check, sir," said he, somewhat discomfited.

"Did you?"

"It isn't agreeable to be put on such an allowance," went on Dudley, sharply. "I'm not accustomed to it."

"Not agreeable, eh?" said his father, comfortably adjusting his feet on an embroidered rest. "Then why do you practice the system with your wife?"

"I give her all that she needs to spend," said Dudley, coloring up.

"And I have given you all that you need."

"I am a man!" said Dudley.

"And she is a woman!" retorted his father.

"I am the manager of your warehouse, and I claim my honest remuneration as such," cried Dudley. "I am no beggar. There is not a penny that I ask for that I do not earn."

"That is Millicent's case exactly," said the wise old advocate. "She does the work of the house, and does it well. She is an economist in every sense of the word. Is it right that she should receive merely her board and clothes? Is she not entitled to a regular allowance to spend as she pleases? Do not think me a meddlesome old fogy, my son," he added, rising and placing his hand kindly on his son's shoulder. "But I have been observing all these things, and I merely wanted to give you a personal application of this lesson in economy. You see how it humiliates one to have to beg humbly for the money that one has honestly earned—to be called upon for an account of every penny one wishes to spend. Don't put your wife into such a false position as this. Treat her as one of the firm of Barrington & Co."

Dudley stood still a moment, pondering, and then he said, earnestly:

"I will sir. You are right!"

And Milly was delighted that very day to receive a check for an ample sum of money from her husband.

"Is it all for me?" she cried, with glittering eyes.

"Yes, all," Dudley answered, laughing.

"But what am I to do with so much money?"

"Lock it up in your desk, dear," he answered, "and spend it for your needs as they occur."

"But I never had so much before all at one time!" exclaimed the amazed Milly.

"No, you never had, more shame to me," acknowledged Dudley. "But I have come to the conclusion, Milly, that you are no child to be given a few shillings at a time. You are my housekeeper, and deserve your regular salary. I shall give you five pounds for your own personal expenses at the beginning of every month, and you shall use and economize it as you choose. The household expenses, of course, will be paid out of the common stock."

"Oh, Dudley, I never felt so rich in my life," said she. "Now, I can dress like other women, and give a little money to the church and help the poor and feel independent! And I can lay by a little, too, Dudley, every month! Oh, you shall see what an excellent manager I can be."

Dudley Barrington looked at his young wife with a sharp prick of conscience at his heart. Why had he never made her so innocently happy before? Simply because it had never occurred to him.

And Milly ran eagerly to her father-in-law.

"Papa!" she cried, "I am to have five pounds a month all for my own self, and never to give account of a penny of it, unless I please! It is Dudley's own offer. Isn't he kind?"

And Colonel Barrington smiled, and patted her head, and answered, with a touch of sarcasm:

"Very kind, indeed!"—Chicago Times-Herald.

FORCES A HEN TO "SET."

Biddy Was Obstinate, but She Was No Match for the Boy.

Down in Missouri, so says the Kansas City Star, lives a boy who likes pets. He began with a pair of pigeons that he got in a trade for a dog that he had traded a knife for. His parents allowed him to keep the pigeons until they multiplied, so that there were pigeons all over the place. Then he sold the pigeons, and bought a goat that ate the clothes off the line every Monday. He was compelled to dispose of it, and traded it for a pair of game chickens. In a week there wasn't a rooster left in the neighborhood; the game rooster had killed them all. His father took the game chickens for a ride one night, and lost them three miles out in the country. Three days afterward the boy brought them home, but he never told anyone how he got them. And so he fought for his pets one by one, his dog was lost, his lamb stolen, his rabbits ran away. He has come down to one old hen.

Recently he bought a "settin'" of eggs. A "settin'" of eggs is as many as a motherly hen can hatch into chicks. He had made up his mind that his hen was lonely, and needed company, and what so companionable as a batch of little chicks to scratch for? The hen, however, had different views, and didn't want to sit on the eggs. But he was not a boy to be stumped by a hen—he had borne too many losses already.

He put the eggs in a box, in which he had made a nest of hay. Then he planted the indignant hen on them, put a board in which he had bored a lot of air holes over her, and left her to come to terms. That night his big brother kicked the board off the box, and set the hen free. Next morning the boy put her back, and put some bricks on the board, for he thought she had raised the board and released herself. The brother kicked both bricks and board off that night. The boy replaced hen and board again, and again they were kicked off. Then he got a board and made a hole in it for the hen to poke her head through, and nailed the board to the box. Once a day he takes the board off and chases the hen around the yard for exercise, and twice a day he carries food and water to her.

What's the use of trying to discourage a boy like that?

A Working Member.

Alderman James Duckworth, the member of parliament for the Middleton division of Lancashire, has the distinction of being the only member of parliament who has worked in the factory as a half-timer. He went to work in a mill at the age of 6 years, and in order to reach the looms was provided with a piece of wood. At the age of 14 he was the support of his mother. He has had a varied career. He has served in the army, been a town missionary, and afterward commenced hawking tea. He is now one of the largest provision merchants in the north of England, and has upward of fifty shops in the neighborhood of Rochdale. He is an alderman of the Rochdale town council, a local preacher, and for twelve months was the president of the United Methodist Free church annual assembly.

Snow that Is Alive.

A most curious phenomenon in the northwest of Canada is the appearance of millions of minute black insects whenever a thaw occurs.

During the winter the snow is dry and crisp, like sand, and nothing whatever can be discovered of these insects, but as soon as a thaw comes they are found everywhere in large patches, looking like a dusting of soot.

They are generally known as snow-fleas or jumpers, and have slight hopping powers, being able to leap some three or four inches. They entirely disappear when it freezes again, and not a trace of them can be found.

They do not fall with the snow, as there may have been no snow for a month or more before their arrival, and are probably something similar to the "red snow" of arctic regions.

The World's Alphabets.

The number of letters in the alphabets of different languages varies considerably. English and German have 26 letters; French, 25; Spanish, 27; Italian, 20; Russian, 36; Greek, 24; Latin and Hebrew, 22; Celtic, 17; Arabic, 28; Persian, 31; Turkish, 28; Sanskrit, 44; and Chinese, most of all, 214.

Non-Churchgoers.

There are 3,750,000 persons in London who never enter a place of worship.

FOR LITTLE FOLKS.

A COLUMN OF PARTICULAR INTEREST TO THEM.

Something that Will Interest the Juvenile Members of Every Household—Quaint Actions and Bright Sayings of Many Cute and Cunning Children.

The eldest Miss Tabbycat gave an "At Home,"
With music and choice recitations
By Signor Angora (quite lately from Rome),
Who rendered the "Yowls of all Nations."

The "Squalls Without Words," sung by Fraulein von Manx,
Were greeted with murmurs of "Charming!"
While her "Chanson de Alley" elicited thanks
So loud they were almost alarming.

There was, too, a sonata, composed by C. Waul,
Which was classic, and claimed the attention
For fully an hour; the themes, one and all,
Were models of feline invention.

This piece, and the trio, "Beloved Young Mouse,"
Were voted the evening's successes;
The latter was purred by three guests of the house,
Who wore solid tortoise-shell dresses.

The pleasant refreshments were freely dispensed
At twelve; there were crumbs of long standing,
And milk in all possible forms, save condensed,
Set forth on the cellar-way landing.

Now little Miss Velvetpaw, pattering home
In a shower, beneath the umbrella
Of Signor Angora (quite lately from Rome),
Said, "Wasn't it nice in that cellar?

"And wasn't Miss Tabby the dearest old thing?
And weren't those split milkings just splendid?
And didn't that Manx creature know how to sing?
Though she looked—well, least said, soonest mended!"

But Fraulein von Manx, treading homeward alone
With a large book of songs, said ('twas spiteful),
Of course, "she was ready to gnaw a dry bone,
And the damp in that cellar was frightful!"

And the eldest Miss Tabbycat sank on the stair
Where she'd stood, and reflected with sorrow
On the mess that her party had made ev'rywhere,
And the bills that would come on the morrow.
—Youth's Companion.

Smart at the Wrong Time.

Impudence occasionally meets with its just reward, and possibly none would envy the feelings of the youth who, when Sir Evelyn Wood was appointed quartermaster general of the British forces, attempted to show his wit at the expense of his wisdom.

Sir Evelyn was little known at the office, and it happened that some of the clerks in a certain room were engaged in "larking," when a quiet looking gentleman walked in. The most impudent of the young men, thinking that the stranger was a visitor who had by mistake come into the wrong room, demanded in a peremptory voice:

"What is your business?"

"My business?" repeated the stranger, in a tone of mingled surprise and sternness.

"Yes, sir, your business," persisted the clerk.

"It is with the duke," was the answer.

"He has been suddenly summoned to Windsor, and Lord Wolseley's in bed with the mumps," ventured the young man, bent on carrying on his joke at the expense of this inexperienced stranger, as he deemed him.

"Your name, sir," demanded the stranger, in an imperative tone.

"My name is Plantaganet Zama, distant relation to her gracious majesty."

"Indeed, and mine is Sir Evelyn Wood. I am quartermaster general to the forces, and I see now how her majesty is served."

The unfortunate clerk, who was not yet aware that his impudence had cost him dear, looked round with a grin, expecting to meet with applause for his talent, and became suddenly aware that all his companions were working away with the most extraordinary earnestness. Instantly the full force of the situation dawned upon him.

"Horrors!" he ejaculated. "I took you for a crank with a grievance!" and then he subsided.

Child's Visit to the Queen.

A special cable from London has the following pretty story: Little Dorothy Drew, granddaughter of Mr. Gladstone, will publish in a magazine here this pretty picture of her visit to the Queen at Windsor Castle:

"An Indian man whom the Queen likes very much was at the door. The next moment we stood before the great Queen, whom grandpa served for sixty years. She was just another woman like grandmamma, with a white cap on her head. I courtesied and kissed her, and told her my name, Dorsie, and of grandpapa, and all our pet names at Hawarden Castle. The Queen put on her glasses and asked me to go to the other side of the room, so that she could see me better.

"Then she took a little jewel case and said: 'This is for you.' I opened it and saw a darling little brooch with a diamond V, a diamond R, a turquoise I, and a little crown at the top made of red enamel. I courtesied and kissed her hand, and said: 'Thank you very much.' She looked very nice and kind, and I liked her very much. The Queen kissed me again, and mother and I went away."

Rations of a Lifetime.

The irrepressible statistician has been at it again, and this time he has been calculating just how much of different foodstuffs is devoured by the average man who lives the allotted threescore years and ten. The illustration given below is the result of that careful calculation and represents the relative quantities of nutriment necessary to keep the human machine going for seventy years.

AMOUNT OF FOOD A MAN EATS.

It will be noticed that the quantity of bread is surprisingly large, more of it being eaten than either beef or lamb. The size of the cumulative egg shows how much man is indebted to the domestic hen. Even salt forms no insignificant fraction of this immense pile of eatables. It will be readily seen that man consumes many times his own weight in both fruit and vegetables, while he would have no difficulty in enjoying a good swim in the aggregate mass of liquid refreshments which has passed down his throat.

Feminine Meanness.

"What are you crying about, Johnny?" asked a mother of her 4-year-old son. "'Cause Nellie's mean to me," he sobbed. "What has she been doing?" asked his mother. "I eat all my candy and now she won't give me half of hers," was the reply.

The One that Whips.

Visitor—I'm afraid that you and your little brother don't always agree, Tommy.

Tommy (one of the twins)—Sure, we don't. We have a scrap regular every day.

Visitor—That's too bad. And which whips?

Tommy—Oh, mamma always whips.

She Paid for Two.

Little Ethel, aged 5, accompanied her grandmother to church one Sabbath morning, and when the contribution plate came around she dropped in the dime her father had given her. The old lady was about to contribute also, when Ethel leaned over and said in an audible whisper: "Never mind, grandma, I paid for two."

An Essay on Man.

Recently a 6-year-old pupil in one of the public schools was told to write an essay on "Man." The following was the result: "Man is a queer animal. He has eyes, ears, mouth and nose. His eyes is to get dust in; his ears is to get the earache in; his mouth is to hatch teeth in, and his nose is to get the sniffles in. A man's body is split half way up and he walks on the split end. The female man is called a woman."

One Who Did.

"You never saw my hands as dirty as yours," said a mother to her little girl. "No, but grandmother did," was the reply.

Hair Turned from White to Black.

There have been several instances of a man's hair turning from white to black. One of the most notable, perhaps, was that of an engineer in the fire department of Louisville, Ky. His age was sixty-five, and he was on duty during a tremendous fire for fifteen consecutive hours. The spray was constantly flying from the hose, and he became in consequence of the lowness of temperature of the atmosphere, covered from head to foot with ice. He wore a skull cap, and a helmet on the top of that, so that his head was the warmest part of his body and not at all exposed, though his eyebrows and whiskers became wet and were frozen stiff. The afternoon after the exposure his hair, which had become gray eight years before, and had for three years been white, turned perfectly black.

Sable Island Disappearing.

To those who regard the world as already finished and quite rounded off the announcement that Sable Island, some eighty-five miles east of Nova Scotia, is sinking, comes as a somewhat startling piece of news. But as a matter of fact this island, which has become so noted a menace to transatlantic commerce that it is known as the "ocean graveyard," has been steadily sinking for the last 100 years. It has decreased in length from forty to twenty-two miles, and naturally, as it grows smaller, the fury of the sea makes a greater impression upon it and hastens its disappearance. Within another century it may be only an ocean reef, and then be more dangerous than before in the path of ships.

A Royal Autograph Album.

The Archbishop of Canterbury has in his keeping the book in which the signatures of all royal brides and bridegrooms married in England are written.

A Pertinent Query.

Minister—We need a night watchman for the church. If I give you the job, do you think you could keep awake?

Man—Do you preach at night?—Judge.

Uncashable Checks.

Mallaby-Bragleigh boats that no living man could forge his name successfully to a check and get it cashed. Has he such a very peculiar signature?

Homans—No. But he hasn't any money in the bank.—London Tit-Bits.

DOINGS OF WOMEN

EVIL OF ANONYMOUS LETTERS.

DID you ever get an anonymous letter? Did you ever write one? It is a habit that belongs to the very young, though older ones have been known to relieve a petty spite in that way.

To have a desire to write an anonymous letter that will give pain reveals a cruel nature. The young who have a desire to wreak petty revenge in this way should remember that nothing is worth considering to which you are not willing to append your name, says a writer in the Philadelphia Times. Have the courage to say what you have to say boldly if it really should be said, and have the grace to be ashamed to wreak spite in the dark.

The sending of comic valentines is only a form of anonymous letter. If you wish to hold someone up to ridicule to themselves, you select a valentine that shows up some fault or weakness in the most ridiculous manner. You mortify, pain or anger the recipient in the cruelest possible sense, for there is no blow more keen than the blow of self-love. Anonymous communications are not worthy of consideration, but they have more than once wrought incalculable injury.

Manages a Farm.

Miss Sarah Hewit, daughter of New York's former Mayor, manages her father's farm at Ringwood, N. J., where she is known as "the 'squire." In town she is a society leader. At Ringwood, on the farm, there is a blacksmith's forge and bench. To the farmers, hands and employes it is no strange sight to see "the 'squire," clothed with a leather apron, raise a horse's hoof, remove an old shoe, pare the hoof and reset the shoe, or, indeed, fit a new shoe. Miss Hewitt never punishes a horse with a whip, and it is said that many a night she has sat up with a horse that was ill and ministered unto him. To her is due the church, the school, the training shop; to her influences is due the destruction of the wretched, joyless, ill-lighted log cabins, and in their stead the neat frame houses, with their bright brick chimneys, their sunny windows and the gardens, gay with brilliant sunflowers and joyous scarlet geraniums.

MISS HEWITT.

Has Her Brother's Courage.

Lieut. Hobson's sister, Miss Annie, proved herself a heroine by the way in which she stuck to the back of a runaway horse at Jackson, Miss. Miss Hobson, who was visiting kinsfolk in the vicinity mentioned, had mounted a fiery Kentucky thoroughbred for a dash across the country, when the animal bolted with the bit between his teeth. The plucky girl stuck to her seat and sawed the reins, while the animal turned corners that would have unseated an ordinary horsewoman. The horse, after running several blocks, was finally brought to a stop, with Miss Hobson none the worse for her experience.

MISS HOBSON.

Street Car Magnate's Wife.

Mrs. Charles T. Yerkes, the wife of the Chicago street car magnate, who has gone to New York to spend his great fortune, is mistress of one of the finest houses in that city. When being built it attracted much attention because of the $30,000 bath-room which Mr. Yerkes placed in it for his wife. Mrs. Yerkes' home cost $700,000, the ground $300,000, furnishings $600,000, and an art gallery with a collection valued anywhere from $500,000 to $1,500,000.

MRS. YERKES.

Are You Jealous?

After marriage jealousy should be striven against just as one battles with fever or any other kind of disease. It creates misunderstandings by the hundreds; it chills love, though it is a sign of love, and it makes the unity of thought and feeling that should exist between husband and wife a hollow mockery. It is the wife's part to cure this canker. Women are so delicately sensitive and so wonderfully wise and diplomatic, that without throwing their cards on the table, and thus revealing their hand, they can force the game to go any way they will. Jealous husbands are very quick to see when their wives really adore them, and them alone, and the woman who is the victimized wife of a jealous man, instead of scorning his weakness, does well to be lenient toward it, and tender, remembering that her conduct alone is its cure, or, on the other hand, its aggravation.

There are wives who argue falsely that when their husbands cease to be jealous they also cease to love them with the passionate fervor of the first few years of married life. Never was there a more absurd mistake. Of a truth, only the woman who has not known the pangs of jealousy would so argue. Jealousy has been known to kill people. It saps the strength and weakens the vitality of the heart. So, though it does invariably imply love, it should be quenched by the sufferer and the object of his or her devotion. Love remains; be certain of it, and more truly it is love where the green-eyed monster has been killed.

May and Her Big Boy.

The woman in the picture is May Irwin, the actress, whose special forte is "coon" songs. The strapping young man next to her is her son, Harry Irwin. Harry has just passed his seventeenth year, and as a birthday present received an appointment to the United States naval academy in Annapolis. Miss Irwin worked hard to secure the appointment for her son.

MAY IRWIN. HARRY IRWIN.

Cleaning Jewelry.

Gold jewelry may be cleaned by washing it in a lather of warm soapsuds, to which a few drops of sal volatile have been added. This imparts brilliance, and the articles should then be dried with a soft cloth and rubbed with a chamois leather.

Silver jewelry should also be washed in a little warm soapy water. It may then be polished with a very little of the best whiting or harishorn powder and finished off with a soft leather. Maltese silver ornaments of filigree work do not require a powder to be used; they should be brushed with a small brush and soapy water, dried carefuly and rubbed with a soft leather.

After gold jewelry has been cleaned, it should be placed in a bag of boxwood sawdust, to be procured from a jeweler's; shake and rub the ornaments thoroughly in the dust, and they will look beautifully bright and clean when taken out. Chains and necklets may be treated in this way.

Advice for Worrying Women.

It is trite advice to tell women to take every day as it comes, to avoid remorse over what is done, and forebodings over what is to come, but it is no less valuable advice. Nervous prostration is seldom the result of present trouble or work, but of work and trouble anticipated. Mental exhaustion comes to those who look ahead and climb mountains before they arrive at them, says the New York Magazine of Sanitation and Hygiene.

Resolutely build a wall about to-day, and live within the enclosure; the past may have been hard, sad or wrong—it is over. The future may be like the past, but the woman who worries about it may not live to meet it—if she does she will bear it. The only thing with which she should concern herself is to-day, its sunshine, its air, its friends, its frolics, its wholesome work, and, perhaps, its necessary sorrow.

Remodeling Hints.

A waist of black or dark satin, silk or wool which has grown too small may be made over into a pretty peasant's bodice by cutting it low, square both front and back, with just a strap over the shoulders and no sleeves. It should not meet in front by three inches at the top, running to a point at the waist line, and it should fasten with a black silver lacer. Wear a white waist and sleeves of thin stuff under the bodice, and the whole, when worn with the black skirt to match it, makes a piquant, pretty effect.

A princess may be made fresher looking by adding a panel in the back from the hem to the collar. The panel slopes a trifle narrower at the waist, and is crossed its entire length by a lacing of cord to match the dress.

In remodeling a sleeve too long, always shorten at the waist after the top is fitted, else you may get the elbow out of place. The skirt must never be shortened from the top, lest you throw the gored seams and darts out of place, but first finish about the hips and belt and then trim what is not needed from the bottom.

For Old Lace.

Very fine old lace can be beautifully cleaned by being sewed in a clean piece of linen and laid all night in salad oil. Next day boil it in a large pan of soapy water for a quarter of an hour and rinse in several waters. Dip into sugared water and pin on to a strained cloth to dry.—Commercial Advertiser.

RURAL TELEPHONES.

Geauga county, O., affords an excellent illustration of how easy and inexpensive it is for farmers to have their own telephone system, if they only go the right way to work in installing it. Telephone wires are strung throughout every one of the sixteen townships in the county; and although there are no cities in the district, and the system is essentially a rural one, it is possible for every citizen of the county to communicate by telephone, either directly or by messenger service, with every other inhabitant of the county, and by connection service with other lines, with an indefinite number of other points in surrounding counties. One of the leading organizations consists of eight farmers, who reside in one township. They formed a regular stock company, and went about the erection of poles and the stringing of wires as if they were catering entirely for themselves. They soon found themselves asked for service by many of the people along the line, and their system quickly grew and became self-sustaining. In one particular respect the organizers of this line showed great wisdom. Instead of making the mistake of many companies and putting up a cheap line, they bought the best cedar poles in the market, painted cross-arms, procured the finest quality of transmitters and used the metalic circuit. This gave such good service from the start that their patrons were delighted, and naturally the scheme received an impetus which soon carried it to a success. The cost of erecting one mile of this system, all told, is $51.50. It must be said, however, that nearly all the labor of this particular line was done by the stockholders themselves. The president took charge of the digging of the holes, the manager did the stringing and all hands turned in and put up the poles and did the general work. The manager of the company is a young farmer who is becoming quite clever in putting in instruments, making connections, and replenishing batteries when they run down. The switchboard is in the house of one of the stockholders, and an attendant is paid for operating it. The patrons are charged $12 per year, payable in advance, or $1 25 per month. The company makes all repairs and in addition to the local service gives a line to a neighboring town, to which farmers for miles around go to transact business. The social influence of this service is almost inestimable, relieving as it does the great bugbear of farm life, loneliness and monotony. The farmer can hear all the latest bulletins, and can obtain the weather forecasts every hour. The amount of time he saves in being able to talk to the nearest town instead of going there himself means not a little economy in many ways. The women, too, get lots of comfort and enjoyment out of the telephone, arranging visits, comparing family news and indulging in social gossip. In fact, it is said that the telephone has brightened the whole community and brought them up to a distinctly higher plane of civilization.

Adventurers from Klondike and Alaska continue to bring conflicting reports as to the richness of the mines of that country; but a glance at the condition of the great majority who are returning should satisfy anyone that the chances for making a sudden fortune are no better than they are in the mining regions of the United States. A large amount of gold is coming from the North, it is true, but it represents a vast amount of labor, hardship, privation and death, and the most of it belongs to the transportation companies, having been taken in by them at their stores and offices for supplies sold, and for transportation. Where the names of individuals appear as possessing large amounts in gold, these statements are nearly always grossly exaggerated. One statement was made that a miner packed $60,000 in nuggets on his back over the mountains. This amount of placer gold would weigh more than 250 pounds, and there are few men who can lift it, to say nothing of carrying it. In proportion to the number of men engaged and the amount of capital employed, the mines of Inyo county yield a vastly greater percentage of profit to the man, with no privation or loss of life. Every day a working one makes a great difference in the profit balance at the end of a year.

Notwithstanding a treaty of peace made only two years ago after a ten years' war, the savage Yaqui Indians are again in revolt and Mexico has a bloody job on hand. The Indians are determined that they will fight until they regain every foot of the territory taken from them by the treaty and the Mexican Government has determined to effectually exterminate the Indians, so as to secure all the land prevent any further outbreak. The Indians have waded rather deep in blood, having killed one hundred miners and as many soldiers; the lives of all American prospectors in there, it is thought, have been lost. The Indians are rich and well armed, and the war will be prolonged and merciless.

Elihu Root, the new Secretary of War, will be concerned chiefly with problems of civil government, and may be made Colonial Secretary, if Congress creates the position. Western half of the United States would be more interested in Congress creating a cabinet position of Secretary of Mines.

When the new Kennedy shaft in Amador reaches the proposed depth of 3200 feet it will be about 2000 feet below the level of the sea.

It is very gratifying to know that the proposition to hold a water conservation convention early in the fall meets with practically universal favor. Not one of our country exchanges, which number into the several hundred, has mentioned the suggestion except to approve it. All over the State the thought of the thing has taken hold upon the public understanding and has the public approval. We predict here and now that the convention will prove to be one of the most notable in the history of the Pacific Coast. It will be the first of a new series of progressive milestones in the onward march of California. A people thoroughly aroused and convinced upon the subject of preserving the forests and conserving the waterfall for marriage to the earth in time of drouth is directly on the path of movement to great benificence and practical and noble ends. The present movement happens to be in perfect harmony with the desire and corresponding movement on the part of the Federal Government. That in itself is a notable fact and counts for much.—*Sacramento Record.*

One Dr. A. de Bausset is to build an air ship with money subscribed by prominent capitalists of New York, and along lines that have been approved by scientific men whose ability is admitted. The plans were submitted to Chief Engineer Melville, U. S. N., who, after an examination of the computations, declared that they were in the main correct. Lieutenant John P. Finlay, of the Signal Corps, U. S. A., made a similar examination and said: "Mathematically you are correct; practically you must now build the ship." De Bausset proposes to build on air craft 775 feet long, and he claims that he can get a speed of 100 miles an hour out of it. He calls his company the Transcontinental Aerial Navigation Company and has succeeded in obtaining sufficient financial support for a complete testing of his ideas.
